The Taylor campaign claims it tracked down the letter writer and discovered she is an Edwards supporter masquerading as a Republican.

Both sides claim they are responding to negative attacks initiated by the other. "We continue to want to have a positive issue-based campaign, and for several months had stayed on that same message, even though we were taking hits on daily basis," Taylor campaign spokesman Mike Spellings said. "Mr. Anderson finally crossed the line."

Anderson has served the Taylor campaign with legal papers accusing his political operation of slander and libel. In one news release, he says Taylor should "stop slandering my good name in an attempt to save his failing candidacy," while, in another release, encourages voters to call him directly if they have any questions.

"I have nothing to hide," Anderson said. "If anyone wants to know where I stand on any issue, call me directly."

The negative campaigning from both sides indicates a close race, with Anderson leading in newspaper endorsements and Taylor leading in money. Anderson said Monday he feels "very good" about his chances.

Facing Primary Challenge, DeLay Touts Clout, Pork (WT)

By Hugh Aynesworth

The Washington Times, March 7, 2006

SUGAR LAND, Texas -- Rep. Tom DeLay faces the first hurdle to re-election today in the Republican primary, but the 11-term congressman has been campaigning since his indictment last year cost him the House majority leader post.

The former powerhouse behind House Republicans' conservative agenda is running a retail political campaign in his suburban Houston district, touting his political clout --and the federal money he has guided home.

In one recent handout, Mr. DeLay boasts of securing more than $1 billion in federal money for Houston-area transportation projects, NASA, area universities, the port and various law-enforcement entities.

"You can't be replaced without hurting Houston or Texas," Houston lawyer Joe Slovacek told Mr. DeLay when introducing him recently to more than 200 Realtors and other businessmen.

Mr. DeLay is expected to defeat his three Republican opponents in the primary, setting up what political observers predict will be a tough general election race in November.

Since last year, he has been dogged by an indictment, secured by Travis County District Attorney Ronnie Earle, charging him with illegally funneling campaign money to Republican candidates to help the GOP take control of the Texas Legislature in 2002. That case is in limbo, pending the outcome of appeals before the state Supreme Court.

Mr. DeLay has also been the subject of news stories linking him to lobbyist Jack Abramoff, who has pleaded guilty to felony fraud and bribery charges, and though Mr. DeLay denies wrongdoing in both situations, the charges have damaged him.

"Getting beat up by the national media and the Chronicle [Houston's daily newspaper] has taken its toll," said Mr. DeLay at one stop.

"It's polarized my district. You either love me or hate me. Thank God there are more that love me."

Mr. DeLay doesn't mention the indictment on the campaign trail unless somebody asks him about it, said his spokeswoman, Shannon Flaherty. She also said one of eight mailers the campaign had sent out included one where Mr. DeLay explained the entire matter.

The DeLay camp exudes confidence even though most polls indicate the congressman's negatives are the highest in his political history and he actually trails his Democratic challenger, Nick Lampson.

Mr. Lampson, a four-time congressman before DeLay-led state redistricting rendered him virtually unelectable in his Beaumont-area district two years ago, has solid financial backing. Another ex-congressman, Steve Stockman, indicates he might run as an independent in November.

The three Republican candidates -- schoolteacher Pat Baig and lawyers Tom Campbell and Michael Fjetland -- probably won't spend one-tenth as much in the race all together as the well-heeled DeLay campaign, and since none are well-known, most political watchers think it's Mr. DeLay's to lose.

It's the first race for Mrs. Baig and Mr. Campbell. Mr. Fjetland has run unsuccessfully thrice before.

Mr. DeLay has singled out the candidate he figures is the strongest challenger and has attacked him in several venues: Mr. Campbell, the DeLay campaign says, doesn't represent conservative issues and has seldom even voted in Republican primaries.

"He isn't qualified to be a precinct chairman, let alone a congressman," said Miss Flaherty.

Mr. Campbell's campaign manager, Michael Stanley, says his candidate is not a career politician like Mr. DeLay, which he considers a plus, considering Mr. DeLay's current legal troubles.

Mr. Campbell stresses a "return to integrity" in his campaign ads on cable TV and in persistent public appearances.

"If I wasn't hurting him, he wouldn't be attacking me," he said of Mr. DeLay.

DeLay Cash May Prove Record High (HILL)

By Patrick O'Connor

The Hill, March 7, 2006

Rep. Tom DeLay (R-Texas) is urging members of the National Rifle Association (NRA) and supporters of Texas Right to Life to dig deep into their pockets to help him retain his seat this year.

The outreach is part of a broad direct-mail and telemarketing campaign to attract new donors and volunteers for the former majority leader's reelection.

It also marks a fundraising shift for DeLay this election cycle from a PAC-heavy strategy in which the once-powerful Republican doled out lobbyist dollars to his congressional colleagues to one in which DeLay and his team are primarily focused on his own reelection bid.

The former majority leader faces his first real test in today's Texas primary, but he has been gearing up for this fight since late fall, after he was forced to step aside as leader following his indictment by a Texas grand jury in a controversial campaign-finance-related case.

The outreach has three aims, said Shannon Flaherty, a spokeswoman for the campaign: get information directly to voters in the district, ask those voters to volunteer or donate money to the campaign and continue building a database of local and national supporters to contact between now and the November election.

DOJ_NMG_0016685

"Most of the mail is for donors and volunteers," Flaherty said.

DeLay's prominence and the expected flood of outside money from national Democrats could make this race one of the most expensive in House history.

The DeLay campaign recently mailed a series of pieces to district voters to boost turnout among potential supporters during the early voting period for today's primary, according to three such pieces. They do not refer to DeLay's three Republican challengers but instead to former Democratic Rep. Nick Lampson (D-Texas), who lost reelection last cycle to current Rep. Ted Poe (R-Texas) after his district was redrawn. Lampson is challenging DeLay this year.

The purpose of this early mailing, which was conducted both locally and nationally, was to identify likely supporters in and out of the district with an eye on the general election.

"We're working on a list that will take us to November," Flaherty said. "We're already at the point where most campaigns are [at the end of the race]."

Flaherty said the campaign would not release the number of donors or supporters on its list, but she suggested a sizable increase in donors and volunteers.

One casualty of DeLay's newfound focus on his own reelection is his leadership PAC, Americans for a Republican Majority, or ARMPAC.

The PAC raised $3.7 million last cycle, according to PoliticalMoneyLine, but has only raised $962,827 this cycle and took in a modest $17,065 during the first month of this year. In addition, ARMPAC requested to file quarterly reports with the Federal Election Commission (FEC) instead of monthly reports, as it had throughout each of the past four years.

"It stands to reason that the campaign continues to be the focal point of what we do this year," said ARMPAC director Jim Ellis, who does not hold an official role with DeLay's reelection campaign. "The emphasis has to be on the reelect."

Ellis said that the request to file quarterly reports was simply an accounting decision and that the PAC will return to form when DeLay is cleared of his legal troubles and wins in November.

"We'll be back," Ellis said.

Because the FEC limits PAC donations, the most a candidate can raise during a particular cycle is around $2.5 million, a number of GOP fundraisers said. DeLay's associates have hinted the congressman hopes to raise somewhere in the neighborhood of $8 million to $9 million this cycle. Direct mail and telemarketing are the most effective ways to reach a sizable enough donor pool to make up that difference, but it can be a costly process.

The DeLay campaign has contracted with the telemarketing firm Feather, Larson and Synhorst of Phoenix and the direct-mail firm Olsen Shuvalov of Austin, Texas, to conduct this outreach campaign, according to FEC filings from the past six months.

The campaign committee paid Feather, Larson and Synhorst more than $150,000 last year and has paid Olsen Shuvalov almost $300,000 since the beginning of last July, according to FEC records.

The campaign has also rented member information from the NRA, the Right to Life PAC of Houston and ARMPAC. FEC rules require members to separate their leadership PACs from their reelection campaigns, preventing them from sharing information directly.

Campaign officials sift through those lists for potential supporters in and out of the district and then send preliminary mailings hoping to attract volunteers and donors and get information out about their candidate. About 3 to 5 percent of the recipients typically contribute time or money with the first mailer, but that number can get as high as 8 percent if the information is more specific, fundraisers said.

The NRA mailer sent out by the DeLay campaign includes a historical comparison of DeLay and Lampson done by the Gun Owners of America, in which DeLay earned an A to Lampson's C, and a statement from NRA Executive Vice President Wayne LaPierre praising DeLay's advocacy on behalf of gun owners.

Democratic National Committee Chairman Howard Dean, documentary filmmaker Michael Moore and Jane Fonda are on the cover of all three early-voting mail pieces, positioned above a panoramic shot of the Hollywood sign.

In addition, DeLay must raise money for that run from outside the current leadership, without a clear path to return, and without a chairmanship within his group.

"Tom DeLay is an experienced guy," National Republican Congressional Committee Chairman Tom Reynolds (R-N.Y.) said during a retreat of House Republicans last month. "He knows exactly what he has to do to win an election."

Asked how much money the committee would spend on DeLay's race, Reynolds said, "If he asks for something, he's an incumbent Republican and we'll do that."

In the most expensive House race to date, former Rep. Jim Rogan (R-Calif.) raised $6.6 million in his unsuccessful reelection fight against Rep. Adam Schiff (D-Calif.) in 2000. Rogan was one of the three House prosecutors of then-President Bill Clinton during the impeachment fight and was the only one in a competitive seat.

DOJ_NMG_0016686

Expecting a tough reelection fight, Schiff's campaign manager, Jason Roe, did a single direct-mail piece to start building a donor list in the fall of 1999 with the hopes of just breaking even. Rogan's name identification was so high among conservative Republicans that the campaign tripled its money on the first mailing, Roe said. It built its list of supporters from 4,000 names to 70,000 by the end of the campaign.

Rogan's name identification was responsible for the success of that fundraising campaign. DeLay's own notoriety suggests that he could have similar success raising money from a national direct-mail campaign.

"DeLay's situation is ready-made," Roe said. "Martyrs are the best guys."

Opponents Of DeLay Make Use Of A Film (NYT)

By David M. Halbfinger

The New York Times, March 7, 2006

LOS ANGELES, March 6 — A documentary about the Texas criminal investigation that led to the indictment of Representative Tom DeLay, the former House majority leader, on campaign fund-raising charges is being put to use by Mr. DeLay's political opponents in an attempt to unseat him.

The film, "The Big Buy: How Tom DeLay Stole Congress," will be distributed this spring by the Hollywood producer and liberal provocateur Robert Greenwald, whose last release was a scathing attack on Wal-Mart sponsored by a variety of labor unions and other groups critical of the retailing giant.

A host of liberal organizations in Texas and nationwide, including People for the American Way, Democracy for America and the Pacifica radio station in Houston, are expected to sponsor the film's release. It will not follow a traditional theatrical rollout but will instead open in a few cities before being made widely available on DVD, as was the Wal-Mart movie, Mr. Greenwald said in an interview.

An important aspect of the release plan is to organize hundreds, if not thousands, of house parties in May and June at which the movie will be shown, Mr. Greenwald said. The distribution strategy is to be detailed on Tuesday — primary day in Texas — as a "welcoming gift" to Mr. DeLay, he said.

Mr. DeLay's lawyer, Dick DeGuerin, called the movie, an early version of which he had seen, a "hatchet job," and said he had refused to sit down with the filmmakers for an interview. (Mr. DeGuerin appears on camera in public question-and-answer sessions with the news media.)

The filmmakers, Mark Birnbaum and Jim Schermbeck, spent three years and about $100,000 following what began as a nasty state legislative battle over Mr. DeLay's push to redraw Congressional districts in Texas in 2002, and mushroomed into a nationally watched partisan standoff, complete with Democratic lawmakers fleeing across state lines. It ultimately wound up as a criminal case, with Mr. DeLay and his allies coming into the cross hairs of Ronnie Earle, the Democratic district attorney of Travis County, Tex.

It was Mr. Earle's argument, in the indictment last September, that Mr. DeLay had engineered the Republican takeover of the Texas legislature in 2002 by breaking a state law banning companies from donating to individual candidates, essentially laundering tens of thousands of dollars in contributions through the Republican National Committee.

It is the film's argument that Mr. DeLay had a grander purpose in mind: using the newly Republican-run legislature to redraw the state's Congressional map, erasing five seats held by Democrats despite Republican majorities, causing a 10-vote shift in the House, and thereby giving Republicans a solid majority with which to enact corporate-friendly federal legislation. All of which, the film asserts, worked like a charm.

Mr. Birnbaum, 57, of Dallas, a veteran documentary maker who started out in public television, and Mr. Schermbeck, 47, of Lubbock, Tex., a longtime community organizer, said in a telephone interview that they had tried mightily but failed to get Mr. DeLay to return their calls, while the district attorney, Mr. Earle, made himself readily available. Nonetheless, they said, they had strived for an evenhanded approach, one they had used in their only previous collaboration, a 2003 film for the PBS series "P.O.V." about high school drug testing in Lockney, Tex. They edited a version of "The Big Buy" in which Mr. DeLay was not so central to the story, and showed it at a Dallas film festival in August.

Then came the indictment of Mr. DeLay.

Quickly, the congressman and his aides used the existence of the film to attack the prosecutor, saying Mr. Earle's cooperation with Mr. Birnbaum and Mr. Schermbeck was proof that he was merely chasing headlines. When Mr. Earle was quoted insisting he had said and done nothing unusual or inappropriate — "I'm just doing my job" — Mr. DeLay went on a Houston talk-radio show and retorted: "Oh yeah, he's just doing his job. He's just doing his job. He's got a film crew that has been following him around for two years to document how he's going to get Tom DeLay."

DOJ_NMG_0016687

Mr. DeGuerin maintained in a telephone interview Monday that the movie "puts the lie to Ronnie Earle's protestations for a year, before the indictment came down on DeLay, that DeLay was not a target." He added, "In truth, all the time he was cooperating with the moviemakers."

But Mr. DeGuerin said that he had not followed through on a threat to subpoena the filmmakers' outtakes, and that he doubted the movie would become a factor at trial.

Mr. Birnbaum and Mr. Schermbeck insist that Mr. Earle had shared no secrets with them, and that they acted and were treated no differently from any journalists covering the case.

In California last fall, Mr. Greenwald watched the coverage of the DeLay indictment unfold and wondered if there wasn't a good documentary in it. "Then somebody told me these two Texas guys had done one," he said in an interview.

The Sundance Film Festival had already expressed interest in "The Big Buy," and Mr. Birnbaum and Mr. Schermbeck were mulling whether to go the festival route, which could take the film a year or more to get into theaters. But Mr. Greenwald had just distributed his Wal-Mart movie through a grass-roots campaign of house parties and internet sales of DVD's — and scored a huge publicity coup when Wal-Mart attacked him — so he proposed a similar strategy for the DeLay film. It is to have its premiere either in Houston or Austin, he said, before opening in a few other cities and being offered for sale on the Internet for $14.95.

Now, of course, the two Texans' supposedly balanced movie is being distributed by the man behind "Outfoxed," a stalwart of the partisan left. Yet they say the net effect will be negligible.

"With Tom DeLay you're either in his camp or you're not," Mr. Schermbeck said. "It wouldn't matter what distributor we chose. You could broadcast this on 'Masterpiece Theater,' and we'd still be Satan's messengers to Tom DeLay and his friends."

Mr. Schermbeck insisted the documentary was fair to Mr. DeLay; it includes comments by three of the congressman's lawyers and some of Mr. DeLay's Republican allies, for example. But he made clear he had no pretensions to neutrality.

"Timing was everything," he said, explaining the choice of Mr. Greenwald's company, Brave New Films. "It was important to get this out as soon as possible, given the trial, the Supreme Court and, frankly, given the elections this November."

Added Mr. Greenwald: "With Wal-Mart, 4,000 groups took it on. I'm assuming there are going to be people all over the country gleeful and joyous to have a tool that they can use for organizing, fund-raising, issue work, all of that."

Mr. Schermbeck suggested the film could well prove to have bipartisan utility. "I'm sure Tom DeLay will use this for fund-raising," he said. "Will it be a great fund-raising tool? It remains to be seen. But I'm hoping to make some money back myself after three years of labor that haven't been compensated."

Two Little-Known Dems Seek Texas Gov. Seat (AP-Y2)

By Kelley Shannon

AP2, March 6, 2006

AUSTIN, Texas — Two Democrats with long resumes but little name recognition are competing in Texas' gubernatorial primary election Tuesday for the chance to challenge popular GOP Gov. Rick Perry.

The general election could also include two independents — the comptroller who calls herself "one tough grandma" and a cigar-chomping comedian.

Chris Bell, a former one-term Houston congressman, has raised more than three times as much money as his Democratic opponent, former Texas Supreme Court Justice Bob Gammage.

The two campaigns tried to stir last-minute voter interest Monday. In the two weeks of early voting, just 3.3 percent of registered voters from both parties cast ballots. The state elections chief predicts a 13-percent overall turnout.

Texas Comptroller Carole Keeton Strayhorn and humorist Kinky Friedman hope to capitalize on low turnout among Republicans and Democrats. They have to collect 45,540 signatures each from voters who did not cast ballots in the primary to make the November ballot as independents.

Strayhorn, elected to her current job as a Republican, wanted to avoid a costly and uphill primary battle against Perry, who was heavily favored to win re-election. Two of her four sons hold high-ranking jobs in President Bush's administration, including White House spokesman Scott McClellan.

Friedman is a musician, author and comedian who once toured with his band called the Texas Jewboys. He is rarely seen without his signature black cowboy hat and cigar and has the same political consultant former pro wrestler Jesse Ventura hired to help capture the governorship of Minnesota.

If Strayhorn and Friedman get on the ballot, Perry could face a four-way race in November against two candidates with political charisma and a Democrat hoping to break the Republicans Party's hold on all the statewide offices in Texas.

"It's great for the people of Texas. It means we're going to have a choice," said Mike Lavigne, former chief of staff for the state Democratic Party. "I think you're going to have everybody focused on Rick Perry. You'll have attacks there."

DOJ_NMG_0016688

Perry portrays himself as being above the political fray and busy governing the state. He faces minor opposition against three primary opponents.

Bell, 46, gained notice as a freshman congressman for filing the first House ethics complaint against former House Majority Leader Tom DeLay. He made the complaint shortly after the Texas redistricting engineered by DeLay caused Bell to lose his re-election bid.

A former broadcast reporter and lawyer, Bell served as chairman of the Houston City Council's ethics committee and came in last in a three-way contest for Houston mayor in 2001. He has said as governor he wants to improve Texas' standing nationally on several fronts.

"My motive for running is to get Texas out of the 'Thank God for Mississippi' club," Bell said, referring to national figures on uninsured children and teen pregnancies in which Texas often ranks just above lowest-ranking Mississippi. He also said he wants to restore bipartisanship to the Legislature after gridlock stymied efforts to change Texas' public school finance system.

Gammage, 67, once represented the same suburban Houston district in Congress now served by DeLay. He also served in the state Legislature and on the Texas Supreme Court, but retired from public life 11 years ago.

In the early 1970s, Gammage was part of a group of legislators who rallied against the speaker of the Texas House and other officials. The speaker, Gus Mutscher, was later convicted and sentenced to five years' probation for conspiring to accept a bribe.

He said recent corruption scandals in Washington and Texas brought him out of retirement.

"My ego doesn't need this," he said. "I don't need the title 'governor.' I care about getting the job done."

GOP Faces Tough Climate, The NRSC's Dole Concedes (HILL)

By Peter Savodnik

The Hill, March 7, 2006

Senate Republicans face a stormy "atmosphere" but will "retain a strong Republican majority" in November, says Sen. Elizabeth Dole (N.C.), the chairwoman of the National Republican Senatorial Committee (NRSC).

In an hour-long interview with The Hill, Dole repeatedly noted that despite the political climate — made worse by White House communications flops and GOP scandals — Republican challengers are mounting viable bids in Michigan, West Virginia and elsewhere.

But she acknowledged that President Bush could have done a better job handling the Dubai ports deal, which has given Democrats an opportunity to look tougher on terrorism than Republicans, and that the president's poll numbers are less than optimal.

"There are highs and lows for any president," Dole said, "and I think that you'll see things change, and it's still a long way, light-years away, from the election. But the bottom line is races are really run and won at the local and state levels."

Other campaign-committee chairmen strike a more pugnacious pose than Dole. Sen. Charles Schumer (N.Y.), Dole's counterpart at the Democratic Senatorial Campaign Committee (DSCC), is viewed as a Brooklyn street fighter unafraid of making tough, politically savvy calls. Last year, for instance, Schumer elbowed aside a more liberal candidate in Pennsylvania to make room for state Treasurer Bob Casey Jr., an abortion-rights foe challenging Sen. Rick Santorum (R).

Similarly, Rep. Tom Reynolds (N.Y.), the chairman of the National Republican Campaign Committee (NRCC), when asked at a press conference if he fears losing seats this cycle, pounded on the table in front of him, booming: "Combat!" Sen. George Allen (R-Va.), Dole's predecessor at the NRSC, is known for his football analogies and aggressive politicking. In 2004, the former University of Virginia quarterback led the GOP to pick up four Senate seats.

Dole, the only woman to run any of the campaign committees this cycle, is also the oldest committee head. This year, she turns 70. Unlike many politicians, who go off the record to trash their rivals, Dole goes off the record to pay compliments.

While Republicans have privately voiced concerns about NRSC fundraising — the committee ended 2005 with $9.2 million in the bank versus the DSCC's $22.4 million — Dole was quick to point out that the Republicans outpaced Democrats in January.

In the first month of the year, the NRSC raised $4.3 million, compared to the DSCC's $2.1 million. Dole said she and her former Senate campaign manager, Mark Stephens, now NRSC executive director, had replicated her strategy back home, "prospecting" for small donors. "Two million of that $4.3 million was people giving $200 or less," she said.

Dole added that GOP senators are being asked to pitch in to campaigns more than in previous cycles. She conceded that Democrats have been more successful at getting their members to help struggling Senate campaigns.

Republicans have also had trouble recruiting candidates in such GOP-leaning states as North Dakota, where Sen. Kent Conrad (D) is up for reelection; Florida, where Sen. Bill Nelson (D) is seeking a second term; and New Mexico, where Sen. Jeff

DOJ_NMG_0016689

Bingaman (D) is running for a fifth term. Republicans have been unable to find a viable contender to take on Sen. Hillary Rodham Clinton (D-N.Y.).

Dole stressed that the NRSC does not take sides in Republican primaries — this has not always been the case — but did single out certain Republican candidates who, she said, are running strong races, including Oakland County Sheriff Mike Bouchard in Michigan and former Ameritrade executive Pete Ricketts in Nebraska. Both Bouchard and Ricketts face primary opponents.

"Despite the atmosphere, these outstanding people have declared that they want to run, and it's been our privilege to work with them," Dole said.

Dole also praised media mogul John Raese, a West Virginia Republican running against Sen. Robert Byrd (D). The senator won his eighth term in 2000 with 78 percent of the vote.

Echoing her communications department, Dole sought to play up the roles played by liberal interest groups and bloggers such as MoveOn.org and DailyKos in boosting Democratic candidates.

The senator, the first woman to head the NRSC, also said the committee is trolling for female donors, particularly in the business world, who might run for office themselves one day.

And she suggested that the NRSC would be following the campaign strategy mapped out earlier this year by White House political adviser Karl Rove and Republican National Committee Chairman Ken Mehlman.

Rove and Mehlman, addressing Republican state party leaders at a meeting in Washington earlier this year, highlighted Democrats' vulnerability when it came to national security, indicating 2006 would be something of a replay of 2002 and 2004.

Dole, in the interview, observed that Democratic leaders had fought the recently reauthorized Patriot Act and that, in Washington and in liberal bastions across the country, Democrats had skewered Sen. Joe Lieberman (D-Conn.) for backing the Iraq war.

Dole declined to make any predictions about how the balance of power might shift after the elections. "I don't really put any numbers down, but let me put it this way," she said. "When I came into this position, I knew that midterms are tougher. There is no question that midterms are tougher."

Excerpts from Dole interview

Let's talk about fundraising [at the National Republican Senatorial Committee (NRSC)].

Dole: We had about 120,000 brand-new donors, people that had never given to the NRSC, and we're going to continue down this path for some months here.

And the Women's Majority Network is one that I would love to tell you about. Our senators have gotten very much interested in this.

The network is really an outreach of women business owners or CEOs or opinion leaders or community leaders that have not been so involved in the political arena. So the overall idea is to get women more involved in the political process, and hopefully as they help us learn more about what happens, learn more in the senatorial committee, they'll become more interested in having a place at the policy table.

Why was January so good for fundraising, but 2005 — not so good?

Dole: [Senate Majority Leader] Bill Frist [R-Tenn.] was down in Florida, and he met all these women who were coming to a Majority Makers event who were all passionate and excited and into it. … Each one of them is going out to tap their networks because they all have networks of people and get them involved … and my view is that we will institutionalize this and once I'm gone after this year there will be a Women's Majority Network that remains a permanent part of the National Republican Senatorial Committee. So people have noticed this in various parts of the country that these women are very passionate and enthusiastic.

Did Republicans hurt themselves by coming out so strongly against the Dubai project?

Dole: There has been a lot of miscommunication, a lot of confusion, a lot of misinformation there. … My feeling is that a better foundation could have been laid. I mean, that's just the way I see it.

I think that 45 days provides a time to get all the facts out. … I really think that this will resolve itself. We really need all the information on the table to understand everything about it, which is really important.

The Medicare prescription-drug plan — do you think by the end of the year that will be an asset to Republicans?

Dole: For so many [years], Democrats have talked about getting prescription drugs for seniors, and we [got it passed]. … When you've got such a massive change for the first time in 40 years, you're going to [have a] problem, but I think … they're doing everything to straighten out where the problems have been, and I'm hearing that we're making real progress there.

Democrats Struggle To Seize Opportunity (WP)

By Shailagh Murray And Charles Babington

The Washington Post, March 7, 2006

News about GOP political corruption, inept hurricane response and chaos in Iraq has lifted Democrats' hopes of winning control of Congress this fall. But seizing the opportunity has not been easy, as they found when they tried to unveil an agenda of their own.

Democratic leaders had set a goal of issuing their legislative manifesto by November 2005 to give voters a full year to digest their proposals. But some Democrats protested that the release date was too early, so they put it off until January. The new date slipped twice again, and now House Minority Leader Nancy Pelosi (Calif.) says the document will be unveiled in "a matter of weeks."

Some Democrats fear that the hesitant handling is symbolic of larger problems facing the party in trying to seize control of the House and Senate after more than a decade of almost unbroken minority status. Lawmakers and strategists have complained about erratic or uncertain leadership and repeated delays in resolving important issues.

The conflict goes well beyond Capitol Hill. The failure of congressional leaders to deliver a clear message has left some Democratic governors deeply frustrated and at odds with Washington Democrats over strategy.

Party leaders, for example, have yet to decide whether Democrats should focus on a sharply negative campaign against President Bush and the Republicans, by jumping on debacles such as the administration's handling of the Dubai port deal -- or stress their own priorities and values.

There is no agreement on whether to try to nationalize the congressional campaign with a blueprint or "contract" with voters, as the Republicans did successfully in 1994, or to keep the races more local in tone. And the party is still divided over the war in Iraq: Some Democrats, including Pelosi, call for a phased withdrawal; many others back a longer-term military and economic commitment.

"It could be a great year for Democrats," said Rep. Jim Cooper (D-Tenn.), but the party must present a more moderate face and distinguish itself more clearly from the GOP on issues such as ethics. "The comment I hear is 'I'd really like to vote for you guys, but I can't stand the folks I see on TV,' " Cooper said in a telephone interview from Nashville.

On issues such as explaining that former lobbyist Jack Abramoff's work "was a 110 percent Republican operation," Cooper said, "we're not making nearly as much headway as we should." Abramoff has pleaded guilty in a corruption scandal.

The Democratic leaders in Congress -- Pelosi and Sen. Harry M. Reid (Nev.) -- are the party's chief strategists and architects of the agenda, which they view as a way to market party ideas on energy, health care, education and other issues. They have held countless meetings to construct the right list, consulting with governors, mayors and just about every Democratic adviser in town.

"By the time the election rolls around, people are going to know where Democrats stand," Reid said.

But many in the party have their doubts. On Feb. 27, Reid and Pelosi appeared before the Democratic Governors Association. At one point in the conversation, Iowa Gov. Tom Vilsack, noting that the two leaders had talked about a variety of themes and ideas, asked for help. Could they reduce the message to just two or three core ideas that governors could echo in the states?

According to multiple accounts from those in the room, Reid said they had narrowed the list to six and proceeded to talk about them. Pelosi then offered her six -- not all the same as Reid's. Oregon Gov. Ted Kulongoski said later: "One of the other governors said 'What do you think?' and I said 'You know what I think? I don't think we have a message.' "

Others, including Sen. Charles E. Schumer (N.Y.) and Rep. Rahm Emanuel (Ill.) -- who head the Senate and House campaign efforts -- believe the November election will turn mainly on how voters view Republicans. Schumer is leading the Democratic attack on the port deal, excoriating the administration for jeopardizing national security -- a realm in which Republicans have held the advantage with voters.

He and Emanuel have sought to delay the agenda's release to allow Democratic attacks to hold the stage with minimum distraction. "When you're in the opposition, you both propose and oppose," Emanuel said. "But fundamentally, this is going to be a referendum on [Republican] stewardship."

Also dividing Democratic strategists is the question of what lessons to take from the Republican landslide of 1994, when the GOP won the Senate and picked up 54 House seats, wiping out 40 years of Democratic rule. Some Democrats associate that breakthrough with the House Republicans' "Contract With America," a list of proposals on policy and government.

"We should take a page from their book" and have "an overarching theme" similar to the 1994 contract, said Sen. Thomas R. Carper (D-Del.).

Many of his colleagues agree, but not Reid. "We're not going to do a 'Contract With America,' " Reid said in an interview. He noted that the GOP document received scant attention when it was presented a few weeks before the 1994 election, and political historians say it played a minor role in the outcome. "There's a great mythology about the contract," Reid said.

Even the party's five-word 2006 motto has preoccupied congressional Democrats for months. "We had meetings where senators offered suggestions," Reid said. "We had focus groups. We worked hard on that. . . . It's a long, slow, arduous process."

That slogan -- "Together, America Can Do Better" -- was revived from the 2004 presidential campaign of Sen. John F. Kerry. It was the last line of Virginia Gov. Timothy M. Kaine's response to President Bush's State of the Union address, and Reid, Pelosi and Democratic National Committee Chairman Howard Dean have used it in speeches. But there is an effort afoot to drop the word "together." It tests well in focus groups and audiences, Democratic sources said, but it makes the syntax incorrect.

Governors privately scoff at the slogan. They also say the message coming from congressional leaders has been too relentlessly negative. "They want to coordinate. They want to collaborate. That's all good," said one Democratic governor who declined to be identified in order to talk candidly about a closed-door meeting. "The question is: Coordinate or collaborate on what? People need to know not just what we're against but what we're for. That's the kind of message the governors are interested in developing at the national level."

Reid spokesman Jim Manley said congressional Democrats have spent the past year redefining the debates over terrorism and Iraq and have prepared the ground for a shift to a more positive message that will focus on energy, health care and homeland security, all areas in which the governors would concur, he predicted. "We've had an unprecedented level of cooperation," he said.

Pelosi spokesman Brendan Daly added: "At the end of the day, I think everyone will be on board."

Perhaps the Democrats' greatest dilemma is how to respond to the Iraq war. It looms as the biggest question mark over Bush's administration and the Republican lawmakers who have backed him on the conflict almost without question.

Congressional Democrats have been split over the war since 2002, when many voted to authorize military action. The ground shifted last November when Rep. John P. Murtha (Pa.), a leading Democratic voice on military matters, called for U.S. troops to be withdrawn as soon as possible. Two weeks later, Pelosi endorsed his stance.

Although Pelosi said she was not speaking for her caucus, some colleagues complained that she was handing Republicans a gift by enabling them to tag Democrats as soft on terrorism and forcing Democratic candidates to explain whether they agreed with their House leader.

There is little question that the political landscape looks promising for Democrats. A Feb. 9 poll by the Pew Research Center found that Democrats lead Republicans 50 to 41 percent in a generic ballot.

But congressional Democrats have some key deficiencies. For instance, they lack the hard-charging, charismatic figurehead that Gingrich represented for the House GOP in 1994. But the Democrats have an abundance of presidential hopefuls, and their agendas sometimes differ from those of Reid, Schumer, Pelosi and Emanuel.

For instance, Sen. Russell Feingold (Wis.) tried to filibuster the renewal of the USA Patriot Act, a move opposed by most of his Senate colleagues, including Reid. Kerry (Mass.) led an unsuccessful filibuster attempt against Samuel A. Alito Jr.'s confirmation as a Supreme Court justice. The best-known Democrat is Sen. Hillary Rodham Clinton (N.Y.), whose plans for a 2008 presidential bid leave many of her colleagues wary of how her famous but divisive presence might affect them.

"There are lots of skeptics," Schumer conceded. But the polls look better and better, he stressed. "There may be some inside-the-Beltway babble, but it's not affecting the voters," said Schumer, who wants the agenda delayed again -- until summer.

The Democrats' Real Problem (WP)

By E. J. Dionne Jr.

The Washington Post, March 7, 2006

It is now an ingrained journalistic habit: After a period of bad news for President Bush, media outlets invariably devote time and space to "balancing" stories that all say more or less: "Yes, the Republicans are in trouble, but the Democrats have no alternatives, no plans," etc.

The pattern began to fall in place this weekend in the wake of two truly miserable weeks for Bush.

The stories about the Democrats are by no means flatly false -- Democrats don't yet have a fully worked-out alternative program -- but they are based on a false premise, and they underestimate what I'll call the positive power of negative thinking.

The false premise is that oppositions win midterm elections by offering a clear program, such as the Republicans' 1994 Contract With America. I've been testing this idea with such architects of the 1994 "Republican revolution" as former representative Vin Weber and Tony Blankley, who was Newt Gingrich's top communications adviser and now edits the Washington Times editorial page.

Both said the main contribution of the contract was to give inexperienced Republican candidates something to say once the political tide started moving the GOP's way. But both insisted that it was disaffection with Bill Clinton, not the contract, that created the Republicans' opportunity -- something Bob Dole said at the time.

DOJ_NMG_0016692

The Democrats' real problem is that they have failed to show how their critique of the Republican status quo is the essential first step toward the alternative program they will owe the voters in the presidential year of 2008.

This failure has made it easier for Republicans to cast anti-Bush feeling (aka, "Bush hatred") as a psychological disorder. The GOP shrewdly makes the president's critics look crazed and suggests that opposition to Bush is of no more significance than, say, the loathing that many watchers of "American Idol" love to express toward Simon Cowell, the meanest of the show's judges.

The president's critics need to identify precisely why they oppose him, not only so they can make clear that they are not psycho basket cases but also to convey the idea that they know what needs to be put right.

Bush critics will almost always point first to the administration's arrogance, a word used recently not by some left-wing Bush hater but by the loyal conservative writer Byron York. In the New Republic, York chose the A-word to explain why Republicans are turning on the White House's "we-know-best approach."

The cure for an arrogant government that doesn't take critics seriously is accountability. Divided government never looked so good. That's especially true at a moment when polls suggest that a majority is yearning for more competence and greater moderation.

For example, moderates and liberals alike are mystified by budget policies saddling our kids with debt tomorrow to pay for tax cuts for the wealthy today. Moderating this radical fiscal approach is something the voters clearly could accomplish with their ballots this fall.

But Democrats have no good answer to Iraq. True. And neither does Bush, who started the war and should be held accountable for where we are now.

The philosophical man who owns our neighborhood Chinese restaurant recently shared with me a brilliant aphorism to describe how to build a good business. "You have to do the right thing," he said, "and you have to do the thing right."

That summarizes what unites Bush's Iraq critics. Many Americans opposed the war in the first place, but many who supported it are aghast that the administration did the thing so badly. It did not dispatch enough troops to achieve order at the outset, and it failed to plan for the inevitable conflicts that would arise among the country's ethnic and religious groups.

What comes from this is not isolationism but an awareness that even a very powerful country needs to be a careful steward of its power. It should never go into a war without considering the probability of unintended consequences and planning for the worst case and not just the best one.

This is the basis for a saner foreign policy in the long run. As for Iraq, the voters should let the president know that he can no longer keep repeating his rah-rah mantras about standing down when the Iraqis stand up. Presidents deserve to be punished for insulting our intelligence.

Thus the shortcoming of Democratic leaders is not that they don't have a program but that they have not yet convinced opinion makers that fighting bad policies is actually constructive -- and that, between presidential elections, keeping matters from getting worse is sometimes the most positive alternative on offer.

Sen. Clinton Says Wear 'Anger' As Honor (AP-Y2)

By Beth Fouhy

AP2, March 6, 2006

Responding to Republican claims that she may be too angry to win national office, Sen. Hillary Rodham Clinton told an audience Monday to wear such criticism as "a badge of honor" and suggested that gender played a role in the attacks.

Democrats, particularly Democratic woman, who run for public office are "going to draw some unfriendly fire," Clinton said at a breakfast fundraiser hosted by black and Hispanic women supporters. "People will be attacking you instead of your ideas, they may impugn your patriotism, they may even say you're angry."

"If they do that, wear it as a badge of honor, because you know what? There are lots of things that we should be angry and outraged about these days," she said.

She cited, among other things, the federal budget deficit, lobbying scandals in Washington, and the government's slow response in the Hurricane Katrina disaster.

It was the latest volley in a rhetorical back-and-forth between Clinton and leading GOP strategists that began last month, when Republican National Committee Chairman Ken Mehlman said Clinton "seems to have a lot of anger" and that American voters tend not to elect angry candidates.

Mehlman pointed to comments Clinton made on Martin Luther King Day, when she called the Bush administration "one of the worst" in history, and compared the Republican-controlled House to a plantation.

Top White House strategist Karl Rove later echoed Mehlman's view, telling a Washington Times reporter in a new book that Clinton could have trouble winning the White House because there is a "brittleness about her."

DOJ_NMG_0016693

Clinton, who has not yet said whether she's considering a presidential run in 2008, first called the attacks a diversion from Republican "failures and shortcomings."

Then, last week, she said, "Karl Rove spends a lot of time obsessing about me," suggesting he spends more time thinking about her political future than she does.

Until now, Clinton had not said she considered the criticisms gender-based, although many observers have done so. New York Times columnist Maureen Dowd said Republicans are casting Clinton "as an Angry Woman, a she-monster melding images of Medea, the Furies, harpies, a knife-wielding Glenn Close in 'Fatal Attraction.'"

Ross Baker, a political scientist at Rutgers University, said he agreed with Clinton's assessment but questioned whether she should have said anything.

"I think she's right, but whether or not it was prudent to acknowledge it this way is another thing," Baker said. "I think another politician might have dealt with it more humorously, to defuse its influence."

Republican National Committee spokeswoman Tara Wall declined to address the suggestion that gender played a role in the attacks.

"When you vote to consistently raise people's taxes, vote against common sense judicial nominees and use Martin Luther King Jr.'s birthday to divide Americans along racial lines, you're likely to encourage criticism of both your ideas and temperament," she said.

Ex-Pentagon Aide Seeks To Unseat Clinton (AP-Y2)

By Marc Humbert

AP2, March 7, 2006

A former Pentagon official under President Reagan said Monday she will seek the Republican nomination to challenge Democratic Sen. Hillary Rodham Clinton's re-election bid this year.

"I am running to be my party's nominee for the United States Senate from the state of New York," Kathleen Troia "KT" McFarland wrote in a letter to supporters. "Toward that end, I have formed an exploratory committee, which I expect to upgrade to a full Senate campaign committee in the coming days."

The move by the political neophyte could put her into a September primary against former Yonkers Mayor John Spencer, already endorsed by top state Conservative Party leaders. No Republican has won statewide office in New York without Conservative Party support since 1974.

Clinton, asked Friday about a possible challenge from McFarland, said: "I am going to remain focused on my job and my race. I will leave it to the other side to sort out their own candidacies."

Polls have shown Clinton far ahead of her potential Senate challengers and leading among possible candidates for the 2008 Democratic presidential nomination.

McFarland, a former National Security Council staffer, has never run for public office and has been out of the public sector since she left her job as a deputy assistant secretary of defense for public affairs in 1985, a post she had held for three years, to raise a family.

Spencer's supporters have in the past dismissed McFarland, a supporter of abortion rights, as an "elitist liberal."

"I don't know what this woman is thinking, I really don't," Spencer said Monday, arguing that McFarland's candidacy would be "divisive (and) I guess helpful to Clinton."

"I'm the only one who can unite the Republican and Conservative parties, which I am doing," he added.

McFarland, in a telephone interview with The Associated Press, refused to address Spencer's criticisms, but said she would "go after every party."

"This is about so much more than that," she said. "This is about offering a candidate who will run an issues-oriented, substantive campaign."

McFarland said she plans to stress her expertise in defense and security issues.

"We are confronted with a dangerous and determined enemy abroad and political divisions at home that are eroding our national spirit," she wrote. "At a time when Americans should be working most closely together, we are being pulled apart by partisan rancor and counterproductive 'gotcha' politics."

She declined to discuss differences with Clinton and said she didn't know how she would have voted on legislation to authorize President Bush to go to war in Iraq. "The important thing now is to move forward and to get it right," she said.

State Republican leaders originally settled on Jeanine Pirro as their Clinton challenger, but Pirro, then Westchester County district attorney, pulled out of the race in December, unable to raise much money or interest in her candidacy.

Ohio: Chabot Had 49 Percent In Democrat's New Poll (RC)

DOJ_NMG_0016694

Roll Call, March 7, 2006

A new Democratic poll taken in the 1st district race showed Rep. Steve Chabot (R) leading Cincinnati City Councilman John Cranley (D) by a margin of 49 percent to 40 percent.

N.Y. Gov. Pataki Leaves Hospital (AP-Y2)

By Adam Goldman

AP2, March 7, 2006

Gov. George Pataki was released from a hospital Monday after 18 days of treatment for appendicitis and complications that followed surgery.

"It's great to feel the fresh air and sunshine," Pataki said as he walked out of New York-Prebyterian Hospital/Columbia University Medical School.

"I'm not 100 percent but I'm a lot better than I was a few days ago," he said.

The New York Republican, who is weighing a run for the 2008 GOP presidential nomination, was hospitalized in Westchester County on Feb. 16 and had his appendix removed. He was transferred to the Manhattan hospital on Feb. 21 and was operated on later that day to deal with a blockage of his intestine.

Pataki told reporters last week he was "chomping at the bit" to go home and have a pizza and a cold beer.

"I'm still waiting for that pizza and hamburger, but it's still a few days off," he said outside the hospital Monday.

Pataki, 60, has been in generally good health during his three terms as governor.

"He will still require some intravenous antibiotics at home," said his doctor, Spencer Amory. "There is still a small possibility ... of infection later."

18 Days After Burst Appendix, Smiling Governor Goes Home (NYT)

By Richard Pérez-peña

The New York Times, March 7, 2006

Eighteen days after suffering a burst appendix, Gov. George E. Pataki left the hospital and went home at last yesterday, walking slowly but smiling and saying, "I never thought I'd enjoy the fresh air as much as I do today."

Mr. Pataki is able to digest enough food so that he no longer needs intravenous nutrition, and he has no signs of fever, said his doctors at NewYork-Presbyterian/Columbia hospital. Even so, they said, to ensure that there is no return of a dangerous abdominal infection, he will continue to receive intravenous antibiotics for a week or more.

The governor, who is doing some of his official work by phone, will have to rest at his home in Garrison, in the Hudson Valley, for at least a week, with care from a visiting nurse, his doctors said. He also remains on a restricted diet and will have to keep an intravenous tube in his arm until doctors say he can do without antibiotics. But such limitations did not appear to dampen his good cheer and relief yesterday.

"It's great to feel the fresh air and the sunshine, and I am going home," he told reporters under a sunny, hazy sky outside the hospital, in the Washington Heights section of Manhattan. "I have to tell you, I'm so, so pleased and happy to be doing that."

Mr. Pataki, who ordinarily might spend a brisk winter morning running, hiking or snowshoeing in the Hudson Highlands, has chafed at being kept in the hospital, suggesting that he misses even the official drudgery of Albany. When asked about negotiations with leaders of the Legislature on a state budget, he said with a grin, "I never looked forward with such excitement to sitting down with the leaders and talking about the budget as I do today."

Last week, the governor said that he looked forward to the next time he could have pizza and beer. But yesterday, he acknowledged that such food was still "a few days off."

Though the most obvious sign of infection — his fever — has gone, Mr. Pataki will continue to have antibiotic treatment, to clean up whatever residual infection might remain, said Dr. Spencer E. Amory, one of the surgeons who treated him. He added, "There is still a small possibility that there can be exacerbation of infection again there."

Mr. Pataki began suffering abdominal pain on Feb. 15, and in the middle of the night, he went to Hudson Valley Hospital Center in Cortlandt Manor, near his home, where he had an appendectomy on the morning of the 16th.

Five days later, he was transferred to the Manhattan hospital, where he had surgery to correct an intestinal blockage, a common complication but one that does not often require surgery. Abdominal surgery often causes the intestine to stop its regular contractions for several days, bringing digestion to a halt, but last week, doctors said Mr. Pataki's intestinal function was gradually returning.

In his first week at Columbia, the governor's doctors there and his aides said little publicly about his condition. Then, last Tuesday, the doctors revealed that when he arrived there, Mr. Pataki had suffered from peritonitis — an inflammation of the

DOJ_NMG_0016695

abdominal lining — and abscesses, or pockets of infection, and that he continued to run an intermittent fever. Abscesses and peritonitis, both potentially very serious conditions, are also common side effects from a burst appendix.

Doctors not involved in the case said that both the complications he suffered and the amount of time he was in hospitals were a bit worse than average but well within the normal range. His aides have bristled at some of the news coverage of the governor's illness, objecting to statements that he was in danger or that his recovery was slow, and to assertions that they had not been open about his condition.

Mr. Pataki is in his 12th and last year as governor, and is mulling a run for president in 2008; his appendicitis forced him to cancel a trip to New Hampshire.

Giuliani Tops Poll For Political Favorability (BOS)

The Boston Globe, March 7, 2006

HAMDEN, Conn. --Former New York City Mayor Rudolph Giuliani is the most popular person in national politics, according to a national poll released Monday by Quinnipiac University.

Giuliani, a Republican who is considered a possible candidate for president in 2008, edged out U.S. Sen. Barack Obama, D-Ill., U.S. Sen. John McCain, R-Ariz., and Secretary of State Condoleezza Rice.

The Quinnipiac poll asked voters to rate politicians on a scale of 0 to 100, with higher numbers representing more favorable opinions. Giuliani's mean score was 63.5, according to the poll.

Obama averaged 59.9, McCain 59.7 and Rice 57.1.

"Not only do Mayor Giuliani and Sen. McCain get the best ratings, but their numbers are uniform across the country," said Peter A. Brown, assistant director of the Quinnipiac University Polling Institute.

President Bush's average rating was 44.1 and Vice President Dick Cheney's was 41.

Four Democrats who are considered potential presidential candidates were also mentioned in the poll's top 10: Former North Carolina Sen. John Edwards received a 50.8 average, former Virginia Gov. Mark Warner scored 50.7, New York Sen. Hillary Clinton averaged 50.4 and Sen. Russ Feingold of Wisconsin scored 49.

The telephone poll of 1,892 registered voters nationwide was conducted February 21-28 and has a margin of sampling error of plus or minus 2.3 percentage points.

Giuliani Is 'Hot' Stuff in New Poll (NYPOST)

By Deborah Orin

The New York Post, March 7, 2006

March 7, 2006 -- WASHINGTON - America loves Rudy Giuliani. A new poll shows "America's Mayor" inspiring the warmest feelings nationwide among 2008 presidential contenders.

Sen. John McCain (R-Ariz.) and Secretary of State Condoleezza Rice were close behind - but not so Sen. Hillary Rodham Clinton (D-N.Y.).

The Quinnipiac University poll asked some 1,900 voters to rate 15 political leaders on a "feeling thermometer" from 0 to 100, the higher numbers reflecting "warmer" feelings. Giuliani's 63.5 was followed by McCain's 59.7 and Rice's 57.1.

Actually, Illinois Sen. Barack Obama, at 59.9, came in second, but more than half of the voters admitted to not knowing enough about him to rank him.

"Giuliani's ratings are uniform in all states," said assistant polling director Peter Brown. "[He] is seen as the mayor of New York [during 9/11], and being a strong leader is the single strongest characteristic desired by voters in a presidential election."

Clinton got a 50.4 but exhibited little crossover appeal, getting a 24.7 from Republicans. President Bush, meanwhile, scored 23.9 with Democrats - but just 44.1 overall. Giuliani and McCain each scored 58.0 among Democrats.

And former President Bill Clinton scored 55.9 with women and 56.5 with men - to his wife's 54.3 and 46.0, respectively.

Prominent Ties Among Comcast Hires (WP)

By Matthew Mosk And Eric Rich

The Washington Post, March 7, 2006

For more than a year, Maryland first lady Kendel S. Ehrlich has been executive producer and star of a largely unnoticed half-hour television talk show about drug and alcohol abuse.

Comcast Cable Communications Inc. paid her an undisclosed sum to host 16 episodes of "Live Right: Straight Talk on Substance Abuse," which can be seen only in the cable provider's on-demand library.

DOJ_NMG_0016696

Ehrlich's day job represents more than an abrupt change in career path for the governor's wife, a lawyer by training. It also illustrates the reach of Comcast, the state's dominant cable provider with more than 1 million subscribers, as it has repeatedly given work to prominent public officials, their relatives or their friends.

Those hired by Comcast and its affiliates have included two members of the University System of Maryland Board of Regents, two sons of a key General Assembly committee chairman and former county executives from Prince George's and Harford counties.

Responsible for most of that hiring was Stephen A. Burch, who until recently served as president of Comcast's Atlantic Division, according to one former and one current senior Comcast official and some of the workers. The officials, who spoke on condition of anonymity out of fear of reprisal, said that within the company, the recruits were known informally as "FOBs" -- Friends of Burch.

None of these politically connected workers has been accused of wrongdoing, and those who could be reached said they were hired on merit.

Still, dual roles such as these raise questions about possible ethics violations and conflicts of interest. Such hires also illustrate a discreet way that some corporations can seek influence with decision makers, not just in Maryland but on Capitol Hill and elsewhere.

"Comcast has to go before every governing body in the state for something," said Bobbie Walton, executive director of Common Cause Maryland. "If they're giving jobs to people because of who they are, it looks a lot like payola."

It is, said Sen. Brian E. Frosh (D-Montgomery), "quite clearly a conflict of interest."

In some cases, Comcast's personnel moves in Maryland came amid public policy debates affecting the company's bottom line. For instance, Comcast hired then-Sen. Thomas L. Bromwell's two sons shortly after the Baltimore County Democrat championed legislation that has enabled cable companies to collect millions in late fees.

Ehrlich was first hired as a lawyer by Comcast when her husband, Robert L. Ehrlich Jr. (R), sat on the House of Representatives' telecommunications subcommittee. She was brought back as a producer in 2004 -- as the cable giant began facing competition over franchises from Verizon Communications. That battle has not come before regulators in Maryland, as it has in some states.

Comcast spokesmen said the company has no reason to suspect that Burch's hiring decisions violated company policy but added that, because he has left to lead a British company, they would neither discuss nor defend his actions.

"Steve Burch is no longer employed by Comcast," said Jim Gordon, a company spokesman. "We are not in a position to comment on decisions made by or relationships entered into by former employees."

Burch responded in an e-mail that said: "To the extent I was involved in these decisions, my actions were appropriate, known to Comcast, and in compliance with Comcast policies."

Comcast's affiliation with Bromwell, the former chairman of the finance committee, has drawn scrutiny from federal investigators. The company received a subpoena in 2003 in connection with the probe that led to Bromwell's indictment in October on corruption and fraud charges, Comcast officials said. They said the company has been assured it is not a target of any probe.

Public officials working on the Comcast payroll say they have been careful to recuse themselves from votes involving the company.

That was the case in 2000, when Comcast was involved in talks with the University of Maryland, seeking a long-term contract to provide cable service in student residences and negotiating for naming rights to a basketball arena. At the same time, the company had a contract with the public relations firm run by David H. Nevins, a member of the board that oversees the university system.

A year after the $20 million deal for naming rights was struck, Comcast tapped Nevins to be president of its newly acquired regional sports network, Comcast SportsNet. He held that post until 2004.

Nevins, who now chairs the Board of Regents, has recused himself from votes related to Comcast, according to ethics filings.

His decision to accept the job at the sports network, though, might violate state ethics law. Ethics Commission Executive Director Suzanne S. Fox said she could not comment on specific cases but noted that the law says a regent "may not have a financial interest in or be employed by an entity having or negotiating a contract with" the university, unless that relationship existed prior to his appointment.

Nevins said his conduct was proper because his initial contract with Comcast predated his joining the board. "While I took on an additional role with them, it did not change my responsibility to continue to recuse myself from those Board matters, which I always did," he said in an e-mail.

DOJ_NMG_0016697

Even so, at a time when Nevins headed the regents' finance committee, his public relations firm continued to represent Comcast in its dealings with College Park, negotiating placement of signs and logos at the arena, Nevins said. "Recusal means from the U of M board, not from my own business," he said.

Another regent, lawyer Leronia A. Josey, found an unusual way to satisfy the ethics requirement when Burch contacted her about a job in 2000, one year after she had joined the board.

"I had to resign, and then I was reappointed," Josey said, describing the maneuver that allowed her to become a regional director of government and community relations. The former regent, who now consults with Comcast, said she did not even miss a meeting.

Josey said she was hired solely for her skills and experience. "They were looking for somebody who knew people and could help them establish a local presence."

The Comcast employee with access to the highest-ranking politician in Maryland, though, is Kendel Ehrlich.

The first lady, a former prosecutor and public defender, has worked for Comcast in a variety of capacities since her husband served in Congress. Shortly after the couple came to Annapolis, she moved from Comcast's legal office to a Comcast job described in disclosure forms as "education liaison."

In June 2003, when the governor vetoed a bill that would have stopped Comcast and other companies from shifting the state tax burden to Delaware holding companies, the advocacy group Progressive Maryland publicly questioned whether the first lady's job posed a conflict. The governor's office dismissed the allegation.

Soon after, a pregnant Kendel Ehrlich announced she was leaving Comcast to have her second son. There was no public announcement when she returned, but her salaried job as a "production manager" reappears on her husband's disclosure forms for 2004. She is not required to disclose how much she is being paid and would not say, when asked.

Her return came as Verizon was beginning to offer cable television over its fiber optic phone lines. In Indiana, Missouri and elsewhere, Comcast has tried to block Verizon by appealing to state officials.

In Virginia's legislature this year, Comcast and other cable companies have lobbied furiously against a bill that would give Verizon short cuts around local franchise rules. Verizon officials said that battle will come to Maryland inevitably.

Kendel Ehrlich declined through her spokesman to be interviewed about her show, but each segment opens with an explanation of her motivation.

"I got involved in this project because I'm a mom," she says. "I have a 5- and a 1-year-old, and I'm trying to guide them through life. It's not easy. In fact, it's pretty scary."

In each episode, she interviews people about addiction. She talks with the wife of the Colombian ambassador, whom she asks, "Coming from a supplier nation, what is it like?" Talking about drugs with a group of Anne Arundel Community College students, she asks: "It's all about instant gratification, right?" In the final episode, she reenacts the cross-examination of a drunk driver. "That was a fatal decision, wasn't it?" she presses.

In the credits, she directs special thanks to Burch.

Burch, 55, is a University of Maryland graduate who has served on bank boards and with charitable organizations in the Baltimore area and has become friendly with many of the state's power brokers.

"He's a very affable, capable, well-spoken and likable figure in the business community and in all of the corridors of Maryland politics," said Wayne K. Curry (D), a former Prince George's county executive.

Late in 2000, Burch hired Eric M. Bromwell, a son of the Baltimore County Democrat who was then a state senator. Within a few weeks, brother Thomas L. Bromwell Jr. was also on the payroll.

Earlier that year, their father sponsored a bill that had a dramatic impact on Comcast revenue. The state's highest court had capped late fees and ordered that millions in refunds be paid to subscribers. Bromwell's bill lifted the cap.

A court later struck down a retroactive provision in the legislation, and Comcast was forced to pay the refunds. But the lasting impact of the bill was to restore a revenue stream for Comcast and other cable providers.

The former senator said in an interview that his sons got their work on their own, and he said any suggestion that the jobs came in response to his legislative work would be ridiculous. "I heard they were hiring, and they went through the process," he said.

Eric Bromwell, who now serves in the House of Delegates, said he recuses himself from any debate that touches on Comcast.

Because cable franchises are granted by counties or municipalities, Comcast's business is often negotiated with local officials. In 2001, the company faced an assault on its monopoly in Prince George's when rival Starpower Communications sought a franchise there.

DOJ_NMG_0016698

Curry's administration initially reached an agreement with Starpower. But after the County Council approved it, the administration insisted that Starpower pay for an additional $400,000 in technological improvements. Faced with the new demand, Starpower dropped out.

"We're at a loss to explain why additional requirements were proposed after the fact," a Starpower spokeswoman, Patricia MacEwan, said at the time.

In February 2003, three months after Curry left office, Comcast hired him as a "general business consultant," a position he still holds, the company said.

Curry said any suggestion his job was a reward would be "absurd" and added, "the Comcast people were angry with me," because of the initial contract. Curry said he believes Starpower dropped out because of financial troubles and added he "would never have had even the slightest inkling of a detail that trivial in the transaction."

Gordon, Comcast's spokesman, said, "It's not really uncommon for past elected officials to become consultants." Hiring such officials as Eileen M. Rehrmann, a former Harford County executive and Democratic candidate for governor, "can add value to our in-house workforce," he said. Rehrmann did not return calls for comment.

Comcast announced in December that Burch was leaving the company to become chief executive of NTL International, a British telecommunications company. In January, Comcast announced a restructuring that could result in 125 layoffs.

Eric Bromwell said he is among those whose jobs are in jeopardy. He worked directly for Burch and called him "the best boss I ever had."

Peace Activist Sheehan Arrested In NY Protest (REU-Y2)

By Irwin Arieff

Reuters, March 6, 2006

Cindy Sheehan, the anti-war activist whose son was killed in the Iraq war, was arrested with three other protesters in New York on Monday after a rally with women from Iraq.

Sheehan became a central figure in the U.S. anti-war movement last summer after she camped outside President George W. Bush's Texas ranch and has been arrested at least two other times at protests.

On Monday, she had joined a delegation of women from Iraq at the rally at the United Nations, urging the United Nations to help prevent civil war in Iraq.

About 20 protesters went to the U.S. mission to the United Nations to deliver a petition with 60,000 signatures seeking an end to the war. Nobody from the mission received them so Sheehan and three other American women sat down in front of the building, refused to leave, and were arrested.

A police spokesman said they were expected to be released later on Monday.

The Iraqi women plan to deliver a petition to the White House on Wednesday. Earlier they held a news conference at U.N. headquarters calling for the United States to withdraw its forces.

Entisar Mohammad Ariabi, a pharmacist at Baghdad's Yarmook Teaching Hospital, wept as she told reporters of the hardships experienced by Iraqi women.

"U.S. occupation has destroyed our country, made it into a prison," she said. "Schools are bombed, hospitals are bombed."

"We thank you, Mr. Bush, for liberating our country from Saddam. But now, go out! Please go out!" she said.

Chief Of Atomic Agency Sounds Optimistic On Iran (NYT)

By Christine Hauser

The New York Times, March 7, 2006

The director of the International Atomic Energy Agency, the nuclear watchdog for the United Nations, said today that he hoped an agreement could be reached with Iran on its nuclear program.

Mohamed ElBaradei spoke before a meeting of the nuclear agency's board of governors in Vienna. The board, which is reviewing Dr. ElBaradei's latest report on Iran this week, voted in February to refer Iran's nuclear case to the United Nations Security Council amid growing suspicions that Iran is determined to develop nuclear weapons.

The United States and the Europeans are certain to use Dr. ElBaradei's most recent report to push for a resolution critical of Iran during the agency's board meeting.

In the past three years, Dr. ElBaradei noted today, the agency has been conducting intensive investigations of Iran's nuclear program to provide assurances about its peaceful nature.

"During these investigations, the agency has not seen indications of diversion of nuclear material to nuclear weapons or other nuclear explosive devices," he said. "Regrettably, however, after three years of intensive verification, there remain uncertainties with regard to both the scope and the nature of Iran's nuclear program."

DOJ_NMG_0016699

He said there were still questions about "the past and current direction" of the program.

"I am still very much hopeful that in the next week or so, an agreement could be reached," Dr. ElBaradei said in televised remarks to reporters.

Iran agreed with Britain, France and Germany in November 2004 to voluntarily freeze all of its uranium conversion, enrichment and reprocessing activities. But when promised economic and political rewards were not forthcoming, Iran broke the agreement. It restarted uranium conversion last August and then began tests of enriching uranium on Feb. 11.

Last week, Dr. ElBaradei released an 11-page report that said Iran has accelerated its nuclear fuel enrichment activities and rejected demands of international inspectors to explain evidence that had raised suspicions of a nuclear weapons program. That assessment could make it easier for the United States and its European partners to seek punitive action in the Security Council.

The report made no definitive judgment about whether the nuclear program was peaceful, or intended to create the capacity to produce weapons.

Dr. ElBaradei today also mentioned a surge of diplomacy in which Iran has offered not to pursue industrial-scale uranium enrichment for up to two years. The Reuters news agency quoted an unnamed diplomat close to the talks between Iran and the European Union as saying that Iran may agree to extend that moratorium if it is permitted to run a small-scale enrichment research program.

Iran says that it has the right to develop a program for power.

The deputy secretary of Iran's national security council, Javad Vaeedi, told Reuters in Vienna that enrichment "research and development" in Iran was irreversible.

U.N. Agency Chief Hopes For Deal With Iran (AP)

By George Jahn, Associated Press Writer

AP, March 7, 2006

The head of the U.N. atomic watchdog agency said Monday a deal on Iran's suspect nuclear program could be only a few days away, making U.N. Security Council action unneeded.

Mohamed ElBaradei's optimism was believed to be linked to a confidential Russian proposal to allow Iran to enrich some uranium domestically, diplomats said. But the plan was expected to meet strong resistance from the U.S., which opposes any enrichment on Iranian soil.

"It's been a core element of our view and the view of the European three, and certainly of the Russian Federation that no enrichment in Iran is permissible," John Bolton, the U.S. ambassador to the United Nations, said in New York.

He said "even small so-called research enrichment programs could give Iran the possibility of mastering the technical deficiencies that it's currently encountering in its program" and translate them into large-scale enrichment later. The United States uranium enriched in Iran could be misused to make nuclear weapons.

ElBaradei, without elaborating, nonetheless said he hoped "that in the next week, an agreement could be reached."

The Russian proposal would allow Tehran to conduct small-scale enrichment and ask the IAEA to set the parameters of such activity to minimize the chances of abuse, according to the diplomats, who spoke on condition of anonymity because they were not authorized to divulge details of the plan.

In return, the diplomats said Iran would be asked to recommit to in-depth IAEA probes of its program on short notice — something Tehran canceled last month after the agency's 35-nation board voted Feb. 4 to alert the Security Council by passing on Iran's nuclear dossier resulting from almost three years of agency investigations.

Russian Foreign Minister Sergey Lavrov planned to discuss the plan with officials in Washington.

Russia and China, which both have economic and strategic ties with Iran, voted with the majority of IAEA board members but insisted the council do nothing until after this week's IAEA meeting in Vienna.

Moscow, with the support of the United States and other countries, has offered to enrich Iran's uranium in Russia, which would ensure greater oversight. But Tehran, insisting its goals are peaceful, has said it should be free to carry out some enrichment domestically.

The Russian proposal was driving a wedge into what had been a relatively united front on uranium enrichment, with Germany cautiously supportive and France and Britain opposed and backing the United States.

Undersecretary of State Nicholas Burns underlined U.S. determination, saying in Washington that "unless Iran does a dramatic about-face," he expected the issue to be taken up by the Security Council.

Tom Casey, a State Department spokesman, also downplayed the latest twist in the Russian proposal.

"You can't be just a little pregnant," Casey said of the U.S. attitude toward small-scale uranium work by Iran.

DOJ_NMG_0016700

France, Britain and Germany broke off negotiations on behalf of the European Union with Iran last year after it resumed enrichment-related activities, which can make both nuclear fuel and the fissile core of warheads. Since then, those three countries, as well as the United States, Canada, Australia and Japan, have been at the forefront of efforts to have the Security Council take up the issue.

The diplomats said negotiations continued on the sidelines of a board meeting of the IAEA, which began Monday and would focus on Iran later in the week.

A senior European diplomat the deal would likely stand or fall "on the response Lavrov gets in Washington" in a meeting later Monday with Secretary of State Conzoleezza Rice and other senior administration officials.

But he said all involved — whether or not they supported allowing Iran some control of enrichment — were firm on the need for Tehran to first return to a freeze of all such activities for a prolonged time "to re-establish confidence."

He said the Russians had proposed eight years — something unlikely to be accepted by the Iranians who publicly reject calls for a return to a freeze. A State Department official, who also demanded anonymity, refused to specify a length but said in response to a question that two years would be too short.

The meeting is scheduled to hear a report by ElBaradei focusing on Iran's nuclear program, including its decision to deny information requested by U.N. inspectors on diagrams related to nuclear weapons and other issues and ongoing enrichment plans that include setting up thousands of uranium-enriching centrifuges later this year.

"We have not seen indication of diversion of ... material to nuclear weapons or other explosive devices," ElBaradei said. "However, there are still a number of important uncertainties that need to be clarified.

"Unfortunately, the picture is not very clear as to the scope of the program and as to the nature of the program," he said, alluding to documents, past experiments and activities that could be used to develop nuclear arms.

The last board meeting sent the complete Iran file to the Security Council. This week's meeting is scheduled to pass the ElBaradei report to the council, which then can decide whether to take action. The board was not likely to discuss Iran until Tuesday or Wednesday.

U.S. Dismisses Talk Of Compromise On Iran (AP)

By Barry Schweid, Ap Diplomatic Writer

AP, March 7, 2006

Unless Iran executes a dramatic about-face and suspends all its nuclear activities, the U.N. Security Council will intervene "quite actively," a senior State Department official said Monday.

The message to Iran is that it has "crossed the international red line" and engaged in unacceptable enrichment activity "and there must be a U.N. Security Council process to deal with that," Undersecretary of State Nicholas Burns said.

Burns did not say what the United States would ask the Security Council to do. While the Bush administration takes a stern line toward Tehran it might not be able to persuade other nations to impose economic or other penalties on Iran.

The U.N. nuclear watchdog agency, which voted to refer the dispute to the Security Council, will reaffirm its stance this week in Vienna, Austria, "unless Iran does a dramatic about-face and suspends all of its nuclear activities," Burns said at the Heritage Foundation, a private research group.

His remarks followed a State Department spokesman's dismissal of reports an eleventh-hour compromise might be struck over Iran's nuclear program.

Mohamed ElBaradei, head of the U.N. International Atomic Energy Agency, said at his agency's Vienna headquarters on Monday that the council might not have to consider Iran's actions. Talks between Moscow and Tehran have focused on shifting Iran's fuel enrichment activities to Russia.

Later, State Department spokesman Tom Casey said Secretary of State Condoleezza Rice telephoned ElBaradei "to reiterate the U.S. position that Iran should cease all enrichment-related activity." In response, ElBaradei agreed that Iran must not be allowed to have enrichment activity on its territory, said a U.S. official who spoke on condition of anonymity beause he was not in position to speak for the IAEA.

The United States has long spearheaded a campaign to haul Iran before the Security Council, which has the power to impose economic or other sanctions. There was no hint of optimism at the State Department about the latest efforts to defuse the issue, which ElBaradei said he hoped could produce a resolution in a week.

"I am not aware of any specific proposals or any specific ideas that would require or force any kind of delay in Security Council action," spokesman Casey said.

DOJ_NMG_0016701

Casey also downplayed a new twist to the Russian proposal that diplomats described to The Associated Press. Under it, the U.N. atomic watchdog agency would set a level of small-scale uranium enrichment that Iran would be allowed to conduct on its own soil as part of an attempt to keep Iran from using the fuel for nuclear weapons, said the diplomats, who spoke on condition of anonymity.

"You can't be just a little pregnant," Casey said of the U.S. attitude toward small-scale uranium work by Iran.

The U.N.'s atomic energy agency voted last month to refer the Iran dispute to the Security Council. "There is no obstacle to that discussion being taken up and we certainly believe that will happen shortly," Casey said.

North Korea took a civilian nuclear program and quickly turned it into a bomb-making program, Casey said.

The process of bringing Iran before the Security Council has been delayed several times. The European Union attempted to negotiate with Iran with the aim of halting the program in exchange for economic concessions. Then Russia came up with its enrichment proposal.

Russian Foreign Minister Sergey Lavrov had dinner in Washington on Monday evening with Rice, and was due to meet with her and President Bush and Rice.

On Wednesday, Lavrov is due to meet in New York with U.N. Secretary-General Kofi Annan.

On his way to Washington, Lavrov stopped in Ottawa for talks with Canadian officials. Russian news agencies quoted him as saying Russia's proposal to shift Iran's uranium enrichment to Russia remains on the negotiating table but Iran must suspend enrichment on Iranian territory.

In Vienna, headquarters for the nuclear watchdog group, ElBaradei said the Council might not have to explore Iran's actions. "I am still very much hopeful that in the next week an agreement could be reached," he said.

Iran Deal Still Feasible: ElBaradei (REU-Y2)

By Mark Heinrich And Parisa Hafezi

Reuters, March 6, 2006

The International Atomic Energy Agency chief said on Monday a deal to defuse a standoff over Iran's nuclear aims was still feasible and diplomats outlined a compromise that would let Tehran pursue limited atomic research.

Mohamed ElBaradei cited a surge of diplomacy in which Iran has offered not to pursue industrial-scale uranium enrichment for up to two years. He was speaking before debate on Iran at an IAEA board meeting that could presage U.N. Security Council action.

Iran may agree to extend that moratorium if it is permitted to run a small-scale enrichment research program, said a diplomat close to talks between Iran and the European Union.

Iran's insistence on doing enrichment research has been a red line for the West, eager to ensure Tehran does not acquire technology that can be used for atom bombs. The Islamic Republic says it seeks only nuclear-generated electricity, not weapons.

"I am still very much hopeful that in the next week or so an agreement could be reached," ElBaradei said, while acknowledging that Russia's proposal to enrich uranium for Iran had snagged on Tehran's determination to purify nuclear fuel itself.

Javad Vaeedi, deputy secretary of Iran's national security council, highlighted that obstacle when he told Reuters that enrichment "research and development" in Iran was irreversible.

"Iran is ready to compromise on the period of suspension (of large-scale enrichment) if it can keep its nuclear research activities," the diplomat close to the Iran-EU talks said.

But the United States dismissed the possibility that Iran might be allowed to continue small-scale nuclear enrichment and said the council would likely take up Iran's case.

"You can't have the regime pursuing enrichment on any scale, because ... (it would allow) them to master the technology, complete the fuel cycle -- and then that technology can easily be applied to a clandestine program for making nuclear weapons," said U.S. State Department spokesman Tom Casey.

SMALL-SCALE ENRICHMENT

On Friday, Iran said it could delay industrial-scale enrichment for up to two years but the EU countered with a demand for a 10-year moratorium on all enrichment activity.

"The (IAEA) board of governors, EU3 and Russia have made clear that there needs to be a suspension of these enrichment capabilities and ... a prolonged period of time necessary to restore confidence. Two years is not a prolonged period of time," a U.S. State Department official said.

DOJ_NMG_0016702

A senior official close to the IAEA, who asked not be named, said trying to distinguish between research work and productive enrichment was like "trying to draw a line in water."

However, EU diplomats said Russia and ElBaradei are pushing the West to let Iran continue small-scale enrichment research under IAEA surveillance as a face-saving solution.

The Security Council could desist from any action for the time being if the proposal won agreement, one diplomat said.

Of the three leading European powers, Germany is the one that "could most live with a pilot enrichment plant in Iran," said a European diplomat close to the talks with Iran.

But he said Germany would not break ranks with its EU partners France and Britain over the issue.

"We are not in the Security Council, unlike Britain or France. So one should not over-estimate Germany's position. Paris and London seem to be much more skeptical," said another EU3 diplomat, speaking on condition of anonymity.

Aliasghar Soltanieh, Iran's envoy to the IAEA, told Reuters there was a good chance of agreement with EU powers and Russia.

In defying calls to suspend all enrichment-related work, Iran seems to be counting on divisions in the Security Council over whether to resort to sanctions mooted by the United States.

Wielding vetoes in the council, Russia and China could block sanctions that would disrupt their trade ties to Iran.

Iran's past secrecy over its nuclear program, its failure to satisfy IAEA inspectors and its public calls for Israel's destruction have stoked Western suspicions about its intentions.

But Iran's chief nuclear negotiator denied the country was seeking nuclear weapons and said it was no threat to Israel since Tehran sought only democratic change in the region.

"The national security doctrine of Iran has no place for an atomic bomb," Ali Larijani said in an interview with Britain's Channel Four news. "You cannot destroy a country or wipe it off the map through democratic means," he said with reference to Israel.

HARDLINERS

ElBaradei believes U.N. intervention could close diplomatic avenues and bolster Iranian hardliners, diplomats say. Tehran has warned it could bolt a nuclear safeguards treaty if pushed.

"Confrontation (between the West and Iran) could be counterproductive and would not (give) us a durable solution," said ElBaradei, calling for verbal restraint on all sides.

"There is universal recognition that the Iran issue has serious implications for international security. Everyone understands that escalation is not going to help a situation that is highly, highly volatile in the Middle East," he said.

The IAEA's 35-member board reported Iran to the Security Council a month ago. It urged Iran to heed resolutions to halt uranium enrichment work and stop stonewalling IAEA inquiries.

On Tuesday the IAEA board will consider ElBaradei's latest report before it is sent to the council, which might eventually consider sanctions if diplomacy fails.

Tehran has complained of double standards -- India, Israel and Pakistan enjoy good ties with the West although they built atom bombs in secret -- and President Mahmoud Ahmadinejad warned of unspecified consequences if Tehran faces a U.N. crackdown.

ElBaradei's report said Iran plans to begin installing 3,000 centrifuges this year. Iran denies this implies industrial scale fuel production, an assertion the West says is not credible.

Around 1,500 centrifuges running optimally for a year could yield enough highly-enriched uranium for a bomb, experts say.

The Security Council's first step would probably be to urge Iran to heed IAEA resolutions. It might also consider endowing the IAEA with more intrusive, short-notice inspection powers.

Enacting sanctions will be much harder given international reluctance to isolate the world's fourth biggest oil exporter.

New Calls Emerge For Nuclear Deal With Tehran (WSJ)

By David Crawford And Alan Cullison

The Wall Street Journal, March 7, 2006

Russian officials and United Nations nuclear inspectors renewed calls for a compromise on Iran's nuclear plans before the U.N. Security Council takes up the issue, a move in conflict with U.S. and European goals.

Speaking before a meeting of the U.N.'s International Atomic Energy Agency Board of Governors in Vienna, IAEA Director General Mohamed ElBaradei said he is "cautiously optimistic" a compromise is possible this week.

That statement is at odds with U.S. determination to refer Iran swiftly to the Security Council, with U.S. and EU officials citing inspectors' evidence that Iran's program includes elements that would only be aimed toward producing weapons, not energy.

DOJ_NMG_0016703

The IAEA's board agreed Feb. 4 to pass the matter on so the Security Council could consider sanctions or other measures against Iran -- but with the unusual proviso that the Security Council not take it up until after this week's meeting in Vienna. That left the way open for continued efforts at compromise. Since then, Russia has held frequent but rocky talks with the Iranians aimed at defusing the standoff. EU officials also held renewed talks but said they went nowhere.

Russia, which helped build Iran's nuclear program, has been interested in a deal in which Russia would be paid to enrich uranium on Iran's behalf, while Iran would agree to a moratorium on enriching uranium itself. Iran's announcement in December that it intended to end its compliance with voluntary inspections and enrich uranium led to the current crisis.

Yesterday, diplomats were debating the possibility of letting Iran continue to experiment with enrichment in 20 centrifuges. Diplomats close to the IAEA say that Iran would likely do those experiments anyway if there is no compromise but noted an agreement would allow the return of IAEA inspectors. U.S. and EU officials have been resistant to the Russian plan on enrichment, even before the additional compromise on Iranian centrifuges was unveiled. A U.S. State Department official and EU diplomat each said yesterday that the operation of even 20 centrifuges would give Iran valuable experience it needs for an advanced enrichment program.

Hopes that Iran will strike a deal that would avert U.N. action against its nuclear program helped push down oil prices yesterday. (See related article7.)

The continued conflicts among major powers over how to handle the situation renewed questions over what the Security Council, with many of the same members as the IAEA board, could agree to do in that forum. Russian Foreign Minister Sergei Lavrov was due to meet U.S. Secretary of State Condoleezza Rice over dinner in Washington last night. On Sunday, U.S. Ambassador to the U.N. John Bolton warned of "tangible and painful consequences" for Iran if it doesn't give up its plans to enrich uranium. But as recently as Friday, Mr. Lavrov warned against referring Iran to the Security Council, saying it would lead to "escalation of the situation."

Part of what bothers Russia is its previous experience with the Security Council over Iraq. After Moscow backed a Security Council resolution demanding Saddam Hussein cooperate with weapons inspectors, the U.S. later used noncompliance with the resolution as a justification for military force -- something the Russians said they never intended.

Speaking to a group of Western reporters in Moscow before departing for Washington, Mr. Lavrov said, "I know how the Security Council works -- you start with soft reminder -- then you demand, then you threaten," he said. "It will become a self-propelling function."

On Sunday Iran's chief nuclear negotiator, Ali Larijani, repeated warnings that Iran would resume large-scale uranium enrichment if Iran's nuclear dossier is referred to the Security Council. It hasn't agreed to the moratorium proposed by Russia, though it has expressed interest in Russia's joint-venture plan.

Iranian Embassy spokesman Ali Esmaili said key talks were under way in Vienna, but described the discussions as difficult. "The positions on both sides are very hard," Mr. Esmaili said. A top Russian involved in negotiations said hope was scarce for an agreement with the Iranians, but that if one were reached it would come "at the last possible moment."

Until recently, the Russians haven't spoken openly about any proposal to allow limited enrichment on Iranian soil. But the idea is presumably something the Iranians have been pushing all along as a deadlock breaker, said Ivan Safranchuk, head of the Moscow office of the World Security Institute.

"That's the position I would expect everyone to lean toward," said Mr. Safranchuk. "It's clearly a position the U.S. would be disappointed in, because the Iranians will be suspected of enlarging enrichment operations. They tend to push everything to the limit, and so this will probably only postpone the confrontation."

Russia And West Split On Iran Nuclear Issue (NYT)

By Elaine Sciolino

The New York Times, March 7, 2006

VIENNA, March 6 — A serious rift emerged Monday when Russia split with the United States and Europe over Iran's nuclear program after the Russians floated a last-minute proposal to allow Iran to make small quantities of nuclear fuel, according to European officials.

The reports of the proposal prompted Secretary of State Condoleezza Rice to call Mohamed ElBaradei, the director of the International Atomic Energy Agency, and according to an administration official who was briefed on the conversation, "she said the United States cannot support this."

Ms. Rice's call came after Dr. ElBaradei suggested to reporters that the standoff with Iran could be resolved in a week or so, apparently an allusion to the Russian proposal. Washington's strategy is to get past the meeting of the I.A.E.A. that opened Monday and, under a resolution passed by the agency's board in February, have the issue turned over to the United Nations Security Council immediately. But officials clearly fear that the Russian proposal is intended to slow that process.

DOJ_NMG_0016704

American officials said they had been assured by the Russians that there was no formal proposal on the table. The Russian foreign minister, Sergey V. Lavrov, had dinner in Washington on Monday evening with Ms. Rice and the national security adviser, Stephen Hadley, and he is scheduled to meet President Bush in the Oval Office on Tuesday.

Under the Russian proposal, Iran would temporarily suspend all uranium enrichment activities at its facility at Natanz but then be allowed to do what Russia describes as "limited research activities" in Iran's uranium enrichment program, said the European officials, who spoke on condition of anonymity under normal diplomatic rules.

Iran would have to agree to a moratorium on production of enriched uranium on an industrial scale for between seven to nine years, ratify additional measures that let the nuclear agency conduct intrusive inspections of its nuclear facilities and create a joint venture with Russia on the production of enriched uranium on Russian soil, the officials said. The proposal, which has not been made public, spurred Dr. ElBaradei to give an upbeat assessment about a possible swift resolution of the impasse over Iran's program, an official familiar with his thinking said.

In a tonal shift, Dr. ElBaradei said Iran had made concessions on some issues. Calling Iran's activities at its uranium enrichment plant at Natanz "the sticking point," he added, "That issue is still being discussed this week, and I still hope that in the next week or so that agreement could still be reached."

In an interview on Monday evening, R. Nicholas Burns, the under secretary of state for political affairs, said the administration would reject any proposal that did not require the Iranians to stop domestic nuclear enrichment and reprocessing activities. "The United States will not support any halfway measures," he said. "That means full suspension of all nuclear activities, and a return to negotiations on that basis."

Ms. Rice told Dr. ElBaradei that Washington wanted to see Iran's case before the Security Council as soon as this week's agency board meeting was over; that the United States would seek a presidential statement, which does not carry the weight of a resolution, noting Iran's past failures to comply with its international commitments; and that Iran's case would then be sent back to the nuclear agency for further review, according to an official with knowledge of the conversation.

The Russian proposal is a reversal of its previous stance and seemed motivated by its determination to protect Iran from judgment by the Security Council.

Russia — and even China — had joined the United States and the Europeans in demanding that Iran resume a freeze of uranium enrichment activities at Natanz, reflecting mounting global suspicion that Iran's nuclear program is intended to produce weapons.

The Russian proposal surfaced late last week, when Sergei Kisliak, Russia's chief nuclear negotiator, presented it to officials of Britain, France and Germany.

He said Iran would have to resume full suspension of all enrichment-related activities, including what it calls its small-scale "research and development" while the agreement on the package was negotiated. Once there was an agreement, however, Iran would be allowed to conduct limited uranium enrichment research activities under a pilot program as agreed with the I.A.E.A.

As soon as Iran and the agency agreed on the small-scale enrichment, Iran's Parliament would ratify the "Additional Protocol" to Iran's nuclear agreement. That protocol gives the nuclear agency's inspectors the right to ask for exceptional access to Iran's nuclear facilities. When one of the Europeans asked Mr. Kisliak for his definition of a pilot program, he said there was no real definition, one official said.

A moratorium on industrial-scale enrichment and reprocessing activities would last two to three years while the nuclear agency carried out an investigation of Iran's past nuclear activities and five to six years more until trust with Iran could be rebuilt.

Mr. Kisliak conceded that a major risk of such a package was that Iran would inch closer to mastering the technology for a small cascade of centrifuges that turn uranium gas into enriched uranium that can be used to produce electricity or to make bombs. He added that it would shorten the period needed for Iran to "manufacture a weapon" by a number of months, one official familiar with the briefing said.

Iran has always contended its nuclear program is for peaceful purposes, although Russia, like the United States and the Europeans, is convinced it intends to make nuclear weapons.

Mr. Kisliak speculated that Iran was unlikely to accept the proposal, in part because of the long-term constraints on its industrial-scale enrichment program. The proposal threatened to derail a carefully formulated, but fragile strategy to send Iran's case to the Security Council. Last month's resolution by the nuclear agency board demanded that no action be taken in the Council until after the current board meeting, a way to give Iran one last chance to comply with agency demands.

Even though there is no specific timetable to seek economic sanctions on Iran, both Russia and China are opposed to sanctions. There is no need for another resolution to be passed by the agency board this time for the Security Council to act. Certainly, Dr. ElBaradei is looking for a negotiated solution to the Iran impasse even if it means giving Iran a significant concession on making nuclear fuel.

DOJ_NMG_0016705

In a conversation with the German and French foreign ministers, a senior British Foreign Office envoy and the European Union's foreign policy chief, Javier Solana, in Vienna last Friday, Dr. ElBaradei expressed the view that Iran needed to continue some uranium enrichment work as a face-saving measure, a European official said. The Europeans, who met earlier with Iran's chief nuclear negotiator, Ali Larijani, replied that it was not a question of saving face but of maintaining both the credibility of the nuclear agency and a firm position toward Iran.

The crucial issue for Iran is mastering the fuel cycle by enriching uranium. Indeed, in Tehran on Sunday, Mr. Larijani reiterated Iran's position that it would not freeze small-scale production of nuclear fuel even if its case came before the Security Council.

Russia Presses US And EU On Iran (FT)

By Daniel Dombey

Financial Times, March 7, 2006

Russia is seeking to convince the US and the European Union to allow Iran to continue limited uranium enrichment, the process that can create weapons grade material.

But the idea has already been rejected by the US and the EU's big powers, and western diplomats said it could disrupt the uneasy common front on Iran between the five permanent members of the United Nations Security Council.

Yesterday, Mohamed ElBaradei, director-general of the International Atomic Energy Agency, called for both Iran and the west to soften their "hard positions" on enrichment. "I still hope that in the next week or so . . . agreement could still be reached."

Moscow argues that there is little danger if Tehran restricts its activity to the 20 centrifuges it has been operating since last month, since thousands of centrifuges would be necessary to develop nuclear weapons. Dan Dombey, Brussels

Iran Said To Step Up Plans For Shahab Missiles (REU-Y2)

By Louis Charbonneau

Reuters, March 6, 2006

As Iran pursues a nuclear program the West fears is aimed at producing bombs, Tehran also appears to be stepping up development of missiles capable of carrying atomic warheads, diplomats citing intelligence say.

According to an intelligence report given to Reuters by a non-U.S. diplomat, a covert Iranian program run by people closely linked to Iran's military includes plans to arm its Shahab-3 missiles, which experts believe have a maximum range of around 2,000 km (1,240 miles), with nuclear warheads.

The report, which could not be independently confirmed, surfaced as the United States and its allies seek to highlight the potential security dangers of a nuclear-armed Iran.

The report said it was code-named Project 111 and that the "aim is arming Shahab-3 missiles with nuclear warheads."

An Iranian official, who asked not to be named, denied the charge.

The assessment that Iran has nuclear ambitions for the Shahab-3 is shared by the European Union, Washington and Israel, said an EU diplomat who asked not to be named.

Tehran says it only wants nuclear power stations, not bombs. After three years of inquiries, U.N. inspectors have been unable to verify that Tehran's nuclear program is purely peaceful.

An Iranian exile who has reported accurately on Tehran's nuclear program in the past said Iran had significantly increased production of Shahab-3 missiles.

The International Atomic Energy Agency's board of governors met in Vienna on Monday to consider the latest IAEA report on Iran's nuclear program. It will be sent to the U.N. Security Council, which could impose sanctions on Iran.

Project 111 was first mentioned last month in a report by the Washington Post, which described it as "a nuclear research effort that includes work on missile development." The Post said U.S. officials believe it is the successor of Project 110, which they believe is the military arm of Iran's atomic program.

GERMANY WARNS COMPANIES

German intelligence officials believe Iran has stepped up covert efforts to procure missile technology, said a German government official, who asked not to be named.

The intelligence officials are sending "early-warning letters" to German firms, urging them to be alert for Iranian agents hunting for missile technology, he said.

German authorities have detained several Germans and at least one foreigner as part of a series of investigations of suspected attempts to purchase missile and other arms technology in Germany on behalf of Iranian intelligence, the official said.

Iran has repeatedly warned it would not hesitate to deploy the Shahab-3 missiles, which can reach Israel and U.S. military bases in the Gulf, if it comes under attack.

DOJ_NMG_0016706

Material recovered by U.S. intelligence from a stolen laptop computer also suggests Iranian missile experts have been trying to develop a missile re-entry vehicle capable of carrying a relatively small nuclear warhead, EU diplomats have said.

But David Albright, a former U.N. weapons inspector and head of a U.S.-based think-tank, cautioned that however credible, all this intelligence is based on assessments, not certainty.

"I don't think any of the available intelligence represents a smoking gun," Albright said.

His Institute for Science and International Security estimates that Iran could not produce a bomb before 2009.

Alireza Jafarzadeh, an Iranian exile who heads a think-tank in Washington, told Reuters Tehran had sharply accelerated production of Shahab-3 missiles to around 90 a year from 15-20.

Jafarzadeh, formerly a spokesman for the National Council of Resistance in Iran (NCRI), listed by Washington as a terrorist organization, revealed the existence of Iran's secret uranium enrichment plant at Natanz and other sites in August 2002.

North Korea has also been key to Iran's missile development.

Last month a German diplomat, citing his country's intelligence, confirmed a German newspaper report from December that said Iran had purchased 18 disassembled BM-25 mobile missiles with a range of around 2,500 km from North Korea.

The NCRI said at a news conference in London on Monday that Iran was also working on developing so-called Ghadr missiles, with a range of up to 3,000 km. Unlike the Shahab, which is based on North Korean Nodong missile technology, the Ghadr missile is based neither on North Korean or Russian designs.

No comment from Iran was immediately available.

India Nuclear Deal Pushed (WT)

By David R. Sands

The Washington Times, March 7, 2006

The proposed U.S.-India nuclear deal will not open the door for Iran and other rogue states to acquire atomic weapons and technology, the Bush administration's lead negotiator insisted yesterday.

"We don't see the connection between what Iran is doing and what India seeks to do," Undersecretary of State R. Nicholas Burns said at the Heritage Foundation.

The administration has begun selling the India deal in earnest on Capitol Hill, where several top lawmakers are either cool to the accord or openly skeptical.

Mr. Burns, speaking five days after helping nail down the deal in New Delhi, rejected critics' assertions that bending the rules for India -- which has not signed the nuclear Non-Proliferation Treaty (NPT) -- will make it more difficult to rally opposition against Tehran.

Mr. Burns said Iran's Islamic regime was an "autocratic state" that hid its nuclear programs from international inspectors for nearly two decades. Iran enjoys "no trust in the international community."

India, however, is a peaceful democracy that, under theagreement, would place 14 of its 22 nuclear reactors under monitoring and inspection by the United Nations.

"We think these are two countries that are going in diametrically opposed directions," he said. "India in the responsible one; Iran is the irresponsible one."

South Korean analysts also have warned that the India agreement could complicate the multilateral effort to pressure North Korea to abandon its nuclear programs.

Administration officials conceded they have a major selling job to do on Capitol Hill, where lawmakers complained that they had been given little notice when the agreement was floated in the summer.

Key Republican lawmakers such as Senate Majority Leader Bill Frist of Tennessee, Senate Foreign Relations Committee Chairman Richard G. Lugar of Indiana and House International Relations Committee Chairman Henry J. Hyde of Illinois have taken a wait-and-see stance, saying they needed to examine the details of the New Delhi deal.

House Armed Services Committee Chairman Duncan Hunter, California Republican, said sharing U.S. nuclear expertise would help train a generation of researchers in India who could help the country's military nuclear programs -- which are not covered by the accord.

"This thing has to be looked at very, very carefully," he told ABC's "This Week" Sunday. "I'm very, very skeptical."

The administration is scheduling briefings for members and staff on Capitol Hill. Congress must amend several U.S. nonproliferation statutes to implement the accord.

Mr. Burns did not rule out a parliamentary maneuver in which the agreement would go into effect unless the House and Senate voted to kill it.

"We're very open to Congress on how to proceed," he said, adding that the process could take several months.

DOJ_NMG_0016707

Although more than a third of India's nuclear reactors will not be subject to U.N. oversight under the accord, Mr. Burns said India had agreed that all future nuclear sites devoted to civilian power also would be automatically covered and monitored. U.S. officials had been told that the "great majority" of India's nuclear activity in the coming years will be on the civilian side.

The percentage of India's nuclear work subject to international controls will be "much broader by the year 2020," he said.

But India insisted on the right to designate which of its sites would be for civilian and which for military uses. That, critics say, allows India to build so-called fast-breeder nuclear reactors that could accelerate the country's bomb-making potential and upset the military balance with rival Pakistan.

In New Delhi yesterday, Indian officials pressed visiting Australian Prime Minister John Howard to end a ban on sales of uranium to India in the wake of the U.S. deal. Australia has the world's largest uranium deposits but does not sell to countries that have not signed the NPT.

Mr. Howard called the U.S.-India accord "very significant" but said his government "was not going to suddenly change" its policy on uranium exports.

Judicious Double Standards (WP)

By Richard Cohen

The Washington Post, March 7, 2006

Back behind my high school one day, we all assembled to watch a fistfight. To my immense pleasure, a bully was being bested by his victim. Then the bully's friend stepped in and ended matters with a swift kick to the other guy's midsection. It was an unfair ending to what was supposed to be a fair fight, but it taught me a valuable lesson: You treat your friends differently than you do your enemies.

This elemental principle of life, love and other matters seems utterly lost on so many critics of George Bush's agreement to provide India with civilian nuclear technology. In doing so, we are told, he has done something truly awful -- established a double standard. Well, duh -- yes. India is our friend and Iran, just to pick an example, is not.

The cry of "double standard" is a bit silly. It asks us not to recognize certain realities -- the difference between friends and enemies, for instance, or good and bad democracies, to give another example. In the case of the nuclear agreement, we are somehow supposed to believe that by favoring India, Bush has made it much harder to put pressure on Iran to abandon its apparent weapons program and become a "good guy" nation. This overlooks the fact that Iran is governed by a zealot who has pledged to eradicate Israel and who firmly believes in the inherent evil of the United States of America. As Bush once said about himself, the Iranians do not do nuance.

Reality imposes its own rules -- and they have nothing to do with double standards. North Korea probably already has a nuclear weapon. Iran is going that way, and it is going to happen no matter what the United States and its allies do. For Iran, going nuclear has been a national goal ever since the shah headed the government. Now this is even more the case, especially since the United States, which lumped Iran along with Iraq into the "axis of evil," invaded Iraq. It would hardly be the height of paranoia for Iran to think it is next.

The invocation of the term "double standard" is often applied where Israel is concerned. Israel is presumed to have a nuclear arsenal. Why should the United States look the other way at Israel's bomb and go nuts over Iran's effort to get one? The answer ought to be clear: Because Israel has not threatened to blow Iran off the map; because it is vastly outnumbered in a tough, belligerent neighborhood; and because it is the lone real democracy in a region run mostly by thugs.

The same accusation of a double standard is made with regard to the effort to discriminate between election outcomes. We are supposed to treat the victory of Hamas in Palestine as we would that of the Labor Party in Britain. But the outcome of one democratic election is not threatening and the other is, and we ought to be able to say so -- and do something about it. If, for instance, we are supposed to continue aiding a Palestinian government that has now fallen into the hands of religious fanatics and proponents of a virulent brand of anti-Semitism, then we have lost our minds. It will not matter to some poor Israeli that the terrorist who kills him represented a democratically elected government.

The "double standard" accusation has a schoolyard quality to it. Why a boycott of Cuba and not of China? Because you can with one and not with the other. Why attack Saddam Hussein and not all the other vile dictators? Because you do what you can. Why not ask why you leave your estate to your kids and not strangers? Because your kids are your kids. It is the ultimate double standard.

It is true, of course, that Bush has upended 30 years of American nuclear policy -- and there will be consequences. Maybe, as some of the critics say, he has made it easier for India to increase its nuclear arsenal. But India will make all the weapons it feels it needs -- no matter what the United States does. America is a superpower, but not even a superpower is all-powerful.

The Israeli bomb threatens nobody. An Iranian bomb does. India has transferred its nuclear technology to no one. Pakistan has. No one worries about India or Israel making the technology available to terrorists. Everyone worries about Iran doing that.

DOJ_NMG_0016708

These are distinctions with great differences. They are, as critics charge, double standards, but to apply a single standard to both friend and enemy, while it might be fair, would be singularly stupid.

Mr. Bush's Asian Road Trip (NYT)

The New York Times, March 7, 2006

There is a lot of good a president can do on a visit to another country: negotiate treaties that enhance American security, shore up a shaky alliance, generate good will in important parts of the world. Unfortunately, President Bush didn't do any of those good things on his just-completed visit to Pakistan and India and may have done some real harm.

The spectacularly misconceived trip may have inflicted serious damage to American goals in two vital areas, namely, mobilizing international diplomacy against the spread of nuclear weapons and encouraging Pakistan to take more effective action against the Taliban and Al Qaeda fighters operating from its territory.

The nuclear deal that Mr. Bush concluded with India threatens to blast a bomb-size loophole through the Nuclear Nonproliferation Treaty. It would have been bad enough on its own, and disastrously ill timed, because it undercuts some of the most powerful arguments Washington can make to try to galvanize international opposition to Iran's nuclear adventurism.

But the most immediate damage was done on Mr. Bush's next stop, Pakistan. Washington is trying to persuade Gen. Pervez Musharraf, the Pakistani military dictator, to defy nationalist and Islamic objections and move more aggressively against Pakistani-based terrorists. This is no small issue because both Osama bin Laden and the Taliban's leader, Mullah Muhammad Omar, are now believed to operate from Pakistani soil.

But sticking Mr. Musharraf with the unwelcome task of explaining to Pakistanis why his friend and ally, Mr. Bush, had granted favorable nuclear terms to Pakistan's archrival, India, while withholding them from Pakistan left him less likely to do Washington any special, and politically unpopular, favors on the terrorism front.

It's just baffling why Mr. Bush traveled halfway around the world to stand right next to one of his most important allies against terrorists — and embarrass him. India and Pakistan are military rivals that have fought each other repeatedly. They have both developed nuclear weapons outside the nonproliferation treaty, which both refuse to sign. When India exploded its first acknowledged nuclear weapons eight years ago, Pakistan felt obliged to follow suit within weeks.

So when Mr. Bush agreed to carve out an exception to global nonproliferation rules for India, it should have been obvious that Pakistani opinion would demand the same privileged treatment, and that Mr. Musharraf would be embarrassed by Mr. Bush's explicit refusal to provide it.

Mr. Bush was right to say no to Pakistan. It would be an unthinkably bad idea to grant a loophole to a country whose top nuclear scientist helped transfer nuclear technology to leading rogue states. Granting India a loophole that damages a vital treaty and lets New Delhi accelerate production of nuclear bombs makes no sense either.

Mr. Bush should have just stayed home.

Energy, Iran Spur Turkey's Revival Of Nuclear Plans (WP)

By Karl Vick

Washington Post, March 7, 2006

ISTANBUL -- Turkey is reviving its long-deferred quest for nuclear power, pressed both by serious energy shortfalls within its own borders and by strident nuclear ambitions in neighboring Iran that threaten to upset a regional balance of power.

"The rise in oil prices and the need for multiple sources of energy make our need for nuclear energy an utmost priority," Energy Minister Hilmi Guler said last month in announcing plans to build as many as five atomic energy plants. The first, to be located on the Black Sea at Sinop, would come on line in 2012 and ease Turkey's costly dependence on natural gas, 90 percent of which arrives by pipeline from Russia and Iran.

With a rapidly expanding economy, a population of 70 million and scarce petroleum deposits, Turkey appears to be a logical candidate for nuclear power. Guler, who made his remarks while visiting a nuclear plant in Virginia, said the new Turkish reactors could provide about a tenth of the 54,000 megawatts the country expects to need over the next two decades.

"Turkey is a very poor country in respect to power. This has made the country very vulnerable," said Fatih Birol, chief international economist at the energy agency of the Organization for Economic Cooperation and Development, a cooperative of 30 countries that fosters good governance. Birol said that after briefing Turkey's foreign and energy ministers in recent weeks, "I think this government is rather determined to go ahead."

Neighboring Iran's nuclear program, which the United States and other countries have called a cover for developing nuclear weapons, also looms over the revival of Turkey's program, which has had numerous false starts since the early 1960s. Iran and Turkey are almost identical in population and economy and regard each other roughly as equals in a famously combustible region with no dominant power.

DOJ_NMG_0016709

"Iran with nuclear production will be the dominant power," said Ozdem Sanberk, a former ambassador to Washington who heads the Turkish Economic and Social Studies research group in Istanbul. "There will be an asymmetrical relationship."

Sanberk has argued recently that Turkey has no choice but to pursue a nuclear program of its own under the nuclear Non-Proliferation Treaty.

"If we want to leave an independent country to our future generations, we do not have the luxury to delay," Sanberk wrote.

U.S. officials are trying to use Turkey's unease over developments in Iran as part of international efforts to persuade Tehran to suspend its nuclear program. Last month, the U.S. ambassador to the International Atomic Energy Agency, Greg Schulte, spent two days in Ankara for what the U.S. Embassy described as "intense dialogue and cooperation" on the Iranian question. Senior officials of Turkey's ruling Justice and Development Party, whose roots in Islam afford some entree with Tehran, lately have turned up the volume. Foreign Minister Abdullah Gul said Turkey was "saddened by Iran's restarting uranium enrichment."

Any Turkish move toward a nuclear weapons program would mark a dramatic departure from long-standing foreign policy and military doctrine. Guided by the slogan of the country's founder, Mustafa Kemal Ataturk, "Peace at home, peace in the world," Turkish diplomats and the powerful general staff have invested heavily in international institutions, deploying troops repeatedly to Afghanistan and ratifying the most stringent additions to the nuclear Non-Proliferation Treaty.

"Turkey's state policy is always: Play the game within the rules," said Mustafa Kibaroglu, a nuclear proliferation expert at Bilkent University in Ankara. But "if Iran goes nuclear, then who knows?"

In the past, Kibaroglu saw merit in a domestic nuclear industry for Turkey. In a recent interview, however, he argued for alternatives, including improvements to the electrical grid, which leaks as much as a quarter of the power it produces.

"I'm not supporting Turkey's nuclear energy program anymore," he said, "because I'm not clear about what the real intention is. Let's put it that way."

Hamas Revokes Abbas's Wider Powers (FT/REU)

Financial Times, March 7, 2006

Hamas legislators voted on Monday to revoke all decisions made by the previous Palestinian parliament at its final session last month, including laws that gave President Mahmoud Abbas wider powers to appoint some judges.

The move was seen as a challenge to Abbas, whose once-dominant Fatah faction suffered a resounding defeat at the hands of Hamas in parliamentary elections on Jan. 25.

A senior Abbas aide accused Hamas of attempting to oust the Palestinian president.

"We see this as a coup attempt to change the regime and they (Hamas) have to seriously reconsider their decisions," said Tayeb Abdel-Rahim.

In the final session of the previous parliament on Feb. 13, majority Fatah members pushed through an amendment to an existing law, giving Abbas power to appoint judges to a constitutional court without seeking legislative approval.

The judges could be asked to decide whether laws approved by the new parliament are constitutional. Hamas has said the move would effectively give Abbas veto power over new laws.

In the first parliamentary session since being sworn in, Hamas lawmakers -- who dominate the 132-seat parliament, nullified all decisions taken in the session.

"The law is very clear. It gives us the right to endorse or reject the resolutions or the decisions of that session," senior Hamas lawmaker Mahmoud Ramahi told Reuters before the annulment vote was taken.

Fatah members had earlier walked out of the first working session of the new parliament on Monday in protest after Hamas began steps to revoke the previous decisions. © Reuters Limited Click for restrictions

Hamas Legislators Strip Palestinian President Of Wider Powers (NYT)

By Greg Myre

The New York Times, March 7, 2006

JERUSALEM, March 6 — In the first working session of the new Palestinian parliament, Hamas lawmakers voted overwhelmingly on Monday to strip the president of the Palestinian Authority, Mahmoud Abbas, of the expanded powers he had been granted by the legislature before Hamas took control of it.

Shortly after the session began, it degenerated into shouting matches between the rival Hamas and Fatah factions, with Fatah legislators ultimately storming out. After the walkout, lawmakers from Hamas, the radical Islamic faction, voted to nullify all actions taken last month in the final session of the previous legislature, including the decision to give Mr. Abbas additional authority.

DOJ_NMG_0016710

In violence on Monday, an Israeli airstrike on a vehicle killed five people in Gaza City: two Islamic Jihad members, who were the targets, and three young bystanders, Palestinian witnesses and medical workers said.

As for the discord in parliament, Azzam al-Ahmed, the head of the Fatah bloc, said, "We have tried through dialogue and contacts with Hamas to resolve this issue, but they are insisting on domination."

Dr. Mahmoud Zahar, a senior Hamas leader, said, "Every time we present an important point, Azzam al-Ahmed stands up and tries to disrupt our work."

For the most part, Hamas and Fatah have spoken of each other in respectful tones since the Hamas election victory in January, which toppled Fatah, the secular nationalist movement that dominated Palestinian politics for decades. Hamas won 74 of the 132 seats; Fatah captured only 45.

Hamas has invited Fatah and other factions to join the cabinet. But Monday's stormy session pointed to the likelihood of a tense, confrontational relationship, and seemed to rule out the already remote prospect that Fatah might take part.

Monday's events also did not augur well for Mr. Abbas, the Fatah leader, who remains president and will have to work with the Hamas-led cabinet.

On Feb. 13, more than two weeks after the election and only five days before the new parliament was sworn in, Fatah lawmakers in the departing parliament gave additional authority to Mr. Abbas.

The most controversial move formed a nine-judge constitutional court, to be appointed by the president. The court would have the power to strike down laws judged to violate the Basic Law, which effectively serves as the constitution for the Palestinian Authority. Mr. Abbas would then be able to work through the court to veto laws passed by Hamas legislators, according to Hamas.

Fatah lawmakers argued Monday that the session last month was legitimate. But in the view of Hamas, the measures passed in the final session were not valid because many lawmakers had already been voted out of office.

Because Israel has barred many legislators from traveling, those from the Gaza Strip gathered in Gaza City, while West Bank legislators met in Ramallah. They were connected in a video conference, which has become the norm for such sessions.

At Monday's session, 20 of the 132 Palestinian lawmakers were absent. Some are wanted by Israel and are in hiding; others are in Israeli jails. Large portraits of a dozen imprisoned lawmakers were placed in their vacant seats.

Aziz Dweik, the speaker of parliament and a Hamas member, opened Monday's session by saying: "The Palestinian people will be our leaders, and we will want to follow the path of the great Palestinian people, who have showed us how to resist. Our main guide will be the teachings of God and of Muhammad."

In the streets of Gaza City, about a dozen Fatah gunmen walked near the parliament building while the legislature was in session and fired their automatic rifles into the air. After a short time, they left the area.

Israel said the airstrike was aimed at Islamic Jihad, which has been behind many recent attacks against Israel.

The dead were identified by Agence France-Presse as Munir Sukar, 25, and Ashraf Shalluf, 24. Three bystanders also died: Raed al-Batsh, 10; his brother Ala al-Batsh, 14; and Ahmed Sousi, 17, according to Palestinian reports.

Israel's military confirmed that it had carried out the airstrike but said it had no information on casualties.

Also on Monday, two Palestinian teenage brothers were killed in a blast in central Gaza that was caused by a bomb that apparently went off accidentally while they were handling it, the Palestinians said.

Hamas Picks A First-Day Fight (WP)

By Scott Wilson

The Washington Post, March 7, 2006

JERUSALEM, March 6 -- In its first working session, the Hamas-controlled Palestinian legislature swiftly asserted its new political clout Monday by nullifying a law approved by the previous parliament that gave new powers to Palestinian leader Mahmoud Abbas, leader of the rival Fatah movement.

The law was passed on the final day of the lame-duck legislature dominated by Fatah, the secular-nationalist movement that Hamas trounced in the Jan. 25 parliamentary elections. Fatah lawmakers called the Hamas vote to void the law illegal and stormed out of parliament in protest.

The measure gave Abbas, president of the Palestinian Authority, power to name members of a constitutional court without parliamentary approval. The panel rules on the legality of legislation, meaning that Hamas's program could have been blocked if Abbas had packed the court with Fatah members.

The incoming Hamas lawmakers had vowed to reverse the law, which they denounced as an illegitimate attempt to strengthen Abbas's power before its new majority took office.

But in fulfilling that pledge Monday, as the parliament met simultaneously in the West Bank city of Ramallah and the Gaza Strip through a video feed, Hamas infuriated Fatah lawmakers whom they are courting to join a coalition cabinet.

DOJ_NMG_0016711

"They got beaten in the first round," said Ahmed al-Hajj Ali, a Hamas legislator. "This is the first day of the victory of law that has been absent from the Palestinian arena for many, many years."

Hamas, formally known as the Islamic Resistance Movement, is designated a terrorist organization by the United States and the European Union for its declared war against Israel. The party controls 74 of parliament's 132 seats. But it is seeking to bring Fatah into the cabinet to assuage international concern over its political agenda, which has jeopardized the government's lifeblood foreign aid.

Hamas rejects a negotiated two-state solution to the Israeli-Palestinian conflict, the approach endorsed by Fatah. The new cabinet is due to be installed by March 28, but so far, Fatah leaders have said they would rather see Hamas fail on its own than join the cabinet.

Saeb Erekat, a Fatah legislator, said Hamas's decision to void legislation passed by a previous parliament was "absolutely unconstitutional." After meeting with Abbas on Monday evening, Erekat said Fatah would ask the Palestinian High Court on Tuesday to overturn the vote nullifying the law.

"This is a new day in the parliament, a whole new ballgame," Erekat said. "We have a government, an opposition, and Hamas in the driver's seat. If we can manage this, we will be doing a great job. But the question is how do we manage it."

In the Gaza Strip, meanwhile, an Israeli airstrike Monday killed five Palestinians and wounded eight others. Israeli military aircraft fired on a car carrying two senior members of the radical Islamic Jihad movement, the group chiefly responsible for the daily rocket fire from Gaza into southern Israel.

Three bystanders were also killed, including an 8-year-old boy, identified as Raed al-Batesh, and Ahmed al-Sousi, 17.

Hamas Strips Abbas' Powers (WT/AP)

By Ibrahim Barzak, Associated Press

The Washington Times, March 7, 2006

GAZA CITY, Gaza Strip -- Hamas headed into a full-blown confrontation with Palestinian Authority President Mahmoud Abbas yesterday, voting to strip him of powers that he was awarded hastily by his Fatah party in the last session of the outgoing parliament.

The Hamas-Fatah conflict has been simmering since Hamas swept Fatah out of office in the Jan. 25 parliamentary elections, ending four decades of unchallenged rule by the party of the late Yasser Arafat.

Hamas has 74 seats in the new parliament and Fatah has 45. The first order of business for Hamas was to cancel the powers the outgoing parliament gave Mr. Abbas, the Fatah leader, authorizing him to cancel laws passed by the new parliament and appointing Fatah officials to key positions.

In the West Bank administrative capital of Ramallah, Fatah delegates walked out, accusing Hamas of twisting the rules to weaken Mr. Abbas' authority.

About 15 Fatah gunmen marched on parliament in Gaza City, firing into the air. The gunmen eventually headed to a Fatah meeting, where they demanded that their party stay out of the government that Hamas is setting up and threatened to kill any Fatah official who joined.

With its absolute majority, Hamas can set up a government by itself, but Hamas leaders prefer to bring in other parties, partly to deflect international criticism and threatened economic sanctions because of Hamas' record of violence and refusal to recognize Israel.

Israel, which considers Hamas a terror group, refuses to allow members of the Palestinian parliament to travel from Gaza to the West Bank, so the two buildings were linked by teleconferencing equipment to allow the session to take place.

In the final session of the previous parliament on Feb. 13, majority Fatah members pushed through an amendment that gave Mr. Abbas power to appoint judges to a constitutional court without seeking legislative approval.

Yesterday, Hamas easily passed legislation to rescind Mr. Abbas' new powers, but some analysts said Mr. Abbas has the authority to cancel the resolution, perpetuating the standoff.

Fatah complained that the Hamas action yesterday "undermines the basis of dialogue and partnership in any institution with Hamas." A Fatah legislator said the decisions would be appealed to the Palestinian supreme court.

Hamas lawmaker Mushir al-Masri ridiculed the Fatah reaction.

"It is obvious that some people until now have not understood the rules of the democratic game," he said.

Mr. Abbas was elected president of the Palestinian Authority in January 2005, and his term has three years remaining, regardless of the makeup of parliament.

Although Mr. Abbas is seen as a moderate and remains in power, Israel has reacted to the Hamas victory by cutting off transfer of vital tax money to the Palestinian Authority, charging that it now is controlled by terrorists.

DOJ_NMG_0016712

As parliament was wrapping up its session yesterday, the Israeli air force targeted an ice-cream truck in Gaza City, killing two Islamic Jihad militants and three bystanders, two of them children, the military and Palestinian officials said.

A spokesman for the group who gave his name as Abu Dajana vowed retaliation.

"God willing, we are going to get revenge for the honorable bloodshed today," he told reporters outside a morgue at the Shifa hospital in Gaza, where angry Palestinians chanted, "Death to Israel."

Mr. Abbas appealed for international intervention to stop Israeli attacks.

"These aggressive actions threaten the exerted efforts to maintain the truce," he said. "Achieving security would come only through negotiations, not unilateral action and aggression."

The "unilateral action" reference came as Israeli security officials outlined plans for Israel to cut itself off further from the Gaza Strip, after the summer withdrawal of soldiers and settlers. The security chiefs are expected to present the plan after Israel's March 28 election.

Hamas Undoes New Powers Given To Palestinian President (LAT)

The Los Angeles Times, March 7, 2006

JERUSALEM — In a sharp challenge to Palestinian Authority President Mahmoud Abbas, the Hamas-dominated parliament Monday annulled a series of measures by the outgoing legislature aimed at strengthening the president's powers.

Hours later, tensions were stoked when an Israeli airstrike in Gaza City killed two Palestinian militants and three passersby, one of them an 8-year-old boy. Israel acknowledged having carried out the "targeted killing" of an Islamic Jihad field operative it said was responsible for a number of attacks against Israelis. It expressed regret over any civilian casualties.

The confrontation in the Palestinian parliament raised fears that Hamas, the militant movement that decisively won January's legislative elections, was turning its back on the notion of compromise and conciliation with Abbas' Fatah, the more moderate and secular faction it defeated.

Fatah lawmakers walked out in protest just before the annulment vote, which took place during the parliament's first full working session. The new legislature had met just once previously, on Feb. 18, for a ceremonial swearing-in.

Monday's stormy six-hour session was held at separate parliament buildings in the West Bank town of Ramallah and in Gaza City, which were connected by a video link. Many lawmakers from Gaza, including the seaside territory's entire Hamas contingent, are prevented by Israel from traveling to the West Bank.

The distance did little to paper over the clear animosity between the two sides. Fatah stalwart Mohammed Dahlan told the Hamas lawmakers that seeking to annul decisions by the previous parliament was "a dangerous precedent." Mahmoud Zahar, the majority leader and a senior Hamas figure, visibly glowered as he accused Fatah of trying to disrupt the new parliament's work.

"This is something we will not accept," he said.

The annulled measures would have given Abbas the power to appoint a constitutional court with the authority to rule on any dispute between the executive branch and lawmakers, or between the president and the new Cabinet that Hamas is expected to put forth in coming weeks.

The nine-member court also would have had the power to veto laws deemed in violation of the Palestinians' quasi-constitutional Basic Law.

Hamas lawmakers also overturned five appointments to senior posts, all of them Fatah members, which were approved by the previous parliament.

As has often been the case since Hamas' upset victory, the threat of violence hung over the gathering.

Fatah gunmen, who have gone on shooting rampages to protest the loss of government privileges, strode up and down outside the parliament building in Gaza City.

The parliamentary quarrel makes it even more unlikely that Fatah will agree to enter into a governing coalition with Hamas. Fatah's senior leaders as well as the rank and file have brushed aside the prospect of such an alliance.

In Gaza City, an angry crowd gathered outside the main Shifa Hospital, where the bodies of those killed and injured in the Israeli airstrike had been brought. Doctors said eight people were wounded in the explosion in the city's Shajaiyeh district, which came as many people were heading home from work or shopping for evening meals.

A spokesman for Islamic Jihad's military wing promised to take revenge for what he confirmed to be the deaths of two of the group's fighters.

"We will escalate our attacks at the Zionist enemy," said the spokesman, who goes by the name of Abu Hamza. "We will strike at the heart of Israel…. We call on the Zionists to get some coffins ready."

DOJ_NMG_0016713

The Israeli army said in a statement that the raid had targeted Munir Mahmed Mahmed Sukhar, a 30-year-old Islamic Jihad operative it said was responsible for rocket attacks against Israel and the attempted smuggling of would-be suicide bombers and explosives into Israel from Egypt.

Islamic Jihad, which has rejected a truce that is largely being adhered to by Hamas, was responsible for all six suicide bombings in Israel last year. Hamas halted its campaign of suicide bombings when it entered politics a year ago.

In recent months, Israel has steadily been targeting Islamic Jihad militants, often with airstrikes like Monday's in urban areas.

A witness, Zohir Maarouf, said he and other onlookers rushed to help the injured after the massive explosion rocked his busy street.

"I grabbed a woman who was hurt and bleeding and carried her to my car and rushed to the hospital," he said.

In an unrelated incident, two teenage Palestinian brothers were killed in an explosion on the outskirts of the Bureij refugee camp in the central Gaza Strip.

The camp's mayor, Kamal Bughdadi, said the boys, ages 14 and 15, were thought to have been playing with unexploded Israeli ordnance, perhaps a tank shell.

Special correspondents Maher Abukhater in Ramallah and Rushdie abu Alouf in Gaza City contributed to this report.

Hamas Leaders Not Immune From Targeted Killing, Israeli Defense Chief Says (WSJ/AP)

Associated Press

The Wall Street Journal, March 7, 2006

JERUSALEM – Israel's defense minister warned that Hamas leaders, including incoming Palestinian Prime Minister Ismail Haniyeh, will not be immune from pinpointed Israeli killings if the Islamic militant group were to resume its attacks on Israel.

The defense minister, Shaul Mofaz, spoke a day after an Israeli air strike against an ice-cream truck killed two Islamic Jihad militants and three bystanders, including two children, in Gaza City.

Hamas, which is sworn to Israel's destruction, swept January parliamentary elections and is in the process of forming a cabinet. It has rejected international calls to renounce its violent, anti-Israel ideology, but has maintained a year-old moratorium on suicide bombings.

Mr. Mofaz told Israel's Army Radio Tuesday that Israel's policy of targeted killings has proven to be effective, and will continue. "There is no question about its efficacy," Mr. Mofaz said. "Look what happened to Hamas in the years it conducted an untrammeled suicide bombing war against us. When we started the targeted killings, the situation changed, he said.

"We will continue the targeted killings at this pace," Mr. Mofaz added. "No one will be immune."

Asked if Mr. Haniyeh would be a target if Hamas were to resume attacks, Mr. Mofaz replied: "If Hamas, a terror organization that doesn't recognize agreements with us and isn't willing to renounce violence, presents us with the challenge of having to confront a terror organization, then no one there will be immune. Not just Ismail Haniyeh. No one will be immune."

Salah al-Bardawil, a Hamas spokesman, denounced Mr. Mofaz's comments. "This statement and Israeli practices on the ground reflect the bloody, inhumane and inflammatory character of the Zionist enemy," Mr. Bardawil said. "We are not seeking immunity or mercy from Israel. We are in a confrontation. The side that is most steadfast is the side that will survive," he said.

Hamas headed into a domestic confrontation on Monday by stripping Palestinian President Mahmoud Abbas of powers his then-ruling Fatah Party granted him in its last session. Fatah delegates walked out of parliament in protest, charging that Hamas was twisting the rules to nullify Mr. Abbas's additional authority. They plan to extend their protest Tuesday by boycotting the parliamentary session, a Fatah official said.

The Hamas-Fatah conflict has been simmering since Hamas swept Fatah out of office in January, winning 74 seats in the new parliament to Fatah's 45. Azzam al-Ahmed, Fatah's parliamentary faction leader, said Tuesday that Fatah would file suit against Hamas in the Palestinian Supreme Court in the course of the day. "They used their majority to infringe the law on behalf of their interests, and we are resorting now to the judiciary to help us protect the law," Mr. Ahmed said.

Some legal experts say Mr. Abbas has the authority to cancel Hamas's action on Monday, a move that would perpetuate the standoff. Mr. Abbas was elected president of the Palestinian Authority in an election in January 2005, and his term has three years to run, regardless of the makeup of the parliament.

US Says Door Remains Open To N.Korea Nuclear Talks (REU-Y2)

By Paul Eckert

Reuters, March 7, 2006

North Korea should return to six-country nuclear talks regardless of the outcome of discussions on the U.S. financial crackdown on Pyongyang over money laundering, the State Department said on Monday.

DOJ_NMG_0016714

Senior North Korean diplomat Ri Gun was due in New York on Tuesday for a briefing from a U.S. team led by the Treasury Department on measures imposed to combat Pyongyang's suspected money laundering and counterfeiting of U.S. currency.

State Department spokesman Tom Casey took pains to separate the technical explanation of the financial penalties from efforts to get North Korea to rejoin nuclear talks with the United States, China, Japan, Russia and South Korea.

"It's not related to the six-party talks," Casey said.

"We think that regardless of this briefing, and regardless of anything else, that the North Koreans ought to come back to those talks as soon as is possible," he told reporters.

North Korea has denied involvement in any illegal activities and has boycotted the talks since November, arguing that the crackdown was an attempt to topple its leadership.

But the visit to New York by Ri, the North's deputy envoy to the six-party talks, has raised hopes that the North may be poised to return to negotiations hosted by China.

The meeting in New York is "an opportunity for us to explain to the North Koreans simply how our law works and the kind of actions that we took," said Casey, who reiterated Washington's stance on the nuclear talks.

"The door is not closed to the resumption of the six-party talks. We're ready to go back today," he said.

NORTH TO COOPERATE?

The six countries agreed in principle in September that the North would dismantle its nuclear programs in exchange for aid and better diplomatic ties. But their last session in November ended without progress.

Japan's Kyodo news agency quoted Ri as saying in Beijing at the weekend that North Korea was a "victim" of money laundering. "We plan to convey our readiness to cooperate in international efforts" to tackle financial crime, Ri said.

In September, the Treasury Department branded Banco Delta Asia -- a bank in Macau that did business with North Korean firms -- a "willing pawn" in Pyongyang's illicit financial activities. The bank denied the allegations, but said in February that it had stopped dealing with North Korea.

The State Department's International Narcotics Control Strategy Report issued on March 1 cited "compelling evidence" that North Korea was involved in a wide range of criminal activities, including trafficking in counterfeit cigarettes and high-quality counterfeit U.S. currency.

Estimates of North Korea's illicit earnings from trafficking and counterfeiting range as high as $1 billion a year. Some U.S. officials have said Pyongyang has enough paper and ink to make $2 billion in counterfeit American money.

The Institute for International Economics' Marcus Noland, a leading expert on the North's economy, said North Korea probably makes only a fraction of the face value of the fake currency it sells to criminal groups in bulk.

S.Korea, U.S. To Start Free Trade Talks In June (REU-Y2)

By Jack Kim

Reuters, March 6, 2006

The United States and South Korea agreed on Monday to start a formal round of free trade talks in June, dealing a blow to farmers and unionists demonstrating against the plans.

A group of about 40 rallied on Monday in Seoul as trade negotiators from the two countries agreed to hold their first official talks, aimed at bringing down trade barriers, on June 5 to June 9 in Washington.

South Korea's chief negotiator, Kim Jong-hoon, told reporters four additional rounds of talks were planned in alternate capitals for this year to open up trade between the two countries that in 2004 totaled more than $70 billion.

"I believe we should finish this job once we start it," he said, adding the two sides had not set a date for when the talks should be finalized.

"We have not set a deadline for the talks," he said.

Kim and the U.S. chief negotiator Assistant Trade Representative Wendy Cutler met at South Korea's Foreign Ministry.

However, Korean opponents, fearing free trade will spark a flood of cheap imports from the United States that could ruin their livelihoods, promised fierce demonstrations against the government of President Roh Moo-hyun to try to prevent a deal going ahead.

"The Roh Moo-hyun government will never be excused," said Moon Kyung-sik, the head of the Korea Peasants' League. "We will be fighting stronger battles than we did last year."

Two members of the Korea Peasants' League were killed last year in clashes with riot police when they demonstrated against a multi-lateral agreement by South Korea to gradually raise rice imports.

Rice will be one contentious area in the talks between Seoul and Washington. South Korea insists rice will not be part of a free trade deal, while the United States says it must be included in the talks.

DOJ_NMG_0016715

Another contentious area is likely to be exports of South Korea autos to the United States. U.S. car makers are already feeling the heat as they lose market share to Asian producers.

South Korea's service sector could also create bottlenecks in the talks because of large state involvement or restrictions on foreign ownership in such fields as telecommunications.

"Opening agriculture is definitely a big barrier, but opening (South Korean) services will also be important," said Daniella Markheim, a trade economist at the Heritage Foundation in Washington.

Kim said the talks will be open-ended even though White House authority to negotiate a trade pact that can not be amended by Congress runs out in July next year.

President Roh said last month reaching a free trade deal with the United States would be one of the top priorities in the remainder of his term that runs to February 2008.

The United States, which has the world's biggest economy, ran a trade deficit with South Korea, which has the world's 11th biggest economy, of $19.8 billion in 2004.

For OPEC, New Talks On Output (NYT)

By Jad Mouawad

The New York Times, March 7, 2006

VIENNA, March 6 — Strange as it may seem, some OPEC oil ministers are feeling sorry for themselves.

For the last three months, a few of OPEC's top representatives have argued that their oil-producing cartel, which pumps nearly 4 of every 10 barrels of oil produced around the world, needs to trim output to avert a potential oil glut and a — highly hypothetical — price collapse.

The current argument for cutting output first came up when the Organization of the Petroleum Exporting Countries met in December in Kuwait. It resurfaced at a meeting in Vienna the following month and it is likely to top the agenda this week when the group meets here again to consider its production levels.

It almost certainly will not happen. For one thing, Saudi Arabia, by far the most powerful OPEC producer, is opposed. For another, such a decision would probably boomerang.

That is because oil prices, rather than falling as some OPEC ministers had feared, remain so high that any action to limit supply while oil still costs more than $60 a barrel would inevitably lead to a political reaction in oil-consuming countries.

"Many oil ministers are itching for a cut," said Frédéric Lasserre, the head of commodity research at Société Générale in Paris. "But politically a decision to cut supplies would be impossible to explain. They would just look greedy."

So far, oil producers have the best of all worlds: high prices and high demand. After Hurricane Katrina, OPEC waived its traditional country-by-country quota system and said it would keep its oil taps fully open. That policy is still in effect.

But because demand for some oil products typically slows in the second quarter, allowing refiners to build up stocks of gasoline, some of OPEC's harder-line ministers have argued that the group should pare its output to avoid a sharp price drop.

Venezuela's oil minister, Rafael Ramírez, said on Thursday that he would propose a production cut of 500,000 to a million barrels a day. "It's our proposal and we're going to discuss it," he told reporters in Caracas.

In January, a similar proposal was briefly floated by Iran, another of the cartel's price hawks.

The group's current president, Edmund Daukoru of Nigeria, who was in Washington last week to meet with Bush administration officials, also expressed some concerns about the level of commercial inventory held in the United States. Too much oil in stock, he implied, could push prices down.

"Currently we believe there is an overhang," Mr. Daukoru said, according to Bloomberg News. "When there's a huge buildup of stocks, it can swing prices drastically. You can get even a drop of up to $4 on a single day."

That view strikes many oil traders as at odds with market reality. If anything, they say, the greater risk is that prices will rise even further because of domestic turmoil in Mr. Daukoru's backyard and elsewhere.

Rebels seeking a greater share of Nigeria's oil wealth have attacked oil pipelines and production platforms, kidnapped foreign workers and threatened to disrupt exports.

Their campaign has forced Nigeria to cut production by nearly 20 percent, or about 450,000 barrels a day. The country is the biggest oil producer in Africa and the fifth-largest exporter to the United States.

Elsewhere, a drop in Iraq's production, the diplomatic dance surrounding Iran's nuclear program and the failed attacks against the world's largest oil-processing operation in Saudi Arabia have also stoked fears of supply disruptions. Some analysts have argued that the supply cuts from Nigeria and other areas amounted to a de facto cut by OPEC.

All of this has kept oil traders on edge and oil prices between $60 and $70 a barrel. On the New York Mercantile Exchange, crude oil futures closed at $62.41 a barrel Monday.

DOJ_NMG_0016716

Given the volatile market and the lack of much spare capacity, not every producer sees the need for a production cut from OPEC anytime soon. Last month, Saudi Arabia's oil minister, Ali al-Naimi, said OPEC was unlikely to cut production for the rest of the year.

"The Saudis understand the current vulnerability in the market," said Lawrence J. Goldstein, the president of the New York-based Petroleum Industry Research Foundation. "They want to make sure the market is well supplied."

One thing producers can count on is strong demand, particularly from China. This year, oil demand is forecast to grow by 2.2 percent, to 85 million barrels a day, according to the International Energy Agency. Last year, oil consumption rose 1.1 percent and in 2004, it jumped a staggering 3.8 percent, more than twice the last decade's average pace.

Given that longer-term pressure, industry experts see little reason for OPEC to worry about today's inventory levels, which stood on Feb. 24 at 328.3 million barrels, up from 300.9 million barrels a year earlier.

"The market is tenuously balanced because inventories aren't high enough to cover tomorrow's surprises," Mr. Goldstein said. "OPEC has used product seasonality as an excuse but it's not a valid argument."

Much of OPEC's anxiety has less to do with the level of consumer-held oil stocks held than by the price the group will seek to defend. The price of the so-called OPEC basket, a composite of the types of oil sold by OPEC members, was $56 a barrel last week. Most analysts argue that oil ministers will consider action if the OPEC basket price falls to $50.

While little change is actually expected, the talk does serve OPEC's interests.

"Before each meeting, ministers come out and say all sorts of things and create confusion in the market," said Yasser Elguindi, a senior managing director at Medley Global Advisers, a consulting firm for hedge funds. "We call it the 'OPEC kabuki.' "

Saudi Minister Doesn't Want Cut To OPEC Output (WSJ)

By A Wall Street Journal News Roundup

The Wall Street Journal, March 7, 2006

Saudi Arabia's oil minister was reported as saying the Organization of Petroleum Exporting Countries shouldn't trim oil output at this week's meeting. In an interview with pan-Arab daily newspaper Al Hayat, published Monday, Ali Naimi also said fears stemming from threats to oil supplies were the main factor behind prices of more than $60 a barrel.

Mr. Naimi said it wasn't likely an extraordinary OPEC conference would convene before June 11, when the 11-member producer group meets in Venezuela.

"OPEC should not take any decision to decrease production because any such decision would be the main reason for price hikes," Mr. Naimi said. He said oil supply was "stable" while the main reason for high prices were fears of supply disruptions caused by political instability in Nigeria, Venezuela, Iran, Iraq and a failed suicide attempt in Saudi Arabia.

Mr. Naimi said OPEC member states should focus on trying to offset shortages caused by the decrease in supply of 450,000 barrels a day in Nigeria, and 500,000 b/d from the effects of hurricane Katrina in the U.S.

Mr. Naimi was reported as saying state-owned Saudi Arabian Oil Co., or Aramco, and Total SA of France were in advanced talks to build an oil refinery in the Persian Gulf city of Al Jubail. London-based Al Hayat said the refinery, a joint venture between Aramco and Total, would have a production capacity of 400,000 barrels a day and cost $4 billion to $5 billion to build.

Sunday, Mr. Naimi met with French Minister of Economy, Finance and Industry Thierry Breton and Total Chief Executive Thierry Desmarest, who were visiting the country as part of a delegation accompanying French President Jacques Chirac. In Riyadh, Mr. Desmarest said "discussions have been going on for several months." There were a number of options on economic and technical issues being considered, he said.

China Exercises Restraint With Taiwan (USAT)

By Paul Wiseman

USA Today, March 7, 2006

HONG KONG — Not so long ago, China would have been lobbing missiles across the Taiwan Strait, mobilizing troops and issuing bloodcurdling threats in response to any Taiwanese move toward independence.

Times have changed: The mainland calculates that restraint, not retaliation, is the best response to Taiwanese President Chen Shui-bian's provocative decision to scrap a neglected but symbolically important council dedicated to the reunification of China and Taiwan.

“They prefer to keep a low profile,” says Andrew Yang, executive director of the Chinese Council of Advanced Policy Studies, a think tank in the Taiwanese capital Taipei.

DOJ_NMG_0016717

Symbols are everything when it comes to the prickly relationship between China and Taiwan, an island just off the Chinese mainland. Chen took a sledgehammer to one symbol Feb. 27 when he announced he was shutting down the Taiwanese government's National Unification Council. The 16-year-old council hadn't met since Chen took office in 2000, but it represented Taiwan's willingness to consider eventual reunification with the mainland.

Chen's Democratic Progressive Party (DPP) advocates independence, but he promised not to abolish the council in his inaugural address in 2000.

China and Taiwan have been separate since 1949 when the communists seized power on the mainland and Chiang Kai-shek's vanquished Nationalists fled across the Taiwan Strait to set up a rival government. Mainland China has never relinquished its claim to the island of 23 million, threatening to resort to force if necessary to reunite.

More than 87% of Taiwanese responding to a National Chengchi University poll in November want to maintain the status quo, at least for now: real but undeclared independence. Taiwanese don't want to provoke China to war by declaring independence outright.

In 1996, the Chinese fired missiles across the Taiwan Strait in an attempt to intimidate Taiwanese voters into rejecting pro-independence presidential candidate Lee Teng-hui. In response, the United States sent warships to the waters off Taiwan. Four years later, the Chinese threatened to attack Taiwan if voters picked Chen.

After Chen's move last week, China ratcheted up the rhetoric. On Monday, the official Xinhua News Agency quoted Guo Boxiong, vice chairman of the Central Military Commission, as saying the closing of the council was a “grave provocation” that would undermine peace. “We … will never allow ‘Taiwan independence' secessionist forces to make Taiwan secede from China,” he said. Despite the warning, a more-serious Chinese response is not likely. Reasons:

·Threats haven't worked. The bombast of 1996 and 2000 backfired. Both times, Taiwanese voters defied China, electing first Lee and then Chen. “Beijing learned a serious lesson: that Chinese coercive policies are counterproductive in Taiwan,” Chen-yuan Tung, a political analyst at National Chengchi University, wrote last year in the academic journal Asian Survey. China has tried to butter up the Taiwanese public instead. Beijing has encouraged Taiwanese businesses to invest and sell their products on the mainland, welcomed visits by opposition Taiwanese politicians and offered to send pandas to the Taipei Zoo.

·Chinese officials prefer to stand back and let Chen's behavior drive a wedge between Taiwan and its No. 1 ally, the United States. Washington is required by law to help Taiwan defend itself, but the United States opposes Taiwanese independence and wants to prevent a cross-strait military conflict.

“They've decided it's more efficient for Washington to tell Taiwan what to do and what not to do,” says Philip Yang, a political scientist at National Taiwan University. It doesn't always work perfectly: The United States warned Chen against shuttering the reunification council. Taipei decided to cease activity at the council but did not abolish it when Chen took office.

·China has other priorities. Conflict probably would jeopardize economic growth, spoil President Hu Jintao's summit in April in Washington and sabotage the 2008 Olympics in Beijing.

Despite its conciliatory approach to the Taiwanese public, China passed an anti-secession law last year. That created a legal basis for attacking if the island declares independence. The mainland still has more than 700 missiles pointed at Taiwan.

Chen is using political brinkmanship with China to rejuvenate his party's pro-independence base after big losses in local elections in December, says National Taiwan University's Philip Yang. “Chen wants to return to center stage in Taiwanese politics,” he says.

Last week, Chen told The Daily Yomiuri, a Tokyo newspaper, that he wanted to draft a Taiwanese constitution, a move China probably would view as a precursor to a declaration of independence.

“The termination of the reunification council is a signal that Taiwan will take a more antagonistic approach toward China,” Tung says. “There will be trouble among the three parties” — China, Taiwan and the United States.

WTO Finds Mexico Violated Trade Rules In Soft-Drink Case (WSJ/AP)

By Associated Press

The Wall Street Journal, March 7, 2006

GENEVA -- The World Trade Organization ruled that Mexico violated global trade rules in a soft-drink dispute with the U.S.

A WTO panel rejected a Mexican appeal, supporting U.S. claims that Mexico was in breach of international law in imposing a 20% tax on drinks that are sweetened with anything other than cane sugar grown in Mexico.

Mexico was a top market for high-fructose corn syrup from the U.S. before the tax was imposed in 2002. The tax made it too expensive to use the corn sweetener in soft drinks, and today, the U.S. share of the market is about 6% of pretax levels, according to the U.S. trade representative's office.

The dispute over sugar and corn sweetener has cost U.S. corn refiners $944 million annually, according to the Washington-based Corn Refiners Association.

DOJ_NMG_0016718

Separately, officials signed an agreement that will boost shipments of Mexican cement into the U.S., resolving a 16-year trade fight.

The agreement, which will take effect on April 3, will allow imports of Mexican cement to rise to three million tons annually until April 2009, at which point Mexico will be allowed unlimited shipments. U.S. contractors estimate the U.S. imported 2.2 million tons of Mexican cement last year. Penalty tariffs on the cement will drop from $26 a ton to $3 a ton and are scheduled to end completely in April 2009.

'Color' Revolutions Wane (CSM)

By Fred Weir

The Christian Science Monitor, March 7, 2006

MOSCOW - Two key former Soviet states - Belarus and Ukraine - head into elections this month amid dramatic accusations of planned coups, state coercion, and vote-fixing.

But Moscow isn't worried.

Instead, there is a sense of calm and fresh confidence here that contrasts sharply with the Kremlin's panicky reactions to the surge of "colored revolts" that swept through the region in recent years. That revolutionary wave - which began with Georgia's 2003 Rose Revolution and continued with Ukraine's Orange Revolution - seemed unstoppable just a year ago, when Krygyz President Askar Akayev was overthrown.

But the inability of new leaders to fulfill revolutionary pledges, together with the failure of popular pressure to effect change in other Soviet satellite states, has opened the way for Moscow to reassert its influence in the region.

"Those upsurges were the response of people to bad governance and worsening conditions, and the new leaders that came in have shown themselves unable to offer improvements," says Gennady Chuffrin, deputy director of the official Institute of World Economy and International Relations in Moscow. "Ukraine could even see a reversal of what happened a year ago. Obviously the Kremlin would like to see a weakening of [Ukrainian President Viktor] Yushchenko, and I think that's what's going to happen."

Ukraine's economic decline and disillusionment have propelled the pro-Moscow opposition party into first place in opinion surveys for parliamentary elections on March 26. In an ironic twist, the opposition leader Mr. Yanukovych, who was forced out of power after being accused of rigging Ukraine's 2004 presidential election in his favor, claims the authorities are preparing to steal the polls. "The orange team can only remain in power through massive falsifications, and this is what they are doing," he said last week.

According to a survey conducted last week by the Institute of Social and Political Psychology in Kiev, Ukraine, Yanukovych's Party of Regions leads with 27 percent support, followed by former prime minister Yulia Tymoshenko's Bloc with 19 percent and Mr. Yushchenko's Our Ukraine movement with 17 percent.

If the elections bring in a deeply split parliament, it could lead to an extended political crisis that would play into Moscow's hands. A January gas blockade by Russia appears to have deepened Ukraine's economic slump while strengthening the hand of the pro-Moscow Yanukovych.

"We can make Ukraine strong and rich, because democracy is impossible in a poor country," Yanukovych told his campaign workers last week. "Unlike the present leadership, we will not build our strategy to the detriment of relations with Russia."

In Belarus, good relations with Russia are not an issue. The Kremlin will try to put the best face on President Alexander Lukashenko's almost certain third-term victory in polls slated for March 19. But even Russian experts who support the Belarussian leader refrain from calling the election process democratic.

Two candidates running against Lukashenko, Alexander Kozulin and Alexander Milinkevich, have been all but barred from media and their rallies have been broken up by force. Last Thursday, Mr. Kozulin was arrested and allegedly beaten by police after he attempted to stage an impromptu press conference at the Palace of the Republic, Belarus' parliament, in Minsk. "I wanted to tell the truth about the dictatorship that we live in," Kozulin told journalists.

Lukashenko, a former collective farm chairman who has maintained a strict, state-controlled economy, can point to healthy growth rates, low unemployment and stable, if meager, living standards.

"Lukashenko, for all his lack of democracy, has the support of his people and is pursuing sensible policies," says Mikhail Delyagin, director of the independent Globalization Institute in Moscow. "He may be the devil incarnate to the West, but Belarussians regard him as their legitimate leader."

But at least a few Belarussians apparently have other ideas. Last week, the chief of Belarus's KGB security service accused an allegedly foreign-funded opposition group of planning to stage an election-day coup after publishing faked voting results.

DOJ_NMG_0016719

Opposition leaders deny the allegations. Mr. Milinkevich has called for peaceful protests if vote-rigging occurs. But all election-day demonstrations were banned by government decree last week. "These elections are being held under conditions of total falsification and persecution of the opposition," Milinkevich told journalists Friday.

The turmoil prompted US Deputy Secretary of State David Kramer to warn Belarussian leaders that "there will be consequences" for incidents like Kozulin's arrest. "We are paying very close attention to those who are involved in activities that promote either fraudulent elections or promote violence," he said.

Many Russian experts worry that the perceived rivalry between Moscow and Washington for influence in the post-Soviet arena, as played out through these events, is accelerating a chill between the two countries. A US Council on Foreign Relations report released over the weekend noted a "downward trajectory" in US-Russian ties, in part due to Moscow's alleged meddling in the affairs of its neighbors, through energy squeezes and political pressure. "Russia's relations with other post-Soviet states have become a source of significantly heightened US-Russian friction," the report said.

That view is mirrored in Moscow. "Unfortunately, the [wave of revolutions] was perceived in Russia as a kind of conspiracy against Russian interests," mainly promoted by the US, says Irina Zvigelskaya, an analyst with the independent Center for Strategic and International Studies in Moscow. She says the problem results from poor communication over each other's policies in the region. "The US has been obsessed with the notion of democracy, while we have been obsessed with the notion of stability," she says. "It's a deeply fraught misunderstanding"

Russian Panel Backs Pipeline Near Baikal (NYT)

By C. J. Chivers

The New York Times, March 7, 2006

MOSCOW, March 6 — A Russian regulatory panel reviewing plans to build an oil pipeline that would pass along the shoreline of Lake Baikal, the world's most voluminous fresh-water lake, announced Monday that it had approved the proposal over objections from scientists and environmental groups.

The announcement, by the Federal Environmental, Technological and Nuclear Oversight Service, will allow Transneft, the state-owned pipeline monopoly, to proceed with plans to build a pipeline to ship Siberian oil eastward to Asian markets.

The project, roughly 2,500 miles long and known as the East Siberia-Pacific Ocean pipeline, would pass within 900 yards of Lake Baikal's northern shore.

Lake Baikal is a chasm more than a mile deep formed tens of millions of years ago by a crack in the earth's crust.

Nearly 400 miles long and 30 miles wide, it holds more than 20 percent of the world's unfrozen fresh water, and is widely regarded as one of Russia's unique natural gems. Much of its plant and animal life lives nowhere else, and the United Nations has placed the lake on the World Heritage list, a designation it shares with the Serengeti and the Great Barrier Reef.

Scientists have warned that because the region remains seismically active and the lake is still expanding, earthquakes could sever any pipeline, causing its contents to flow into the lake. They also say that because Transneft's planned route will require crossing many of the lake's tributaries, the project will cause erosion and send dirt and pollution into the lake's nearly pristine water.

"It looks very bleak for the environment," said Michiel Hotte of the Zoological Society of London, who has campaigned against the pipeline plan.

The decision announced Monday followed months of maneuvering.

Russia's prime minister, Mikhail Y. Fradkov, signed a resolution late in 2004 detailing the plan, under which Russia, the world's second largest oil exporter, would build the pipeline and diversify its oil sales. President Vladimir V. Putin has signaled his approval.

Opponents of the plan said such powerful support doomed a chance for a genuine environmental review.

They noted that even though a commission of Russian experts working for the oversight service rejected Transneft's planned route on environmental grounds, the ruling was not accepted. Instead, a new commission, with additional members, was ordered to review the project again.

Greenpeace Russia, which has also campaigned against the plan, said that the new commission was under intense pressure, and that its decision was all but a foregone conclusion. Signs of the pressure appeared evident last month, when Transneft's leadership threatened to sue the oversight body and seek financial damages against experts who blocked or delayed the pipe's construction.

Greenpeace Russia said it planned to file a lawsuit against the decision. It was not hopeful about its prospects. "Suing a state-owned business with close ties to the Kremlin is quite a tricky thing," said Roman Vazhenkov, the campaign coordinator. "But we have to try."

DOJ_NMG_0016720

During months of meetings and quarrels, environmentalists had proposed another path for the pipeline that would have swung north and east away from the lake and its watershed before joining another section of the route.

The idea never gained traction with Transneft, whose route follows the course of existing railway lines, making development less expensive. "This is a classic conflict between the cost and the environment," Mr. Hotte said. "It is just a matter of convenience."

A spokesman for Transneft declined Monday to comment about the decision. Company officials have previously played down the environmental concerns, saying the pipeline will be constructed to high standards and noting that trains carrying oil and petroleum products already pass by the lake on the railway each day.

In an interview last month with the state-owned newspaper Rossiskaya Gazeta, Simon Vainshtok, Transneft's president, also suggested that Greenpeace was a tool used by unidentified international interests to prevent Russia from opening Asian and Pacific oil markets.

Transneft has said it hopes to have the pipeline completed within three years at a cost of $11.5 billion. Environmentalists said that even without delays from lawsuits, that schedule was optimistic.

Russia Approves Divisive Pipeline Plan (WP)

By Peter Finn

The Washington Post, March 7, 2006

Critics Cite Threat to Lake Baikal, Political Pressure on Panel

MOSCOW, March 6 -- A controversial plan to build a major oil pipeline passing within half a mile of Siberia's Lake Baikal, the world's largest freshwater lake, was approved by a Russian government regulatory agency Monday.

The decision followed a review process that environmentalists and some Russian experts involved in assessing the route say was marked by manipulation of an expert panel and political pressure on dissenting scientists.

"Even if billions of dollars are at stake, the Russian government cannot put Lake Baikal at risk," Andrei Poyarkov, a member of the expert panel and a biologist at the Institute of Ecology and Evolution in the Russian Academy of Sciences, said at a news conference in Moscow. "They do not have the right."

The head of Rostekhnadzor, the Federal Service for Environmental, Technological and Nuclear Oversight, signed a decree Monday accepting the vote of an expert commission last week to give the project the green light, according to the Russian news agency Interfax.

The expert panel's vote overturned one last month by the same group to reject the route on grounds that a pipeline rupture in the earthquake-prone area could send thousands of tons of crude oil into the lake, a Russian natural treasure. UNESCO designated the lake a World Heritage Site 10 years ago.

Transneft, the state-controlled pipeline operator, is set to build the 2,500-mile pipeline, which would run from Taishet in eastern Siberia to the Pacific coast. With an annual capacity of 80 million tons of crude, it would allow Russia to increase its oil exports to China, Japan and other Asia-Pacific economies.

The $11.5 billion project is a strategic goal of President Vladimir Putin's government, which wants to diversify the country's export network and build Russia into an energy superpower.

Officials at Transneft argue that rerouting the pipeline would add hundreds of millions of dollars to the project's costs and cause major delays in starting construction. They also insist that the project will not endanger the lake.

"Transneft will take all the requisite precautions for Baikal to stay safe," said Simon Vainshtok, president of the company, in an interview last month with the government newspaper Rossiyskaya Gazeta. "For instance, the average thickness of the pipe we use across Russia is 9 millimeters, whereas in the vicinity of Baikal it is 27 millimeters." Those measurements are equivalent to about 0.35 inches and 1.1 inches.

The project has a history of rejection, then acceptance by official bodies. Last September, the Natural Resources Ministry turned down the proposal for the route near Lake Baikal but reversed itself two months later under what Russian news reports have called pressure from the Kremlin.

In a vote last month, 46 of 52 members of an expert panel that Rostekhnadzor had appointed to study the project rejected the route.

After that vote, Rostekhnadzor added 34 experts to the group, all of whom favored the proposed route, according to Gennady Chegasov, a dissenting member of the panel. Chegasov said group members who voted to reject the pipeline came under strong pressure. People were told, "If you vote against construction, it will be the end of your scientific career," he said.

Supporters of the plan still had trouble mustering the two-thirds majority necessary to approve construction, Chegasov said. In the end, 58 members of the expanded commission voted for the project, with 27 against.

DOJ_NMG_0016721

"I remember the Communist Party and the meetings of the party were not like this," said Stanislav Tronin, another member of the panel and a chemist at the Institute for Emergency Situations.

Last week, Putin was presented with a petition signed by 14,000 Russians asking him to take measures to change the route.

A spokesman for Rostekhnadzor could not be reached Monday. In the past week, the agency has declined to comment on allegations that it manipulated the process.

Roman Vazhenkov, the Baikal Campaign coordinator for Greenpeace, said opponents would appeal to the Russian courts and seek to influence international lenders not to finance the pipeline. He said his organization had already written to major banks in the United States, Europe and Japan.

Greenpeace and other opponents of the project said they recognized the need for a pipeline and objected only to the route.

Vainshtok, Transneft's president, told Rossiyskaya Gazeta that Greenpeace and other environmental groups were being manipulated by "puppet masters" outside Russia who do not want China to grow in strength by importing more Russian oil.

Serb Who Aided Hague Tribunal Called A Suicide (NYT)

By Marlise Simons

The New York Times, March 7, 2006

PARIS, March 6 — Milan Babic, a wartime Serbian leader who was closely cooperating with prosecutors, committed suicide in a prison cell of the war crimes tribunal in The Hague, the court said Monday.

Mr. Babic, 50, was found dead in his cell on Sunday evening, the court said in a statement. A senior court official said he had hanged himself, but the court spokeswoman would not confirm that. The official requested anonymity because he was not authorized to speak on the subject.

Mr. Babic's death deprives the prosecution of one of its valuable insider witnesses, a onetime close ally of the former Serbian president, Slobodan Milosevic. He was one of the leaders of an ethnic Serbs' rebellion in Croatia in 1991, and was in close contact with the top of the Serb government in Belgrade.

But he later said he had been deceived by Belgrade and turned himself in and pleaded guilty to crimes against humanity. Since then, he has testified against three senior fellow Serbian politicians, including Mr. Milosevic, and he was to give evidence in three more trials.

"He was a star witness for the prosecution, a key insider, no question," said Edgar Chen, a lawyer who monitors trials at the tribunal for the Coalition for International Justice.

One crucial question, Mr. Chen said, was whether Mr. Babic's past testimony would remain part of the record. Court officials said it was up to the judges in each trial to decide.

Among Serbs, Mr. Babic was widely seen as a turncoat, and tribunal officials had been so concerned for his safety that they would not disclose where he was serving his 13-year sentence.

He was brought back to the Netherlands in February to testify against another Croatian Serb and former comrade, Milan Martic. His testimony was to finish Monday.

It was the second suicide at the prison. Another Croatian Serb, Slavko Dokmanovic, hanged himself with his tie in 1998.

In recent weeks, Mr. Babic described how the rebellion of Croatian Serbs had been run from Serbia and led by Mr. Milosevic.

At various times, Mr. Babic and Mr. Milosevic shouted insults at each other across the courtroom. At one point, Mr. Babic told his former ally: "You dragged the Serbian people into war. You brought shame upon the Serbian people. You brought misfortune on the Croatian people, on the Muslim people."

Where Killers Roam, The Poison Spreads (NYT)

By Nicholas D. Kristof

The New York Times, March 7, 2006

ALONG THE CHAD-SUDAN BORDER

For more than two years, the world has pretty much ignored the genocide unfolding in the Darfur region of Sudan, just as it turned away from the slaughter of Armenians, Jews, Cambodians and Rwandans in earlier decades.

And now, apparently encouraged by the world's acquiescence, Sudan is sending its proxy forces to invade neighboring Chad and kill and rape members of the same African tribes that have already been ethnically cleansed in Darfur itself.

I've spent the last three days along the Chad-Sudan border, where this brutal war is unfolding. But "war" doesn't feel like the right term, for that implies combat between armies.

DOJ_NMG_0016722

What is happening here is more like what happens in a stockyard. Militias backed by Sudan race on camels and pickup trucks into Chadian villages and use machine guns to mow down farming families, whose only offense is that they belong to the wrong tribes and have black skin.

I found it eerie to drive on the dirt track along the border because countless villages have been torched or abandoned. Many tens of thousands of peasants have fled their villages, and you can drive for mile after mile and see no sign of life — except for the smoke of the villages or fields being burned by the Sudan-armed janjaweed militia.

In some places the janjaweed, made up of nomadic Arab tribes that persecute several black African tribes, have turned villages into grazing lands for the livestock they have stolen. At one point, my vehicle got stuck in the sand, and a group of janjaweed children materialized and helped push me out. The children were watching a huge herd of cattle with many different brands. Their fathers were presumably off killing people.

This is my sixth trip to the Darfur region, and I've often seen burned villages within Darfur itself, but now the cancer has spread to Chad.

One young man, Haroun Ismael, returned with me — very nervously — to the edge of his village of Karmadodo, between the towns of Adré and Adé. Eleven days earlier, Sudanese military aircraft and a force of several hundred janjaweed had suddenly attacked the village. Mr. Haroun and his wife had run for their lives, with his wife carrying their 3-month-old baby, Ahmed.

The janjaweed raiders overtook Mr. Haroun's wife and beat her so badly that she is still unconscious. They also grabbed Ahmed from her arms.

"They looked at the baby," Mr. Haroun added, "and since he was a boy, they shot him."

Sudan is also arming and equipping a proxy army of Chadian rebels under a commander named Muhammad Nour. The rebels were repulsed when they tried to invade Chad in late December, and now they are regrouping for another attempt.

Sudan's aim seems to be to overthrow Chad's president and install a pawn in his place, in part because this would allow Sudan's Army to attack rebels in Darfur from both directions.

Regardless of whether the rebels succeed in overthrowing Chad's government, they could ignite a new civil war in Chad. Much will depend on whether the French will use their military base in Chad to fight any Sudanese-sponsored invasion; the French aren't saying what they'll do.

Chad's army is too small to defend its border, so it tries to defend potential invasion routes. That leaves villages in other areas defenseless.

"See that smoke over there?" asked Ali Muhammad in the market town of Borota. "The janjaweed are burning our fields today."

"Most people here have fled," he added, "but I have old family members to look after, so I can't leave."

These areas are too insecure for the United Nations and most international aid workers, who are already doing a heroic and dangerous job in Darfur and Chad. So Mr. Ali and others left behind get no food aid and go hungry.

In the last few weeks, President Bush has shown an increased willingness to address the slaughter in Darfur. He should now encourage the French to use their forces to defend Chad from proxy invasions, make a presidential speech to spotlight the issue, attend a donor conference for Darfur, encourage the use of a NATO bridging force until U.N. peacekeepers can arrive, enforce a no-fly zone and open a new initiative for peace talks among the sheiks of Darfur.

The present Western policy of playing down genocide and hoping it will peter out has proved to be bankrupt practically as well as morally. Granted, there are no neat solutions in Darfur. But ignoring brutality has only magnified it, and it's just shameful to pretend not to notice the terrified villagers here, huddling with their children each night and wondering when they are going to be massacred.

U.S. Pushes Foolish Policy Of 'Baseball, Sí, Academics, No' (USAT)

By DeWayne Wickham

USA Today, March 7, 2006

HAVANA — How insane is this?

Digna Castañeda, a frail and aging professor of Caribbean history and philosophy at the University of Havana, cannot go to Puerto Rico next week to attend the International Congress of the Latin American Studies Association.

She is one of 59 Cuban academics who have been denied visas to enter the U.S. commonwealth to take part in LASA's meeting because the Bush administration says it would be "detrimental to the interests of the United States" to permit them to do so.

On Wednesday, however, Cuba's national baseball team will take the field in San Juan's Hiram Bithorn Stadium to play its first game in the World Baseball Classic, a competition among 16 nations. While a group of young, brawny, bat-wielding Cuban

DOJ_NMG_0016723

men can get visas (admittedly after some strong protests of the U.S. government's initial refusal), a diminutive Havana college professor cannot.

This "baseball si, academics no" policy severely limits the kind of personal contacts and intellectual exchanges between Cubans and Americans that could be the taproot of improved diplomatic relations. One of the workshops scheduled to be held at this year's LASA meeting is titled, "The Never-Ending Cold War: The United States, Cuba, and LASA's Battle for Academic Freedom."

Visas denied

The academics were denied visas pursuant to a 1985 Cold War-era presidential proclamation that "suspends entry into the U.S. of officers and employees of the Cuban government and Communist Party," says the State Department's Justin Higgins. "Cuban academic institutions are state-run, and the Cuban government tightly controls the activities of its academic researchers."

But this rule wasn't always broadly applied. In 2000, '01 and '03, Cuban academics were allowed to attend LASA meetings. Then in October '04 — three months after the Bush administration stepped up its effort to topple the Castro government — more than 60 Cuban scholars were refused visas to attend LASA's meeting in Las Vegas.

Castañeda, who has visited 22 U.S. universities during her 42-year career, is miffed by the denial of her visa. But I am not surprised. The Bush administration has been unwavering in its refusal to let Cuban academics participate in the LASA conference because it's easier to demonize the Castro regime when people-to-people contact is cut off.

Castro the real target

Shielding Americans from some of Cuba's best and brightest people makes it easier for neo-conservatives to portray this island nation as a place that is driven by the thinking of just one man: Fidel Castro.

"Castro has stated publicly that the universities (in Cuba) are available only to those who share his revolutionary beliefs," Higgins says in explaining why the Cuban academics were denied visas.

Apparently, the Bush administration doesn't want Americans to think that saving the lives of impoverished children might be one of Castro's "revolutionary beliefs." Last year, the State Department refused to permit scientist Vicente Verez-Bencomo into the country. He had been invited by California's Tech Museum of Innovation, which wanted to honor him for leading a team of researchers that developed a low-cost synthetic vaccine to keep children from getting meningitis and pneumonia. Each year, these diseases take the lives of up to 700,000 children, many living in countries where regular mass immunizations are too costly. The vaccine Verez-Bencomo helped develop might save millions of lives, Science magazine said.

Cuba is no utopia. It's a communist state struggling to find the right mix of social programs to safeguard its people and joint ventures with foreign capitalists to fuel its sputtering economy.

Cuba is also a nation that is besieged by policies of the Bush administration that are arbitrary, capricious and simpleminded.

Thanks, Neil. We are in good shape.

The first 500 copies of the report will be ready on Friday. Omar is working with OPA on the logistics of getting them up to Chicago in time for the event. The rest of the copies will be ready on Tuesday or Wednesday of next week for distribution here. I will send a reminder email today to OPA, OIPL, and OLA so that they can have their distribution lists ready.

Tucker is working on the AG's remarks; we are providing him with background information. He expects to circulate a draft by the end of this week.

March 3, 2006

VIA FACSIMILE AND FIRST CLASS MAIL

The Honorable Donald H. Rumsfeld
Secretary of Defense
1000 Defense Pentagon
Washington, DC 20301-1000

Dear Mr. Secretary:

Lawyers acting on behalf of Mr. Mohammad Bawazir, a Guantanamo detainee, filed suit this week alleging that authorities have force-fed Mr. Bawazir in a manner that constitutes cruel and inhumane treatment. While I do not believe that intervening to save the life of a detainee who wishes to commit suicide constitutes cruel, inhumane, or degrading treatment, I do have concerns about the intent of the methods employed.

Mr. Bawazir's lawyers have cited several actions that they believe are designed to inflict pain and punishment for the hunger strike, rather than merely to deliver nutrients in an effective and safe manner. They allege that Guantanamo personnel forcibly strapped Mr. Bawazir into a restraint chair; inserted a feeding tube that was larger than the tube that had previously been left in Mr. Bawazir's nose, increasing the pain of the insertion and extraction; poured four bottles of water into his stomach through the nasal gastric tube each time he was fed, even though Mr. Bawazir has never refused to drink water by mouth; and performed other unnecessarily painful procedures.

If these measures are designed to induce detainees, through pain and cruel treatment, to abandon their hunger strikes, that is a disturbing breach of medical ethics and may be in violation of the law recently enacted on detainee treatment. U.S. District Judge Gladys Kessler said in a hearing yesterday, "These allegations . . . describe disgusting treatment that, if proven, is treatment that is cruel, profoundly disturbing and violative of [ ]" United States and foreign treaties banning torture. Why have Guantanamo personnel not chosen to deliver nutrients intravenously while the detainee is restrained and unable to remove his needle or use it as a weapon? Are there not other methods personnel could employ that would lessen the pain accompanying the force-feeding?

I hope you will personally look into this matter as soon as possible. If medical personnel at Guantanamo must intervene to preserve the lives of detainees, they should do so in the most humane and effective manner.

Thank you for responding to this matter, your prompt attention to these concerns is appreciated.

Sincerely,

John McCain

All,

Attached is a letter SECDEF received from Senator McCain regarding the humane treatment of detainees who are involuntarily fed. Although the letter specifically cites the case of Mohammad Bawazir, Senator McCain is primarily asking about the methods we use for involuntarily feeding any detainee who needs it.

SECDEF wants this letter answered by COB today. Some of the information we need for a response is in the most recent filling from the Bawazir case. However, we believe that without the answer to the ICRC report, SECDEF will be unable to accurately respond to this letter. To prevent a phone call from the SECDEF to General Craddock, we need the response to the ICRC report by noon today.

AP Sues for Access to Lindh's Petitions

By MARK SHERMAN

Associated Press Writer

WASHINGTON_The Associated Press sued the Justice Department on Monday for access to American-born Taliban soldier John Walker Lindh's petitions to have his 20-year federal prison sentence shortened.

The federal Freedom of Information Act lawsuit, filed in U.S. District Court in New York, said the government has improperly refused to turn over Lindh's pleas to have his sentence reduced on the grounds that doing so would be an unwarranted invasion of his privacy.

AP's lawyers, in letters to the Justice Department and the lawsuit, however, said Lindh "is a 'high-profile public figure' whose 'privacy interest in his petition is low to nonexistent.'"

Lindh's lawyer, James Brosnahan, also has told the news cooperative that he would have turned over the documents

DOJ_NMG_0016736

himself, but he can't under the terms of Lindh's imprisonment.

The Justice Department did not immediately comment on the lawsuit\l "l".

Lindh, 25, was captured in Afghanistan in November 2001 in the U.S.-led effort to topple the Taliban following the Sept\l "l". 11\l "l" attacks.

Prosecutors charged him with conspiring to kill Americans and supporting terrorists. He pleaded guilty to lesser offenses in 2002, including carrying weapons against U.S. forces. He avoided a potential life sentence and agreed to withdraw claims that he had been abused or tortured in U.S. custody.

The AP said it believes Lindh "contends in his petition that he was prosecuted and convicted unfairly in the immediate wake of the September 11, 2001 attacks, and that he was not, in fact, knowingly fighting the United States in Afghanistan."

The president decides whether to commute sentences or pardon people who have been convicted of crimes and have completed their sentences, usually on the recommendation of the department's Pardon Attorney.

Lindh, who is held at the medium security federal penitentiary in Victorville, Calif., first applied for clemency in September 2004, following up on his request 15 months later. Justice officials told him it would be at least a year before any decision is made.

AP first sought the records on Jan. 4. Nine days later, the department replied it could only release the documents with Lindh's written consent, according to the lawsuit. But Lindh is barred from making any public comment on the matter, including consenting to the release, under the terms of his plea agreement, the suit said.

A similar privacy issue is at the center of a long dispute between AP and the government over access to information about detainees at the U.S. military facility at Guantanamo Bay, Cuba. U.S. District Judge Jed S. Rakoff last month ordered the Pentagon to release the identities of hundreds of detainees.

US asks court to drop ex-detainees' torture suit

WASHINGTON (Reuters) - The U.S. Justice Department asked a federal court on Monday to dismiss a lawsuit charging that Defense Secretary Donald Rumsfeld bears responsibility for the torture of detainees in Iraq and Afghanistan.

In its first substantive response to the lawsuit filed by two rights groups, the Justice Department said the suit against Rumsfeld should be dismissed based on the "absolute immunity" granted federal officials under 1988 legislation on civil lawsuits.

"That act bars suits against federal officials for conduct performed with the scope of their employment except for claims for violations of the Constitution or of federal statutes," the filing said.

The government also said that the court had no jurisdiction over cases seeking damages for alleged violations of international law.

The American Civil Liberties Union and Human Rights First filed suit on March 1, 2005 on behalf of nine men -- five Iraqis and four Afghans -- who said they were tortured by U.S. forces while in custody. None of the men were ever prosecuted. All were released.

The suit focuses on an order Rumsfeld signed in December 2002, that authorized new interrogation techniques for detainees in the "war on terror," including "stress positions," 20-hour interrogations, removal of clothing, the use of dogs and prolonged isolation and sensory deprivation.

The suit alleges that when evidence became overwhelming that prisoners were being tortured, Rumsfeld turned a blind eye.

"Secretary Rumsfeld takes the extraordinary position in his brief that ordering torture was 'within the scope of his employment' as Secretary of Defense. Especially in light of recent finds that no one at senior levels has been held to

account for gross acts of torture and abuse of detainees, this is a remarkable abdication of the responsibility of command," said Deborah Pearlstein, a representative of Human Rights First.

The plaintiffs want the court to declare Rumsfeld's actions unconstitutional and a violation of U.S. and international law. They are also seeking monetary damages for their injuries.

The rights groups amended the original complaint in January to include similar suits against three other senior officers: Col. Thomas Pappas, Gen. Janis Karpinski and Lt. Gen. Ricardo Sanchez.

Supreme Court Sides With Military Recruiters

By Tony Mauro

Rejecting the views of some of the nation's top law schools and professors, the Supreme Court on Monday upheld the so-called Solomon Amendment, which requires universities receiving federal funds to give equal access to military recruiters on campus.

The unanimous decision was a sharp rebuke of the legal academe, many of whose members objected on First Amendment grounds to hosting military recruiters, because of the armed forces' policies against allowing open homosexuals in their ranks.

Writing for the 8-0 Court, Chief Justice John Roberts Jr. said the academics' arguments "trivialize" some of the Court's First Amendment precedents while "exaggerating" others. Justice Samuel Alito Jr. did not participate in the ruling.

"This decision will force our schools to carve out an exception to our nondiscrimination policies for the military, and that is unfortunate," said Carl Monk, executive director of the Association of American Law Schools, which has opposed discrimination in legal education on the basis of sex since 1970. But he said law schools will obey what is now "the law of the land." Monk expressed the hope that "the day is not far off when gays and lesbians will be able to serve as military lawyers."

The challenge to the Solomon Amendment was brought by the Forum for Academic and Institutional Rights, which includes the law school faculties of Stanford, Georgetown, George Washington, New York and other universities. The AALS also joined the challenge, but not as a lead plaintiff.

Georgetown law professor Mark Tushnet, a former president of the AALS, predicted that the ruling would lead to an increase in "the number and intensity of protests against military recruiting in the fall."

Roberts wrote that the law, first passed by Congress in 1994, bears no resemblance to the compelled speech the Court has struck down in other cases, such as *West Virginia Board of Education v. Barnette* and *Wooley v. Maynard*, which said states could not require students to recite the Pledge of Allegiance or force drivers to display a state motto on their license plates.

"There is nothing in this case approaching a Government-mandated pledge or motto that the school must endorse," wrote Roberts. Law schools argued that to give military recruiters equal access, they would be forced to distribute fliers or send e-mails to students that would convey an unwanted government message, but Roberts said those actions are "plainly incidental."

The ruling came as little surprise after oral arguments last December when justices showed little sympathy for the law schools' argument, especially after Solicitor General Paul Clement said law schools were free to show their disapproval of military recruiters in a variety of ways, including organizing student protests against them.

Referring to Clement's statement at oral arguments, Roberts wrote, "The Solomon Amendment neither limits what law schools may say nor requires them to say anything." Roberts added, "As a general matter, the Solomon Amendment regulates conduct, not speech. It affects what law schools must do -- afford equal access to military recruiters -- not what they may or may not say."

Roberts also rejected an argument made by former acting Solicitor General Walter Dellinger III on behalf of a group of Harvard Law School professors that includes Dean Elena Kagan (in her capacity as a professor), Laurence Tribe, Lani Guinier, Randall Kennedy, and Robert Clark (a former dean).

They argued that by giving military recruiters disfavored treatment, Harvard and other law schools were, in fact, abiding by the Solomon Amendment because they would treat any other employer who violated their nondiscrimination policies in the same disfavored way.

DOJ_NMG_0016738

But Roberts, a Harvard Law School alumnus, rejected the argument, asserting that the federal law looks to the actual access military recruiters are given, not to the policy that leads to that access. "It is insufficient for a law school to treat the military as it treats all other employers who violate its nondiscrimination policy," Roberts wrote. "Under the statute, military recruiters must be given the same access as recruiters who comply with the policy."

The law was also attacked as an unconstitutional condition on federal funding, but the Court rejected that argument, too. Roberts said that because Congress has "broad authority" in the area of military recruiting, it could have imposed the access requirement on universities directly, rather than making it a condition of federal funding. "Because the First Amendment would not prevent Congress from directly imposing the Solomon Amendment's access requirement, the statute does not place an unconstitutional condition on the receipt of federal funds," Roberts wrote.

The ruling was Roberts' third majority opinion, and all have been without dissents or separate concurrences. Some critics of the military-recruiting decision took solace in that fact Monday, suggesting it means that the Court was not announcing a sweeping new doctrine.

"The unanimity of today's decision strongly suggests that the Court did not think it was changing any existing constitutional rules," said Steve Shapiro, legal director of the American Civil Liberties Union. "Certainly, nothing in today's decision endorses the military's 'Don't ask, don't tell' policy or any other form of discrimination against gay people."

Feds in N.J. subpoena Bayer over cholesterol drug linked to deaths

WASHINGTON — Bayer AG disclosed Monday that it received a subpoena from the U.S. attorney for New Jersey relating to its withdrawn Baycol/Cerivastatin anti-cholesterol drug, which has allegedly been linked to about 100 deaths.

Bayer received the subpoena last month, according to the company's annual report filed with the Securities and Exchange Commission.

The Germany-based pharmaceutical and chemical company had received a subpoena in January 2004 that also related to its Baycol drug from the Defense Criminal Investigative Service of the U.S. Department of Defense Inspector General.

Bayer withdrew Baycol from the market in August 2001 after it was allegedly linked to about 100 deaths.

The company said that as of Jan. 13, it had paid $1.15 billion to settle 3,082 Baycol cases, without acknowledging any liability.

Bayer American depositary shares fell $1.97, or 4.8 percent, to $38.75 in afternoon trading on the New York Stock Exchange.

Bayer AG also said Monday its fourth-quarter profit fell 33 percent after it set aside $330.5 million to settle claims that it colluded on prices of rubber and plastic in the United States.

Glaxo Loses U.S. Court Bid to Block Generic Flonase

March 6 (Bloomberg) -- GlaxoSmithKline Plc, the world's second-biggest drugmaker, lost a U.S. bid to prevent sales of generic versions of its $900 million-a-year allergy drug Flonase.

Boehringer Ingelheim GmbH's generic version may reach the market tomorrow after U.S. District Judge Andre Davis in Baltimore refused to block sales while Glaxo pursues a lawsuit against the Food and Drug Administration, Glaxo spokeswoman Mary Anne Rhyne said. The company doesn't plan to appeal, she said.

Glaxo sued the FDA Feb. 23, seeking to set aside approval given to Boehringer. The suit claimed the agency hadn't developed appropriate guidelines for determining whether generic copies would work the same as the original nasal spray. Davis on Feb. 24 ordered Boehringer to halt sales until today's hearing.

DOJ_NMG_0016739

``He was giving the FDA an abundant amount of deference on any matter of science and we weren't able to persuade him that this warranted intervention,'' Rhyne said of today's three-hour hearing. Glaxo, based in Brentford, England, won't fight the judge's order, she said.

``From a practical standpoint, once generics have hit the market, it's virtually impossible to restore our sales,'' Rhyne said. ``We asked the judge for an injunction and he said no, so we're not going to go any further.''

Par Agreement

Par Pharmaceutical Cos. has an agreement with Glaxo to sell an ``authorized generic,'' or unbranded version of Glaxo's drug, as soon as an FDA-approved generic reached the market. Par also had to halt sales after the judge's Feb. 24 hearing and will be able to re-enter the market as soon as Boehringer does.

Boehringer, based in Ingelheim, Germany, is the world's biggest family-owned drugmaker. Pfizer Inc. is the world's largest drugmaker overall, ahead of Glaxo.

Glaxo said in its lawsuit against the FDA that the agency doesn't have guidelines in place to determine whether the generic is absorbed in the body the same way as Flonase. Most generic drugs are approved on that basis, known as bioequivalence.

Measuring whether two nasal sprays are similar is different from gauging equivalence in pills or injections because nasal sprays don't enter the bloodstream, which is where scientists often look to see how a chemical is absorbed in the body.

Flonase also is different from many other nasal sprays because its active ingredient, fluticasone propionate, is held in a suspension, which is a solid dispersed throughout a liquid, the lawsuit says. Many sprays are solutions.

The case is Glaxo Group Ltd. v. Michael O. Leavitt, in his official capacity as secretary, Department of Health and Human Services, 06cv469, U.S. District Court for the District of Maryland.

Closing arguments set to begin in war contractor case

ALEXANDRIA, V.A. (AP) -- Closing arguments are expected today in the civil trial of a Middletown-based contractor accused of defrauding the government during work in Iraq.

Scott Custer, co-founder of Custer Battles LLC, testified in his own defense yesterday. He and his business partner Michael Battles are accused of bilking the government of millions of dollars by using sham companies and submitting false invoices.

Custer told jurors about his experiences in Iraq, but he did not spend much time speaking about the whistleblowers' allegations. The whistleblowers who filed the lawsuit could win a portion of any reimbursements made to the government.

Custer and Battles deny the allegations. They say their accusers are disgruntled former employees.

Newspaper companies join in on FEMA fight

By Melanie Payne

Three Gannett Co. newspapers' legal battle with the federal government has found friends in the competition.

On Monday, four newspaper organizations filed a brief supporting The News-Press, Pensacola News Journal and Florida Today in its appeal of a court ruling that allowed the Federal Emergency Management Agency, or FEMA, to keep confidential the names and addresses of people who received disaster aid after four hurricanes hit Florida in 2004.

Attorneys representing The Associated Press, E.W. Scripps Co., Media General Corp. and the Tribune Co. filed a brief Monday urging the 11th U.S. Circuit Court of Appeals to reverse a lower court's ruling.

"We appreciate that AP and others are supporting our effort to compel FEMA to release these records," said Cindy McCurry-Ross, The News-Press managing editor. "The names and addresses we've requested are necessary to determine whether billions of taxpayer dollars were distributed equitably. That kind of analysis of government's performance is truly in the public interest, but can't be done without the detailed information we've asked for."

The News-Press and the other Gannett Inc.-owned papers in Florida have appealed to the Court of Appeals to reverse the November 2005 ruling of Judge John Steele of the U.S. District Court Middle District of Florida Fort Myers Division.

Steele wrote the names and addresses were exempt from the Freedom of Information Act. Disclosing the information would be a "clearly unwarranted invasion of personal privacy," he wrote.

Charles Tobin, the attorney for Gannett Inc. newspapers that filed the lawsuit and appeal, said privacy isn't an issue following a natural disaster — victims are obvious.

"The reason people receive government money is not because they are down on their luck or are ill, that doesn't apply when we are talking about disaster relief," Tobin said. "Everyone knows when you are hit by a hurricane or a tornado. This does not rise to the same level of personal or private matters as some other aid programs."

AP is the world's largest news organization, Media General publishes the Tampa Tribune and the Tribune Co. publishes the South Florida Sun-Sentinel and Orlando Sentinel. The E.W. Scripps Co. publishes The Naples Daily News.

"The decision in this case will have a direct and immediate impact on the ability of the (media outlets) to report about both relief efforts that already have taken place and those that will take place in the future," the attorneys for the media groups wrote in their brief.

Air Force Vet Wants To Limit Proselytizing

(AP) COLORADO SPRINGS, Colo. An Air Force veteran who filed suit seeking a limit on proselytizing in the military said his proposal is less strict than a ban that now covers the American military in the Middle East."Why is (proselytizing) acceptable over here but not in the combat zone?" Mikey Weinstein told The Gazette of Colorado Springs in its Monday editions. "This is hypocrisy of the highest order."

After allegations that evangelical Christians at the Air Force Academy -- including officers -- were pressuring cadets with other beliefs to convert, Weinstein filed a lawsuit in federal court seeking a ban on uninvited proselytizing across the Air Force.The U.S. Central Command prohibits "proselytizing of any religion, faith or practice" for service personnel in the Middle East, including Iraq and Afghanistan.

The order was designed to keep U.S. personnel from trying to convert residents of Islamic nations because of the potential to upset the host government, Central Command spokesman Ensign Joseph P. Vermette said.The order applies to contacts among U.S. service personnel, although on U.S. military camps, local commanders decide how to interpret and enforce it, Vermette said.

Weinstein, an academy graduate who lives in Albuquerque, N.M., said his proposed ban would still allow religious speech if it took place off duty and if all those involved were participating willingly.The Air Force won't comment on the case.

Kyle Fisk, executive administrator of the National Association of Evangelicals in Colorado Springs, said the Central Command order is necessary "for good order and discipline."But he said it should not be applied in this U.S. because it would violate free-speech rights.

Tom Minnery of the conservative Christian ministry Focus on the Family said the rule could be keep soldiers from finding faith when they most need it."On a battlefield is precisely where a soldier might want to begin considering their ultimate values, and to deny someone the chance to depend on God is a concern," said Minnery, vice president of public policy for the Colorado Springs-based group."We would respect it as it applies to conduct in a Muslim country, but as it applies to soldier-to-soldier religious discussion, its problematic," he said.

Michael O'Hanlon of the Washington-based Brookings Institution, a nonpartisan research group, said American forces have to distance themselves from religion in Iraq and Afghanistan to avoid the possibility of increased violence."It raises

the specter of religion and force of arms being combined against the Muslims," O'Hanlon said. "Proselytizing plays into that image and our enemies would use it against us."

> Gonzales defends conditions at American prison camp
> Mar. 8, 2006. 01:00 AM
> TIM HARPER
> <ContentServer?pagename=thestar/Render&c=Page&cid=968332188492&ce=Columnis >
t&colid=1053514084392>
> WASHINGTON BUREAU
> WASHINGTON-U.S. Attorney General Alberto Gonzales painted a brilliant > portrait of the American prison camp at Guantanamo Bay yesterday, touting > its "state-of-the-art'' medical care, healthy meals and unprecedented > legal protections for detainees.
> Gonzales mounted the defence of the much-criticized facility in Cuba > during a speech in London as mounting calls for the closure of the camp > come from U.S. allies and the United Nations.
> He also said his government does not use the airspace or landing strips of > countries in Europe or anywhere else to transport detainees to places > where they will be tortured.
> "Not all of the facts about Guantanamo seem to be widely known,'' Gonzales > told the International Institute for Strategic Studies.
> "Detainees are permitted access to state-of-the-art medical care, healthy > meals consistent with their cultural and religious requirements, and > opportunities to observe their religious beliefs.''
> Calls for the shutdown of the prison camp have come from Britain, France, > Germany and the United Nations and the release last week of some 5,000 > pages of testimony from military panels held at the prison have softened > the edges on some of those who the U.S. have called the worst of the > worst.
> While some of the testimony clearly indicates detainees bent on killing > Westerners, others appear to be perplexed as to why they have been > detained, in some cases for three years or more.
> "For so long we were told these were the most evil, the most dangerous, > the ones who would chew through fuel lines to bring a plane down,'' said > Jumana Musa, advocacy director for Amnesty International USA. "We were > made to think that each one was an individual Osama bin Laden.
> "While some clearly deserve prosecution, these stories undermine the > administration's argument that none of these people can be released.''
> Gonzales told his British audience that he is not aware of any other > nation in history that has afforded such procedural protections to enemy > combatants, including access to civilian courts. He

said more than 265 > detainees have been transferred out of the Cuban prison, but 15 have > returned to fight and have been recaptured or killed on the battlefield.
> "Some say that in pursuing the war on terror America has failed to respect > human rights and the rule of law,'' he said.

>
> US govt lawyer defends conditions at Guantanamo
> Web posted at: 3/8/2006 1:33:25
> Source ::: Reuters
> LONDON: The US government's leading lawyer defended the Guantanamo Bay > prison camp yesterday, saying detainees there were granted > state-of-the-art health care, good food and "unprecedented legal > protection".
> Responding to complaints by the United Nations, human rights groups, > religious leaders and some national governments, Attorney General Alberto > Gonzales said the camp was entirely lawful and essential to the protection > of the United States.
> "We operate Guantanamo because there's a necessity, a need, for the United > States to detain enemy combatants somewhere," he said in a speech in > London. "That was the genesis of Guantanamo. This need continues today."
> Gonzales said all detainees at the camp in eastern Cuba were granted an > assessment by US authorities, a right of reply and a separate, formal > hearing of their case before a three-member tribunal with a right to > appeal.

> "We are aware of no other nation in history that has afforded such > protection for enemy combatants," he told the International Institute for > Strategic Studies (IISS).
> Included among the 500 detainees at the camp are terrorist trainers, bomb > makers, former bodyguards of Al Qaeda leader Osama bin Laden and potential > suicide bombers, he said.
> "Detainees are permitted access to state-of-the-art medical care, healthy > meals consistent with their cultural and religious requirements and an > opportunity to observe religious beliefs."
> Organisations across the world, from the United Nations to the Vatican, > have decried US use of indefinite detentions without charge at Guantanamo.
> In four years, only 10 detainees from the camp have been formally charged > with a crime.
> "Gonzales appears to be missing the point completely. He completely fails > to acknowledge the numerous allegations of ill treatment coming from > Guantanamo," human rights group Amnesty International said.
> "If the conditions of detention for detainees are as great as he claims > then why not allow the UN and human rights organisations such as Amnesty > to visit Guantanamo and speak directly to the detainees themselves," it > added.
> Former detainees have also accused US authorities of using torture at > Guantanamo, a charge denied by the Pentagon.
> "Some say that in pursuing the war on terror, America has failed to > respect human rights and the rule of law," Gonzales said.
> "Nothing could be further from the truth."
> He said around 265 detainees had been either freed or transferred from > Guantanamo since it opened in the wake of the attacks on the United States > on September 11, 2001.
> Of those, 15 had since been recaptured or killed.
> Top US official denies 'torture' US Attorney General Alberto Gonzales has > defended the treatment of terrorism suspects held at the US military base > at Guantanamo Bay.
> Speaking on a visit to the UK, Mr Gonzales denied prisoners at the camp in > Cuba had been tortured.
> He told the BBC that of thousands of allegations of mistreatment, only > five had been found to be genuine.
> He also denied the US had used airports in Europe to transfer prisoners to > countries where they would be tortured.
> The notion that you can't embarrass or insult someone, I would > question if that makes sense today
> Alberto Gonzales
> Last month a UN report called for the prison camp at Guantanamo Bay to be > closed immediately, saying prisoners had no access to justice and were > subjected to treatment that amounted to torture.
> Mr Gonzales said his message to critics was "we hear what you're saying".
> "We are aware of your concerns, we are here to communicate exactly what's > going on in Guantanamo," he said.
> "If there are alternatives, we are always willing to look at that."
> 'Interests of America'
> In an interview with the BBC, Mr Gonzales said the detention camp was > necessary in the interests of America and was consistent with the > provisions of the Geneva Convention, which deals with the treatment of > prisoners of war.
> He would not say whether the US government planned to close the camp.
> "We have been and continue to reassess all of our activities in the war on > terrorism to ensure they are in fact effective and to ensure they are in > fact lawful," Mr Gonzales said.
> The attorney general said only five cases of torture had been verified at > Guantanamo Bay.
> He acknowledged some people had a different interpretation of what > constituted torture.
> "There is a disagreement about what constitutes cruel, inhumane or > degrading treatment. The notion that you can't embarrass or insult > someone, I would question if that makes sense today," he

said.
> Mr Gonzales also said the relevance of some provisions of the Geneva > Convention were questionable in respect to "this new kind of war, against > this new kind of enemy".
> "I'm not talking about the basic provision of human dignity - I'm talking > about provisions that say you have to provide these detainees with > commissary privileges, a monthly allowance - I think the average British > citizen would say that sounds rather strange."
> UK airspace
> Mr Gonzales said the US respected the sovereignty of every European > country when asked if rendition flights had moved through UK airspace or > UK airports without the government's permission.
> The UK government has said there have been no requests for such flights > since 11 September 2001.
> "We do not render individuals where we believe it's more likely than not > that they will be tortured," Mr Gonzales added.
> Mr Gonzales also said he wanted to see the UK-US extradition treaty > ratified as soon as possible.
> The UK government is unhappy their parliament has ratified the treaty, but > the US Senate still has not - which makes extradition easier for > prosecutors in the US than in the UK.
>
>
>
> US A-G defends Guantanamo Bay
> By Stephanie Kennedy
> The Attorney-General of the United States has defended Guantanamo Bay, > arguing the prison camp is lawful and consistent with the Geneva > Convention.
> In the past week, the British Prime Minister and the head of the Anglican > Church, the Archbishop of Canterbury, have called for the US detention > camp to close.

Gonzales defends conditions at American prison camp
Mar. 8, 2006. 01:00 AM
TIM HARPER
WASHINGTON BUREAU

WASHINGTON-U.S. Attorney General Alberto Gonzales painted a brilliant portrait of the American prison camp at Guantanamo Bay yesterday, touting its "state-of-the-art" medical care, healthy meals and unprecedented legal protections for detainees.

Gonzales mounted the defence of the much-criticized facility in Cuba during a speech in London as mounting calls for the closure of the camp come from U.S. allies and the United Nations.

He also said his government does not use the airspace or landing strips of countries in Europe or anywhere else to transport detainees to places where they will be tortured.

"Not all of the facts about Guantanamo seem to be widely known," Gonzales told the International Institute for Strategic Studies.

"Detainees are permitted access to state-of-the-art medical care, healthy meals consistent with their cultural and religious requirements, and opportunities to observe their religious beliefs."

Calls for the shutdown of the prison camp have come from Britain, France, Germany and the United Nations and the release last week of some 5,000 pages of testimony from military panels held at the prison have softened the edges on some of those who the U.S. have called the worst of the worst.

While some of the testimony clearly indicates detainees bent on killing Westerners, others appear to be perplexed as to why they have been detained, in some cases for three years or more.

"For so long we were told these were the most evil, the most dangerous, the ones who would chew through fuel lines to bring a plane down," said Jumana Musa, advocacy director for Amnesty International USA. "We were made to think that each one was an individual Osama bin Laden.

"While some clearly deserve prosecution, these stories undermine the administration's argument that none of these people can be released."

Gonzales told his British audience that he is not aware of any other nation in history that has afforded such procedural protections to enemy combatants, including access to civilian courts. He said more than 265 detainees have been transferred out of the Cuban prison, but 15 have returned to fight and have been recaptured or killed on the battlefield.

"Some say that in pursuing the war on terror America has failed to respect human rights and the rule of law," he said.

"Nothing could be further from the truth. Dealing with captured terrorists is a difficult challenge in this very different kind of war and we are constantly working to improve our detainee policies and procedures."

The U.S., he said, is a great defender of human rights and the rule of law.
Almost 500 prisoners remain, including Canadian teen Omar Khadr, who appears before a tribunal again next month to face murder charges.

Gonzales said many of those remaining are highly dangerous, including "terrorist trainers, bomb makers, terrorist financiers, bodyguards for Osama bin Laden and potential suicide bombers."

Gonzales received some backing for his arguments yesterday from a Belgian senator who had visited Guantanamo for the Organization for Security and Co-operation in Europe, which had urged Washington set a date to close the camp.

Anne Marie Lizin, an outspoken critic of the prison who is preparing a report for the OSCE, told Belgian newspapers that operations had improved and treatment of detainees had become "more humane."

"The prison lives up to European norms; the jail cells are even bigger than those in Belgium," she said.
Gonzales also delivered a highly nuanced denial that his government engages in the practice of rendition, saying Washington does not transport anyone to a country if the administration believes it "more likely than not" that the individual will be tortured.

He added that Washington seeks assurances "where appropriate" that transferred persons will not be tortured.
"We do not use the airports or air space of any country in Europe or anywhere in the world for the purpose of transporting a detainee to a country where he will be tortured," he said.

However, on the same day Gonzales was speaking, *The Guardian* newspaper in London reported the Tony Blair government admitted aircraft suspected of being used by the CIA to transport detainees to secret interrogation centres had used British military airfields.

Britain's armed forces minister, Adam Ingram, told the leader of the Liberal Democrats, Menzies Campbell that two aircraft landed 14 times in Britain between October 2003 and May 2004.

The government did not call them CIA planes in a letter released to the British media.
In Canada, documents obtained by The Canadian Press indicate 20 planes with alleged CIA ties have made 74 flights to Canada since the terrorist attacks of Sept. 11, 2001.

US govt lawyer defends conditions at Guantanamo
Web posted at: 3/8/2006 1:33:25
Source ::: Reuters
LONDON: The US government's leading lawyer defended the Guantanamo Bay prison camp yesterday, saying detainees there were granted state-of-the-art health care, good food and "unprecedented legal protection".

Responding to complaints by the United Nations, human rights groups, religious leaders and some national governments, Attorney General Alberto Gonzales said the camp was entirely lawful and essential to the protection of the United States.

"We operate Guantanamo because there's a necessity, a need, for the United States to detain enemy combatants somewhere," he said in a speech in London. "That was the genesis of

Guantanamo. This need continues today."

Gonzales said all detainees at the camp in eastern Cuba were granted an assessment by US authorities, a right of reply and a separate, formal hearing of their case before a three-member tribunal with a right to appeal.

"We are aware of no other nation in history that has afforded such protection for enemy combatants," he told the International Institute for Strategic Studies (IISS).

Included among the 500 detainees at the camp are terrorist trainers, bomb makers, former bodyguards of Al Qaeda leader Osama bin Laden and potential suicide bombers, he said.

"Detainees are permitted access to state-of-the-art medical care, healthy meals consistent with their cultural and religious requirements and an opportunity to observe religious beliefs."

Organisations across the world, from the United Nations to the Vatican, have decried US use of indefinite detentions without charge at Guantanamo. In four years, only 10 detainees from the camp have been formally charged with a crime.

"Gonzales appears to be missing the point completely. He completely fails to acknowledge the numerous allegations of ill treatment coming from Guantanamo," human rights group Amnesty International said.

"If the conditions of detention for detainees are as great as he claims then why not allow the UN and human rights organisations such as Amnesty to visit Guantanamo and speak directly to the detainees themselves," it added.

Former detainees have also accused US authorities of using torture at Guantanamo, a charge denied by the Pentagon.
"Some say that in pursuing the war on terror, America has failed to respect human rights and the rule of law," Gonzales said.

"Nothing could be further from the truth."
He said around 265 detainees had been either freed or transferred from Guantanamo since it opened in the wake of the attacks on the United States on September 11, 2001.

Of those, 15 had since been recaptured or killed.
Top US official denies 'torture' **US Attorney General Alberto Gonzales has defended the treatment of terrorism suspects held at the US military base at Guantanamo Bay.**

Speaking on a visit to the UK, Mr Gonzales denied prisoners at the camp in Cuba had been tortured.
He told the BBC that of thousands of allegations of mistreatment, only five had been found to be genuine.
He also denied the US had used airports in Europe to transfer prisoners to countries where they would be tortured.

The notion that you can't embarrass or insult someone, I would question if that makes sense today
Alberto Gonzales
Last month a UN report called for the prison camp at Guantanamo Bay to be closed immediately, saying prisoners had no access to justice and were subjected to treatment that amounted to torture.

Mr Gonzales said his message to critics was "we hear what you're saying".
"We are aware of your concerns, we are here to communicate exactly what's going on in Guantanamo," he said.

"If there are alternatives, we are always willing to look at that."

'Interests of America'

In an interview with the BBC, Mr Gonzales said the detention camp was necessary in the interests of America and was consistent with the provisions of the Geneva Convention, which deals with the treatment of prisoners of war.

He would not say whether the US government planned to close the camp.
"We have been and continue to reassess all of our activities in the war on terrorism to ensure they are in fact effective and to ensure they are in fact lawful," Mr Gonzales said.

The attorney general said only five cases of torture had been verified at Guantanamo Bay.
He acknowledged some people had a different interpretation of what constituted torture.
"There is a disagreement about what constitutes cruel, inhumane or degrading treatment. The notion that you can't embarrass or insult someone, I would question if that makes sense today," he said.

Mr Gonzales also said the relevance of some provisions of the Geneva Convention were questionable in respect to "this new kind of war, against this new kind of enemy".

"I'm not talking about the basic provision of human dignity - I'm talking about provisions that say you have to provide these detainees with commissary privileges, a monthly allowance - I think the average British citizen would say that sounds rather strange."

UK airspace

Mr Gonzales said the US respected the sovereignty of every European country when asked if rendition flights had moved through UK airspace or UK airports without the government's permission.

The UK government has said there have been no requests for such flights since 11 September 2001.
"We do not render individuals where we believe it's more likely than not that they will be tortured," Mr Gonzales added.

Mr Gonzales also said he wanted to see the UK-US extradition treaty ratified as soon as possible.
The UK government is unhappy their parliament has ratified the treaty, but the US Senate still has not - which makes extradition easier for prosecutors in the US than in the UK.

US A-G defends Guantanamo Bay

By Stephanie Kennedy

The Attorney-General of the United States has defended Guantanamo Bay, arguing the prison camp is lawful and consistent with the Geneva Convention.

In the past week, the British Prime Minister and the head of the Anglican Church, the Archbishop of Canterbury, have called for the US detention camp to close.

Both have described it as a legal anomaly.
Speaking on a visit to Britain, US Attorney-General Alberto Gonzales insists the camp is consistent with the Geneva Convention, but he questions the relevance of the Convention in today's world.

"I think it's always appropriate to look to see whether or not in this new kind of war against ... this new kind of enemy, are the conventions, are all the provisions of the conventions [relevant]," he said.

enemy, are the conventions, are all the provisions of the conventions [relevant]," he said.

Mr Gonzales rejects allegations that prisoners have been mistreated and tortured at Guantanamo Bay. Australian David Hicks has been held at Guantanamo Bay for more than four years.

Gonzales defends Guantanamo treatment

LONDON, March 7 (UPI) -- On a British tour, U.S. Attorney General Alberto Gonzales defended treatment of terror suspects at the U.S. military base at Guantanamo Bay, Cuba.

Gonzales denied Guantanamo Bay prisoners had been tortured. He also said that of thousands of allegations of mistreatment only five were found to be warranted.

"There is a disagreement about what constitutes cruel, inhumane or degrading treatment," Gonzales told the BBC. "The notion that you can't embarrass or insult someone, I would question if that makes sense today."

Gonzales also denied the United States used European airports to transfer terror suspects to countries where they would be tortured.

"We do not render individuals where we believe it's more likely than not that they will be tortured," Gonzales said.
Gonzales, who said he was in Britain to "provide reassurance," would not say if the United States would heed the U.N. call to close Guantanamo immediately.

Gonzales also called on Britain to ratify a British-U.S. extradition treaty.

Gonzales defends conditions at American prison camp
Mar. 8, 2006. 01:00 AM
TIM HARPER
WASHINGTON BUREAU

WASHINGTON-U.S. Attorney General Alberto Gonzales painted a brilliant portrait of the American prison camp at Guantanamo Bay yesterday, touting its "state-of-the-art" medical care, healthy meals and unprecedented legal protections for detainees.

Gonzales mounted the defence of the much-criticized facility in Cuba during a speech in London as mounting calls for the closure of the camp come from U.S. allies and the United Nations.

He also said his government does not use the airspace or landing strips of countries in Europe or anywhere else to transport detainees to places where they will be tortured.

"Not all of the facts about Guantanamo seem to be widely known," Gonzales told the International Institute for Strategic Studies.

"Detainees are permitted access to state-of-the-art medical care, healthy meals consistent with their cultural and religious requirements, and opportunities to observe their religious beliefs."

Calls for the shutdown of the prison camp have come from Britain, France, Germany and the United Nations and the release last week of some 5,000 pages of testimony from military panels held at the prison have softened the edges on some of those who the U.S. have called the worst of the worst.

While some of the testimony clearly indicates detainees bent on killing Westerners, others appear to be perplexed as to why they have been detained, in some cases for three years or more.

"For so long we were told these were the most evil, the most dangerous, the ones who would chew through fuel lines to bring a plane down," said Jumana Musa, advocacy director for Amnesty International USA. "We were made to think that each one was an individual Osama bin Laden.

"While some clearly deserve prosecution, these stories undermine the administration's argument that none of these people can be released."

Gonzales told his British audience that he is not aware of any other nation in history that has afforded such procedural protections to enemy combatants, including access to civilian courts. He said more than 265 detainees have been transferred out of the Cuban prison, but 15 have returned to fight and have been recaptured or killed on the battlefield.

"Some say that in pursuing the war on terror America has failed to respect human rights and the rule of law," he said.

"Nothing could be further from the truth. Dealing with captured terrorists is a difficult challenge in this very different kind of war and we are constantly working to improve our detainee policies and procedures."

The U.S., he said, is a great defender of human rights and the rule of law.
Almost 500 prisoners remain, including Canadian teen Omar Khadr, who appears before a tribunal again next month to face murder charges.

Gonzales said many of those remaining are highly dangerous, including "terrorist trainers, bomb makers, terrorist financiers, bodyguards for Osama bin Laden and potential suicide bombers."

Gonzales received some backing for his arguments yesterday from a Belgian senator who had visited Guantanamo for the Organization for Security and Co-operation in Europe, which had urged Washington set a date to close the camp.

Anne Marie Lizin, an outspoken critic of the prison who is preparing a report for the OSCE, told Belgian newspapers that operations had improved and treatment of detainees had become "more humane."

"The prison lives up to European norms; the jail cells are even bigger than those in Belgium," she said.
Gonzales also delivered a highly nuanced denial that his government engages in the practice of rendition, saying Washington does not transport anyone to a country if the administration believes it "more likely than not" that the individual will be tortured.

He added that Washington seeks assurances "where appropriate" that transferred persons will not be tortured.
"We do not use the airports or air space of any country in Europe or anywhere in the world for the purpose of transporting a detainee to a country where he will be tortured," he said.

However, on the same day Gonzales was speaking, *The Guardian* newspaper in London reported the Tony Blair government admitted aircraft suspected of being used by the CIA to transport detainees to secret interrogation centres had used British military airfields.

Britain's armed forces minister, Adam Ingram, told the leader of the Liberal Democrats, Menzies Campbell that two aircraft landed 14 times in Britain between October 2003 and May 2004.

"We operate Guantanamo because there's a necessity, a need, for the United States to detain enemy combatants somewhere," he said in a speech in London. "That was the genesis of

Guantanamo. This need continues today."

Gonzales said all detainees at the camp in eastern Cuba were granted an assessment by US authorities, a right of reply and a separate, formal hearing of their case before a three-member tribunal with a right to appeal.

"We are aware of no other nation in history that has afforded such protection for enemy combatants," he told the International Institute for Strategic Studies (IISS).

Included among the 500 detainees at the camp are terrorist trainers, bomb makers, former bodyguards of Al Qaeda leader Osama bin Laden and potential suicide bombers, he said.

"Detainees are permitted access to state-of-the-art medical care, healthy meals consistent with their cultural and religious requirements and an opportunity to observe religious beliefs."

Organisations across the world, from the United Nations to the Vatican, have decried US use of indefinite detentions without charge at Guantanamo. In four years, only 10 detainees from the camp have been formally charged with a crime.

"Gonzales appears to be missing the point completely. He completely fails to acknowledge the numerous allegations of ill treatment coming from Guantanamo," human rights group Amnesty International said.

"If the conditions of detention for detainees are as great as he claims then why not allow the UN and human rights organisations such as Amnesty to visit Guantanamo and speak directly to the detainees themselves," it added.

Former detainees have also accused US authorities of using torture at Guantanamo, a charge denied by the Pentagon.
"Some say that in pursuing the war on terror, America has failed to respect human rights and the rule of law," Gonzales said.

"Nothing could be further from the truth."
He said around 265 detainees had been either freed or transferred from Guantanamo since it opened in the wake of the attacks on the United States on September 11, 2001.

Of those, 15 had since been recaptured or killed.
Top US official denies 'torture' **US Attorney General Alberto Gonzales has defended the treatment of terrorism suspects held at the US military base at Guantanamo Bay.**

Speaking on a visit to the UK, Mr Gonzales denied prisoners at the camp in Cuba had been tortured.
He told the BBC that of thousands of allegations of mistreatment, only five had been found to be genuine.
He also denied the US had used airports in Europe to transfer prisoners to countries where they would be tortured.

The notion that you can't embarrass or insult someone, I would question if that makes sense today
Alberto Gonzales
Last month a UN report called for the prison camp at Guantanamo Bay to be closed immediately, saying prisoners had no access to justice and were subjected to treatment that amounted to torture.

Mr Gonzales said his message to critics was "we hear what you're saying".
"We are aware of your concerns, we are here to communicate exactly what's going on in Guantanamo," he said.

"If there are alternatives, we are always willing to look at that."

'Interests of America'

In an interview with the BBC, Mr Gonzales said the detention camp was necessary in the interests of America and was consistent with the provisions of the Geneva Convention, which deals with the treatment of prisoners of war.

He would not say whether the US government planned to close the camp.
"We have been and continue to reassess all of our activities in the war on terrorism to ensure they are in fact effective and to ensure they are in fact lawful," Mr Gonzales said.

The attorney general said only five cases of torture had been verified at Guantanamo Bay.
He acknowledged some people had a different interpretation of what constituted torture.
"There is a disagreement about what constitutes cruel, inhumane or degrading treatment. The notion that you can't embarrass or insult someone, I would question if that makes sense today," he said.

Mr Gonzales also said the relevance of some provisions of the Geneva Convention were questionable in respect to "this new kind of war, against this new kind of enemy".

"I'm not talking about the basic provision of human dignity - I'm talking about provisions that say you have to provide these detainees with commissary privileges, a monthly allowance - I think the average British citizen would say that sounds rather strange."

UK airspace

Mr Gonzales said the US respected the sovereignty of every European country when asked if rendition flights had moved through UK airspace or UK airports without the government's permission.

The UK government has said there have been no requests for such flights since 11 September 2001.
"We do not render individuals where we believe it's more likely than not that they will be tortured," Mr Gonzales added.

Mr Gonzales also said he wanted to see the UK-US extradition treaty ratified as soon as possible.
The UK government is unhappy their parliament has ratified the treaty, but the US Senate still has not - which makes extradition easier for prosecutors in the US than in the UK.

US A-G defends Guantanamo Bay

By Stephanie Kennedy

The Attorney-General of the United States has defended Guantanamo Bay, arguing the prison camp is lawful and consistent with the Geneva Convention.

In the past week, the British Prime Minister and the head of the Anglican Church, the Archbishop of Canterbury, have called for the US detention camp to close.

Both have described it as a legal anomaly.
Speaking on a visit to Britain, US Attorney-General Alberto Gonzales insists the camp is consistent with the Geneva Convention, but he questions the relevance of the Convention in today's world.

"I think it's always appropriate to look to see whether or not in this new kind of war against ... this new kind of enemy, are the conventions, are all the provisions of the conventions [relevant]," he said.

enemy, are the conventions, are all the provisions of the conventions [relevant]," he said.

Mr Gonzales rejects allegations that prisoners have been mistreated and tortured at Guantanamo Bay. Australian David Hicks has been held at Guantanamo Bay for more than four years.

Gonzales defends Guantanamo treatment

LONDON, March 7 (UPI) -- On a British tour, U.S. Attorney General Alberto Gonzales defended treatment of terror suspects at the U.S. military base at Guantanamo Bay, Cuba.

Gonzales denied Guantanamo Bay prisoners had been tortured. He also said that of thousands of allegations of mistreatment only five were found to be warranted.

"There is a disagreement about what constitutes cruel, inhumane or degrading treatment," Gonzales told the BBC. "The notion that you can't embarrass or insult someone, I would question if that makes sense today."

Gonzales also denied the United States used European airports to transfer terror suspects to countries where they would be tortured.

"We do not render individuals where we believe it's more likely than not that they will be tortured," Gonzales said.
Gonzales, who said he was in Britain to "provide reassurance," would not say if the United States would heed the U.N. call to close Guantanamo immediately.

Gonzales also called on Britain to ratify a British-U.S. extradition treaty.

The Morning Update

Today, President Bush addresses the second White House National Conference on Faith-Based and Community Initiatives, highlighting the important role corporations and foundations play in funding social services. This afternoon, the President signs legislation reauthorizing the USA PATRIOT Act. The Patriot Act gives law enforcement critical tools to prosecute the War on Terror and safeguard the American people.
This legislation also reorganizes the U.S. Department of Justice to help law enforcement detect and disrupt terrorist threats, strengthens seaport and waterway security and provides law enforcement new tools to combat methamphetamine abuse.

From Today's Morning Headlines

In The Gulf Coast Region, President Bush Assesses The Progress Made And The Work Still To Be Done. "Making his 10th visit to this storm-battered region in the last six months, President Bush promised Wednesday to rebuild and strengthen the breached levees that flooded New Orleans during Hurricane Katrina and chastised Congress for cutting $1.5 billion from Louisiana's recovery funds. As pile drivers clanged in the background, Bush pledged that the levees would be 'equal or better to what they were before Katrina.' 'We fully understand that if the people don't have confidence in the levee system, they're not going to want to come back,' <http://www.latimes.com/news/printedition/asection/la-na-bush9mar09,1,7059952,print.story?coll=la-news-a_section> he said. 'People aren't going to want to spend money or invest.' Bush urged Congress to make good on the White House's request in December for $3.1 billion to fund New Orleans levee projects." (Johanna Neuman, "Bush Pledges Support In Visit To Gulf Coast," Los Angeles Times, 3/9/06)

The New York Times Interviews Secretary Chertoff. "Even by Washington's caffeinated standards, Michael Chertoff's to-do list is ambitious: cut illegal immigration, make ports, subways and chemical plants less vulnerable to terrorist attack and fix FEMA fast, because hurricane season starts in less than 90 days. It is part of the reason, Mr.
Chertoff, the secretary of homeland security, is trying to steer clear of the roiling debate over who most deserves blame for the government's flawed response last summer to Hurricane Katrina. 'There is no value in me engaging in that,' Mr. Chertoff said in an interview on Tuesday. 'My job is to make sure we are better prepared for the next time.' <http://www.nytimes.com/2006/03/09/politics/09chertoff.html?_r=2&oref=sl

ogin&pagewanted=print&oref=slogin> " (Eric Lipton, "With An Ambitious Agenda, Homeland Security Chief Steers Clear Of Fault-Finding," The New York Times, 3/9/06)

Attorney General Alberto Gonzales Discusses The Importance Of The Patriot Act. ATTORNEY GENERAL GONZALES: "Well, the Congress has decided to make 14 of the 16 provisions permanent. ... Importantly, though, the Act also creates a new national security division within the Department of Justice. Fighting terrorism is the number one priority for the Department, and we will now have a new assistant attorney general in charge of the national security division and I think that's an important change in the Patriot Act. It provides for additional port security, there are provisions that provide additional enforcement tools for law enforcement in dealing with our ports. It provides for additional tools for the law enforcement community to deal with the severe meth problem that we have in this country. So there are many things that are important for the law enforcement community in order to make our communities safe, not only against terrorists but other kinds of problems like methamphetamines." (CNN's "American Morning," 3/9/06)

The Wall Street Journal Praises The President's Line-Item Veto Proposal.
"An even more promising idea is this week's White House request that Congress pass a line-item veto. <http://online.wsj.com/article/SB114187330501393346.html?mod=opinion_main_review_and_outlooks> This would allow the President to delete, one by one, some of the most wasteful items in the 1,000-page spending bills that are delivered, practically via fork lift, to the Oval Office. Such veto power would give a President greater leverage over bridges to nowhere in Alaska, asparagus research grants and any of the other 13,994 projects that Congressmen delivered to their districts last year to buy votes for their re-election." (Editorial, "Walk The Line," The Wall Street Journal, 3/9/06)

White House Report Finds Faith-Based Organizations Playing A Larger Role In Delivering Services To Americans In Need. "The Bush administration says it is making steady progress in steering more federal taxpayer dollars to religious charities. In the budget year that ended Sept. 30, religious charities received $2.15 billion in federal grants to administer a range of social service programs for the needy. That represented 10.9 percent of the total grants from the seven federal agencies such charities were eligible to apply to in fiscal 2005, according to a White House report obtained by The Associated Press. ...
Jim Towey, who directs the so-called faith-based initiative for Bush, said the most important measure is not how many dollars were awarded but whether religious charities are being treated fairly. 'We think faith-based groups are more competitive, but there are barriers they still face,' he said in an interview. 'The president is changing a culture of grant-making and there's a headwind. <http://www.syracuse.com/newsflash/washington/index.ssf?/base/politics-7/1141895951212600.xml&storylist=washington> '" (Jennifer Loven, "Religious Charities Get More Federal Money," The Associated Press, 3/9/06)

President Bush Signs Executive Order Creating An Office For Faith-Based Initiatives At The Department Of Homeland Security. "A day before returning to the ravaged Gulf Coast region, President Bush created an office for faith-based initiatives within the Department of Homeland Security to improve

created an office for faith-based initiatives within the Department of Homeland Security to improve disaster recovery efforts. ... Homeland Security Secretary Michael Chertoff yesterday said the Bush directive calls for the department to establish a center for faith-based and community initiatives to advance the administration's 'overall mission and strengthen the department's preparedness efforts.' ... He said faith-based and community groups 'played an instrumental role in response to Hurricane Katrina, and they continue to be an essential partner in helping victims in the Gulf-states region rebuild their lives and communities.' <http://www.washingtontimes.com/national/20060309-123110-2544r.htm> " (Eric Pfeiffer, "Bush Orders Faith-Based Office," The Washington Times, 3/9/06)

The United States And Malaysia Agree To Begin Free Trade Negotiations.
"The United States and Malaysia announced Wednesday that they have agreed to begin negotiating a free trade deal to eliminate trade barriers between the two nations. ... 'Malaysia has been at the forefront of the economic dynamism transforming Asia in recent years,' U.S. Trade Representative Rob Portman said at the news conference.
'Malaysia's rapidly growing economy will help generate meaningful export opportunities for our workers, service providers and farmers.

The Morning Update

Today, President Bush addresses the second White House National Conference on Faith-Based and Community Initiatives, highlighting the important role corporations and foundations play in funding social services. This afternoon, the President signs legislation reauthorizing the USA PATRIOT Act. The Patriot Act gives law enforcement critical tools to prosecute the War on Terror and safeguard the American people.
This legislation also reorganizes the U.S. Department of Justice to help law enforcement detect and disrupt terrorist threats, strengthens seaport and waterway security and provides law enforcement new tools to combat methamphetamine abuse.

From Today's Morning Headlines

In The Gulf Coast Region, President Bush Assesses The Progress Made And The Work Still To Be Done. "Making his 10th visit to this storm-battered region in the last six months, President Bush promised Wednesday to rebuild and strengthen the breached levees that flooded New Orleans during Hurricane Katrina and chastised Congress for cutting $1.5 billion from Louisiana's recovery funds. As pile drivers clanged in the background, Bush pledged that the levees would be 'equal or better to what they were before Katrina.' 'We fully understand that if the people don't have confidence in the levee system, they're not going to want to come back,' <http://www.latimes.com/news/printedition/asection/la-na-bush9mar09,1,7059952,print.story?coll=la-news-a_section> he said. 'People aren't going to want to spend money or invest.' Bush urged Congress to make good on the White House's request in December for $3.1 billion to fund New Orleans levee projects." (Johanna Neuman, "Bush Pledges Support In Visit To Gulf Coast," Los Angeles Times, 3/9/06)

The New York Times Interviews Secretary Chertoff. "Even by Washington's caffeinated standards, Michael Chertoff's to-do list is ambitious: cut illegal immigration, make ports, subways and chemical

plants less vulnerable to terrorist attack and fix FEMA fast, because hurricane season starts in less than 90 days. It is part of the reason, Mr.
Chertoff, the secretary of homeland security, is trying to steer clear of the roiling debate over who most deserves blame for the government's flawed response last summer to Hurricane Katrina. 'There is no value in me engaging in that,' Mr. Chertoff said in an interview on Tuesday. 'My job is to make sure we are better prepared for the next time.' <http://www.nytimes.com/2006/03/09/politics/09chertoff .html?_r=2&oref=sl
ogin&pagewanted=print&oref=slogin> " (Eric Lipton, "With An Ambitious Agenda, Homeland Security Chief Steers Clear Of Fault-Finding," The New York Times, 3/9/06)

Attorney General Alberto Gonzales Discusses The Importance Of The Patriot Act. ATTORNEY GENERAL GONZALES: "Well, the Congress has decided to make 14 of the 16 provisions permanent. ... Importantly, though, the Act also creates a new national security division within the Department of Justice. Fighting terrorism is the number one priority for the Department, and we will now have a new assistant attorney general in charge of the national security division and I think that's an important change in the Patriot Act. It provides for additional port security, there are provisions that provide additional enforcement tools for law enforcement in dealing with our ports. It provides for additional tools for the law enforcement community to deal with the severe meth problem that we have in this country. So there are many things that are important for the law enforcement community in order to make our communities safe, not only against terrorists but other kinds of problems like methamphetamines." (CNN's "American Morning," 3/9/06)

The Wall Street Journal Praises The President's Line-Item Veto Proposal.
"An even more promising idea is this week's White House request that Congress pass a line-item veto. <http://online.wsj.com/article/SB114187330501393346.html?mod=opinion_mai
n_review_and_outlooks> This would allow the President to delete, one by one, some of the most wasteful items in the 1,000-page spending bills that are delivered, practically via fork lift, to the Oval Office. Such veto power would give a President greater leverage over bridges to nowhere in Alaska, asparagus research grants and any of the other 13,994 projects that Congressmen delivered to their districts last year to buy votes for their re-election." (Editorial, "Walk The Line," The Wall Street Journal, 3/9/06)

White House Report Finds Faith-Based Organizations Playing A Larger Role In Delivering Services To Americans In Need. "The Bush administration says it is making steady progress in steering more federal taxpayer dollars to religious charities. In the budget year that ended Sept. 30, religious charities received $2.15 billion in federal grants to administer a range of social service programs for the needy. That represented 10.9 percent of the total grants from the seven federal agencies such charities were eligible to apply to in fiscal 2005, according to a White House report obtained by The Associated Press. ...
Jim Towey, who directs the so-called faith-based initiative for Bush, said the most important measure is not how many dollars were awarded but whether religious charities are being treated fairly. 'We think faith-based groups are more competitive, but there are barriers they still face,' he said in an interview. 'The president is changing a culture of grant-making and there's a headwind.
<http://www.syracuse.com/newsflash/washington/index.ssf?/base/politics-7
/1141895951212600.xml&standlist=washington> '" (Jennifer Loven, "Religious Charities Get More

/1141895951212600.xml&storylist=washington> (Jennifer Loven, "Religious Charities Get More Federal Money," The Associated Press, 3/9/06)

President Bush Signs Executive Order Creating An Office For Faith-Based Initiatives At The Department Of Homeland Security. "A day before returning to the ravaged Gulf Coast region, President Bush created an office for faith-based initiatives within the Department of Homeland Security to improve disaster recovery efforts. ... Homeland Security Secretary Michael Chertoff yesterday said the Bush directive calls for the department to establish a center for faith-based and community initiatives to advance the administration's 'overall mission and strengthen the department's preparedness efforts.' ... He said faith-based and community groups 'played an instrumental role in response to Hurricane Katrina, and they continue to be an essential partner in helping victims in the Gulf-states region rebuild their lives and communities.' <http://www.washingtontimes.com/national/20060309-123110-2544r.htm> " (Eric Pfeiffer, "Bush Orders Faith-Based Office," The Washington Times, 3/9/06)

The United States And Malaysia Agree To Begin Free Trade Negotiations.
"The United States and Malaysia announced Wednesday that they have agreed to begin negotiating a free trade deal to eliminate trade barriers between the two nations. ... 'Malaysia has been at the forefront of the economic dynamism transforming Asia in recent years,' U.S. Trade Representative Rob Portman said at the news conference.
'Malaysia's rapidly growing economy will help generate meaningful export opportunities for our workers, service providers and farmers.
<http://news.yahoo.com/s/ap/20060308/ap_on_go_ot/us_malaysia_trade&printer=1;_ylt=AueuDUpBVmuh332oTDd3fVl2wPIE;_ylu=X3oDMTA3MXN1bHE0BHNlYwN0bWE-> '" (Martin Crutsinger, "U.S., Malaysia To Launch Free-Trade Talks," The Associated Press, 3/8/06)

From Today's Morning Headlines

In The Gulf Coast Region, President Bush Assesses The Progress Made And The Work Still To Be Done. "Making his 10th visit to this storm-battered region in the last six months, President Bush promised Wednesday to rebuild and strengthen the breached levees that flooded New Orleans during Hurricane Katrina and chastised Congress for cutting $1.5 billion from Louisiana's recovery funds. As pile drivers clanged in the background, Bush pledged that the levees would be 'equal or better to what they were before Katrina.' 'We fully understand that if the people don't have confidence in the levee system, they're not going to want to come back,' <http://www.latimes.com/news/printedition/asection/la-na-bush9mar09,1,70

59952,print.story?coll=la-news-a_section> he said. 'People aren't going to want to spend money or invest.' Bush urged Congress to make good on the White House's request in December for $3.1 billion to fund New Orleans levee projects." (Johanna Neuman, "Bush Pledges Support In Visit To Gulf Coast," Los Angeles Times, 3/9/06)

The New York Times Interviews Secretary Chertoff. "Even by Washington's caffeinated standards, Michael Chertoff's to-do list is ambitious: cut illegal immigration, make ports, subways and chemical plants less vulnerable to terrorist attack and fix FEMA fast, because hurricane season starts in less than 90 days. It is part of the reason, Mr.
Chertoff, the secretary of homeland security, is trying to steer clear of the roiling debate over who most deserves blame for the government's flawed response last summer to Hurricane Katrina. 'There is no value in me engaging in that,' Mr. Chertoff said in an interview on Tuesday. 'My job is to make sure we are better prepared for the next time.' <http://www.nytimes.com/2006/03/09/politics/09chertoff .html?_r=2&oref=sl
ogin&pagewanted=print&oref=slogin> " (Eric Lipton, "With An Ambitious Agenda, Homeland Security Chief Steers Clear Of Fault-Finding," The New York Times, 3/9/06)

Attorney General Alberto Gonzales Discusses The Importance Of The Patriot Act. ATTORNEY GENERAL GONZALES: "Well, the Congress has decided to make 14 of the 16 provisions permanent. ... Importantly, though, the Act also creates a new national security division within the Department of Justice. Fighting terrorism is the number one priority for the Department, and we will now have a new assistant attorney general in charge of the national security division and I think that's an important change in the Patriot Act. It provides for additional port security, there are provisions that provide additional enforcement tools for law enforcement in dealing with our ports. It provides for additional tools for the law enforcement community to deal with the severe meth problem that we have in this country. So there are many things that are important for the law enforcement community in order to make our communities safe, not only against terrorists but other kinds of problems like methamphetamines." (CNN's "American Morning," 3/9/06)

The Wall Street Journal Praises The President's Line-Item Veto Proposal.
"An even more promising idea is this week's White House request that Congress pass a line-item veto. <http://online.wsj.com/article/SB114187330501393346.html?mod=opinion_mai
n_review_and_outlooks> This would allow the President to delete, one by one, some of the most wasteful items in the 1,000-page spending bills that are delivered, practically via fork lift, to the Oval Office. Such veto power would give a President greater leverage over bridges to nowhere in Alaska, asparagus research grants and any of the other 13,994 projects that Congressmen delivered to their districts last year to buy votes for their re-election." (Editorial, "Walk The Line," The Wall Street Journal, 3/9/06)

White House Report Finds Faith-Based Organizations Playing A Larger Role In Delivering Services To Americans In Need. "The Bush administration says it is making steady progress in steering more federal taxpayer dollars to religious charities. In the budget year that ended Sept. 30, religious charities received $2.15 billion in federal grants to administer a range of social service programs for

the needy. That represented 10.9 percent of the total grants from the seven federal agencies such charities were eligible to apply to in fiscal 2005, according to a White House report obtained by The Associated Press. ...
Jim Towey, who directs the so-called faith-based initiative for Bush, said the most important measure is not how many dollars were awarded but whether religious charities are being treated fairly. 'We think faith-based groups are more competitive, but there are barriers they still face,' he said in an interview. 'The president is changing a culture of grant-making and there's a headwind. <http://www.syracuse.com/newsflash/washington/index.ssf?/base/politics-7/1141895951212600.xml&storylist=washington> '" (Jennifer Loven, "Religious Charities Get More Federal Money," The Associated Press, 3/9/06)

President Bush Signs Executive Order Creating An Office For Faith-Based Initiatives At The Department Of Homeland Security. "A day before returning to the ravaged Gulf Coast region, President Bush created an office for faith-based initiatives within the Department of Homeland Security to improve disaster recovery efforts. ... Homeland Security Secretary Michael Chertoff yesterday said the Bush directive calls for the department to establish a center for faith-based and community initiatives to advance the administration's 'overall mission and strengthen the department's preparedness efforts.' ... He said faith-based and community groups 'played an instrumental role in response to Hurricane Katrina, and they continue to be an essential partner in helping victims in the Gulf-states region rebuild their lives and communities.' <http://www.washingtontimes.com/national/20060309-123110-2544r.htm> " (Eric Pfeiffer, "Bush Orders Faith-Based Office," The Washington Times, 3/9/06)

The United States And Malaysia Agree To Begin Free Trade Negotiations.
"The United States and Malaysia announced Wednesday that they have agreed to begin negotiating a free trade deal to eliminate trade barriers between the two nations. ... 'Malaysia has been at the forefront of the economic dynamism transforming Asia in recent years,' U.S. Trade Representative Rob Portman said at the news conference.
'Malaysia's rapidly growing economy will help generate meaningful export opportunities for our workers, service providers and farmers.
<http://news.yahoo.com/s/ap/20060308/ap_on_go_ot/us_malaysia_trade&printer=1;_ylt=AueuDUpBVmuh332oTDd3fVl2wPIE;_ylu=X3oDMTA3MXN1bHE0BHNlYwN0bWE-> '" (Martin Crutsinger, "U.S., Malaysia To Launch Free-Trade Talks," The Associated Press, 3/8/06)

The Morning Update

Today, President Bush addresses the second White House National Conference on Faith-Based and Community Initiatives, highlighting the important role corporations and foundations play in funding social services. This afternoon, the President signs legislation reauthorizing the USA PATRIOT Act. The Patriot Act gives law enforcement critical tools to prosecute the War on Terror and safeguard the American people.
This legislation also reorganizes the U.S. Department of Justice to help law enforcement detect and disrupt terrorist threats, strengthens seaport and waterway security and provides law enforcement new tools to combat methamphetamine abuse.

The Morning Update

Today, President Bush addresses the second White House National Conference on Faith-Based and Community Initiatives, highlighting the important role corporations and foundations play in funding social services. This afternoon, the President signs legislation reauthorizing the USA PATRIOT Act. The Patriot Act gives law enforcement critical tools to prosecute the War on Terror and safeguard the American people.
This legislation also reorganizes the U.S. Department of Justice to help law enforcement detect and disrupt terrorist threats, strengthens seaport and waterway security and provides law enforcement new tools to combat methamphetamine abuse.

From Today's Morning Headlines

In The Gulf Coast Region, President Bush Assesses The Progress Made And The Work Still To Be Done. "Making his 10th visit to this storm-battered region in the last six months, President Bush promised Wednesday to rebuild and strengthen the breached levees that flooded New Orleans during Hurricane Katrina and chastised Congress for cutting $1.5 billion from Louisiana's recovery funds. As pile drivers clanged in the background, Bush pledged that the levees would be 'equal or better to what they were before Katrina.' 'We fully understand that if the people don't have confidence in the levee system, they're not going to want to come back,' <http://www.latimes.com/news/printedition/asection/la-na-bush9mar09,1,7059952,print.story?coll=la-news-a_section> he said. 'People aren't going to want to spend money or invest.' Bush urged Congress to make good on the White House's request in December for $3.1 billion to fund New Orleans levee projects." (Johanna Neuman, "Bush Pledges Support In Visit To Gulf Coast," Los Angeles Times, 3/9/06)

The New York Times Interviews Secretary Chertoff. "Even by Washington's caffeinated standards, Michael Chertoff's to-do list is ambitious: cut illegal immigration, make ports, subways and chemical plants less vulnerable to terrorist attack and fix FEMA fast, because hurricane season starts in less than 90 days. It is part of the reason, Mr. Chertoff, the secretary of homeland security, is trying to steer clear of the roiling debate over who most deserves blame for the government's flawed response last summer to Hurricane Katrina. 'There is no value in me engaging in that,' Mr. Chertoff said in an interview on Tuesday. 'My job is to make sure we are better prepared for the next time.' <http://www.nytimes.com/2006/03/09/politics/09chertoff.html?_r=2&oref=slogin&pagewanted=print&oref=slogin> " (Eric Lipton, "With An Ambitious Agenda, Homeland Security Chief Steers Clear Of Fault-Finding," The New York Times, 3/9/06)

Attorney General Alberto Gonzales Discusses The Importance Of The Patriot Act. ATTORNEY GENERAL

Attorney General Alberto Gonzales Discusses The Importance Of The Patriot Act. ATTORNEY GENERAL GONZALES: "Well, the Congress has decided to make 14 of the 16 provisions permanent. ... Importantly, though, the Act also creates a new national security division within the Department of Justice. Fighting terrorism is the number one priority for the Department, and we will now have a new assistant attorney general in charge of the national security division and I think that's an important change in the Patriot Act. It provides for additional port security, there are provisions that provide additional enforcement tools for law enforcement in dealing with our ports. It provides for additional tools for the law enforcement community to deal with the severe meth problem that we have in this country. So there are many things that are important for the law enforcement community in order to make our communities safe, not only against terrorists but other kinds of problems like methamphetamines." (CNN's "American Morning," 3/9/06)

The Wall Street Journal Praises The President's Line-Item Veto Proposal.
"An even more promising idea is this week's White House request that Congress pass a line-item veto. <http://online.wsj.com/article/SB114187330501393346.html?mod=opinion_main_review_and_outlooks> This would allow the President to delete, one by one, some of the most wasteful items in the 1,000-page spending bills that are delivered, practically via fork lift, to the Oval Office. Such veto power would give a President greater leverage over bridges to nowhere in Alaska, asparagus research grants and any of the other 13,994 projects that Congressmen delivered to their districts last year to buy votes for their re-election." (Editorial, "Walk The Line," The Wall Street Journal, 3/9/06)

White House Report Finds Faith-Based Organizations Playing A Larger Role In Delivering Services To Americans In Need. "The Bush administration says it is making steady progress in steering more federal taxpayer dollars to religious charities. In the budget year that ended Sept. 30, religious charities received $2.15 billion in federal grants to administer a range of social service programs for the needy. That represented 10.9 percent of the total grants from the seven federal agencies such charities were eligible to apply to in fiscal 2005, according to a White House report obtained by The Associated Press. ...
Jim Towey, who directs the so-called faith-based initiative for Bush, said the most important measure is not how many dollars were awarded but whether religious charities are being treated fairly. 'We think faith-based groups are more competitive, but there are barriers they still face,' he said in an interview. 'The president is changing a culture of grant-making and there's a headwind. <http://www.syracuse.com/newsflash/washington/index.ssf?/base/politics-7/1141895951212600.xml&storylist=washington> '" (Jennifer Loven, "Religious Charities Get More Federal Money," The Associated Press, 3/9/06)

President Bush Signs Executive Order Creating An Office For Faith-Based Initiatives At The Department Of Homeland Security. "A day before returning to the ravaged Gulf Coast region, President Bush created an office for faith-based initiatives within the Department of Homeland Security to improve disaster recovery efforts. ... Homeland Security Secretary Michael Chertoff yesterday said the Bush directive calls for the department to establish a center for faith-based and community initiatives to advance the administration's 'overall mission and strengthen the department's preparedness efforts.' ... He said faith-based and community groups 'played an instrumental role in response to Hurricane Katrina, and they continue to be an essential partner in helping victims in the Gulf-states

region rebuild their lives and communities.' <http://www.washingtontimes.com/national/20060309-123110-2544r.htm> " (Eric Pfeiffer, "Bush Orders Faith-Based Office," The Washington Times, 3/9/06)

The United States And Malaysia Agree To Begin Free Trade Negotiations.
"The United States and Malaysia announced Wednesday that they have agreed to begin negotiating a free trade deal to eliminate trade barriers between the two nations. ... 'Malaysia has been at the forefront of the economic dynamism transforming Asia in recent years,' U.S. Trade Representative Rob Portman said at the news conference.
'Malaysia's rapidly growing economy will help generate meaningful export opportunities for our workers, service providers and farmers.
<http://news.yahoo.com/s/ap/20060308/ap_on_go_ot/us_malaysia_trade&printer=1;_ylt=AueuDUpBVmuh332oTDd3fVl2wPIE;_ylu=X3oDMTA3MXN1bHE0BHNlYwN0bWE-> '" (Martin Crutsinger, "U.S., Malaysia To Launch Free-Trade Talks," The Associated Press, 3/8/06)

U.S. to join lawsuit against Gamco Investors

Shares of Mario Gabelli's Gamco Investors Inc. fell as much as 9.4 percent, after a Justice Department lawyer said the government will seek to pursue civil fraud claims against the money manager and his firm.

Gabelli, 64, is accused in a lawsuit of masterminding a plan to use dozens of related companies and partnerships to bid for licenses the United States sold at discounts to small telecommunications businesses in the 1990s. The suit was filed in 2001 by R.C. Taylor III, a lawyer representing rival bidders at FCC auctions.

At a hearing yesterday in Manhattan, a Justice Department lawyer told U.S. District Judge Paul Crotty the government will file legal papers seeking to join the suit.

In a letter to the judge Tuesday, Assistant U.S. Attorney David Kennedy said the government decided there's "good cause" to intervene, based on information Taylor's lawyers learned during the pretrial discovery phase.

DOJ_NMG_0016816

"There is no fraud involved here," Gabelli said in an interview. "We have been defending ourselves for the last four years. We applaud Judge Crotty's statement to the FCC that he would allow the government to intervene only if we get all the documents we need."

The Justice Department's move is a blow to Gabelli, who has said the government's failure to intervene in the case underscored its weakness, according to John Phillips, an attorney for Taylor. Damages may top $1 billion, Phillips said.

Shares of Rye, N.Y.-based Gamco dropped $3.58, to $40.14, in New York Stock Exchange composite trading, after falling to $39.60 earlier in the afternoon.

Charles Miller, a Justice Department spokesman in Washington, said the government asked Crotty for permission to intervene in the case. The judge is expected to rule on the request sometime after April 10, Miller said.

In bringing the case against Gabelli, Taylor made use of a law that lets individuals sue on the government's behalf for a violation of the federal False Claims Act. If his suit is successful, he'll get a cut of any settlement or verdict.

US says to pursue fraud claims against Mario Gabelli

By Herbert Lash

NEW YORK (Reuters) - The U.S. Justice Department said on Wednesday it would pursue civil fraud claims against investor Mario Gabelli, alleging that he was at the center of a scheme to deceive the government during federal auctions of wireless telephone licenses in the 1990s.

The main charge in the case is that Gabelli and the other defendants created "sham" bidding entities that defrauded the U.S. Treasury by improperly participating in the auctions.

A federal prosecutor told the U.S. District Court in Manhattan that the government would move to take over a 5-year-old lawsuit against Gabelli, one of Wall Street's best-known money managers, and others defendants in the case.

Shares of Gabelli-run GAMCO Investors Inc. <GBL.N> closed down $3.58, or 8.19 percent, at a 9-month low of $40.14 on the New York Stock Exchange.

A call to Gabelli's office in Rye, New York, was not immediately returned.

Justice Department spokesman Charles Miller said Judge Paul Crotty did not immediately rule on the government's request. Crotty set a schedule for both sides to file briefs laying out their arguments between March 20 and April 10, Miller said.

The Wall Street Journal reported in its online edition on Wednesday that Crotty rebuked the Federal Communications Commission (FCC) for failing to provide all the documents that Gabelli's lawyers say they need to complete their defense.

Crotty made the government's entry into the case "contingent on full, open-book discovery on all matters," the newspaper said in its online report.

"I think it's extraordinarily unfair that in the last minute the government has chosen to intervene," said Lanny Breuer, who argued for the defendants at the hearing. "For years they have denied us access to the documents that are at the very heart of this case."

Gabelli and Gabelli-related companies, including Lynch Interactive Corp. <LICT.PK>, are defendants in the lawsuit filed in 2001. Lynch has said that Lynch Corp., as it was previously known, was involved in 12 auctions conducted by the FCC starting a decade ago.

In the auctions, the sole function of Lynch, whose chairman is Gabelli, was to provide bidding and administrative services to bidders, the company has said. Lynch was an investor in some of the bidding entities.

Lynch has said it was always compliant with the law and FCC regulations, and that the suit is without merit.

Gabelli has delivered an enviable record on Wall Street. In a filing last year to raise capital for Gabelli Group Capital Partners Inc. it was revealed GGCP has returned an annual 26.6 percent since 1977, the year he struck out on his own.

In 2004, Gabelli's compensation as chief executive of GAMCO was $55 million, among the top on Wall Street, and he earned more from other investments and as an executive at Lynch.

Gabelli is a disciple of "value" investing. His forte is in-depth research and a willingness to take big stakes in mostly small- and mid-size companies.

Known for his media industry expertise, Gabelli holds or has held stakes in such newspaper stocks Tribune Co., Knight Ridder Inc., Media General, Journal Register Co. and in the broadcasting area Liberty Corp.

U.S. Plans To Take On Gabelli Suit

JULIE CRESWELL

The Justice Department announced yesterday that it planned to pursue civil fraud claims against the famed money manager Mario J. Gabelli, contending that he orchestrated a scheme to deceive the Federal Communications Commission in its auctions of wireless spectrum licenses several years ago.

The government is seeking to take over a civil lawsuit filed by a lawyer involved in the auction process in 2001 that accused Mr. Gabelli of creating a series of sham companies that bid for F.C. C. licenses at a discount under a program that favored minorities and small businesses.

Most of these Gabelli-backed companies were fronted by individuals who were friends and associates of Mr. Gabelli, and they had virtually no experience in telecommunications. Most never began companies to sell cellphone or other communication-related services to customers, according to the 2001 lawsuit.

Instead, the companies resold the licenses at a substantial profit, with Mr. Gabelli pocketing much of the gains, according to the lawsuit.

One of the nation's most successful and high-profile fund managers, Mr. Gabelli controls a number of companies worth an estimated total of $28 billion. He is often featured on investor panels and quoted in the financial media.

For years, Mr. Gabelli has played down the significance of the lawsuit, calling it a "form of legal extortion" in a statement last fall. He suggested the suit was started by contingency-fee lawyers seeking their own payday from him. He also said the suit lacked merit because the Justice Department initially chose not to join it.

That, of course, may no longer be the case. The judge overseeing the lawsuit did not immediately rule on the government's motion. A trial is scheduled to begin June 1, although it could be delayed. A call to Mr. Gabelli's office was not returned. A call to the assistant United States attorney on the case was also not returned.

Nevertheless, the government's attempt to join the suit was seen as a major victory for the side of the plaintiff, Russell C. Taylor III, who was working at a law firm involved in the bidding for spectrum. He contends he witnessed anomalies in the process by the companies backed by Mr. Gabelli.

"This is excellent news," said John Phillips, a lawyer representing Mr. Taylor. "It's good to have the government totally acknowledging the validity of the claim and joining us in it."

A lawyer for Mr. Gabelli questioned the timing of the government's move. "I think the government conduct in this matter has been outrageous," said Lanny A. Breuer, a former White House lawyer in the Clinton administration who also represents the Gabelli-backed bidders. "For years we asked the government to play a constructive role in this case and on the eve of trial to come in and try to join the case while they denied us most of the documents we were entitled to and are essential to this defense is very, very troubling."

This is not the only lawsuit facing Mr. Gabelli, who made his name by being a vocal champion of shareholder rights. Some of his biggest shareholders in a Gabelli-controlled private holding company have sued him, saying he paid himself too well -- his publicly disclosed income for 2004 was $55 million -- and he prevented them from selling their shares.

The fraud lawsuit against Mr. Gabelli dates to the mid-1990's, when the F.C.C., noting the intense demand from communications companies, realized it had been giving away a prized asset for years: radio spectrum. It decided to auction off slices of radio spectrum for cellphone service.

Recognizing that large telecommunications companies could spend billions and billions of dollars -- which they did -- to win spectrum in the auctions, the government set aside some of that spectrum to be sold at a steep discount to small and minority-owned companies.

In the days and even, in some cases, hours before the series of auctions from 1995 to 2000, several bidding corporations were founded by individuals with close ties to Mr. Gabelli and were financed by a private investment firm Mr. Gabelli owns, according to the lawsuit.

Most of these individuals lacked any experience in the telecommunications industry. One company was headed by Trent Tucker, a former New York Knicks basketball player who later claimed in testimony that he believed he was a passive investor in the scheme.

Another company was owned by Thomas Wilson, a Bronxville dentist and the father-in-law of Mr. Gabelli's daughter. Other companies were owned by an aerobics instructor and a couple that owned a media buying and advertising agency, according to the lawsuit.

Bidding for spectrum through these companies, Mr. Gabelli and his partners qualified for $90 million in federal discounts as well as $70 million in favorable financing on federal loans, the lawsuit stated. After being awarded the licenses, several were quickly sold to others at a profit of $206 million, the lawsuit states.

"The F.C.C. did not know all of these relationships or the scope of control that Mr. Gabelli had," Mr. Phillips, the plaintiff's lawyer, said.

Mr. Breuer disputes that, claiming that the commission knew that most of the minority-owned companies or small businesses that applied for the licenses had bigger backers helping them and that the practice was not discouraged. He also argued that the F.C.C. never required the companies or individuals applying for the licenses to have a background in telecommunications. Furthermore, he argues, many of the Gabelli-backed companies indeed tried to start communications operations.

"It was an extraordinary time -- people overbid throughout the auctions and a number of players went bankrupt," Mr. Breuer said. "The notion that there were start-ups that were unable to have a viable business and should be sued is a very unfair perspective."

Mr. Breuer added that the F.C.C. approved not only every sale of the spectrum through the bidding process, but also every resale of that spectrum.

The lawsuit itself is filed under the False\l "l" Claims\l "l" Act\l "l", a Civil War-era law that is designed to uncover fraud against the government. If the case is successful, the plaintiff, Mr. Taylor, could receive 15 percent to 25 percent of the amount recovered. He is currently studying for a doctorate at Oxford University, according to his lawyer, Mr. Phillips.

ACLU

3/8/06

Press Release: Justice Department Continues to Stonewall on NSA Spying Program

NEW YORK -- In response to a Freedom of Information Act lawsuit filed by the American Civil Liberties Union, the Justice Department today released documents on the National Security Agency's warrantless surveillance program. The ACLU said the documents, which include copies of articles, are a rehash of previously released information, and charged the Justice Department with stonewalling on its obligation to comply with a federal court order.

The following statement can be attributed to ACLU Executive Director Anthony D. Romero.

"We would expect the Bush administration to be eager to prove to the public that the warrantless surveillance program is within the law, as Alberto Gonzales has repeatedly claimed. Yet the government is once again refusing to inform Americans of the extent to which our phone conversations and e-mails are monitored without court approval.

"History has shown us what happens when the government is allowed to spy on innocent Americans without judicial or

Congressional oversight, and Congress passed laws to prevent the abuses of executive power that were rampant in the Nixon administration. Our system of democracy depends on the rule of law, and not even the president can issue illegal orders that violate Constitutional principles.

“Some members of Congress are now eager to bail out the president by ratifying his illegal actions after the fact, but we need to know the facts before we take any action.”

Guidant Consultant Advised Company to Release Data on Defects

BARRY MEIER

A consultant to the Guidant Corporation told the company last year that he believed it had a clear ethical obligation to tell physicians about heart device defects, and urged the company to overhaul its practices, newly released court records show.

In two lengthy memos written just before Guidant was swamped by controversy, the consultant, Dr. Richard N. Fogoros, also told company executives that their decision to withhold such data, while statistically defensible, was questionable. Guidant executives have said they did not publicize defibrillator flaws because they believed that patients faced greater risks from replacement surgery than from the units.

But Dr. Fogoros wrote in one memo that Guidant, while believing it was acting in the patients' best interest, had violated a "sacred obligation" it had to doctors by interposing its medical judgment for theirs. He also noted that Guidant had a clear conflict of interest that would naturally lead it to disclose product failures only when "absolutely necessary."

"This conflict is not tacit; it is obvious for all to see," Dr. Fogoros wrote in a memo dated May 18, 2005, adding: "This means that when a tragedy occurs, our decisions will be viewed in the harshest light possible, without any objective consideration of the statistical niceties supporting our actions."

The memos written by Dr. Fogoros are the latest internal Guidant records to emerge from a product liability lawsuit filed in a Texas state court by patients who received Guidant defibrillators. But the records may prove especially damaging to Guidant because they show a paid company consultant challenging the device maker's arguments.

The documents are coming to light as the Senate Judiciary Committee plans a hearing tomorrow on possible new legislation that would make it a federal crime for a corporate executive to knowingly ship a defective product. A Minneapolis physician, Dr. Barry J. Maron, whose patient died after a defective Guidant defibrillator failed, is among those scheduled to testify.

Steven Tragash, a spokesman for Guidant, which is based in Indianapolis, said that the documents show "how seriously Guidant takes the very complex issue of how and when to communicate potential device risks to physicians -- an issue that is being discussed and debated not only within Guidant but also throughout the industry."

Dr. Fogoros, reached at his home yesterday, said that he had been asked not to comment on the documents because of active litigation. His memos, which make reference to Dr. Maron, were written last May, just after Guidant told the Minneapolis physician that his patient had had a type of Guidant defibrillator that had repeatedly short-circuited because of an electrical flaw.

At that time, Dr. Maron and a colleague, Dr. Robert G. Hauser, urged Guidant to alert physicians about the device defect; the company had known about the defect for three years. When the company failed to do so, Dr. Maron and Dr. Hauser contacted other physicians and The New York Times, which published an article in late May about the device.

Since then, Guidant has recalled more than 100,000 implantable heart devices, including three models of defibrillators with similar electrical flaws that are tied to at least seven patient deaths. The company, which is based in Indianapolis, is also under investigation by the Justice\l "l" Department\l "l" and the Food and Drug Administration. A defibrillator is a device that uses electricity to disrupt a potentially fatal heart rhythm.

Last May, soon after The Times article appeared, Dr. Fogoros, a cardiologist in Pittsburgh, vigorously defended Guidant's

actions in an interview published on an Internet Web site, Medscape. "This data's been out there in public the whole time," he was quoted as saying about the device.

But in internal memos written just two weeks earlier, Dr. Fogoros took a critical view of Guidant's policies when it came to data disclosure, court records show. Those memos also predict, with an eerie accuracy, the crisis Guidant soon faced for failing to inform doctors about potentially life-threatening product failures.

In essence, Dr. Fogoros wrote that Guidant was caught between two conflicting impulses, doing what it thought was right for patients or allowing doctors to make that decision. He concluded that the company, by withholding data from doctors, was violating its basic ethical duty to be forthright with physicians.

"Neither the doctor nor the patient consider themselves to have signed up to have Guidant dictate any treatment plans," he wrote in his May 18 memo.

Dr. Fogoros, who is still a company consultant, sent his memos to the chief medical officer of Guidant's heart device unit, Dr. Joseph M. Smith, records show. Guidant executives like Dr. Smith have defended their decision not to alert doctors earlier about heart device problems by saying that doing so would have led to unnecessary removal, exposing patients to surgical complications like infections.

Implanted heart devices like defibrillators are normally replaced about every five years when their batteries wear out. A doctor's decision about whether to replace a problem device earlier is typically determined by how dependent an individual patient is on that unit.

Dr. Fogoros wrote that he believed the device used by Dr. Maron's patient was highly reliable and that Guidant executives could defend their actions with statistics. But he added that it was in Guidant's best interest to overhaul its disclosure practices by "exposing our dirty laundry as well as our clean."

He also predicted that the company's use of statistics to justify its actions would be met "with bitter derision towards our protests that we were only acting with the patients' best interests at heart."

Dr. Fogoros added that the company could capitalize on a new disclosure by combining its announcement with a marketing initiative for a new product that allowed doctors to remotely monitor how well a device is working. He also wrote that he believed that Guidant products were superior to its competitors'.

It was not until November, six months later, that Guidant began publishing more detailed information on product failure.

The newly released documents were produced by Guidant in connection with a pretrial deposition last month of Dr. Smith, the Guidant medical officer. Last Friday, the company dropped its claim that Dr. Fogoros's memos were covered by a court-approved confidentiality agreement, said Robert Hilliard, a plaintiffs' lawyer in Corpus Christi, Tex., who is involved in the case.

Women sue U.S. Marine Corps over alleged recruiter rapes

By KIM CURTIS

Associated Press Writer

SAN FRANCISCO_Two teenage women who claimed a pair of former U.S\l "I". Marine Corps sergeants raped them in a Ukiah recruiting office sued\l "I" the military Wednesday in federal court for failing to properly train and supervise recruiters.

The women were in high school and excited about joining the military when Joseph Dunzweiler, 25, and Brian Fukushima, 26, allegedly raped them, according to the suit. Both recruiters were demoted after court-martial proceedings, but acquitted of the most serious charges they faced.

"I have always dreamed of being a Marine," plaintiff Jane Doe said in a news release. "I thought they were the elite, the

ones who stepped in when everyone else failed."

The 18-year-old women, who were allowed to sue under pseudonyms to protect their identities, live and work in Ukiah, according to their lawyers.

"They would still consider a career in the Marines if they could be safe," attorney Michael Sorgen said at a news conference. "We're asking the court to order them to do what is necessary to prevent this from happening again."

The suit, which names as defendants the recruiters, the U.S. Navy and the U.S. Marine Corps, which is under Navy jurisdiction, seeks unspecified damages and an injunction requiring the military to train and supervise recruiters, among other things.

Both of the recruiters have been discharged from the military, according to Marine spokesman Maj. Joe Kloppel, who said he's prohibited from revealing the type of discharge for privacy reasons. He also cited their courts-martial and discharges as evidence the Marine Corps doesn't "tolerate this type of behavior."

"The Marine Corps did everything they could under the Uniform Code of Military Justice to discipline" Dunzweiler and Fukushima, Kloppel said.

Jane Doe said she met Dunzweiler in late 2004, according to court documents. She said he immediately began flirting with her, asking her out and sending her e-mails about how he wanted to "get her alone."

Doe believed Dunzweiler would prevent her from joining the Marines if she didn't have sex with him, according to the suit. Doe said Dunzweiler ended up giving her chlamydia, a sexually transmitted disease.

The other plaintiff, identified only as Mary Roe, said Fukushima raped her during a "sleep over" at the Ukiah recruiting office, according to court documents. She said she was very drunk, had vomited and could not resist his advances.

The women's lawsuit is among the latest in a series of scandals involving military recruiters. Last week, 14 Army recruiters in Southern California were suspended amid accusations they falsified documents.

The former Ukiah recruiters were court-martialed last fall at the Marine Corps Recruit Depot in San Diego.

Dunzweiler was acquitted of charges he coerced Doe into having sex with him. However, he was convicted of five lesser charges, including having sex with another potential recruit, providing alcohol to recruits, lying to Marine investigators and asking others to lie for him. His rank was reduced from staff sergeant to corporal, his pay was docked by $1,300 and he was restricted to base for 30 days.

Sgt. Brian Fukushima was convicted by the military in September of sexual misconduct, adultery and asking a recruit to lie to investigators. He was demoted to corporal, his pay was docked $1,000 and he was restricted to base for 30 days.

A third recruiter, Marine Reserve Cpl. William McFarland admitted guilt and was punished administratively. The terms of his agreement weren't made public and he isn't part of Wednesday's suit.

A third woman who accused one of the recruiters of rape in court-martial proceedings opted not to join the suit, according to lawyer Barry Vogel.

The case is Doe and Roe v. Gen. Michael W. Hagee et al, C061777.

Judge rules that rice levy legal

LITTLE ROCK_A judge has ruled in favor of the Arkansas Rice Research and Promotion Board in a lawsuit that challenged how the board spends money collected from growers.

DOJ_NMG_0016822

Circuit Judge Willard Proctor Jr. on Tuesday turned away a lawsuit by Lonoke County rice farmer Joe Bryant, who claimed fees collected by the board were improperly used for promotion. Proctor, in granting a summary judgment, said the money collected between Aug. 25, 2004, and March 15, 2005, was for research, not marketing.

Bryant, represented by Little Rock attorney Richard Quintus, also has a suit pending against the Arkansas Wheat Promotion Board. Quintus represents other clients in suits against the Arkansas Beef Council and the Arkansas Pork Producers Association.

Each of the suits asks a judge to allow farmers to opt out of paying mandatory marketing fees.

Proctor's ruling could be appealed.

In May, the U.S. Supreme Court ruled that the federal government could legally require beef producers to pay for an advertising program, even though some producers did not want the advertising.

The court ruled that the government is allowed to promote its own message and compel producers to pay fees.

Attorney Bill Waddell, representing the rice board, said the compelled speech issue was not a valid concern in Bryant's suit because the rice board used money from producers for research. Quintus said the rice program is different from the beef program that was before the U.S\l "l". Supreme Court.

Assessments were made mandatory by a state law passed in 1995. The board was sued\l "l" by Gulf Rice Arkansas Inc., now Harvest Rice Inc., on grounds that the assessment was an illegal tax. The Arkansas Supreme Court ruled in 1999 in favor of Gulf Rice and ordered it be repaid $50,000.

"As a result of that decision, the Legislature passed Act 16 of 1999; they removed the unlawful delegation (of taxing authority) issue," Waddell said.

A subsequent class-action suit over buyer assessments was settled in 2004 with buyers eligible for credits on future marketing assessments equal to a third of their original claims.

Last year, the Legislature modified the rice program again, stipulating that 1.35 cents per bushel paid by farmers on rice they produce would go to research, and 1.35 cents a bushel paid by buyers would go to marketing and promotion.

DoD lawyers to review judge's block of new personnel system

WASHINGTON, - Defense Department attorneys are reviewing a federal judge's decision today to block a new civilian personnel system to determine their next course of action a system spokesperson, said.

U.S. District Judge Emmet G. Sullivan ruled that provisions of the new National Security Personnel System would fail to protect civilian employees' ability to bargain collectively.

These provisions pertain to labor relations, collective bargaining, independent third-party review, adverse actions and the National Security Labor Relations Board, DoD's proposed internal labor relations panel, the 77-page decision noted.

The American Federation of Government Employees and 12 other labor unions filed a lawsuit in February 2005 challenging the proposed system.

NSPS is one of Defense Secretary Donald H. Rumsfeld's key initiatives designed to transform DoD operations to better meet 21st-century needs. It is designed to replace an outdated, 50-year-old civilian personnel management system that had rewarded employees for length of service rather than performance.

The new program, in development since 2003, seeks to replace the current general-schedule personnel ranking system with broad pay bands.

DoD and the Office of Personnel Management are partnering to establish the system, which eventually will affect more than 650,000 DoD civilian employees.

Wall Street Journal

Editorial: Union War Rules; A not-so-flexible civilian fighting machine.

Tuesday, March 7, 2006

In drafting the U.S. Constitution, the Founders entrusted national security largely to the President. But to protect the Republic today, the executive branch must first comply with something James Madison never imagined--union work rules.

In a decision last week, Judge Emmet Sullivan sided with union plaintiffs and tossed out the Pentagon's new personnel system, which the Defense Secretary and White House say they need to safeguard the nation. His decision comes after Judge Rosemary Collyer threw out a similar personnel system at the Department of Homeland Security in August. (That case is under appeal.) The danger here is that the collective bargaining rights of 650,000 civilian workers will trump the collective right we all have to a military organized to confront 21st-century threats.

Five years ago Donald Rumsfeld returned to the Pentagon to find that its personnel system was even more outdated than GM's. He was forced to negotiate with some 1,300 unions and operate under rules that rewarded seniority over initiative and prevented managers from redirecting civilian workers to more pressing assignments.

This is especially dangerous in wartime, when the Defense Department is forced to put uniformed troops in administrative jobs that need to be filled quickly even though they might be put to better use in Iraq or elsewhere. Not so incidentally, this also encourages the best civilian employees to quit for private-sector jobs that will pay them better. So the Administration pushed for basing pay on performance, allowing the Pentagon to shift employees to meet emerging threats and allowing the new rules to go into effect even if the American Federation of Government Employees and other unions didn't agree to them.

Congress passed legislation in 2003 calling for a "flexible" and "contemporary" personnel system. But thanks in large part to Republican Senators Susan Collins (Maine) and George Voinovich (Ohio), the bill also said that employees were allowed to "bargain collectively" through their unions. It was on this hook that Judge Sullivan hung his decision, arguing that the new regulations would undermine agreements with union officials. So the Defense Department can have a new personnel system, but only if it's identical to the old system.

We doubt this is what Congress had in mind in authorizing the Pentagon to "establish and from time to time adjust a labor relations system . . . to address the unique role that the Department's civilian workforce plays in supporting the Department's national security mission." It also glosses over the fact that, even under the new system, Defense officials will continue to negotiate with unions over pay and benefits and will have every incentive to use their new flexibility in a way that doesn't produce labor tension.

The Pentagon hasn't decided what its next step will be, but we hope the Administration will appeal. It's hard to see how Mr. Rumsfeld's drive to use his uniformed soldiers more effectively can proceed if he doesn't gain the flexibility to better use his civilian workforce. Improving Defense's "tooth-to-tail ratio" requires getting the civilian tail out from under union work rules.

From Today's Morning Headlines

President Bush Signs Legislation Reauthorizing The USA PATRIOT Act. "A day before parts of the USA Patriot Act were to expire, President Bush <http://search.news.yahoo.com/search/news/?p=President+Bush> signed into law a renewal that will allow the government to keep using terror-fighting tools passed after the Sept. 11, 2001, attacks. ... The president said the law has been vital to protecting Americans from terrorists. 'The Patriot Act has accomplished exactly what it was designed to do,' Bush said during a signing ceremony in the White House East Room. 'It has helped us detect terrorist cells, disrupt terrorist plots and save American lives. <http://news.yahoo.com/s/ap/20060310/ap_on_go_pr_wh/bush_patriot_act;_ylt=AkONUC.V381enZ5.MP6ltytp24cA;_ylu=X3oDMTA5aHJvMDdwBHNlYwN5bmNhdA--> '" (Nedra Pickler, "Bush Signs Renewal Of Patriot Act," The Associated Press, 3/10/06)

Senate Intelligence Committee Chairman Pat Roberts (R-KS) Says The NSA Terrorist Surveillance Program Is "Legal And Constitutional." "As chairman of the Senate Intelligence Committee, I - along with Vice Chairman Jay Rockefeller, D-W.Va. - have been briefed on the details of this program since 2003. I believe this terrorist surveillance capability is legal and constitutional. The courts have long recognized that the president has the authority under the Constitution to conduct 'warrantless' surveillance for the purposes of collecting foreign intelligence. ... It's the constitutional duty of the executive branch to make the tough decisions necessary to win wars. <http://www.usatoday.com/news/opinion/editorials/2006-03-09-opposing-view_x.htm> That's not the case for the legislative branch, which has the luxury of criticizing actions with the benefit of hindsight. When it comes to national security, we should fight the enemy, not each other." (Sen. Pat Roberts, Op-Ed, "No Investigation Needed," USA Today, 3/10/06)

President Bush Addresses Second White House National Conference On Faith-Based And Community Initiatives. "President Bush <http://search.news.yahoo.com/search/news/?p=President+Bush> said Thursday his administration is making steady progress in steering more federal taxpayer dollars to religious charities.Bottom of Form In the budget year that ended Sept. 30, religious charities received $2.15 billion in federal grants to administer a range of social service programs for the needy. That represented 10.9 percent of the total grants from the seven federal agencies such charities were

eligible to apply to in fiscal 2005, according to a White House report. 'It used to be that groups were prohibited from receiving any federal funding whatsoever because they had a cross or a star or a crescent on the wall,' Bush said. 'And that's changed, for the better. It's changed for the better for those who hurt in our society, <http://news.yahoo.com/s/ap/20060309/ap_on_go_pr_wh/bush_religious_chari
ties;_ylt=AiXrXNs_rFtFQf2HQqSoPJNp24cA;_ylu=X3oDMTA5aHJvMDdwBHNlYwN5bmNh
dA--> ' he said." (Jennifer Loven, "Religious Charities Get More Federal Money," The Associated Press, 3/9/06)

The Washington Post Endorses The President's Line-Item Veto Legislation.
"We have repeatedly opposed the idea of a line-item veto. So it may seem inconsistent to warmly endorse - as we do - President Bush's proposal this week for what he terms the Legislative Line Item Veto Act of 2006.
<http://www.washingtonpost.com/wp-dyn/content/article/2006/03/09/AR20060
30902109_pf.html> In fact, though, Mr. Bush is embracing a responsible alternative to the line-item veto, which the Supreme Court struck down in 1998. His bill raises none of the constitutional problems of the earlier law; nor does it raise the same concerns about concentrating power in presidential hands. While it will do much less than is often pretended to diminish the deficit, it would be a useful open-government tool to combat the gross proliferation of congressional earmarks." (Editorial, "A Good Line-Item Veto," The Washington Post, 3/10/06)

The Washington Post Profiles Recovery Along Mississippi Coast. "Six months after Hurricane Katrina smashed through a fragile necklace of Mississippi coastal towns, the region is enjoying a post-storm boom <http://www.washingtonpost.com/wp-dyn/content/article/2006/03/09/AR20060
30902151.html> . Fueled by insurance money, federal reconstruction aid and speculative capital, surviving hotels and restaurants are filled to overflowing, beachfront land prices are soaring, and developers are placing billion-dollar bets that shattered antebellum mansions will give rise to condominium resorts." (Spencer S. Hsu, "Mississippi's Reversal Of Fortune," The Washington Post, 3/10/06)

In TIME Interview, Ambassador Khalilzad Discusses The Political Path Forward In Iraq. "To give them a push, Khalilzad is advocating a new initiative based on an old-fashioned solution to family squabbles: lock them up in a room and don't let them out until they have sorted out their differences. The ambassador told TIME that over the next few days, he hopes to persuade Iraq's main political players to participate in a conference - possibly away from Baghdad, even away from Iraq - where they would be coaxed into arriving at a common political agenda to be administered by an all-party coalition government. ... But Khalilzad told TIME he remains optimistic: 'I believe that if we get - when we get - the national-unity government, when we have ministries that are run by competent ministers, and as we get into the next phase of our Sunni outreach ... I see a set of circumstances, frankly, that would allow for a significant withdrawal of our forces.' <http://www.time.com/time/world/article/0,8599,11
71630,00.html> " (Aparisim Ghosh, "Khalilzad: A Pullout Is Still Possible," TIME.com, 3/9/06)

Insurgents Turning On Al-Qaida In Iraq's Anbar Province. "Residents reported curious declarations

Insurgents Turning On Al-Qaida In Iraq's Anbar Province: "Residents reported curious declarations hanging from mosque walls and market stalls recently in Ramadi, the Sunni Muslim insurgent stronghold west of Baghdad. The fliers said Iraqi militants had turned on and were killing foreign al-Qaida fighters, their one-time allies. <http://news.yahoo.com/s/ap/20060309/ap_on_re_mi_ea/iraq_fighting_al_zarqawi_2;_ylt=AuMf9UwD7n4CUJ3Pept6oMVX6GMA;_ylu=X3oDMTBiMW04NW9mBHNlYwMlJVRPUCUl> A local tribal leader and Iraq's Defense Ministry have said followers of Jordanian militant Abu Musab al-Zarqawi, leader of al-Qaida in Iraq, have begun fleeing Anbar province and Ramadi, its capital, to cities and mountain ranges near the Iranian border." (Bassem Mroue, "Some Sunnis Targeting Al-Qaida In Iraq," The Associated Press, 3/9/06)

"President Bush said Thursday his administration is making steady progress in steering more federal taxpayer dollars to religious charities. In the budget year that ended Sept. 30, religious charities received $2.15 billion in federal grants to administer a range of social service programs for the needy. That represented 10.9 percent of the total grants from the seven federal agencies such charities were eligible to apply to in fiscal 2005, according to a White House report. 'It used to be that groups were prohibited from receiving any federal funding whatsoever because they had a cross or a star or a crescent on the wall,' Bush said. 'And that's changed, for the better. It's changed for the better for those who hurt in our society,' he said." (Jennifer Loven, "Religious Charities Get More Federal Money," *The Associated Press*, 3/9/06)

***The Washington Post* Endorses The President's Line-Item Veto Legislation.** "We have repeatedly opposed

The Washington Post Endorses The President's Line-Item Veto Legislation. "We have repeatedly opposed the idea of a line-item veto. So it may seem inconsistent to warmly endorse – as we do – President Bush's proposal this week for what he terms the Legislative Line Item Veto Act of 2006. In fact, though, Mr. Bush is embracing a responsible alternative to the line-item veto, which the Supreme Court struck down in 1998. His bill raises none of the constitutional problems of the earlier law; nor does it raise the same concerns about concentrating power in presidential hands. While it will do much less than is often pretended to diminish the deficit, it would be a useful open-government tool to combat the gross proliferation of congressional earmarks." (Editorial, "A Good Line-Item Veto," *The Washington Post*, 3/10/06)

***The Washington Post* Profiles Recovery Along Mississippi Coast.** "Six months after Hurricane Katrina smashed through a fragile necklace of Mississippi coastal towns, the region is enjoying a post-storm boom. Fueled by insurance money, federal reconstruction aid and speculative capital, surviving hotels and restaurants are filled to overflowing, beachfront land prices are soaring, and developers are placing billion-dollar bets that shattered antebellum mansions will give rise to condominium resorts." (Spencer S. Hsu, "Mississippi's Reversal Of Fortune," *The Washington Post*, 3/10/06)

In *TIME* Interview, Ambassador Khalilzad Discusses The Political Path Forward In Iraq. "To give them a push, Khalilzad is advocating a new initiative based on an old-fashioned solution to family squabbles: lock them up in a room and don't let them out until they have sorted out their differences. The ambassador told TIME that over the next few days, he hopes to persuade Iraq's main political players to participate in a conference – possibly away from Baghdad, even away from Iraq – where they would be coaxed into arriving at a common political agenda to be administered by an all-party coalition government. ... But Khalilzad told TIME he remains optimistic: 'I believe that if we get – when we get – the national-unity government, when we have ministries that are run by competent ministers, and as we get into the next phase of our Sunni outreach ... I see a set of circumstances, frankly, that would allow for a significant withdrawal of our forces.'" (Aparisim Ghosh, "Khalilzad: A Pullout Is Still Possible," *TIME.com*, 3/9/06)

Insurgents Turning On Al-Qaida In Iraq's Anbar Province. "Residents reported curious declarations hanging from mosque walls and market stalls recently in Ramadi, the Sunni Muslim insurgent stronghold west of Baghdad. The fliers said Iraqi militants had turned on and were killing foreign al-Qaida fighters, their one-time allies. A local tribal leader and Iraq's Defense Ministry have said followers of Jordanian militant Abu Musab al-Zarqawi, leader of al-Qaida in Iraq, have begun fleeing Anbar province and Ramadi, its capital, to cities and mountain ranges near the Iranian border." (Bassem Mroue, "Some Sunnis Targeting Al-Qaida In Iraq," *The Associated Press*, 3/9/06)

SUNDAY SHOW TRANSCRIPTS
3/12/06

NBC – MEET THE PRESS

MR. TIM RUSSERT: Our issues this Sunday: What should we do about Iraq?What should we do about Iran? And how has the port controversy affected the Bush presidency. With us: Two men who would like to be the next president of the United States. For the Republicans, Senator George Allen of Virginia. For the Democrats, Senator Joe Biden of Delaware. Allen and Biden square off.

Then, a new book, "Cobra II," details the inside story of the invasion and occupation of Iraq. Here in their first television interview are the authors, chief military correspondent for The New York Times, Michael Gordon, and retired Marine Corps Lieutenant General Bernard Trainor.

But first, joining us now, two United States senators: Republican George Allen of Virginia, Democrat Joe Biden of Delaware.

Welcome, both.

SEN. JOE BIDEN, (D-Del.): Good to be with you.

SEN. GEORGE ALLEN, (R-Va.): Good to be here.

MR. RUSSERT: Senator Allen, how goes things in Iraq?

SEN. ALLEN: It's going tough. Some progress, but obviously when they used the burning-of-the-Reichstag tactic of hitting that mosque in Samarra and trying to create this religious violence back and forth, that was, that was a setback. But things seem to be calming down.

There's been—there was a lot of progress in the last year, politically, which I think's very important, where the people have a consent in who's governing them. They passed—they ratified by referendum their Constitution. But I—but it's been set back because they have such a difficult way of trying to form a government there, where you need a two-thirds vote, which is to make sure that Kurds, Shia, Sunnis and all are involved and there's a consensus.

I think it's very important that those who are elected in these recent elections in February get together—and they are being delayed now—but nonetheless, get together and form a unity government. That is absolutely essential, I think, to keep moving forward. It's far—and so far as training troops and police forces and so forth, progress is being made there. But politically, action needs to be taken. They need to come together, and then I think there'll be a greater confidence on the part of the people of Iraq.

MR. RUSSERT: When General Pace, who was here last week, says things are going very, very well, is that a bit overly optimistic?

SEN. ALLEN: I would say things are moving forward, it's—but it's very, very difficult.

MR. RUSSERT: Senator Biden, you voted for the war. Senator Edwards was on this program last week, and he said he was wrong in voting for that war. Were you wrong?

SEN. BIDEN: I was—the mistake I made was that I never imagined they'd be this incompetent in the pursuit of the war. I—on your program not almost a year ago I said that, Tim. It has stunned me, the incompetence and way in which they pursued the war, what they're doing now.

And I think, by the way, General Pace is very, very wrong in his assessment. I think we're in, we're at a point where in the next six to eight weeks, we don't get something moving in terms of a government—and that's just the first step, by the way. The idea that once a government is formed here that somehow things are going to begin to roll is, is really another misrepresentation.

MR. RUSSERT: But finish that statement. If they don't get another government in the next six to eight weeks, what happens?

SEN. BIDEN: I think what happens is you're—we have to decide how we're going to deal with, it's going to be a different circumstance. It'll be closer to a civil war. We're going to have to have a different function for our troops. You're going to have to have a plan B. You're going to have figure out how to contain rather than how to, how to build. And that's a very much tougher circumstance to be in.

MR. RUSSERT: Should we get out?

SEN. BIDEN: No. No, I think we're going to have to get out. Look, this administration is already on the glide path to get out. We're already drawing down troops. They're going to draw down troops, as I said on your program a while ago, they're going to get down to 100,000 before the end of this year. They're going to be down to somewhere around 30,000 next year. There's not a whole lot of difference between the Murtha Plan, what these guys are talking about, in terms of timing, that's the difference.

But, look, we, we have vital interests that are there. We—it's bad enough it's a civil war. It'll be a lot worse if it's a regional war. So, and I don't see, look, if the president, instead of deciding to make a series of speeches here at home, should be on a plane. He should get on a plane and be dealing with world leaders to try to generate an international consensus to put international pressure on the parties to make the concessions that are needed. I can't imagine if this were Reagan or Kennedy or FDR, they wouldn't be on a plane. We don't have to convince the Americans, but you've got to convince these folks to get together. And it's very, very, very, very difficult. It will not be done just by our ambassador alone.

MR. RUSSERT: Knowing what you know now, that there were not significant levels of weapons of mass destruction, if the vote happened today, would you still vote yes?

SEN. BIDEN: No. Not knowing, knowing what I know how this administration used the power we gave them. Everybody kind of forgets, Tim, the issue was...

MR. RUSSERT: Do you vote no?

SEN. BIDEN: I vote no. The issue was, though, whether or not the status quo—not whether the status quo would remain, which we have inspectors. I mean, excuse me, we continue to contain Saddam. The question was, do we take those shackles off of Saddam, let him roll, or do we give the president the power to demonstrate to the world, where we're united, to use pressure to bring other folks in to help us put pressure on him? And remember, from the time we gave him the power, we didn't go to war for another six months. So, it was—I, I think it was mishandled. I didn't ever think they would be as incompetent as they were. If I'd known that, I wouldn't have voted for it.

MR. RUSSERT: Senator Allen, let me show you what the American people are thinking. "How are things going in Iraq?" Well, 36; badly, 62. "The war in Iraq, is it worth fighting?" Yes, say 42; 57 percent, a solid majority, say no. Can we continue the war in Iraq without the support of the American people?

SEN. ALLEN: It is vitally important to have the support of the American people. They're the owners of our government. And it is important for the people to get the information, and obviously, most of the news is—that gets coverage are, are incidents of car bombings, of blowing up mosques, of, of fractiousness and so forth, and not some of the more positive things that are actually occurring. And I think General Pace was trying to get to some of those positive aspects of it. I do think, and I do agree with Joe, that it's vitally important for the, the government, those who are elected, to form a government. Again, let's recognize how difficult that is. In this country, if we had to get two thirds of the Congress to agree who our president would be, for example, we, we'd still be fussing through the 2000 election. And so there's...

MR. RUSSERT: But, senator, it's been three year, it's been three years. If the Iraqis are not able to put together a unity government that in fact can secure the country, what do we do then?

SEN. ALLEN: Well, the point is is they have to; and, and in fact, their elections, again, were in February, here we are in March, they still haven't put it together. And there's all sorts of talk now that the Kurds might join up with the Sunnis and try to get the non-sectarian Shiites together. Regardless of how it's done, they do need to get a coalition government. Joe made a good point, and I think we should, and I think our administration is, trying to get other countries in the Middle East region to put pressure on those to settle this issue. Because I think, ultimately, the constitution that the people passed and ratified in Iraq does stand up a pretty free and just society where women have freedom of expression as well as men, where they do have religious freedom where rights are not enhanced nor diminished on account of religious beliefs.

The terrorists in Iraq, I don't see them winning the hearts and minds of the people of Iraq. Their main goal is to cause disruption, to, to wreak havoc, to cause factionalism and so forth. But I think that if you look, if you listen to those who are training, whether it's police or military

forces who are attacked a great deal by these terrorists, there are many who are enlisting or, or applying for those jobs. So I think the people of Iraq are also turning against these terrorists as well.

But again, it is important that the Iraqis themselves work out their differences and, and put together this unity government.

SEN. BIDEN: We can't want peace in Iraq more than the Iraqis want it. We can't want it more than they want it, and if they don't step up to the ball we're going to be gone. The—no foreign policy can be sustained without the informed consent of the American people.

MR. RUSSERT: And what do you leave behind?

SEN. BIDEN: You leave behind chaos. You traded dictator for chaos, open civil war, and the concern of a regional war. Worse off than we were when we had him sitting there. It's good he's gone, but what are you trading him for? What are we going to trade him for?

MR. RUSSERT: Is this a distinct possibility?

SEN. BIDEN: Absolutely, it's a distinct possibility. And you even have our generals on the ground saying it's a distinct possibility.

MR. RUSSERT: When...

SEN. BIDEN: And that's why—sorry.

MR. RUSSERT: When is decision day? When do we have to look up and say, "They have not put a government in place. We have to get out"?

SEN. BIDEN: If they don't have a constitution in place by this summer that is viewed as a uniting document, where everybody signs on to it, it's game over. Now, how you pull them out, where you pull them to, whether you have them over the horizon, whether you kept a containment policy that, that, that secures the region in a different way, that's a whole different question. But status quo, the way it is now, is over.

MR. RUSSERT: Do you agree with that, senator? If they don't have a government in place by the summer, that's it, we're out?

SEN. ALLEN: You have to look at the facts and situation at the time. We're both in agreement, everyone recognizes, and I think the Iraqis themselves recognize, that the longer that they wait to actually form this unity government, the more that allows the terrorists to, to have that uncertainty in, insofar as authority in the country, and the people themselves of Iraq wondering, "Well, what's going to come of it?" So the sooner, obviously, the better. I don't want to have some, some deadline, "If you don't get it done by, by June 1, well, then we're pulling out." Or, "It's, it's a failure."

The point of the matter is, is we need to pressure and try to get others in that region, as well as other countries outside of the region, to really tell them what the stakes are. And I think they recognize what the stakes are, but, but action needs to be taken. There's going to need to be concessions from various points. And then ultimately, this government—they can get a unity government, but there's going to need to be some credibility, particularly in the security forces, the secretary, so to speak, of the interior, to make sure that law enforcement and military actions are, are fair and just and not based upon any sort of religion or, or ethnic biases.

MR. RUSSERT: Senator Biden, if they don't get a government together, and we do get out, and we leave chaos behind, is that not a foreign policy disaster for the U.S.?

SEN. BIDEN: It is an absolute foreign policy disaster. What I said was that we're going to have to have a different deployment of the troops. We're going to have to figure out a containment policy, Tim. You may find a debate begins to ensue: Do we help the Badr Brigade and the Peshmerga deal with the Sunnis? Do we decide to cordon off the north? Do we decide—it'll be a different policy. We're not going to just be able to walk away. It will be a disaster. I—when I got back from Iraq a little while ago, I went down to see the president, and I sat with the president, and he kept talking about terrorists. And I said, "Mr. President, if every single al-Qaeda personality, every single al-Qaeda operative or anyone like him tomorrow were blown away, you still have a war, Mr. President. This is well beyond terrorists."

There's an insurgency, Tim, a gigantic insurgency that has nothing to do with terrorists. It's a big deal. And there's no serious—we put these military guys so far behind the eight ball, because we didn't go in with the 5,000 police trainers that I talked about on your show two and a half years ago and others did, because they said we didn't need it, because we said we had all the oil we needed when in fact the oil companies told us we needed $30 billion dollars in. These guys are about two years behind the curve. The civilians have done a disservice, in my view, to the military on the ground. We said we needed more troops. Remember on your show, I called for more troops the year we went in? Then John McCain called for more troops. What were we told? "No, the folks on the ground don't want the troops." Now what's coming out, including Bremer? "Yeah, we needed more troops, we wanted more troops." This has been a debacle. This has been a debacle. The president, literally, this is a test of his leadership. He's got to unite the international community to bring every pressure possible on these guys or it's not going to get done.

MR. RUSSERT: Let me talk about another issue confronting us, and that's Iran. Vice President Cheney on Tuesday, gave a speech, and let me show you and share with our viewers exactly what he said:

(Videotape, March 7, 2006):

VICE PRES. DICK CHENEY: The Iranian regime needs to know that if it stays on its present course, the international community is prepared to impose meaningful consequences. We will not allow Iran to have a nuclear weapon.

(End of videotape)

MR. RUSSERT: "Meaningful consequences."

Senator Allen, if the president decides that we are going to remove the Iranian nuclear threat militarily, must he, should he go to Congress for authorization before he does that?

SEN. ALLEN: I believe he should and I believe he would, if, if necessary.

One thing—let me just, on the, on the previous question: Yes, these are tough times in Iraq. Let's not get everyone so depressed, so demoralized about things. It is difficult. However, I think that we can hopefully prevail. Not us, but the Iraqi people, because I do believe the people, regardless of their ethnicity or religion, do want to have a better life for themselves and their children, and have, have a say in who their public servants are. And I, and I'm hopeful. We have to be realistic, but let's not get everyone so depressed that is—it's, it's definitely going to fail.

Now on Iran, on Iran, which is a very pressing, dangerous situation, fortunately we have the French and the Germans and the British all with us. We are working with the international community. The Russians are, are clearly the most important. They're the ones making money off this deal as far as nuclear capabilities for—whether it's—well supposedly, for electricity generation, which is, is relatively legitimate. The worry is weaponization of those nuclear capabilities. There's going to be a step-by-step-by-step approach to this. But we are dealing with a theocracy that is deadly serious when they said they want to take Israel off the map. They cannot be allowed to get nuclear weapons. It is dangerous to our, to our friend Israel, it's a danger to us, the United States, our allies, it is dangerous to other countries in the Middle East. We'll start a nuclear—we won't, but they will start, almost, a nuclear arms race in the Middle East, and...

MR. RUSSERT: But how do you stop them? If the Russians don't go along with sanctions, what do you do?

SEN. ALLEN: Well, of course you go through the sanctions, embargoes and so forth, and it—to the extent you have sanctions, it can't just be the United States alone, it has to be other countries of the world as well. Internally, and this is, this is kind of a long shot, but internally, you would hope that the people of Iran, who are getting isolated by these mullahs, and some of these sanctions could have an impact, obviously, on their economy, which is going well because oil prices are up, but if, in the event that this has an impact on their own society there, you could have a change from within. That's, that's a long shot. Ultimately, it—you never want to take military action off the table, but you never want it to get that far. But if, if necessary, it is, it is an option.

MR. RUSSERT: But you agree with the vice president, they will not be allowed to build a nuclear weapon. Period.

SEN. ALLEN: We can't allow them to have a nuclear weapon. It would be too dangerous for us, for our allies, and for the rest of the world.

MR. RUSSERT: Senator Biden, would, should the president, would the president go to Congress for authorization if he wanted military action in Iran?

SEN. BIDEN: He has to do that. Look, I think there's two things here, Tim. I heard the vice president put a prefix in front of "stop them." He said the international community stops them. The fact of the matter is that the administration's gotten it right, in my view, finally, on Iran. They have joined with the international community so that we end up isolating Iran, not us being isolated like we were before, number one.

Number two, it disturbs me a little bit that the administration has not, not done a cold calculation on the issue of whether or not an oil embargo would hurt the Iranians—the Iraqis—I mean, the Iranians more than would hurt the rest of the world. The truth is, the Iraqis—the Iranians cannot sustain an oil embargo. They import all their finished product. They import it all. We could break their back if we are able to organize the international community to stay in place. And this is a matter of time, Tim. If you're telling me they're about to have a nuclear weapon that they can have—put in the tip of a missile, they're going to do that in six months, that changes the dynamics of whether it's in 10 years. There's a big difference here. And we're not allowed to talk about that, that classified judgments that are had among the various capitals.

But there is time here, and it's critically important that we keep the world together to keep pressure on the Iranians, and if need be go to sanctions short of military sanctions. But obviously no president can take off the table the possible use of military force.

MR. RUSSERT: And our policy is simply stated: Iran will not get a nuclear weapon, period.

SEN. BIDEN: That is the policy stated by us, stated by the Europeans, stated by the Russians and stated by the Chinese right now. How that policy works out is a different deal. But that's the stated policy of all those countries right now.

MR. RUSSERT: Do you think ultimately they'll have a nuclear weapon?

SEN. BIDEN: I think ultimately we can stop them from having a nuclear weapon. I think we can stop them from having a nuclear weapon short of war.

SEN. ALLEN: And, by the way, once again I agree, I agree with Joe on this. Not—that's not once again. But on this, it is absolutely essential that we have the rest of the world with us on it, including Middle Eastern countries. Remember, in addition to their threats to Israel, Iran is a state sponsor of terror. They may not even use some of their missile capabilities if they had a nuclear weapon. They could give it to Hezbollah or Hamas or any one of these terrorist organizations.

This also is an occasion for us as Americans to recognize that we need to get greater energy independence in this country so we are not worrying about the whims of some Mullah in Iran 8,000 miles away. We need development of oil and natural gas in this country, more biofuels, the use of advanced nuclear and clean-coal technology, and some other battery-powered approaches,

say for in solar photovoltaics and from nanotechnology. We need to unleash the minds of the people of this country so that we have American energy produced here at home, and a diversity of fuel so we're not so dependent on that one region that is so unstable and in some cases hostile to our country.

MR. RUSSERT: Let me turn to presidential politics. Senator Allen, you were in Tennessee yesterday talking to some Southern Republicans. There was a straw vote taken last night, and here are the results from the Southern Republican Leadership Conference: Bill Frist, his home state, 37 percent;

Mitt Romney, the governor of Massachusetts, 14 percent; George Allen, 10;

President Bush as a write-in, 10 percent. That was initiated by John McCain.

And McCain himself got 5 percent. What do you make of that result?

SEN. ALLEN: It's fine Bill—Bill Frist is popular in Tennessee.

MR. RUSSERT: How about Mitt Romney?

SEN. ALLEN: That's fine. It's good. It's a straw poll.

MR. RUSSERT: He's a—he's a Northeasterner and you're, you're a Southerner.

SEN. ALLEN: Well, it's OK...

SEN. BIDEN: Hang on, man, it doesn't matter. Don't worry about that. Don't worry about that number.

SEN. ALLEN: ...it's OK. I don't think it matters much at all. No, it was great. There were actually—actually it wasn't just the South. There were folks from the Midwest there, too. And for—saw folks from Michigan and Iowa and so forth. At any rate, it was fun. The main thing of that is great hospitality there from folks in Tennessee, and there were a good number from—from Mississippi, and it was I think a good chance for us to all get rejuvenated. And that—that's what most important. I had a great time at it and I think that for this having any meaning, it's kind of like a pick-up game.

MR. RUSSERT: A pick-up game?

SEN. ALLEN: Yeah. Since I'm...

MR. RUSSERT: Not even a scrimmage?

SEN. ALLEN: Inter—intrasquad scrimmages matter. That determines who starts. Pick-up games are just fun.

MR. RUSSERT: Let me turn to the travel each of you've undertaken. Here's Senator Allen recent travel in six months: New Hampshire, Georgia, Michigan, Nevada, Colorado, Arizona, North Carolina, Tennessee, India, China, Pakistan and Taiwan.

Your colleague, Mary Landrieu from Louisiana, had this to say, "I don't think anyone can run for president—Democrat or Republican—until they've been in the shoes of [Gulf Coast residents], walked through their neighborhoods and visited their churches." Why haven't you been down to the Gulf region?

SEN. ALLEN: We've been trying to figure it out and get a time to go. In fact, we have set it up. I, I've talked to Mary—Senator Landrieu as well as David Vitter and I'm going to be there April 7. And initially.

MR. RUSSERT: So it is important.

SEN. ALLEN: I do think it's important.

MR. RUSSERT: Senator Biden, you've been to Kansas, Kentucky, New Hampshire, Texas, California, New York, New Jersey, Italy, Iraq, Israel. Why not the Gulf region?

SEN. BIDEN: Two reasons. I—by the way, I'm set up over the recess to go down there as well. But two reasons: One, I was worried in the beginning that we look like we're all down there grandstanding. I was worried that, quite frankly, some of the folks down there I didn't know really what they were adding. And so the very beginning of that I deliberately didn't go down because I think it just, it just, it—I, I didn't go down because it didn't feel comfortable.

MR. RUSSERT: But you are now going?

SEN. BIDEN: Yes.

MR. RUSSERT: Something else happened this week, Senator Allen, in South Dakota. And this is how The New York Times reported it: "Governor Michael Rounds, the Republican Governor of South Dakota, signed into law the nation's most sweeping state abortion ban. ... The law makes it a felony to perform any abortion except in a case of a pregnant woman's life being in jeopardy." No exceptions for rape, incest, health of the mother. Would you like to see that law, the law of the United States of America?

SEN. ALLEN: Well, first of all I respect and support the right of the people in the states to pass laws that reflect their values and their desires. For the country, I think each state ought to make those decisions. Personally, I think that there should be exceptions for rape and incest because I look at the person. There is a victim of a crime, and if they so choose they ought to have that option.

MR. RUSSERT: But you would outlaw all abortion except in cases of rape, incest?

SEN. ALLEN: Oh, I don't think the federal government ought to be making such laws. I think the laws ought to be determined by the people in the states. If South Dakota wants a law like that, they can have that. If South Carolina wants a different law, that's up to South Carolina or Virginia or California.

MR. RUSSERT: And if a state said unlimited abortion on demand, you would abide by that?

SEN. ALLEN: Well, I don't agree with that approach.

MR. RUSSERT: But you said states should determine...

SEN. ALLEN: But the, but the—if a state did that—I can't imagine too many states or any state having one that allows abortion for all nine months for any reason or no reason at all. But that would be the right of the people of the states. And for those—but if a state like South Dakota wants a law like that, even though it's not exactly what I would think is appropriate, that does reflect the will of the people. This is a representative democracy and I think that's appropriate approach.

MR. RUSSERT: It would means that Roe vs. Wade would have to be overturned, which you would support?

SEN. ALLEN: I think Roe vs. Wade has been interpreted in such a way that it precludes the rights of the people to decide their laws. When I was governor, we passed the law on parental notification. I think parents ought to be involved if a girl who's 16, 17 years old...

MR. RUSSERT: So you say overturn Roe. You hope Roe is overturned.

SEN. ALLEN: Well, Roe—if you need parental notification for ear piercing or a tattoo, they certainly ought to be involved with it. And so I think Roe vs. Wade has been interpreted in such a way as to restrict the will of people. Moreover, that decision was from the early 1970s and medical science has advanced a great deal. We know a lot more and of course, unborn children have an earlier stage of development.

MR. RUSSERT: So overturn?

SEN. ALLEN: The point is, rather than arguing on a legal term, the point of the matter is the people in the states ought to be making these decisions. And if that's contrary to the dictates of Roe vs. Wade, so be it. Because the way that Roe vs. Wade has been interpreted is taking away the rights of the people in the states to make these decisions.

MR. RUSSERT: Senator Biden, what has the port controversy done to the Bush presidency?

SEN. BIDEN: It's sort of stripped away the curtain that there was any competence on, on homeland security.

I heard you on another show with Katie Couric, Tim, saying something in effect that Congress hadn't done much, either. Back in 2001, we introduced legislation for port security and rail security; 2002, 2003, 2004, 2005. It's been repeatedly spurned by the administration. Virtually nothing's been done. Their priorities are backwards, Tim. Tim, if, in fact, they spent as much money on homeland security as they do one year on Star Wars, we could fund another 13,000 police locally, another 1,000 FBI agents. We could have every container at every port inspected with gamma rays as well as with radiation. We could, in fact, secure our railroads. These guys have priorities that are backwards and they're dangerously, dangerously incompetent. And this is going to be the next place you're going to see that incompetence show.

MR. RUSSERT: Senator Allen, let me show you two polls from the Associated Press. The approval of George W. Bush, 37; disapproval 60. And should the Democrats or Republicans control Congress, people--47 percent now say Democrats; 36 percent say Republicans. You're running for reelection this year. How concerned are you about running in this particular climate, and are you proud to run as a Bush Republican?

SEN. ALLEN: I run as a common-sense, Jeffersonian conservative, trusting free people and free enterprise...

MR. RUSSERT: Why not a Bush Republican?

SEN. ALLEN: Because I've always called myself a common-sense Jeffersonian conservative since the days I had Mr. Jefferson's seat in the House of Delegates. And the people of Virginia know me, they know my record as governor of the Commonwealth, and as well as a U.S. senator. I'm, I—look, I support President Bush, I have in the past, I'm not running away from that. But I'm my own person with my own philosophy.

MR. RUSSERT: Of a hundred, a hundred United States senators, you ranked three in your support of the president. Ninety-six percent of the time, you supported George W. Bush. Are you concerned about being presented as a rubber stamp for the president?

SEN. ALLEN: Well, look at the—whatever those 96 percent are. If—obviously I agreed with whatever that position was, 96 percent of the time. Look at—maybe it's on tax cuts. I do think we ought to cut taxes on people and small businesses and capital gains and dividends. I, I do very much believe that we do need to have, for example, exploration of oil on the north slope of Alaska, so we're less dependent on foreign sources of energy. So I don't know what those specific votes are, but regardless what the president's position is, I, I obviously feel that way and voted that way.

MR. RUSSERT: Senator Biden, if the election were held today, 2006 midterm elections, what would happen?

SEN. BIDEN: I think the Democrats would clearly take back the House and I think we have a clear shot at the Senate.

MR. RUSSERT: In 2008, you're up for reelection. Will you run for reelection to the Senate, or run for president?

SEN. BIDEN: I'm going to try to get the nomination for president, and I think that'll be decided by the time the New Hampshire primary's over, as a practical matter, maybe South Carolina, and I'll make a decision then.

MR. RUSSERT: Then you could fall back and run for the Senate.

SEN. BIDEN: Yes, I could. I don't know what I'll do, but yes, I could. I mean look, as you know, in politics that's a lifetime. It's about two and a half years, and that's a lifetime. It's actually probably three lifetimes. And so—but my intention now is to see if I can garner enough support to get the Democratic nomination. If I can I stay in the race until the end of this. If it turns out that I can't raise the money or I can't get any support, then you know, then I make a decision about my Senate career.

MR. RUSSERT: Senator Allen, you get reelected, there's a good chance you'll seek the presidency?

SEN. ALLEN: I'll look at it after that. No matter what I'm doing, I'm going to keep advocating these ideas that I think are important, such as securing our freedom, making this country a land of opportunity for all. We need to get much more competitive for investment and jobs and education, particularly for science and engineering and getting more women, more Latinos, more African-Americans interested. And I also think it's important that we preserve the values of our country. So no matter where I am, I'm going to keep advocating those ideas because I think it's important to make sure this country's a better place for us to live and learn and work and raise our families.

MR. RUSSERT: Candidate A, Allen, Candidate B, Biden, thank you very much for joining us and sharing your views.

SEN. BIDEN: Thank you very much.

MR. RUSSERT: Coming next: the inside story of the invasion and occupation of Iraq, chronicled in a new book "Cobra II." What went right, what went wrong with Iraq? We'll ask the authors, Michael Gordon of The New York Times, and retired Marine Corps Lieutenant General Bernard Trainor. The authors in their first television interview are right here next on MEET THE PRESS.

(Announcements)

MR. RUSSERT: And we'll go inside the invasion and occupation of Iraq.

Co-authors of a new book, "Cobra II," after this station break.

(Announcements)

MR. RUSSERT: And we're back.

Michael Gordon, General Trainor, welcome, both. The new book, "Cobra II." And this is what you write: "The violent chaos that followed Saddam's defeat was not a matter of not having a plan but of adhering too rigidly to the wrong one. ... President Bush and his team committed five grievous errors." And we'll try to go through them.

The first, you write: "They underestimated their opponent and failed to understand the welter of ethnic groups and tribes that is Iraq." A sense of misreading the culture. One of the examples you pointed out, and this is quite striking, "On May 19, [2003]," Secretary of Defense "Rumsfeld himself sent a classified set of planning instructions to [Paul] Bremer," who was on the ground in Iraq as our ranking American, "on how to establish the New Iraqi Corps. 'The NIC will contribute to setting the conditions necessary for a stable, self-sustaining Iraq, with a viable governing body.' ... For all the talk of building Iraqi pride, the name of the new force betrayed a certain cultural insensitivity: NIC, when pronounced, sounded very much like the 'F...' word in Arabic. It was a graphic demonstration of just how little the liberators understood the nation they occupied." How did we misread this so much?

MR. MICHAEL GORDON: Well, Tim, in my view, basically, the American security establishment essentially fought the last war. And by that, I mean their view was that the Republican Guard was the main enemy, you defeat them, you take Baghdad, cut off the head of the snake, so to speak, and you—victory is in hand. And what they really failed to see is that, in addition to the Republican Guard, there was a whole 'nother security force out there, the Fedayeen. And they had a very simplistic view, that if you take the capital of the country, you've basically achieved your victory. You know, they called it the center of gravity. The center of gravity really wasn't a physical place, like the capital of Iraq, it was the Sunni Triangle and really the Iraqi population.

MR. RUSSERT: But what about this notion that we'd be greeted as liberators, that people would welcome us, that we understood their culture, that Shiites and Sunnis intermarried and there would not be this kind of sectarian violence?

MR. GORDON: Well, that was an assumption that they made, and you know there were—I was there as an imbedded reporter—there were places where American forces were indeed welcomed. We shouldn't, you know, forget that. But this was a core assumption, because what they didn't want to do was the heavy lifting of nation-building. They looked askance at the Clinton administration and the efforts in Bosnia. They decided they weren't going to do that, so their concept, this was going to be a turnkey operation. The U.S. liberates the country, we hand it over to Iraqis that we support and who support us, they run the country, and then the allies are brought in to essentially pacify it. The U.S. forces were to be reduced, according to a scheme General Franks had in mind, to like a division-plus, maybe 30,000 by the end of the summer of 2003.

MR. RUSSERT: So in April of 2003, General Franks was planning to remove all troops from Iraq by September, other than 30,000?

MR. GORDON: On April 16, 2003, General Franks flew to Baghdad—I was there at the time—and he delivered guidance to his commanders to be prepared—not necessarily to leave, but be, to be prepared to reduce forces down to a division-plus by September, conditions permitting, but it was his assumption and hope that the conditions would allow that.

MR. RUSSERT: General Trainor, you also write, "They did not bring the right tools to the fight and put too much confidence in technology." We had all, and have been discussing General Shinseki, the Army chief of staff who was recommending hundreds of thousands of troops for years in order to stabilize, occupy Iraq, but in the book, you write that there were several other people, other studies, also advocating supporting that same notion.

GEN. BERNARD TRAINOR, (Ret.): Yeah, Tim. It was—you have to come back to kind of the philosophical aspect of Rumsfeld, who was the secretary of defense. He's a businessman and he wanted to do things efficiently at the smallest possible price, and in terms of the military the smallest possible numbers elitely prepared with all this high technology. The military, of course, tends to be conservative, and if one is good, three is better. So when they were looking at the plans and going back to the contingency plans that predated the war itself, they talked in terms of about 385,000 people and not so much for, for taking out the Iraqi Army, but for, for governing, taking over the occupation of Iraq. Well, this was poo-pooed by the administration because they didn't feel that there was—those numbers were necessary for victory, and they were correct. They didn't need those for the victory, but they did need it for the post-victory phase, which was what the military was insisting upon. But Rumsfeld, as Michael has already indicated, and the administration, had poo-pooed the idea of a long occupation, that we win the war and we get out and the Iraqis govern themselves and the international community comes in to help. So, therefore, they had a small number of people, enough to win the war, but not enough to win the peace.

MR. RUSSERT: As a military man, should the military have pushed back harder on the secretary of defense?

GEN. TRAINOR: Secretary Rumsfeld is a tough hombre to deal with, and he has a management technique that wears you down. Constantly asks questions and diverts you from the position that you're trying to establish by attacking you from a different direction. Just wears you down. Having said that, I'd say that the U.S. military did not shine in, in pushing back against Rumsfeld more effectively. They, in effect, gave up and did everything that he pretty, pretty much wanted to do.

MR. RUSSERT: Let me read from the Chicago Tribune back in March of 2003:

"Ground troops entered southern Iraq, sweeping through a desert landscape...as the military campaign to oust Saddam Hussein began its second day. ... U.S. officials said they were confident that Hussein and possibly his sons were inside the suburban Baghdad compound struck by the initial salvo against Iraq, but did not know if they had been injured or killed. ... Asked if the man who appeared on Iraqi television after the initial strike was Hussein or a double, Secretary Rumsfeld replied: 'There's debate about that.'"

Now this was the "shock and awe." And this is Mr. Hussein, with his glasses on, rushing to get to the air to talk to the Iraqi people, telling them he was alive. He was supposedly staying at a place called Dora Farms, which we had been tipped, we bombed it, and yet you, you write that's there's some indication, evidence, that Saddam Hussein had not been there for years. What happened?

MR. GORDON: Well, this is a very striking moment because this is how the war begins and it was really a bold gamble, I think, by the administration. George Tenet, the CIA director, came to the president. He said the CIA had absolutely firm intelligence that Saddam Hussein was at Dora Farms and there was supposedly a bunker there, it's near Baghdad. And the president had to make a decision whether to strike. And this was right as the 48-hour ultimatum expired. Two F117s were sent to bomb it at some risk to themselves. They couldn't guarantee the pilots could get back. They bombed the exact target that they were given. They hit it squarely. Almost 40 cruise missiles came in afterwards. They obliterated the place. And afterwards, this figure came on television wearing glasses and people said, "Well, surely he must be a double, an imposter. What is this?"

And what we now know are two things: one, from—they've captured the presidential secretary to Saddam Hussein and debriefed him. Turns out Saddam was nowhere near this location when this occurred and, according to presidential secretary, hadn't been there in years. He went to his house. He wanted to film a speech to the nation. There was no TelePrompTer or printer to put up cue cards in this Iraqi TV operation, so he, he wrote the speech by hand and he had to wear his glasses to read it. It was Saddam. And then US forces, by the way, Tim, later went to that very site that had been bombed to see what happened at that bunker. There was no bunker at all. Not only was Saddam not there, there was no underground bunker there. These pilots risked their lives to bomb a target that simply didn't exist.

MR. RUSSERT: General Trainor, we were wrong about weapons of mass destruction, we were wrong about gauging the level of insurgency, whether or not there would be sectarian violence, whether or not Saddam was in that bunker that didn't exist. Why these problems with intelligence, this magnitude?

GEN. TRAINOR: Well, there's no question that the whole war was—and the build-up to the war was flawed by imperfect intelligence, the intelligence community. One of the reasons was, that, you know, the intelligence community was stretched rather, rather thin throughout the world. And there was a lot of focus, not on Iraq, because Iraq was, to a certain degree, from the intelligence standpoint, contained, but looking at Iran, looking at North Korea, we didn't have experts. We had experts on Afghanistan because we had agents in Afghanistan ever since the Soviet occupation. We didn't have the same sort of thing in, in Iraq, and they were doing imperfect intelligence.

But there was also mindset. If you have—if you are convinced that Iraq is a threat, now you may not going to cook the books to come to the conclusions that you have to invade Iraq, but you are going to look for evidence that is going to support you, your preconceptions. And I think that's

what the administration was guilty of. And in the process they misread. I mean, the assumptions that were made on the basis of, of their, their intelligence were almost consistently wrong, and one of the problems with it, they never adjusted to it, never realized it. The people in the field did, but the, the hierarchy, at the secretary of defense level and even at General Franks' level, they totally misread the effects, the, the events that were taking place on the ground.

MR. RUSSERT: In terms of a midcourse correction, and this is particularly

striking in your book, Michael, "They failed to adapt to developments on the

ground and remained wedded to their prewar analysis even after Iraqis showed

their penchant for guerrilla tactics in the first days of the war." And you go

on to write, "[CENTCOM Commander] Tommy Franks never acknowledged the enemy he

faced, nor did he comprehend the nature of the war he was directing. He denigrated the Fedayeen as little more than a speed bump on the way to Baghdad and never appreciated their resilience and determination." And then you write, "They presided over a system in which differing military and political perspectives were discouraged." And you refer to this interview given by General William Wallace. "The removal of the Iraqi government is likely to take longer than originally thought, Lieutenant General William Wallace, the commander of the Army forces in the Persian Gulf, said. 'The enemy we're fighting is a bit different than the one we war-gamed against, because of these paramilitary forces,' General Wallace said. 'We knew they were here, we did not know how they would fight.'"

Fair enough. But you write that General Wallace was almost removed from his position because of speaking out with that candid analysis. True?

MR. GORDON: That's true and it's in the book, and here's a plug for The New York Times. It's in the next edition of, of the, of The New York Times and the series we're doing on it.

But what happened is, granted the intelligence was wrong. That's not the fault of the military. But in the first few weeks of the war, in Nasiriyah, in Samawa, in An Najaf, in all of these towns in southern Iraq, there were fierce battles with a paramilitary, irregular enemy that didn't wear uniforms, that fought with RPGs in Toyota pickup trucks. And the field commanders, General Wallace, General Conway from the Marines, General McKiernan, the land war commander, they all agreed that something had to be done, you ought to pause the march to Baghdad, turn to these paramilitary foes and defeat them. But back at Central Command, General Franks was very impatient with them, he wanted to press the march to Baghdad. I don't think Secretary Rumsfeld ever really appreciated the significance of the Fedayeen.

And so the larger point here is that there was a sense in the first few weeks of the war that we were fighting an entirely different kind of enemy, an irregular enemy, a guerrilla—with guerrilla-style tactics, an enemy that wasn't going to go away after Baghdad falled, that didn't depend on

explicit orders from Saddam Hussein. And it was a Marine intelligence officer who had a prescient analysis he sent through the classified channels saying that these, these Fedayeen could indeed become involved in an insurgency. This is in the first few weeks of the war. General Franks, Secretary Rumsfeld never internalized this message, they stuck with the plan. Not only, not only did they send more troops, they actually stopped the flow of reinforcements by not sending the First Cavalry Division.

MR. RUSSERT: General Trainor, almost three years ago the president landed on an aircraft carrier, this was May 1st of 2003, and he offered these comments to our country and the world. Let's listen.

(Videotape, May 1, 2003):

PRES. GEORGE W. BUSH: My fellow Americans, major combat operations in Iraq have ended. In the battle of Iraq, the United States and our allies have prevailed.

(End videotape)

MR. RUSSERT: That was nearly three years ago. What do we new—do now as a country? You're a military man, you understand that you can't just send an army to war without the support of its people. What do we do?

GEN. TRAINOR: Well, this war has, has changed in its complexion on, on a number of occasions. Number one, it was the battle that the president talked about, taking Baghdad and defeating the Iraqi regular army and Republican Guard. That phase—that was just one round in, in a 15-round bout. Then the next thing, of course, you see the, the rise of the insurgency, and we have adjusted to that, and now seem—the, the, the target now does no longer seem to be the, the American forces, it seems to be the Iraqi governance. And then that's another round. And now we're moving into another phase which people, of course, call it possible civil war, but at least it's a sectarian war between the Sunnis and, and the Shias. So each time we have seen a, a different complexion to this particular war.

In this, this particular junction, the Americans are almost like a, a policeman on the beat getting involved in a domestic dispute, the last thing a policeman wants to do. And hopefully that they will be able to have some conciliatory group bringing the—a sense of national unity to Iraq with us standing in the background so they solve their own problems.

From the outset, from the day that Baghdad fell, what we were facing was a power struggle as to who was going to run Iraq at the end of the day. And that battle goes on. And in that sense, the Americans are irrelevant; we're in there, we just can't move—leave precipitously. But we should look and accept the fact that this is going to require an Iraqi solution to an Iraqi and an Arab problem.

MR. RUSSERT: There is a paragraph, I think, that pretty much summarizes what you have found in your book, Michael Gordon, and I'll read it. "There's a direct link between the way the Iraq War was planned and the bitter insurgency the American-led coalition subsequently

confronted. The ambitious plans that the president announced to transform American defense proved at to be at odds with his bold plan to transform a region." Explain.

MR. GORDON: Well, I think that, that, from the beginning, for, I think, for the administration, this is really a lot—about a lot more than weapons of mass destruction. They wanted to take Iraq, which was always the red square, the enemy square, and make it a blue square. And really by—through the invasion of Iraq, through the installation of a friendly government—a government friendly to the United States, they we're going to teach the Iranians an object lesson, the Syrians an object lesson, they we're going to change the, the kind of strategic kind of calculus in the Middle East. This was always part of their thinking. That was the transformational foreign policy. And the tragedy, really, is that the resources committed to this were inadequate for that task. They simply didn't have enough forces for the peacekeeping. Enough to take Baghdad, but not to secure the country. They didn't make the commitment to nation-building that would be necessary to win over the Iraqi people.

And one thing, when I was in, in Iraq in that long, hot summer of 2003, almost all the senior military officers then thought there was a window of opportunity; yes, there would be resistance, but not this kind of virulent insurgency. There was an opportunity to do things better, and to direct Iraq on a somewhat better course. It would have been more difficult the administration—than the administration thought, but it need not have been this difficult.

MR. RUSSERT: What are your friends at the Pentagon telling you?

GEN. TRAINOR: Well, obviously, they're frustrated. Nobody anticipated this thing was going to go on this long and take this, this characteristic. And...

MR. RUSSERT: How does it end?

GEN. TRAINOR: How does it end? Oh, I wish I'd be able to predict that, Tim, but, but I can't. I—it doesn't necessarily have to end up in civil war. I think after the, the explosion on mosque a couple of weeks ago, and the, the trouble that emerged from that, I think a lot of the Iraqi people on both Shia and Sunni and Kurds saw a vision of the future, and a future that they didn't want. And hopefully that's the sort of thing that would lead to some sort of a national conciliatory government, and avoid a civil war. But whatever happens, the United States at this particular point is somewhat helpless. There's not much that we can possibly do. This is an Iraqi problem, which will require an Iraqi solution.

MR. RUSSERT: General Bernard Trainor, Michael Gordon, thank you for your writing and your research and "Cobra II."

And we'll be right back.

(Announcements)

MR. RUSSERT: For more information on today's guests, and a link to The New York Times book excerpt from "Cobra II," logon to the viewer resources page of our Web site: mtp.msnbc.com.

That's all for today. We'll be back next week. If it's Sunday, it's MEET THE PRESS. Go, you Boston College Eagles.

ABC – THIS WEEK

STEPHANOPOULOS: Good morning, everyone. President Bush is coming off a week that one top GOP strategist called the worst of his presidency. And on Friday, our first headliner said it was time to get tough with the president.

Senator Russ Feingold, welcome back to This Week.

FEINGOLD: Good morning, George.

STEPHANOPOULOS: Tomorrow in the Senate, you're going to introduce a resolution to censure George W. Bush. Let me show that to our viewers.

It says, Resolved that the United States Senate does hereby censure George W. Bush, president of the United States, and does condemn his unlawful authorization of wiretaps of Americans.

That is a big step. Why are you taking it now?

FEINGOLD: It's an unusual step. It's a big step, but what the president did by consciously and intentionally violating the Constitution and laws of this country with this illegal wiretapping, has to be answered.

There can be debate about whether the law should be changed. There can be debate about how best to fight terrorism. We all believe that there should be wiretapping in appropriate cases -- but the idea that the president can just make up a law, in violation of his oath of office, has to be answered .

STEPHANOPOULOS: But as you know, the president says he was acting on his inherent authority under the Constitution -- and even your resolution acknowledges that no federal court has ruled that a president does not have that authority as commander in chief.

So aren't you jumping the gun?

FEINGOLD: Not at all. You know, we've had a chance here for three months to look at whether there's any legal basis for this -- and they're using shifting legal justifications.

First, they try to argue that, somehow under the Foreign Intelligence Surveillance Act, they can do this. It's pretty clear that they can't.

Then there's the argument that somehow the military authorization for Afghanistan allowed this. This has basically been laughed out of the room in the Congress.

So the last resort is to somehow say that the president has inherent authority to ignore the law of the United States of America.

STEPHANOPOULOS: Inherent authority...

FEINGOLD: And that has a consequence that the president could even order the assassination of American citizens if that's the law. So there is no sort of independent, inherent authority that allows the president to override the laws passed by the Congress of the United States.

STEPHANOPOULOS: So if you're so convinced -- if you're so convinced -- that the president has broken the law, why not file an article of impeachment?

FEINGOLD: Well, you know, that's an option that we could look at, if somebody thought that was a really good idea.

There are other options out there.

In fact, this conduct is right in the strike zone. Even though the founding fathers, they didn't have strike zones; they didn't have baseball -- but this is right in the strike zone of the concept of high crimes and misdemeanors.

STEPHANOPOULOS: So are you pulling your punch?

FEINGOLD: We have to consider: Is it best for the country to start impeachment proceedings? Is it best for the country to consider removing the president from office?

We're not mandated to impeach a president who has broken the law, but I think we are required to do our job to live up to our oath of office and say, Wait a minute, there has to be -- at least as a first step -- some accountability.

STEPHANOPOULOS: But...

FEINGOLD: Proper accountability is a censuring of the president -- saying: Mr. President, acknowledge that you broke the law, return to the law, return to our system of government.

That's what I think we should do.

STEPHANOPOULOS: But censure appears nowhere in the Constitution. The Constitution spells out the impeachment proceedings quite clearly -- and you just said yourself, it's right in the strike zone of high crimes and misdemeanor.

Let me ask it again: Why not impeachment?

FEINGOLD: Well, censure isn't prohibited by the Constitution...

STEPHANOPOULOS: It's not prohibited, but it's not talked about.

FEINGOLD: Well, in fact, there have been six or seven instances that I have here where presidents have been attempted to be censured -- and Andrew Jackson was censured.

STEPHANOPOULOS: But the only one censured.

FEINGOLD: So it certainly is not prohibited. And what we have to do here is do what's right for the country. Our number one priority is fighting terrorism. The president is right about this.

His intentions here may have been honorable. He may have been just trying to do everything he could to protect the country.

But that's not our system of government. He has a right to do everything he can to protect our country within our laws. We have to respond in a way that's responsible.

I'm not ruling out other actions.

STEPHANOPOULOS: So you might go for impeachment down the road?

FEINGOLD: I think we have to look at all the options. But I think this one could help us resolve this.

The problem here is that we're trying to just gloss this over. Almost every member of Congress is saying, Well, yes, he broke the law -- but let's see if we can fix the law.

Well, if we have that kind of a system, if we don't answer the president now with a censure, then we're not going to get back on track.

We're not going to get back to a system where the Congress makes the law and the president signs the law. He doesn't get the laws -- to make up the laws by himself.

STEPHANOPOULOS: So, have any other members of Congress or senators signed on to your resolution?

FEINGOLD: I'm announcing it right now, George, so we'll talk to them about it...

STEPHANOPOULOS: You haven't talked to any of them about it?

FEINGOLD: No. I'm announcing it right now.

STEPHANOPOULOS: And what do you expect? I mean, do you expect this is something you're going to push for and demand a vote on and make sure everyone goes on record?

FEINGOLD: You know, I think this is a great way to resolve the problem, at least initially, on a bipartisan basis. Many Republican senators have said, wait a minute, I didn't vote when I voted for the military authorization for any illegal wiretapping.

This is an option for members of both parties, without getting into impeachment, without getting into some of the other things, to say we have to answer. We have to stand up for our constitutional form of government. This gives both parties a chance to say, Mr. President, you made a mistake here. We're going to pass this censure.

Hopefully, he would apologize for having done this. Say that he did it with good intentions, and then let's get back to work together to resolve the problems of this country, especially the fight against terrorism. It's a reasonable approach. It's not a harsh approach, and it's one that I think should lead to bipartisan support.

STEPHANOPOULOS: I'm not sure the president would not see it as not a harsh approach, and I'm not sure he's going to come out and apologize. But -- in fact, I'm pretty sure he probably will not do that. But...

FEINGOLD: What I'm interested in is my colleagues acknowledging that we as a Congress have to stand up to a president who acts as if the Bill of Rights and the Constitution were repealed on September 11. We didn't enact martial law on September 11. We still have a constitutional form of government, and if the Congress of the United States does not stand up for that authority at this point, it will be an historic failure of our system of government.

STEPHANOPOULOS: You were the only senator to vote against the Patriot Act. Do you think you might be the only person to be for this right now?

FEINGOLD: No. I think others will for it, and I'm no longer the only senator to vote against the Patriot Act. Even though I was the one four years ago, now we've increased it tenfold. There are now ten senators that voted against the Patriot Act.

STEPHANOPOULOS: Let's talk about the politics of this. Are you concerned at all that this might backfire? The Republicans in the Senate and the House have been pulling away from President bush. Do you think this might unify them behind him?

FEINGOLD: This is the tough question for us, especially the Democratic Party. We have a choice here. We can try to sort of gloss this over. In other words, go out like a lamb in March and say, OK, the president broke the law, but we're going to get in political trouble if we talk about that.

That is not the way for Democrats to talk. Democrats have to be as tough as they can on national security. This whole Dubai thing has indicated that. But we also have to be the party that stands up for the rule of law and for protecting the civil liberties of innocent Americans. We are the party, if we do it right, that can do both of those things, and I think that's the right message for the American people.

I agree with you, though. There is a possibility -- I've even heard some Democratic potential presidential candidates saying, you know, the president might have broken the law, but we shouldn't touch that. We have an absolute obligation as members of Congress and public servants to stand up for our system of government. And that overrides any political considerations that might exist.

STEPHANOPOULOS: Do you think President Clinton should have been censured?

FEINGOLD: You know, that was an option there that I think was not a bad idea. I understand that people were determined in the House to go through the whole impeachment process, but this conduct here is so much more serious, clearly, than anything Bill Clinton ever did that it can't even be compared.

This is an open and shut case for the censure of the president. This is the foundation of our nation. It's the whole reason that we created our system of government is that the president can't take authority and violate the laws of the country.

Bill Clinton got into a bad situation and he didn't handle it very well, but this is a conscious and repeated attempt where the president continues to say that what he did was proper, and has repeatedly misled the public.

STEPHANOPOULOS: But even though you voted against the articles of impeachment for President Clinton, you did -- in fact, you were the only Democrat to vote against dismissing the charges before the trial went forward. Do you stand by that vote today?

FEINGOLD: Oh, absolutely. And I hope this points out that this is certainly not a partisan attempt on my part. I was the only senator to call for independent counsel on the campaign finance issues under President Clinton. I was the only senator on the Democratic side to say, let's hear the evidence.

And I'll tell you something, George. When I saw the evidence, the case against the president was pretty weak. I concluded that there was not a clear case that he had obstructed justice. This president, however, has openly, and almost thumbing his nose at the American people and the Congress, said, I can make up this law. I'm here to protect the American people.

Well, of course, he's there to protect the American people, but not against the laws and our system of government. That's a different kind of system of government, and it's inappropriate, and the president has got to be condemned for having done it.

STEPHANOPOULOS: And finally on this issue, you are committed, then, not only to introducing it but to putting it forward for a vote and putting all senators on record.

FEINGOLD: Oh, I would very much like to have a vote on this censure resolution. I would hope there would be bipartisan support and a recognition that this is a way, without going too far, without sort of causing a constitutional crisis, to say, Mr. President, this was a mistake. This is

how we feel. This is a censure. And we hope the president would acknowledge it in an appropriate way.

STEPHANOPOULOS: Before we go, you mentioned the Dubai ports deal. It seemed to go down this week. The company said it was going to transfer its assets. Are you now prepared to join other Democrats, like Senator Hillary Clinton, and pass legislation that would prohibit any foreign entities from managing American ports?

FEINGOLD: I'm willing to look at legislation like that. I think it has to be a reasonable approach. I don't think it should be an extremely harsh approach. But I think it's something...

STEPHANOPOULOS: Is the Hillary approach reasonable?

FEINGOLD: I haven't had a chance to review it in enough detail to say I'm for it or against it, but I'll give it a fair look.

I'm extremely concerned that we have a good image throughout the world. I do support stopping this Dubai deal, but I hear the president talking about not wanting to alienate the Islamic world, and I find that somewhat ironic in light of the fact that his conduct in taking us into Iraq war was the most damaging thing to our reputation in the Islamic world of anything that's been done.

But I will want to take a rational, careful look at any legislation that is going to regulate this.

But homeland security, port security is a great example of where we must do a better job, and this administration is not handling the war against terrorism well at all.

STEPHANOPOULOS: Are you really positive that this is going to make any difference in our national security? As the administration pointed out again and again and again, the security at our ports is going to be done by Customs, it's going to be done by the Coast Guard. Wasn't this just the Democrats and some Republicans playing politics?

FEINGOLD: You know, I'm not certain it's going to make a difference, but you know, we have to err on the side of safety when it comes to this kind of an issue. We have to make sure that we do everything we can, and that means not just sort of opening up every kind of port deal to the free market. It would be nice if we could do that, but it's too dangerous. So we do have to consider our national security in these situations, and I think it's a good point of caution that the president I think would even admit was not the finest hour of his administration.

STEPHANOPOULOS: Finally before you go, last time you were on the show, you said the chances of you running for president were better than 100:1. Now, how much closer are they to certain?

FEINGOLD: You know, I'm so busy trying to deal with the problems that this administration is causing with not getting the fight against terrorism right and not handling the situations that are relevant to the American people that I haven't really had a chance to figure that out. I'm going to worry about that after the 2006 election.

STEPHANOPOULOS: So no decision until 2007?

FEINGOLD: Probably not. This is -- I'm focused on this kind of concern. I am frankly -- if there was a way that I could get this president to say that he had violated the law, to reverse course on this Iraq mess and to stop promoting the policies that he has in the USA Patriot Act, I'd be happy not to run for president. I want to change these laws. I want to make sure that we're protecting the American people and protecting our rights. That's what matters to me most.

STEPHANOPOULOS: Senator Feingold, thanks very much.

FEINGOLD: Thank you.

STEPHANOPOULOS: Senate Majority Leader Bill Frist is next. And later, Art Buchwald, savoring and sharing his final days.

(BEGIN VIDEO CLIP)

BUCHWALD: What's really good (ph) and really crazy is I am hearing from everybody. I am hearing from girlfriends that I didn't know I even had.

(COMMERCIAL BREAK)

STEPHANOPOULOS: And we're back now with the Senate Majority Leader and the winner of the first straw poll of 2008, Senator Bill Frist.

Welcome, Senator.

FRIST: George, good to be with you. Good to be with you, George.

STEPHANOPOULOS: You heard Senator Feingold there. He wants Democrats and Republicans to come together on the censure resolution he's going to introduce tomorrow.

I can't imagine you're going to support that.

FRIST: George, what was interesting in listening to my good friend, Russ, is that he mentioned protecting the American people only one time.

And although you went to politics a little bit later, I think it's a crazy political move.

And I think it, in part, is a political move because here we are, the Republican Party, the leadership in the Congress, supporting the president of the United States as commander in chief who is out there fighting Al Qaida and the Taliban and Osama bin Laden and the people who have sworn -- have sworn -- to destroy Western civilization and all the families listening to us; and they're out now attacking -- at least today through this proposed censure vote -- out attacking our commander in chief.

It doesn't make sense.

STEPHANOPOULOS: So you're against it. Are you going to allow it to come up for a vote?

FRIST: Well, George, this is the first I've heard about it. I really am surprised about it, because Russ is just wrong. He is flat wrong. He is dead wrong.

And as I was listening to it, I was hoping deep inside that the leadership in Iran and other people who really have the U.S. not in their best interests are not listening because of the terrible -- the terrible -- signal it sends.

STEPHANOPOULOS: So you're saying that censure resolution actually weakens America abroad?

FRIST: Yes. Well, I think it does because we are right now at a war, in an unprecedented war, where we do have people who really want to take us down. And we think back to 9/11 and that war on terror is out there.

So the signal that it sends that there is in any way a lack of support for our commander in chief who is leading us with a bold vision in a way that we know is making our homeland safer is wrong. And it sends a perception around the world.

And, again, that's why I'm saying -- as leader at least of the Republican side of this equation -- that it's wrong, because leadership around the world of our sworn enemies are going to say, Well, now we have a little crack there.

There is no crack. The American people are solidly behind this president in conducting this war on terror.

STEPHANOPOULOS: Well, Senator, you say that -- but your own party has been running away from the president on several issues, most recently this Dubai Ports deal. And one of your colleagues, Senator Norm Coleman, told the New York Times that it's time for a White House shake-up.

Do you agree with that?

FRIST: Yes. But before you move to that, let's come back to that.

This proposal, at least as I just heard it, was on international terrorist wiretapping -- which affects the safety and security of the American people.

The American people feel vulnerable now. The people listening to us now feel this insecurity -- and we're seeing it a little in the Dubai Port deal, as well -- and this censure proposal really goes at the heart of a program that is lawful, that is constitutional and it is protecting the American people.

And that's the bad signal that it sends.

STEPHANOPOULOS: Well, let's go to that Dubai Ports deal, because you broke with President Bush early on that. You said the deal raises serious questions about homeland security.

But about a week after that, you seemed to change your tune. And I want to show our viewers something written in the Lexington Herald- Leader on February 25th:

Frist said last night that, after recent briefings, he is now comfortable with an Arab-owned company running port security for six American cities, and backed off a pledge to pass legislation to stop the deal.

'My comfort level is good. The Senate is behind the president 100 percent. We believe the decision, in all likelihood, is absolutely the right one'.

So was this deal bad for national security or not?

FRIST: You know, we don't know yet -- and that's the problem. And that is: the review process, this Committee on Foreign Investment, is a broken process -- the process by which we review these foreign investments is a process that needs to be fixed.

We will fix it in the United States Senate. It lacks full transparency. It does not have any congressional oversight.

And the fact that the law is written that way today means that I don't know -- United States senators don't know because we don't have access to the information of the deal.

Thus what I did -- I said, to the administration, let's go back, let's re-review, let's make available the information and data that you put forward and then let's make a decision.

Let's take a 45-day pause, do the investigation so that we can have the information to share with the American people. And that's why I achieved, and that's why it's not necessary to pass legislation to stall the deal -- or it wasn't at the time. Let's give it those 45 days.

All of it has changed as of last Friday in that the companies said that they are going to sever these six ports out of the deal. It does not yet fix the process itself, the transparency of this -- this is called CFIUS, but it's the Committee on Foreign Investment.

We need to have better oversight there, congressional oversight. I would argue we need to have stronger intelligence input into that committee. And also, we need to go back and fix our port security. We are not as secure in our ports as we'd like.

STEPHANOPOULOS: Excuse me, sir. You said that the company announced the deal -- they would transfer their assets.

And everybody is assuming the deal is dead. But they also said in their statement that this was on the understanding that the company would not suffer economic loss. And a lot of people are looking at that and wondering if that's some legal room to get out of killing the deal if they can't sell it at the price they want.

Are you committed -- is that your understanding, first of all, and are you committed to killing the deal no matter what?

FRIST: No, well, I think, George, you're right in the sense that we don't know what the outcome will be. We have their press statement that said what the company intends to do.

And we have to wait and see if they're going to do it. I would still encourage the CFIUS process to stay under way in the event they don't, so that we, in the event it doesn't work out, it's not a total separation, they can't find a buyer, that we can act and act accordingly.

And I haven't taken legislation off the table. But the fact that they've say that they're taking it to sever themselves completely -- it means we don't have to go to the United States Congress and, again, vote. At least it doesn't now.

Let's continue that investigation. If they don't sever it -- and then we can wait and see.

STEPHANOPOULOS: But that's what I'm asking, though. If they can't find a buyer, will you vote to kill the deal?

FRIST: Well, it depends on the outcome of the investigation. If everything that the president, the administration has said, and that is that there is absolutely no threatening or jeopardy to our security and safety of the American people and they tell us and they prove that to our satisfaction and we go to the American people and they understand, I don't see how the deal would have to be canceled.

But we don't have that information yet because that process is broken. And it's a process that we will fix.

STEPHANOPOULOS: Well, I understand. I'm surprised here, Senator. You're saying it's still possible that Dubai Ports World will end up managing six American ports.

FRIST: Well, what I'm saying, under your hypothetical, is that they don't have a buyer and they can't sell it. I'm not agreeing with that presumption at all.

All I know is that right now, they said they are going to sell; they're looking for a buyer. That's what I expect them to do.

And if that's what happened to me, the deal is over with. There is no issue except that we need to fix the process that caused it in the first place, number one, and, number two, we need to tighten up our port security.

STEPHANOPOULOS: This week, Governor Mike Rounds of South Dakota signed into a law a ban in his state on all abortions except when a woman's life was in danger, no exceptions for rape, no exceptions for incest.

I want to show our viewers what your fellow prospects for 2008 are saying about that bill.

Senator George Allen says he would not sign it. Senator John McCain, Governor Mitt Romney, Governor Mike Huckabee, Senator Sam Brownback all said say they would sign that bill. What would you do?

FRIST: Well, you know, I made it very clear from day one when I first really started making public statements about my personal views that I am pro-life, that I am opposed to abortion except in exceptions, rare exceptions of rape and of incest and of life of the mother, that there are too many abortions in this country today.

I'm opposed to abortion. I'm not -- the governor myself, didn't have to vote on it, but if I ever did have to vote on a situation like that, it would be around that feeling, opposition to abortion with those exceptions.

STEPHANOPOULOS: But with those exceptions, so you would not sign the South Dakota ban?

FRIST: Well, again, I'm not going to put myself in that situation. I can tell you what my feelings are, my beliefs are and my philosophy is about it. And that's how I vote and vote accordingly. I am pro-life and I have a 100 percent pro-life voting record. And I would vote accordingly.

STEPHANOPOULOS: You did have this win yesterday in the straw poll. I guess that was expected because it is your home state of Tennessee. But I was wondering, were you surprised that Governor Romney, a northerner from Massachusetts, came in second, beat out Senator Allen, beat out Senator McCain, Governor Huckabee?

FRIST: Well, I don't know if I'm surprised. Mitt Romney and I are very close friends. Everybody on that list, we're all close friends. Let me say, I wouldn't make too much over the poll.

I know a lot are trying to analyze and reanalyze and all. It really is a reflection of the energy, enthusiasm that 1,600 people came together in Memphis from 26 states, actually over 30 states but 26 with delegates, around those core principles of limited government and low taxes, a more prosperous America with a strong military and individual responsibility.

What was interesting, which I should mention, is that every time President Bush's name was mentioned here, because you mentioned some fracturing in the future, the round of applause was unbelievable, standing applause each and every time that President Bush and his leadership was mentioned here.

STEPHANOPOULOS: Finally, sir, immigration is scheduled to come before the Senate in the next couple of weeks.

Senator Allen is against a guest worker program. Senator McCain, President Bush are for it.

Again, this is something you haven't taken a position on. Are you for a guest worker program or against it?

FRIST: Well, George, let me tell you what we're going to do. And it's going be about 10 days from now -- no, about 12 days from now. We're going to go to the floor of the United States Senate, and we're going to stress border security, enforcement first. We're a nation of immigrants, and immigrants have made this nation strong.

At the same time, we're a nation of rule of law, and we've not been enforcing that rule of law. We're going to focus on border security. We're going to tighten our borders. Secondly, we're going to move to interior enforcement. What happens when immigrants illegally come to Tennessee or to Ohio or to Michigan? What do we do with them? How do we enforce that interior, addressing issues surrounding employers, where we actually send these illegal immigrants back to.

And then thirdly, we're going to come to the question of more comprehensive immigration reform, guest worker immigration reform. And we will take that to the floor. We will be voting on it. I will end up at the end of the day as we go through this debate making a decision of exactly how far we need to go on a guest worker program. But we will have a guest worker program of some sort, I predict, by the time we finish on the Senate floor.

STEPHANOPOULOS: And you will vote for it?

FRIST: It depends on what the nature of it is. I'm against amnesty. I've made that very clear. On the other hand, I understand that there are many, many workers who come here legally, who need to continue to work legally. I want to maximize the number of legal workers that we can -- that can come from other countries. And we need to clearly improve their documentation to see if they're legal or illegal. If they're here illegally, they need to be sent back home.

STEPHANOPOULOS: Senator Frist, thank you very much.

FRIST: Good to be with you, George.

STEPHANOPOULOS: The roundtable is next with George Will, Donna Brazile, Jay Carney and Claire Shipman. And later, the Sunday Funnies.

(BEGIN VIDEO CLIP) JAY LENO, HOST, THE TONIGHT SHOW : That's something you rarely see, Republicans rejecting a business deal. That's like a Democrat turning down a hooker. That never happens.

(LAUGHTER)

(END VIDEO CLIP)

(COMMERCIAL BREAK)

STEPHANOPOULOS: The roundtable, Art Buchwald and the Sunday Funnies after this from our ABC stations.

(COMMERCIAL BREAK)

STEPHANOPOULOS: Our voice this week, Art Buchwald. The Pulitzer Prize winner is best known for his razor-sharp columns published in more than 300 newspapers. And now, Buchwald is scripting his final days. Refusing dialysis, the 80-year-old author has decided it's time to die. From a bed in his Washington hospice, he tells us why.

(BEGIN VIDEOTAPE)

BUCHWALD: It was a tough decision, because you're affecting other people. You know, yourself, you're affecting your family. But I made it. I was relieved. It was over. The decision was made. The only part of it that I don't understand, and nobody else understands, is why I'm still here.

But, you know, it's a no-no. You're not supposed to talk about death. You're not to talk about where you're going. Yet everybody that's listening to this show knows they're going to go. And so it shouldn't be a secret. It shouldn't be banned. It should be a good thing. At least, you know, the way you go, I can't predict that. But you don't have to make it a terrible thing.

I'm having the best time of my life. Wouldn't you, to be sitting here, and everybody thinks you're a wonderful person? And you can't take it all, because first of all, you know, you start to feel like John Glenn. The big question that keeps coming up all the time with anybody -- an interviewer talks to me -- is: Do I believe in God?

The answer is: I believe in God, but I'm not too certain that the people that are telling me, It's God's will are the ones I want to listen to. I've found a way that not a lot of people have to make other people laugh. And I'm proud. I hope I can be remembered for that. Because everybody wants to be remembered for something when they go.

Well, I enjoyed talking to you. And I hope I see you next week and the week after and the next month. And we'll say something's wrong with the camera. He's still going.

(END VIDEOTAPE)

STEPHANOPOULOS: Here's to broken cameras and Art Buchwald. Now, the Sunday Funnies.

(BEGIN VIDEO CLIP)

LENO: You hear about this? The people have spoken. The Dubai Port deal is dead. We got our ports back. Dubai announced that it will sell ownership of the six American ports to another investor. The bad news: It's Iran.

(LAUGHTER)

But OK, it's a step in the right direction. They're calling this the biggest setback to the Bush administration all day.

(LAUGHTER)

(END VIDEO CLIP)

(BEGIN VIDEO CLIP)

CONAN O'BRIEN, HOST, LATE NIGHT WITH CONAN O'BRIEN : According to The Washington Post, newly retired Federal Reserve Chairman Alan Greenspan has been offered $8 million to write a book. Yeah. Yeah. Finally, a book that captures the romance and excitement of an old man talking about interest rates.

(LAUGHTER)

(END VIDEO CLIP)

(LAUGHTER)

LENO: Oh, did you hear about this? Now, to get even with us, the United Arab Emirates -- they're talking about not buying any American-made products. Ooh. Yes, we got them there, too. We don't make any products in America anymore.

(LAUGHTER)

(END VIDEO CLIP)

STEPHANOPOULOS: That's our show for today. Stay tuned to ABC News this week for a special series: Bird Flu: Fears, facts and fiction; what Americans need to know.

Thanks for sharing part of your Sunday with us. We'll see you next week.

FOX – NEWS SUNDAY

WALLACE: I'm Chris Wallace. Now the government finds holes in U.S. port security, next on Fox News Sunday .

The Dubai ports deal exposes division in the Republican Party and hands the president an embarrassing defeat. We'll talk with two Republicans who disagree with the White House, Congressmen Duncan Hunter and Mike Pence.

Democrats seem in good shape for the November elections, but will they grab defeat from the jaws of victory? We'll ask one of their party leaders, Senator Chris Dodd.

Plus, the GOP's first presidential straw poll. Who's the early leader for 2008? We'll discuss that with our panel, Brit Hume, Mara Liasson, Bill Kristol and Juan Williams, and our Power Player of the Week, who may just have the world's greatest voice, all right now on Fox News Sunday .

And good morning again from Fox News in Washington. Here's a quick check of the latest headlines. Weapons of mass destruction could be smuggled by terrorists through America's ports, that according to a new study by the Department of Homeland Security. According to A.P., the report found serious lapses by private companies at foreign and U.S. ports.

Iran has rejected a proposal to move its uranium enrichment program to Russia. According to a spokesman, Iran will start its own large-scale program.

And with 37 percent of the vote, the home state favorite, Senate Majority Leader Bill Frist, easily won last night's straw poll at a Republican conference in Memphis. Massachusetts Governor Mitt Romney finished second. We'll have more of the results a bit later.

After the GOP revolt over the Dubai ports deal, what's the fallout for the president and congressional Republicans? And who will be setting the agenda this election year? We turn to Republican Congressmen Duncan Hunter and Mike Pence, who have both had their differences with the Bush White House.

And, gentlemen, welcome back to Fox News Sunday .

PENCE: Thanks, Chris.

WALLACE: Good to have you here. I want to start by asking you both about the Dubai ports deal and about assurances the president gave the American people that it would be safe for homeland security. Let's take a look.

(BEGIN VIDEO CLIP)

GEORGE W. BUSH, PRESIDENT OF THE UNITED STATES: People don't need to worry about security. This deal wouldn't go forward if we were concerned about the security for the United States of America.

(END VIDEO CLIP)

WALLACE: Mr. Bush said that U.S. intelligence agencies okayed the plan. He was satisfied with it.

Congressman Hunter, why wasn't the president's endorsement enough for you?

HUNTER: Well, the president has an arm of government. It's called the Committee on Foreign Investment, CFI. It is supposed to look at these foreign acquisitions and look at them from a security standpoint. These folks let him down.

The Dubai government in 2003 shipped 66 nuclear triggers, high- speed switches that can be used to detonate nuclear weapons -- allowed that shipment to go to Islamabad, even while we had an American agent standing on the dock asking the customs director of Dubai not to let this shipment go.

That information was not given to the Committee on Foreign Investment. They didn't get it. They let him down. They did a superficial look at this thing. And when the president turned to his people that he'd relied on, they gave him the go sign. They had rubber stamped this thing. So they let him down.

And you know, I gave the president the federal district court documents, the affidavits of our customs agents, and he was very interested in getting those before they made the decision to -- before Dubai pulled the plug on this thing. So I think the president, having all the information, would have stopped this deal.

WALLACE: Let me bring Congressman Pence in and ask it a little bit differently.

You're a loyal Republican. This is a Republican president. He says I'm satisfied with the security of this deal. Why not follow the line, follow the leader?

PENCE: Well, Chris, let me tell you, I thank God every day that George W. Bush is a president more determined than the enemies of this country to keep the American people out of harm's way.

On this deal, I just think the president was ill-served by an antiquated process in the so-called CFI plan that Chairman Hunter refers to. We simply ought to talk in an orderly way about changing that in ways that reflect the post-9/11 world.

This new homeland security report confirms what the common sense of the American people felt about this deal, that while we cherish our relationship with the United Arab Emirates, that this was just a bridge too far in that new relationship given some of their troubling associations in the past.

But let me also say I think it's extremely important, Chris, that the United States Congress and this administration seek a way in the immediate future to reaffirm our sense of the importance of our new relationship with the United Arab Emirates.

WALLACE: And how do you do that?

PENCE: Well, there are a variety of means, economic and diplomatic, and as a member of the International Relations Committee, I hope to be a part of some conversations on the Hill and with the White House about ensuring that the royal family in Dubai knows that while this

particular deal was not possible in our new relationship, that there's a great deal of gratitude for their support of our war on terror.

WALLACE: Congressman Hunter, you not only wanted to block the ports deal, you have proposed legislation that would mandate all critical infrastructure in the United States be American-owned.

HUNTER: Sure.

WALLACE: Are you going to go ahead with that bill?

HUNTER: Yes, we're moving ahead with the bill. Now, part of what was in the bill, which was to kill the Dubai deal, is now done. And of course, that would be stripped away.

But it's important that the secretary of defense, in consultation with Homeland Security, identifies what is critical infrastructure. That is, infrastructure that is critical to national security. And having identified that, that that infrastructure be owned, operated and managed by Americans.

And you know something, Chris, it can be. And the idea that somehow we Americans can project enormous power halfway around the globe, we can offload tons and tons of material, and we can send people to far reaches of the globe in very short periods of time, but we can't run a port -- that idea is just not logical.

And we've got lots of great people coming back from Afghanistan, from Iraq. Let's get a good colonel out of the 101st Airborne, retired, and let him operate some of this critical infrastructure.

WALLACE: Congressman, I want you to take a look, though, at this list, if you will. Foreign companies now operate about 80 percent of U.S. port terminals. Another Dubai company, Inchcape, moves ships in and out of two dozen American ports.

An Australian company owns the Chicago Skyway Bridge and the Detroit Windsor Tunnel. And German and French firms purify water for 24 million Americans. Congressman, would you ban all of that?

HUNTER: Well, what we do in this bill is require that you have a security committee, if something is defined by the secretary of defense as being critical American infrastructure.

WALLACE: Well, we're talking about water purification, key bridges, key tunnels.

HUNTER: Well, whatever he goes with, we give a five-year period for divestment by the parent companies. You don't have a fire sale.

And we have a requirement that you have a security committee made up of independent directors in that entity that runs that critical infrastructure, and that has to work with the secretary of defense to put together a security plan.

The point is, Chris, you know, we talk about having a strong homeland security, checking 100 percent of cargo containers, et cetera. In the end, our commercial interests get ahead of us, and here we are, years after 9/11, still with a relatively small percentage of cargo being checked. We have to move ahead.

And the other point is this, Chris. You couldn't open a hamburger stand in Dubai because Americans can't own anything. All we're asking to foreclose to foreign ownership is a tiny percentage of that vast array of economic opportunities. Let's let people buy apartments in Chicago or farmland in Iowa, but they can't own and operate port operations.

WALLACE: Let's do a lightning round on other issues that are likely to come up this year.

Congressman Pence, you proposed a budget this week that would cut spending faster and deeper than the president. No problem at all separating yourself from the president's budget?

PENCE: Well, it wouldn't be the first time that House conservatives disagreed with this administration, Chris. Many of us broke with the president on the expansion of the Education Department and No Child Left Behind, and a few dozen of us broke with the president when he advanced the creation of the first new entitlement in the Medicare prescription drug bill.

What we put out this week we actually call the Contract With America Renewed, because it was based on the budget that the brand new Republican majority passed out of the House of Representatives in 1995. We balanced the budget in five years. It is significantly more aggressive than the budget that the president sent to the Hill.

But, Chris, I really believe that we are in danger of becoming the party of big government. And despite the fact that we just passed the first deficit reduction bill since 1997, I think the American people long for leadership, independent leadership, on Capitol Hill that hews to the conservative principles that minted this majority in 1994.

WALLACE: Let me ask you about another issue, immigration. The president wants a guest worker program to provide a basis for immigrants to work in this country. Are you going to support that? PENCE: Well, just as many Americans that feel that we can't control spending worry that we won't control the border, and I along with many House conservatives believe that the first priority of our government in this immigration issue is to secure our borders.

A nation without borders is not a nation. But once we secure our borders and the American people are confident that we have control of the south, in particular, I believe that we will be able to have a rational national debate about what to do with the 8 million to 10 million souls that are here.

WALLACE: Given these issues, Congressman Pence, and given past concerns when it came to Social Security, or the Miers nomination or the Katrina response, are Republicans moving away from this president? Is Mr. Bush becoming a lame duck?

PENCE: Well, I don't believe this president's a lame anything. He is a determined and focused leader who is going to continue to be that energetic executive that the American people have come to appreciate.

I think what you're actually seeing is that the Congress is simply beginning to step back up to its truly independent role. You know, I always tell those eighth grade kids that I give tours of the Capitol to that the Congress, even if it's of the same party, doesn't work for the president of the United States, that they are two co- equal branches of government.

And to some extent, I think what you see here is a very healthy constitutional friction that our founders contemplated.

WALLACE: But you know, taking the long look at this, Congressman Hunter, over the course of the first five-plus years, I think it would be fair to say you followed the party lines set by the White House. What's changed?

HUNTER: Well, I followed the party line except on trade. We've always had a difference of opinion on that and, you know...

WALLACE: But now it goes to a lot more areas -- and not just you. I'm talking just generally.

HUNTER: I disagree with that. I think that the president's main role now -- because everything, I think, is taken against the backdrop of the war against terror, and specifically the war in Iraq and Afghanistan.

There is strong, strong support for the president as commander in chief. And if you -- you know, this guy's a tough guy, and he's also a guy that likes Congress to stand up. When you go to the White House and you disagree with the president, I've never seen him do anything but say okay, that's your position. In the end, he tries to change your position. Let's move ahead.

He's good at that. He's resilient. He's tough. He's got a lot of endurance. He's a good leader. And he's been doing a great job in the war against terror.

In this particular ports deal, he got totally let down by this Committee on Foreign Investment that rubber-stamped it, said we've checked it out. They hadn't checked out anything. And so the president was left in an embarrassing position, but he's recovered from that already.

WALLACE: Congressman Pence, I want to show you a comment by one of your colleagues. Take a look at this. Republican Congressman Tom Davis said this week, This is probably the worst administration ever in getting Congress' opinion on anything.

Truth to tell, has this White House been high-handed in dealing with Congress and has that caught up with the White House?

PENCE: I really don't think so. I mean, I disagreed with the president along with a few others on his top priority during the first session of Congress, No Child Left Behind. I disagreed with him on the creation of the new Medicare entitlement. If anybody...

WALLACE: You disagree with him on the budget. You disagree with him on...

PENCE: Well, yes.

WALLACE: ... immigration. You disagree with him on ports.

PENCE: But, Chris, if anybody would have felt the high hand, I think it would have been me and House conservatives. And I think it's actually what Duncan Hunter just said. This president is a man of strong opinions, and he's always been more than willing to have members of Congress down to the West Wing and have a conversation about that.

But I haven't sensed a high-handedness. I really do believe -- and I've only served under one president. I've been in Congress for five years. I really do believe that what you are seeing happen is not that the president has changed, but that Congress is beginning to assume that independent role that our founders contemplated here.

And whether it be Duncan Hunter's leadership on Dubai Ports World or what House conservatives are doing on trying to reassert fiscal discipline, I think this is really the kind of friction between the two co-equal branches of government that our founders contemplated.

HUNTER: And, Chris, Let me follow up on what -- Mike has just said something I think is really important. This president is very busy. When he was back here to -- the last time I saw him on the Dubai ports thing, he was coming back to brief us on being on the India trip, talking with Pakistan, India, about their nuclear relations.

He didn't have the time to have a seven-hour hearing, which the House Armed Services Committee did. He didn't have time to get into the weeds in this and drill down on this Dubai ports thing. We provided, I think, a valuable service in doing a lot of investigation and coming up and shoring up this Committee on Foreign Investment and uncovering some of this.

WALLACE: I'm not sure he'd thank you for that, but we're going to have to...

HUNTER: Oh, I'm sure he would.

WALLACE: We're going to have to leave it there. Congressman Hunter, Congressman Pence, I want to thank you both so much for coming in and talking with us today.

PENCE: Thank you, Chris.

HUNTER: Good to be with you.

WALLACE: Up next, with Republicans split, some question whether the Democrats are prepared to take back Congress. We'll talk with Senator Chris Dodd in a moment.

WALLACE: With Republicans fighting amongst themselves, do Democrats have their house in order to take back Congress this fall? We want to talk about that with one of their key leaders, Senator Chris Dodd.

And, Senator, welcome back to Fox News Sunday .

DODD: Good to be with you, Chris.

WALLACE: I want to start with something that General John Abizaid, head of U.S. Central Command, said this week about the opposition to the Dubai ports world deal. Here it is.

(BEGIN VIDEO CLIP)

GEN. JOHN ABIZAID, COMMANDER, U.S. CENTRAL COMMAND: I'm very dismayed by the emotional responses that some people have put on the table here in the United States that really comes down to Arab and Muslim bashing that was totally unnecessary.

(END VIDEO CLIP)

WALLACE: Wasn't there a good deal of demagoguery by Republicans and Democrats in opposing this ports deal?

DODD: Not necessarily. This hit a very, very responsive nerve, Chris, in the country. This didn't go away. This issue wasn't going to disappear. Some issues like this do after a few days.

When you have after -- and now we're almost five years after 9/11, where still almost 90 percent, or more than 90 percent, of our ports are being controlled by foreign entities, less than 5 percent of the cargo coming in, year after year after year -- Congress has tried to have better port security, going back to Fritz Hollings, my former colleague from South Carolina.

I've offered on four different occasions the Rudman report recommendations on port security, been defeated every time. Even in this budget, we'll be voting on this week, there's no separate line item, despite the glaring problems we have on port security in the country.

You know, you could argue some of the -- I'm not going to say that every member of Congress who spoke on the issue, Republican or Democrat, necessarily chose words that I would choose, but it was indicative of the public feeling about this issue. And I don't think you can dismiss that.

WALLACE: But, Senator, does the United Arab Emirates represent a security threat? Over the years, we look back at your record, you have voted to sell UAE jet fighters, missiles. Since 9/11, they turned over the mastermind to the USS Cole. They allow our warships to use their ports. They allow our warplanes to use their bases.

I mean, did the UAE deserve this?

DODD: Well, I don't think they did. But I think I'd begin discussing this with the administration's failure to recognize that this is a country, again, that has some serious issues and problems. You just heard Duncan Hunter talk about some of the history here.

Remember, we had a very good relationship with a guy named Saddam Hussein not many years ago, either, in that part of the world. And today, of course, we have a very different situation on our hands.

I didn't like to hear some of the rhetoric I did, but the fact of the matter remains this is a country that has a very spotty record when it comes to national security issues. And the world did change on 9/11.

Now, my hope is that we'll deal with this issue more thoroughly and step back from it. And again, I point out, the administration should have set up at least a 45-day examination period here and didn't do that.

Now we need to look at this Committee for Foreign Investment. We need to have the CIA representative on that committee, the national intelligence director on it. There should be a pause when you have a foreign government going to operate a port at least to examine the national security implications today. That didn't happen at all.

So we need to reform that process. So not necessarily pointing a finger at the UAE or other countries here, but today to take a closer look at how these ports are being operated.

WALLACE: You have been in the Senate -- I hope you won't mind me saying this -- for a quarter century now.

DODD: Yes. A very young man I am.

WALLACE: What does it tell you about this president's standing when members of his own party desert him the way they did in the past couple of weeks?

DODD: Well, it's not unique. I've seen it happen over the last 25 years in Congress, Democrats and Republicans, particularly in the second term. But again, I think they get lazy, I think what happens. You know, the term limits -- they're not going to run again. And so people begin to let down their guard.

Bob Kim -- and I have a great deal of respect for -- who's the undersecretary of treasury, who is in charge of the CFIUS program -- why didn't someone raise their hand in that room and say wait a minute, here's a country with a record that's a little spotty, they want to operate six or seven major ports in the country, a $7 billion deal, shouldn't we check with the boss on this one?

I think the laziness of it, not paying attention -- the cabinet secretary should have been on there, much better prepared for that kind of a thing. So this happens, and clearly the Republicans are

getting ready for 2006 elections. They're worried about issues like this, and so they're going to distance themselves.

WALLACE: But let's talk about your party...

DODD: Sure.

WALLACE: ... because according to the polls, this should be a good election year for Democrats, but a number of top Democrats are worried. And in fact, when asked about the health of the Democratic Party about a month ago, you said this -- and let's put it up on the screen -- A lot worse than it should be. We seem to be losing our voice when it comes to the basic things people worry about.

DODD: Well, again, at that point here, I was concerned we were going off on some tangents here and not coming back. But just recently, you'll see the kind of unity the Democrats have shown, just last week, on the issue of bringing up the lobbying reform, ethics reform package -- dealing with this issue, allowing one of our colleagues to be able to offer an amendment or work out some time agreement to do so.

I think Democrats on issues of national security, support for our troops, for educating our children, health care, energy policy, are standing for progress for the future and for a better future -- a better chance for people in this country.

WALLACE: But, Senator, your party keeps promising to put out a plan, an affirmative agenda of what Democrats stand for. They promised to put it out in November. They promised to put it out in January. They've promised to put it out this spring.

Now we still don't know when it's going to come out. What's the problem?

DODD: Well, no, they are doing it. I think we are doing it on issue by issue as they come along here. And again, you're going to see more of that in the coming days. But remember, we don't control either the Senate, the House of Representatives or the presidency.

WALLACE: But you control your own party. You can put out your own plan.

DODD: Well, and we are laying out these issues and we're doing it in a united way. Remember, we've got 45 Democrats in the Senate. You've got around 200 in the house -- governors.

Putting all of that together with one coherent plan all the time is not necessarily easy, particularly when you're battling upstream as we are in the House, the Senate and dealing with the president every day.

WALLACE: Is it enough for Democrats simply to oppose the president?

DODD: Well, again, I don't think you can do that alone. I think people do want to hear proactive, positive ideas. And I think we've done that -- again, I emphasize to you -- on things like national

security and support for our troops, a number of issues coming along -- on energy policy, and education, on health care.

You're watching a very united Democratic Party here.

WALLACE: Not on Iraq. You're all over the place.

DODD: Not necessarily. There are some differences here, but basically people want to see us succeed.

WALLACE: Well, stay in, leave. I mean, that's a pretty big difference.

DODD: Well, I think generally, people want us to succeed. But also, again, we're not setting the policy. And again, you know, the president -- again, look at some of the lead editorials today. This is cratering.

We're now three months since the elections and still no government in Iraq. And what we're saying is here this government has to get its act together. These people have to get their act together -- certainly, the leaders of the Shias and the Sunnis.
And if they don't, then nothing we're going to be able to do is going to save that country. That's really their responsibility.

WALLACE: Senator, I want to put up an article written by the editor of Slate Magazine, a magazine that's generally pretty friendly to Democrats, about three leaders of your party, House leader Nancy Pelosi, Senate leader Harry Reid, and Party Chair Howard Dean.

Here's what it said. Under the title The Three Stooges, it says, The three of them have shown themselves to be somewhere between useless and disastrous as party leaders. Individually they lack substance and party smarts -- Pelosi -- coherence and force -- Reid -- and steadiness and mainstream appeal -- Dean. Collectively, they convey an image of liberal elitism, disarray and crabbiness.

Other than that, Senator, I think he was a big fan. Doesn't he have a point?

DODD: No, not at all. Listen, in this day and age, with the ability to transmit information like that around -- that's mild what you get sometimes. Get back to the major point here.

WALLACE: Well, I want to ask you about that, though. Are you really... DODD: I totally disagree with that. Nancy Pelosi has been a wonderful leader in the House. Harry Reid is doing a great job of uniting Democrats, as I mentioned, on these issues I've talked about. And certainly, Howard Dean -- they bring different perspectives.

And the party is not a party that's homogenic in that sense. There are differences within our party. But that's one of the strengths of the Democratic Party. And each of these leaders I think brings that strength to this party.

That's one of the reasons why I think we're going to be very successful, and most people do as well, in the November elections, winning back the House, winning back the United States Senate, and setting itself in a very strong position to win the presidency in 2008.

WALLACE: But do Democrats have -- pardon the expression -- a Newt Gingrich, who in 1994 was so successful in setting out a vision, an affirmative plan that connected with the country and helped persuade them to vote for change -- in that case to push out the Democrats who were in the majority in the House and the Senate?

Who's your messenger and what's your message?

DODD: Well, again, I'll tell you, in 1994, I watched those elections very carefully. The problem was less about Newt Gingrich as it was with -- the president was in the mid part of that first term, and there were serious problems. The president's numbers were very, very low, not unlike the president's numbers today.

I think that probably had more to do with why the Congress went the different direction it did politically than Newt Gingrich, with all due respect. So I don't necessarily see that as the key to success in 2006.

The key is going to be a continued failure by this administration, its leadership in Congress, to provide an alternative sound idea of where we need to go as a people, and alternatively for Democrats to lay out some good ideas -- is exactly what I think we're doing.

WALLACE: And finally, and we have about a minute left, lobbying reform. There was a period right after the 1st of the year where the Abramoff scandal -- when it looked like this was a big, hot issue. There's a general feeling on Capitol Hill it's losing some steam.

DODD: Well, I'm worried about that, and I'm hoping that Bill Frist will bring this matter back up again. He could have the other day. We had a unanimous vote out of the Senate Rules Committee...

WALLACE: But didn't Senator Schumer put an amendment on?

DODD: That's very legitimate in the United States Senate. And the Democratic leader, Harry Reid, said by the way, we'll take this amendment off, give us a time certain for a one-hour debate, or a two- hour debate, after the consideration of this bill, and we'll take the amendment down and get back to lobbying reform.

And the Republican leader refused to do that. Now, my hope is we get back to this issue. It's up to the Republican leadership to set that back up on the agenda again. I'm not convinced they're going to do that. That would be a great mistake.

WALLACE: Senator Dodd, we're going to have to leave it there. Thank you...

DODD: Thank you, Chris.

WALLACE: ... as always, for joining us.

DODD: Thank you.

WALLACE: Always a pleasure to talk to you.

DODD: Good to be with you as well.

WALLACE: Up next, it's never too soon for political junkies to talk 2008 presidential politics. We'll discuss last night's GOP straw poll with our panel, Brit Hume, Mara Liasson, Bill Kristol and Juan Williams. Stay tuned.

(BEGIN VIDEO CLIP)

U.S. SENATOR BILL FRIST (R-TN), MAJORITY LEADER: I will do everything in my power to bury the death tax once and for all.

(END VIDEO CLIP)

(BEGIN VIDEO CLIP)

GOV. MITT ROMNEY (R), MASSACHUSETTS: Every child in America has the right to a mother and a father.

(END VIDEO CLIP)

(BEGIN VIDEO CLIP)

U.S. SENATOR GEORGE ALLEN (R-VA): Let's remember Ronald Reagan's inspiring call to action: If not us, who? If not now, when?

(END VIDEO CLIP)

WALLACE: That was just a sampling of the campaign rhetoric at the Southern Republican Leadership Conference in Memphis the past few days.

And it's panel time now for Brit Hume, Washington managing editor of Fox News, and Fox News contributors Mara Liasson of National Public Radio, Bill Kristol of The Weekly Standard, and Juan Williams, also from National Public Radio.

Well, it's still almost two years before anyone casts a real vote for president, but over the weekend 2,000 republicans went to Memphis to hear all of the leading contenders, or most of the leading contenders, who showed up for the 2008 presidential race, and here are the results. Let's take a look.

Home state favorite Bill Frist finished first with 37 percent. In a bit of a surprise, Massachusetts Governor Romney took second. The unofficial front runner, John McCain, urged his followers to write in President Bush, who tied for third with George Allen, and McCain took fifth.

Brit, what, if anything, do you make of all this? HUME: Well, you said earlier that it's not too hard for political junkies to start talking about this kind of thing. I think for this particular thing you have to be an actual junky to think that anything important has happened here.

This would have been a bad thing for Bill Frist if he had not been able to win it in his home state of Tennessee. He did, so he sort of passes that test, for what it's worth. The rest of the numbers strike me as more or less cats and dogs. McCain didn't real compete and didn't do anything. Mitt Romney does, I suppose, a little better than one might have imagined with southern Republicans, who knows?

But you're talking about 14 percent of, you know, a couple thousand people at most. It doesn't add up to too much.

LIASSON: Yes, I agree with Brit. The only person that this mattered to was Bill Frist, and then only if he lost. He won in his own state. Ho-hum. But if he had lost, it would have been a big deal.

I think the interesting story here is John McCain, who -- the conventional wisdom used to be on McCain -- oh, great crossover appeal but can never be nominated in the Republican Party because he has too much bad blood with parts of the conservative base. I think that's changing.

The transformation of McCain over the past six years -- he's moved, I think, pretty skillfully to be a loyal defender of the president, at the same time being an independent and a maverick on a lot of issues that are important to conservatives like spending, like earmarks.

And I think what he did in terms of taking his name out of the running here and encouraging his supporters to vote for Bush, because he probably would have lost to Frist -- I think that's pretty clever and shows that he's kind of tactically agile.

I think the question now to look for -- is the Republican Party getting over its McCain problem. I think he is getting over his problem with parts of the Republican Party. And we'll see as that does forward. April 7th, South Carolina Republicans have a big meeting. We'll see what happens there.

WALLACE: But you can see -- now, is she a junky or a political...

(LAUGHTER)

HUME: We need some heroin for that one.

WALLACE: Or methadone.

But anyway, let me ask you about this, Bill. Two aspects. First of all, did the ploy work, the idea he's taking a beating anyway, so let's show his loyalty to George W. Bush by saying look, the president needs our support, let's all write in his name?

And secondly, do you think he really is at this point the frontrunner in this race?

KRISTOL: He being McCain?

WALLACE: Yes, not George W. Bush.

KRISTOL: Right. That would be good. I think a coup -- you know, is -- well, I was a conservative who liked McCain before it was cool for conservatives to like McCain, so I'm glad that he's -- some of the conservatives are rethinking their opposition to McCain.

But I think the big story out of Tennessee -- there was no big story, but the story out of Nashville was the split among the voters, among the activists. Frist won. More than half of the people there were from Tennessee.

If you look at the second choice of the people who voted for Frist, the leading second choice person is other. They're undecided. And really, if you look at the fragmentation of the field, McCain and Bush together -- if you take the Bush votes as proxies for McCain -- we're now over-interpreting this, but anyway, it's 15 percent. Romney, 14 percent. It's a fragmented field.

This is the first Republican race in ages where there's no establishment -- there's no one establishment candidate. There's no Bush or a Dole. And there's no one conservative movement candidate. There's usually one of those. There's sometimes both of those.

So this is something we haven't seen in a long time, a wide open Republican race where candidates get to define themselves. Candidates get to adopt different issues. An issue like immigration is going to come into the race one way or the other.

Someone like Newt Gingrich, who is a very able politician and didn't compete down in Tennessee, is really out there working the Republican grassroots. He shouldn't be underestimated. So I think it's a very fluid and unpredictable situation.

WALLACE: All right. You can take any of the above, McCain, Frist, Romney finishing second, George Allen.

WILLIAMS: Well, I think it's the people that weren't mentioned. I mean, I think Giuliani -- I think Rice, Condoleezza Rice -- you know, she says she's not running, but I think that if you look at the numbers, you look at the polls, when people are asked about who they'd like to see out there, Rice is consistent. Giuliani is consistent.

You ask people in Washington -- I think it was National Journal that did a thing about insiders. George Allen comes up way big. People think George Allen has the goods and has the ability to get out there and deliver a strong message.

McCain seems to me fascinating because I think he at this point is known to the American people, who like him. The question is whether or not he's liked inside the party. I think what you heard from Bill Kristol is right. Would conservatives think that John McCain is truly a conservative and going to stand with them on everything from Supreme Court nominations to abortion -- I could continue.

But it's just that quality that makes him attractive to independents and would make him, therefore, electable. And that's going to be a challenge for the Republican base moving away from George W. Bush into, you know, whatever the next era is for them.

WALLACE: Brit, let me ask you about these two people who, at least in the polls, are two of the leading contenders who didn't show up, and that's Rudy Giuliani and Condoleezza Rice.

First, do you think either of them is actually going to run for president? And secondly, if so, how do they get into the race?

HUME: I don't think there's a particle of evidence that Condoleezza Rice is running for president or will run for president. All indications are to the contrary.

WALLACE: Even though she had herself photographed working out the other day?

HUME: Well, who knows what that's about? I mean, I'm not sure that if you're running for president as the secretary of state, a woman of considerable dignity and style, that being photographed wearing sweats in a gym is the way to get there. So I suspect that's not what that was about, but who knows?

Giuliani, it seems to me, is a man who would like to be president and thinks he could be president. And you know, there's some evidence to that effect. Let's look back to the Republican Convention this last time around.

On the same night Giuliani and John McCain made speeches. And both of them, in the eyes of Republicans, were very good speeches. The one that really wowed them, though, was Giuliani's -- confident and tough and all the things that Republicans like. Now, he's got some ideological baggage to carry on important issues, the most important being abortion. But I think he'd be a very interesting candidate.

What I'm interested in here is what Mara said about John McCain, indicating that he has mended fences and is on his way to being favored by the Republican right, which is the nominating force in that party. I don't think there's much evidence that he's there yet. He may be moving in that direction, but I'm not sure he's there yet.

LIASSON: No, I raised it as a question. I think that is the question about McCain. In terms of Giuliani, first of all, I agree with Brit. Condoleezza Rice is not running. I mean, maybe she'd be drafted to be the vice presidential candidate, but she is not running for president.

Giuliani -- I still question his ability to be nominated in this Republican Party. I think he's one of the most popular speakers on the Republican circuit, fund-raisers. He's the hero of 9/11. People want to hear from him. But when they find out he's pro-gay rights, pro-gun control, pro-choice, he's been married three times -- I mean, all of the things that he would have to contend with -- I just don't see it.

WALLACE: What do you make of, Bill Kristol, the strategy -- I mean, John McCain is continuing to go out all the time, does plenty of interviews, is a frequent guest. And we're happy to have him on this and other Sunday talk shows. Rudy Giuliani has basically disappeared. I mean, we tried to get him on. Everybody tries to get him on, and he's done almost no public interviews.

What do you make of the strategy, if he is thinking about running for president, to basically just go to ground until the end of the 2006 election?

KRISTOL: I think each person's strategy makes sense for himself. I mean, McCain is a Senator. He's expected to have opinions on the issues of the day. He has helped himself a lot by being the most resolute, forceful and eloquent defender of the president's foreign policy.

And if Republicans want to nominate someone who will fight the war, the global war, against Islamic radicalism, McCain will look like a very credible candidate in 2008, and that will swamp, I think, whatever differences people have had with him in the past on some issues.

If for some reason McCain falters, Giuliani then, I think, is wise to sit back. He can't compete with McCain right now. McCain's a senator. Giuliani's in the private sector -- sit back, see if McCain somehow falters, and step up in 2007 as the embodiment of the post- 9/11 spirit, a tough executive who ran New York well and who could run the country well at a time of war.

So I think each of them actually -- I'd say McCain, Giuliani, Gingrich and Romney are all running extremely intelligent campaigns for where they are. And I think those four are formidable candidates.

WALLACE: Juan, I loved the fact that we all said how silly it was to talk about this, and we've now spent the last nine minutes -- your final thoughts.

WILLIAMS: Well, the thing is the Democrats -- they've got to think about who they're running against. I think Hillary Clinton is out there. I think that's why it's not ridiculous to have some imagination about a Condi Rice.

Also, the Democrats, you should know, this week said they're going to possibly have more diverse contests between Iowa and New Hampshire, and so that means that I think you're going to see a different kind of result in terms of the Democratic nominating process that would bring in an opportunity maybe for Al Gore or John Edwards to come back.

WALLACE: Oh, boy. More to talk about. All right.

We have to take a break here. But when we return, we'll take a look at the collapse of the Dubai ports deal. Where does it leave U.S. policy and the president's political standing? We'll chew over that in a moment.

(COMMERCIAL BREAK)

WALLACE: On this day in 1933, President Roosevelt delivered his first fireside chat.

(BEGIN VIDEO CLIP)

FRANKLIN DELANO ROOSEVELT, PRESIDENT OF THE UNITED STATES: You people must have faith. Let us unite.

(END VIDEO CLIP)

WALLACE: He used the chats to reassure Americans during the Great Depression.

(COMMERCIAL BREAK)

(BEGIN VIDEO CLIP)

BUSH: I'm concerned about a broader message this issue could send to our friends and allies around the world.

(END VIDEO CLIP)

WALLACE: That was President Bush on Friday talking about the long-term consequences of the defeat of the Dubai ports deal.

We're back now with Brit, Mara, Bill and Juan. Let's examine what happened to the ports deal from several different angles.

Brit, first of all, the profile and political courage by congressional Republicans and what it says about the president's political standing.

HUME: It was so bad that it was almost hilarious. The 62-2 vote in the House committee was a case of members of Congress heading in full flight for the tall grass because there's an issue easily demagogued out there on the table, without regard really to the extent to which the UAE had been an important ally in the war on terror in a part of the world where we need allies.

We have the military officials, others, talking about what a good friend and ally they've been and how much we depend on them. Never mind. Not since the anthrax scare have we seen so dispiriting a spectacle in the U.S. Congress.

You may recall that that shut the Congress down and showed just how tough these people were going to be in the war on terror. This goes in the same category. It was pretty discouraging.

WALLACE: And what does it say, Mara, about the president's standing, that they felt free to jump ship the way they did?

LIASSON: Well, I would say...

HUME: Free? They're scared.

LIASSON: Yes, I would say they're quite panicked, and his approval ratings and not only not giving them any comfort, they're making them even more panicked. And they're facing an election. I think on issue after issue, this was the latest and most dramatic breach of the Republican Congress and the president.

But there's a long list of things that they've broken with him on -- I mean, immigration, and Social Security, and the budget. And I think this -- I think it doesn't get us anywhere to say that now he's a lame duck and before this he wasn't. But he doesn't have the pull he had.

And also I think that there's some resentment. I mean, you talked about it with the guests earlier, that there was no consultation. It wasn't just the facts of this deal. It was the fact that Congress was blind-sided. They weren't consulted. And that certainly has happened before.

WALLACE: Bill, let me ask you about a different aspect of this. Now that you look back, do you think the ports deal raised any legitimate concern about security, or was this all political demagoguery? KRISTOL: The more I learned about it, the less concerned I got about security, and I think it was basically ridiculous demagoguery, shameless by Senators Schumer and Clinton, who claim to be in favor of America reaching out to moderate Arab regimes and care about our relationships with allies around the world, and just slapped around the UAE, which has more American port calls than any other nation, any other -- Dubai has more than any other place in the world, where thousands of American soldiers and sailors are right now on port leave, where we have very close intelligence cooperation.

And then the Republicans demagogued it as well. I think it was a bad couple of weeks for the global war on terror, for the war against Islamic radicalism. I think the -- I mean, I think the president could have done more, frankly, though, to make his case. They gave up too early, in my view.

He said he would veto the legislation. He stupidly, then -- or some of his aides stupidly tried to denigrate all the opponents as xenophobes or quasi-racists, which was not fair. People were just confused.

And if he had spent a week or two saying let me make the case for this, I'm not sure he couldn't have turned this around. But they threw in the towel. And Karl Rove called someone in Dubai, I guess, last Wednesday night and said please withdraw the deal. And they're a pretty good ally, and they didn't want to be embarrassed, so they did.

WILLIAMS: Right, but I mean, it's -- I think it's unfair to suggest that this White House was caught -- I mean, gosh, this White House has been involved in this fear-mongering all along. And I think it's just come back to bite them. That's all.

And so now they're going to say oh, gee, these guys were playing politics...

KRISTOL: What fear-mongering? What fear-mongering?

WILLIAMS: ... you call these guys demagogues...

KRISTOL: This White House is talking about moderate Arab regimes.

WILLIAMS: You call these people demagogues.

KRISTOL: I do call them demagogues.

WILLIAMS: They're not demagogues. They're reacting to a public, an American public, that had concern about the idea of Arabs controlling our ports. Why do they have that concern? Because of the kind of attitude...

KRISTOL: And what is it called to react to an uninformed and, in this case, false concern? What is it called to exploit an uninformed concern?

WILLIAMS: You're wrong. KRISTOL: It is demagoguery.

WILLIAMS: Let me just tell you something.

KRISTOL: It is demagoguery.

WILLIAMS: You're absolutely wrong on this -- that when the pollsters asked the American people are you aware...

HUME: Juan...

WILLIAMS: ... that the United Arab Emirates is an ally, are you aware that they give us opportunities for support and a base in the Middle East, American people still said overwhelming we oppose the ports deal. It wasn't uninformed.

HUME: Juan, it is...

WILLIAMS: Don't think everybody is a dummy up here, and don't think these congressmen -- you said last week they were clowns. Now they're demagogues. These guys are reacting to what they're hearing from the American people going forward toward the midterm elections.

HUME: Juan, reacting to poll numbers on an issue like this is not a source of legitimacy for what these people did.

WILLIAMS: Why is that?

HUME: There are two ways you can go when you confront an issue like this, and the public is leaning in one direction and you might tend to be leaning the other. You can stand for what you think and know, or find out more and then stand up for what you believe.

What we saw here in Congress the last couple weeks was a head- long flight based on limited or bad information and early poll numbers.

WILLIAMS: Right, but they always ask...

HUME: And to say they didn't demagogue the issue is ridiculous. All kinds of crazy things were said. We had people reciting -- even after the deal was canceled, we had one member of Congress saying -- a woman from Pennsylvania, a Republican, said we don't know enough about the ownership of our ports.

WILLIAMS: That's ridiculous.

LIASSON: Look. I think the big question, the political question, for Republicans is did this strategy make sense. In other words, in breaking with the president, did they help themselves? Did they make themselves safer in November? or will it be exactly the opposite, that they kind of demoralized their base so much that, in the end, this was not a good political move? That's...

WALLACE: And, Ms. Liasson, what's your answer to that very good question? LIASSON: I don't know yet. I mean, that, I think, is the question coming out of this politically. You know, is this some that helped or hurt Republicans? Clearly, the vast majority of them thought this was the way to go.

WILLIAMS: Well, Democrats though -- that it helped Democrats, because suddenly you saw the American people saying hey, wait a second, this president...

LIASSON: Well, they were hoping that Republicans...

WILLIAMS: ... and Republicans aren't doing the job...

LIASSON: ... would have been on the other side of the issue.

WILLIAMS: ... of defending America against terror and, therefore, Democrats saw it as an opportunity to get rid of the key Republican leverage coming forward to the midterms.

The one thing in terms of a future contract with America that you're hearing about from Rahm Emanuel and the Democrats is the first thing we'll do if there's a Democratic majority in the

House is enact the recommendations of the 9/11 Commission. They're speaking to the terror issue.

KRISTOL: It's pathetic. I mean, look. The president had agreed to another 45-day review. That was a reasonable compromise. Republicans should have supported that. The president should have threatened to veto a precipitate denial to this company of the ability to run the ports pending the serious review, which would have had congressional oversight.

The president went to India last week and signed an important agreement with a huge Democratic friendly country which tightens the relationship with us. That's important in the global war against Islamic radicalism. It got no attention at all because everyone around here was screaming and yelling about this ports deal when they didn't have to.

The Republicans hurt the president and they hurt themselves by their behavior over the last two or three weeks.

WILLIAMS: So what do you say about the study that's just out today from homeland security saying you know what, we are vulnerable in terms of our ports -- and this is how many years after 9/11? Why hasn't this administration acted?

HUME: In fact, the administration has acted, to some extent, on the issue of ports, and more is happening than did before. Are there still gaps? You bet. There are gaps everywhere. But it's a work in progress.

WALLACE: Got to go. Thank you, panel. Spirited conversation. See you next week. Thank you. That's it for today.

Time now for some mail, much of it about our interview last week with the former director of FEMA, Michael Brown. Linda Meyers from Virginia writes, The real problem wasn't that Brown was in a helicopter. It was that the new, confused DHS bureaucracy didn't know who was supposed to be doing what.

But Jim Archer sees it differently. Michael Brown has no leadership qualities. A good leader would have taken over and saved lives.

And many of you were as surprised as we were by this exchange from our panel.

(BEGIN VIDEO CLIP)

KRISTOL: If this generic number holds up, Republicans will certainly lose the House.

WILLIAMS: Oh, come on. I'm sick of all this Bush bashing, Chris.

(END VIDEO CLIP)

WALLACE: Margie Tompros from Virginia writes, Were my senses deceiving me while watching my beloved Fox News Sunday? Did someone switch Juan and Bill's brains?

Be sure to let us know your thoughts by emailing us at fnsfoxnews.com. Their brains are back in place.

Up next, our Power Player of the Week.

(COMMERCIAL BREAK)

WALLACE: While Washington focuses on politicians and sports stars, there's another figure in this town who is a true national treasure. We are honored to call him our Power Player of the Week.

(BEGIN VIDEOTAPE)

DOMINGO: I can sing it as much as the birds who sing the whole time. I think I consider myself one bird.

WALLACE: Placido Domingo on singing. He's been called the king of opera who has played 122 different roles, more than any other tenor.

We asked him how he regards the remarkable voice that has made him an international superstar.

DOMINGO: I think the voice is -- it is like a tremendous, demanding, jealous woman, you know. So you better treat her as the most beautiful woman in the world, but demanding and difficult.

WALLACE: Domingo didn't even know he had a good voice till he was a teenager, sitting with his mother, who was herself a singer.

DOMINGO: My mother was playing the piano for me, and I start singing. And then I hit a note, and I see her crying. And I say what happened. And she say that's beautiful.

WALLACE: He's now 65 and had not sung in months because of a respiratory infection. But we asked him to hit the note that made his mother cry.

Can you just do a little for us?

DOMINGO: I don't know if I have voice now. So that was the sound.

WALLACE: In 1990, Domingo became a huge pop star when he toured as the Three Tenors with Pavarotti and Carreras. But while he has sung for crowds of hundreds of thousands, his true love are full operas, where he gets to play a very dramatic role.

Do you enjoy suffering in an opera?

DOMINGO: Suffering on the stage is the best thing. I mean, I love to suffer on the stage, not in real life.

WALLACE: But 10 years ago, bowing to the demands of real life, Domingo decided to play a different role, becoming general director of the Washington National Opera.

DOMINGO: I thought that I was close to finished, my career, so I said it's the right time to do it.

WALLACE: It's a transition, performing to..

DOMINGO: Yes. And the fact is that I'm still singing.

WALLACE: For the last decade, he has run the artistic and business sides of the Washington Opera while continuing to perform. But he still thinks about that inevitable transition.

What are your thoughts about retiring as a performer?

Domingo said he did not want to do one of those long farewell tours, calling it pretentious. He has a different plan.

DOMINGO: I hope that the last performance of opera, when I can just go out in front of the public, and nobody will know, and say it, ladies and gentlemen, that was it. That was my last performance.

I just want -- when the public knows, then I have give everything that I can possibly give, which it has been all my soul and my feeling.

(END VIDEOTAPE)

WALLACE: While we hope his retirement is still a long, long way off, the Washington Opera celebrates its 50th anniversary this week, and Domingo his 10th year as general director.

And that's it for today. Have a great week, and we'll see you next Fox News Sunday .

CBS – FACE THE NATION

SCHIEFFER: And joining us now, Senator Barack Obama is in the studio with us. Senator, thank you for coming. And I must say, before we get serious, you were the absolute star of last night's Grid Iron show in Washington, which is put on by local journalists. It's all parody, where people from both parties come together.

And I must say, when you said that you were a little nerve nervous at the beginning of your speech because you realized people were drinking alcoholic beverages and the vice president was just 30 yards away, it really brought down the house.

What would the Grid Iron have done this year without Vice President Cheney? He became the target of targets.

OBAMA: You know, it was like shooting quail in a barrel.

(LAUGHTER)

So we appreciated it. You know, he was a great sport about it. The president was a great sport about it. And the truth is, though, in my family, my wife is the funny one.

So I'm glad she didn't get up on there because she could have done a riff on me that would have lasted 20 minutes.

SCHIEFFER: Well, I'll tell you, if she's funnier than you are, then she's my candidate to host the Academy Awards next year because you were my candidate until you said that.

Well, we need to get serious, Senator. We're coming upon the third anniversary of the war in Iraq. What do we do now?

OBAMA: Well, at this point, I think it's clear that there is not going to be a military solution to this. I think there's going to have to be a political solution determined by the Iraqis.

And, obviously, all of us have been watching with growing concern when we see the Shias, the Sunnis, at each other. The bombing of the mosque, I think, brought us close to civil war.

Now it's Iraqi leadership that is going to have to come to the fore and say we want a nation that is unified and are willing to make sacrifices, each faction saying we are willing to give something up to accomplish that vision.

If they are not willing to do that-- and I think we'll know in the next several months-- if you don't see concessions from the Shias on the constitution, if you don't see, in the interior ministry and the security apparatus of the country, Sunnis as well as Shias who are in power and that there's a nonsectarian perspective in how the central government should be run, then it's hard for me to imagine how we can be successful.

And I think that, at that point, we're going to have to make some serious determinations about how we deploy our troops.

SCHIEFFER: Well, what do we do? Let's suppose that a civil war does break out. What should American troops do?

OBAMA: Well, you know....

SCHIEFFER: Whose side are they on?

OBAMA: You know, I'm not a military expert. What I know is that this year should be the year in which we start withdrawing our troops. I think the footprint that we have on the ground is actually exacerbating some of the tensions.

My view -- and I always thought that this enterprise was poorly thought out, but I also felt once we were there we should try to make the best of a bad situation -- but if, in fact, the Iraqi leadership is not interested, we can't function essentially as a replacement for Saddam's revolutionary guard and try to hold the country together by sheer force.

What we can do is advise, help build up the Iraqi security forces. But if politics break down and you start seeing all-out civil war, it is not appropriate for our troops to be in the middle of that.

And I think I would then be asking the joint chiefs of staff and others to figure out how do we deploy ourselves where we can be helpful in minimizing death and destruction?

SCHIEFFER: Well, what you're talking about is pulling out.

OBAMA: Well, you know there are certain sections of the country, even if there was a civil war, that I think remain safe and stable.

Certainly, that's true in the Kurdish north. There are certain portions, both in western Iraq and southern Iraq where, conceivably, some of our troops could be deployed.

But certainly what would not be appropriate would be for American troops to be placed in the midst of a civil war, having to choose sides, not knowing who our allies were and who our enemies were.

That would be a recipe for disaster.

SCHIEFFER: So you're not with Congressman John Murtha, who says it's time to leave, that we've done all we can do?

If, in fact, the United States did pull the troops out, do think that would be seen as a sign of weakness by the insurgents and that they would strike America some place else?

OBAMA: You know, the challenge right now is not simply the insurgency. The challenge is the Shias and the Sunnis maintaining their own militias, engaging in a low-level civil war, as it is. That is the real problem.

And so what we have to recognize is that if you don't see significant political accommodations between these various parties, then our role -- necessarily -- is limited.

It's not going to matter how many troops we have there. If the Iraqi people have not taken the responsibility for forming a government that recognizes the importance of all parties being involved -- and, most importantly, makes certain that the government apparatus, the security

apparatus is in the hands of nonsectarians -- then we are not going to be able to impose order in that country.

SCHIEFFER: Senator, let's talk a little bit about politics. The White House is -- I think even their strongest supporters would say they've had a very hard time lately, kind of culminating in this port deal that went haywire.

Yet Democrats do not seem to be getting their act together at all. What do Democrats need to do here -- because I'm not sure I understand what the Democrats' message is right now? Do you have one?

OBAMA: Well look, it's always more difficult when you don't control any branch of government. And we don't have one central figure who is delivering the message in a consistent way, in a disciplined way.

But the Democrats, I think, stand for some things that the American people stand for, and it's a matter of us projecting it going into the '06 election.

I think we all believe that we should achieve energy independence; that the notion that we're sending billions of dollars to countries like Iran that are hostile towards us makes no sense.

And so, being serious about an energy policy that switches to alternative fuels -- and biodiesel something that the American people, I think, can get behind.

The health care crisis -- since I've been in Washington, we have not had a single serious debate on the floor of the Senate about what to do for not just the uninsured, but people who have insurance and are seeing their co-payments and deductibles going up, for businesses that are straining under the costs and can't compete internationally.

So having a serious message that said, you know, by '08 we're going to have every child in America insured, and by 2012 we've got every American who's working able to have accessible health insurance, that would be an agenda that makes sense.

Education -- being serious about ensuring that our young people are competitive around issues of math and science.

And on security -- being serious about the ports, chemical plants, rails that the 9/11 Commission says we have not adequately protected since 9/11, and has to be part of our national security apparatus.

Those are all issues where I think, if the Democrats are clear, focused and, frankly, are willing to repeat themselves -- sometimes, we have more problems than the Republicans just keeping our talking points simple so that the American people can understand them -- then I think we can be successful.

SCHIEFFER: Let me ask you this: Are you going to have to campaign on these social issues like abortion rights, on gay marriage -- these hot-button issues that seem to be so much in favor of many people and, by the same token, so many people are opposed to them?

Where do you come down on all that? Do you emphasize those or do you not?

OBAMA: Well look, I think those are difficult issues. And I think the people feel passionately about them. I don't think you can avoid them completely.

And let me take the example of abortion. I think the Democrats historically have made a mistake just trying to avoid the issue or pretend that there's not a moral component to it. There is.

And I think that, no matter what side of the debate that you're on, you're going to agree that the decision to terminate a pregnancy is a profound decision for the woman and for society and that we have to have a serious conversation about how to reduce the circumstances in which women feel obliged to make that choice.

But I think...

SCHIEFFER: You are pro-choice?

OBAMA: I am pro-choice, but I also think that it's important -- even as I indicate that I'm pro-choice -- to say this is not a trivial issue. And we have to listen to the profound concerns that other people have.

More broadly, you know, the red state phenomenon where Democrats just say, well, we can't campaign in those areas because they're going to vote Republican, I think is a mistake.

I'm a Christian, for example. I want to go into churches and have a debate about moral values. Of course, my moral values don't just include issues of abortion or gay marriage. I'm interested in our obligations to the poor. I'm interested in Sermon on the Mount.

And I think it's important for us to willingly engage in a values discussion in America, because, ultimately, that's where a lot of people live. They're trying to figure out how to have meaning in their lives in a complicated, dynamic, topsy-turvy society. And the fact that we have not engaged in that, I think, has given the Republicans an advantage.

SCHIEFFER: Hillary Clinton is leading most of the polls as the Democratic favorite right now. Do you think she's the best candidate that the Democrats can put forward?

OBAMA: Well, I've got, I think half of my colleagues are running for president. So I'm not going to take the bait on that one, Bob. But I...

SCHIEFFER: Why not?

OBAMA: I think Hillary is a wonderfully intelligent and capable person. I'm sure that, should she decide to run for president, she will be a formidable candidate. I think there are a lot of other candidates who are running who bring terrific qualities to the table. I think right now, my focus is on '06 because it's critical, I think, for all Americans to say, we need some balance in our government.

You know, if we don't have any capacity to investigate the administration when it makes bad decisions around the port deal or wiretapping or a whole host of other issues, if we don't have some check on the unfettered power of the White House, then I think we're going to continue to see some of the problems that we've had over the last several months.

SCHIEFFER: One final and one quick question. It seems now that ethics reform, which was on the front burner of everybody for a while, looks like it's just almost about to slide right off the table. What happened?

OBAMA: Well, I'm not going to let it slide off the table. I mean, we've got a bill on the Senate floor that makes some small incremental steps. And it's my effort, along with some others on the Democratic side as well as some Republicans, to try to strengthen it. We're going to try to see if we can ban some of the corporate jets that are being used, and perks. We're going to see if we can put a strong enforcement agency in place that can take complaints outside of the Senate.

So we're going to work hard, and I think that, ultimately, we're going to see a product come out of the Senate that is a decent product. That's my hope, and I'm going to be pushing my colleagues. I'm a little concerned about what happens on the House side. There seems to be a lot of back-pedaling. Given that most of the scandals came out of the House side, I would think that they would be more interested in moving on this than they have been so far.

SCHIEFFER: All right. Senator, thank you very much, and good luck. I hope to have you again many times on Face the Nation.

OBAMA: Thank you, Bob.

SCHIEFFER: Thank you. We'll be back in a moment with Republican Governor Mike Huckabee.

SCHIEFFER: And with us now from Little Rock, Arkansas, the Arkansas Governor Mike Huckabee. He is also chairman of the National Governors Association. And earlier this weekend, he was in Memphis, where all the people who are thinking about running for the Republican nomination, all the wannabes, the think-about-it-ers, the people who are trying to get on the great mentioners list, they were all there. And Governor Huckabee was there with them.

Well, Governor, let's just clear it up. Do you want to announce today, this morning, that you're going to seek the Republican nomination?

HUCKABEE: I think I'll hold off just a little bit. I may go ahead and announce for 2016, but not for '08 just yet.

You know, it was a wonderful weekend in Memphis. I made the comment that it was one of those times where everyone was trying to go around acting as if no one of us had any ambition or ego and we really weren't thinking at all about '08. We just were there and going to places like Iowa, New Hampshire and South Carolina because we were invited to go make those speeches, and it just happened that that's where we ended up.

SCHIEFFER: Well, that's probably the most candor we'll get out of any of the people who were in Memphis over the weekend.

You know, Governor, I want to say one thing: Regardless of ideology or a party, you are a politician that I think anyone would admit leads by example. Like me, you came down some years ago with type II diabetes. One of the things you have to do is lose a little weight, and you really have to get on a program. And it is my understanding you lost how much weight, Governor?

HUCKABEE: Over 100 pounds. About 110 pounds total, Bob.

SCHIEFFER: Well, Governor, somehow -- do you hear me, Governor?

HUCKABEE: Yes, I hear you just fine.

SCHIEFFER: Because suddenly I have lost all communication with you. I'm very sorry to hear that. If you didn't -- and if it didn't come out, you lost 120 pounds...

HUCKABEE: Well... SCHIEFFER: ... which, I must say, is just a remarkable thing.

And, Governor, I guess I'm going to have to sit here and keep talking about you...

HUCKABEE: OK.

SCHIEFFER: ... because we seem to have lost all communication with you.

Governor Huckabee is a Republican, of course. He comes from what is becoming the home of recent presidents, because he comes from Hope, Arkansas. We all know who came from Hope, Arkansas some years back, and that would be Bill Clinton.

And Governor Huckabee in his effort to lose this weight, he's now on the program -- he lost 120 pounds -- he has enlisted the help of former junk food addict Bill Clinton.

And let's see, Governor, can you hear me now?

HUCKABEE: Yes, sir, I'm hearing you fine.

SCHIEFFER: All right, Governor, well, we're back on the program now. So I guess we'll try to get serious as we can here now that we have the sound back.

I want to ask you about what you're hearing from the people in Arkansas about Iraq and what we're going to do about that situation there. Obviously, the president has had a really hard time. What do you think the president needs to do?

HUCKABEE: Well, I just came back from Iraq. I was there a little over a month ago. It was a very enlightening experience, and I had a chance to meet with a number of Arkansas troops who have been there for some time, as well as to talk to some of those troops who have just come back having been there for 18 months. We've had about half of our entire 11,000-member National Guard over there at some time or another.

So I feel like that the information that I'm getting from them, those that are actually out there, as I say, sucking the sand in their lungs and putting their boots on the ground is a little more accurate than maybe those who have yet to go, or who really haven't seen it up close.

The reality is, establishing a beachhead of democracy in a place like Iraq is no easy task. It's a messy process. But it was messy in this country 260 years ago, too, and we're still working to get it right.

The good news is, the progress is significant. And I think a lot of Americans underestimate the incredible job our American military is doing in turning over the security to the Iraqis. We are no longer simply doing something for them; we're doing things with them. And we are making progress.

SCHIEFFER: You really do believe that. Now, the chairman of the Joint Chiefs of Staff, Peter Pace, said last week he thinks -- thought things were going very, very well. There's been a lot of talk about that statement, that maybe the administration is just trying to put the good spin on it here, when, in fact, the country appears to be sliding into civil war. You don't believe it's at that point yet?

HUCKABEE: I do not believe it's at that point. In fact again, with my own eyes and my own ears, I looked, I watched, I listened. And not only to the Americans, but I would pull the soldiers off line, not the official briefings that the Pentagon was going to give us, because I knew that they were going to tell me things were going well. They're supposed to do that.

But when I pulled the soldiers from Arkansas aside and said, look, I'm not going to quote, I'm not going to bust you out. I want to know, are you being equipped? The answer was yes. Are you doing something important? The answer was yes. Do you feel your mission here is accomplishing something worthwhile, and do the Iraqis appreciate what you're doing, and are you getting something done that you believe will have lasting value? And again, the answer was yes.

This was not from a diplomat. This was not from a politician. This was from a guy whose own life was at risk every day he was there, a person who has the most reason to want to come home today, but who said I'm ready to stay to get this job done.

I was impressed with the kind of commitment I saw out of our military, but also the competence and the sense of commitment to the task ahead and a belief that that mission was a vital mission to bring stability in the Middle East, and, for that matter, the rest of the world.

SCHIEFFER: Governor, I think even you would admit, as a Republican that this has been a very difficult time for the president. No matter what poll you look at, he is going down in those polls.

And he's, I think, at an all-time low for his presidency right now. Do you think, as a Republican, that he is now an asset or a liability for the Republican party?

HUCKABEE: Well, polls, I think, for an executive, are certainly troubling because when you make very tough decisions overnight, you can plummet.

I think governors understand that better than most members of Congress do because they're always able to, sort of, hide amidst the votes of others.

But when you're the sole executive having to make tough decisions, you often make them knowing they're going to be unpopular but also knowing that in the long term, you have to make those decisions.

One thing about this president that I respect very much and one of the reasons I like him a lot is that he's willing to make tough decisions, knowing full well they're not necessarily going to be popular.

But he makes them out of a deep sense of conviction and also a deep sense of believing that it's the long-term importance of the decision rather than the short-term political impact that ought to really gauge what he does.

SCHIEFFER: Well, let me just ask you this quickly. What do you think he ought to do right now? What's the most important thing he could do right now?

HUCKABEE: Well, there's about 270 million people all telling him what he ought to do. I'm not sure I'm best qualified to do it.

But I think the most important thing is not so much to change the course but to continue to communicate in clear, plain language the value of seeing democracy established in that part of the world and making sure that Americans understand that, if we succeed there, the ramifications are going to be dramatic for generations.

But, by the same token, if we fail there, not only will the ramifications for our security and safety be compromised but I believe the credibility of the United States is going to be compromised for generations with people not believing that we have, in essence, the stamina to stay to the task that we announced that we're going to engage in.

SCHIEFFER: All right. Governor, I'm sorry about the loss of communications there. Thank you so much for being with us. I hope we'll see you again on Face the Nation.

HUCKABEE: I'll look forward to it, Bob. Thanks.

SCHIEFFER: Back in a minute.

SCHIEFFER: This week marks the third anniversary of America's invasion of Iraq. And tomorrow, the president will deliver the first in a new series of speeches on why we must persevere.

We need to hear the reasons.

We're in a situation now where none of us -- those of us who believe we had to invade and disarm Saddam and those who opposed it -- can say with any real certainty what action will guarantee success.

But it's the Iraqis who need an explanation more than we do.

What needs to be explained to them is this: If you can't stop killing each other and form a government, we cannot help you.

On this broadcast last week, Senator Richard Lugar, the chairman of the Foreign Relations Committee, said it comes down to whether Iraqis want to be Sunnis and Shiites or if they really want to come together and be Iraqis.

In a sardonic column, my friend Tom Friedman of the New York Times picked Vice President Cheney to deliver just that message because, he said, Cheney can deliver it in the toughest way.

What must stop is the ongoing government effort to sugarcoat it, trying to blame it on the media or saying it's all going very, very well -- as our top general, Peter Pace, did last week.

The Iraqis hear that and take it to mean we believe their excuses; then they'll continue to dawdle.

At this table last week, Congressman John Murtha said it's not a

we problem, it's a them problem. The Iraqis need to be told that.

Sure, if threatening to leave is a risk, but when people realize they have to do something to survive and they are the only ones to do it, they generally give it their best effort.

We'll see you next week right here on Face the Nation.

CNN – LATE EDITION

WOLF BLITZER, HOST: This is "Late Edition," the last word in Sunday talk.

(BEGIN VIDEO CLIP)

DONALD RUMSFELD, U.S. SECRETARY OF DEFENSE: The plan is to prevent a civil war.

(END VIDEO CLIP)

BLITZER: Sectarian violence grows alongside Iraq's insurgency. Can the country survive the double threat?

We'll ask the U.S. ambassador to Iraq, Zalmay Khalilzad.

Plus, insight on Iraq, the war on terror and more from two former vice presidential candidates, Republican Jack Kemp and Democrat John Edwards.

And Democratic National Committee Chairman Howard Dead outlines his party's plan for winning back the majority in Congress.

(BEGIN VIDEO CLIP)

GEORGE W. BUSH, PRESIDENT OF THE UNITED STATES: I'm concerned about a broader message this issue could send to our friends and allies around the world.

(END VIDEO CLIP)

BLITZER: A political firestorm kills a Dubai company's deal to manage U.S. ports. How will it impact Arab allies in the war on terror?

We'll talk to the two top members of the Senate Armed Services Committee, Republican Chairman John Warner and Democrat Carl Levin.

Highlights of my exclusive firsthand look at the company and the ports at the center of the storm.

And a unique visit to Dubai, the city of gold -- by air, land, and sea.

ANNOUNCER: Live from CNN in Washington, this is "Late Edition" with Wolf Blitzer.

BLITZER: It's 11:00 a.m. in Washington, 8:00 a.m. in Los Angeles, 7:00 p.m. in Baghdad, 8:00 p.m. in Dubai.

Wherever you're watching from around the world, thanks very much for joining us for "Late Edition."

We'll get to my exclusive interview with the United States ambassador to Iraq, Zalmay Khalilzad, in just a moment.

First, though, let's get a quick check of what's in the news right now.

(NEWS BREAK)

BLITZER: Thanks very much, Fred.

Let's go to Iraq right now. As if the insurgency isn't a big enough challenge for U.S. forces and the country's struggling government, there's also now the problem of escalating sectarian violence among Shiite and Sunni Muslims.

Joining us now live from Baghdad is the United States ambassador to Iraq, Zalmay Khalilzad.

Mr. Ambassador, thanks very much for joining us. I know you've just emerged -- only within the past several moments -- from emergency meetings with top Iraqi leaders.

What, if anything, did you accomplish?

ZALMAY KHALILZAD, U.S. AMBASSADOR TO IRAQ: Well, first of all, it's good to be with you.

The meeting was a very positive step. It was a good day today in Baghdad. The leaders decided to bring forward the opening of the assembly -- now, rather than on the 19th, the assembly would be opened on the 16th.

And, two, there was an agreement among the leaders to meet continuously as of the day after tomorrow, 10:00 o'clock, until there is an agreement on the government -- including the prime minister and the process for decision-making by the new government.

And lastly, which was very important, there was agreement by all the leaders of the factions that there is no red line in terms of the inclusion of any faction in the formation of the government.

And I think this was important. The leaders rose to the occasion. This indicates they are taking the problems of the country seriously.

BLITZER: I know that one of the major issues is who's going to be the prime minister of Iraq under this new government -- and Ibrahim al-Jaafari, the interim prime minister, I take it, did not participate in these high-level discussions you just completed?

What does that mean, if anything, about his future as the prime minister of Iraq? KHALILZAD: Well, the reason he did not participate is that he's not the leader of the faction that he's a part of. Abdel Aziz Hakim is the leader of that faction, the United Iraqi Alliance, and he was there.

And also there was principal deputy speaker Mr. Shahristani, representing the alliance. There were two representatives from each of the major groups, and those two represented the alliance.

With regard to Mr. Jaafari's future, I think there was a good discussion that there needs to be a broadly acceptable nominee for the prime minister.

And the Shia alliance indicated flexibility -- there has to be a broad agreement, someone who can bring the country together, someone who's effective in leading Iraq.

But obviously the issue was not decided on as to who. This will be, of course, one of the key issues that, in the coming days, the Iraqi political leaders will have to decide on.

BLITZER: Well, you're leaving open the possibility that, even though in a narrow vote he emerged as the candidate of the Shiite faction, Ibrahim al-Jaafari, he still might not be the next prime minister.

I want you to listen to what Adnan Pachachi, one of the Sunni leaders with whom you met today -- I want you to listen to what he told me on "Late Edition" last Sunday.

He said this, and I'll read it to you: "This is not a personal matter, but we feel that in order to have a government of national unity, the prime minister has to be acceptable to all the components of this government and he should not be a controversial figure, which unfortunately Dr. Jaafari is."

Bottom line: Is it possible that the Shiite leadership, the Shiite political faction, will now have a change of heart and nominate someone else like Adel Abdel-Mehdi to be the next prime minister?

KHALILZAD: Everyone agrees that the prime minister has to be someone that can bring the country together, someone who is competent in terms of dealing with the problems of Iraq -- and that the person has to be from the largest bloc, and that is the UIA, the Shia alliance.

And as I said before, this is an issue that will have to come up in the coming days and be agreed to. There was a lot of flexibility on all sides. I think I would leave it at that at the present time.

BLITZER: All right. You're leaving it a little bit ambiguous, which clearly is what the parties want.

Bottom line: How much longer do you think it will take for a new government to be formed?
KHALILZAD: It's very important to remember, Wolf, that this decision, the formation of a government of national unity, is an extremely important decision that the Iraqis face. If they make the right decision, forming a national unity government, competent ministers, a good process for decision-making with a good program governing from the center, it will put Iraq on the right trajectory. It will be a major step forward for Iraq.

So given the toughness of the situation, of the decisions that they have to make, it's still going to take a bit of time. But I have urged them -- and they understand that they need to move as quickly as possible. But I do not want to give you a date or how many days it will take.

We'll work with them to do it as quickly as possible. They understand that it's an urgent situation.

BLITZER: Let me read to you from what Lieutenant General Michael Maples, the director of the U.S. Pentagon's Defense Intelligence Agency, testified before Congress at the end of February. He said this, he said:

"Sunni Arab elites have little cause to support the rebuilding of Iraq. Many Sunni leaders view the current political solutions as predicated on a perpetual minority status in a Shia-Kurd dominated government."

Are you convinced, Mr. Ambassador -- and no one is closer to the negotiations right now than you are -- that Iraqi Sunnis, who did dominate the political structure under Saddam Hussein, will participate fully in this new government of national unity, as you call it?

KHALILZAD: Well, absolutely. It's very important that they participate, and I believe they will.

The Sunnis did not participate in the first elections that took place in Iraq over a year ago. They did participate in the last election on December 15th. That was a major positive development.

Now the next step is to have them -- along with the Shias and Kurds -- participate in a national unity government and to, as I said, have a program for governing from the center.

The terrorists would like to provoke a sectarian war. The appropriate answer to that is a government of national unity with a good program, good ministers, and a good process for decision-making.

That's what's needed and that's what we're working for.

BLITZER: Let me read to you, Mr. Ambassador, from an article in today's New York Times entitled the juggler -- that's a reference to you, as the headline calls it.

"The Shiite religious parties who dominate Iraq's government have now grown tired of hearing the ambassador tell them that they must share power with Sunni Arab leaders, whom they view as terrorists. Some Shiite leaders even say they suspect the ambassador of betraying them in his recent criticisms of Shiite militia tactics. They interpreted those comments as a shift from democratic idealism to a cold concern with the balance of power."

I wonder if you'd want to react those words that were reported in today's New York Times.

KHALILZAD: Well, it is true that I have been speaking repeatedly privately and publicly with them with regard to the need for a government of national unity and with regard to a program and with regard to the ministers being competent and broadly accepted. I hope they have not grown tired of me, but they agree with me when I talk with them that they need that.

Sometimes, of course, they'd rather I not say some of those things that I say publicly but speak to them privately. But I have told them that I'm going to be frank with them, both publicly and privately, in terms of what I see the situation to be.

We are very much committed to defeating terrorists here. We are very much committed to building a democratic state in Iraq that's successful. And for all communities, including the Shias, to have the appropriate place, their rights respected and protected.

And I believe they understand where I'm coming from and what I am pushing for, and I understand them. I think we'll work together and achieve a government of national unity. That's what's necessary. And we're on the right track.

BLITZER: As you know, Mr. Ambassador, a lot of American analysts are worried that the big winner in Iraq might be its neighbor Iran. I know you've been authorized to hold talks with Iranian diplomats. Have you held such talks, whether in Iraq or outside of Iraq?

KHALILZAD: No. We have not had any meetings with them yet. There's still discussions about modalities. The offer is still on the table. With regard to the Iranian policy, we have concerns with regard to their support for some of the militias and some of the extremist groups.

We want good relations between Iraq and all its neighbors, and at the same time we do not want any of its neighbors to dominate Iraq. And that's our policy with regard to Iran as well. We have not sought to impose our differences with Iran on Iraq, but at the same time we are concerned about aspects of Iranian policy which supports extremists and interferes in the development of a successful democratic Iraq.

BLITZER: Do you know, Mr. Ambassador, who killed the American peace activist, the Quaker activist, Tom Fox?

KHALILZAD: Well, the terrorists did. And the Iraqis found his body in western Baghdad. And I'm very sorry about that. Tom was a good man. He came here to work with Iraqis for peace and reconciliation. The terrorists want nothing good, and they go after innocent people. They cannot confront our forces or Iraqi forces directly. So they want to make life difficult by provoking sectarian war and carrying the murder of people like Mr. Fox, Tom Fox.

BLITZER: Mr. Ambassador, thanks very much for joining us on this very, very hectic, busy day for you. We appreciate it. Good luck to you. Be careful over there. Stay safe. And we'll have you back here on CNN. The ambassador of the United States to Iraq, Zalmay Khalilzad joining us from Baghdad.

Just ahead, debating a troops timetable. Can the U.S. afford to set a deadline for withdrawal from Iraq? We'll get the views of two former U.S. Vice presidential candidates, Jack Kemp and John Edwards. They're standing by live.

Then, the Democratic party chairman Howard Dean. I'll ask him how his party claims to reclaim the balance of power on Capitol Hill in this year's midterm elections in the United States.

And later, my exclusive view of Dubai and the company at the center of the ports controversy. "Late Edition" continues right after this.

BLITZER: Our web question of the week asks this: Did Congress overreact to the United Arab Emirates ports deal? You can cast your vote. Go to cnn.com/lateedition. We'll have the results at the end of this program.

Straight ahead, defiant words from Iran. We'll talk with former vice presidential candidates Jack Kemp and John Edwards about how the U.S. should respond. You're watching "Late Edition, " the last word in Sunday talk.

BLITZER: Joining us now to talk about where the U.S. mission in Iraq is headed, as well as the week's other key developments, are two special guests. In Orlando, Florida the former Republican vice presidential candidate and U.S. congressman, Secretary Jack Kemp. And in his home state of North Carolina, the former Democratic vice presidential candidate and U.S. Senator John Edwards. Gentlemen, good to have both of you with us. And Secretary Kemp, I'll start with you. You just heard the ambassador say this has been a good day in Iraq as far as trying to bring together a government of national unity. But God knows there have been a lot of bad days. Is the country, in your opinion, heading toward civil war or genuine democracy?

JACK KEMP, FORMER VICE PRESIDENTIAL NOMINEE: Well, probably some form of democratic development if we do the right thing. The ambassador is doing a fabulous job. He's a wonderful human being, and he's exerting all his diplomatic skills in trying to get a government of national unity. We have to be of help. I think one or two ways we could be of help is number one, announce unambiguously that the United States is not there to keep bases in Iraq. And number two, I think by the year 2009 or the end of 2008, we've got to say to the Arab world and to Iraqis, we are going to be out. We are going to set a deadline, and then seal off the borders of Syria and Iran, make the job easier of keeping insurgents out.

BLITZER: So basically, let me just be precise. You're saying there should be a timetable for a U.S. withdrawal?

KEMP: A date certain. But more importantly, we have to make an unambiguous announcement that we're not there for bases or oil. We're going to be not keeping any bases in the Iraqi nation.

BLITZER: Senator Edwards, are you closer to your fellow Democrat John Murtha, Democratic senator from Pennsylvania, who wants a phased withdrawal over the, shall we say, the next six months, a redeployment of troops outside of Iraq? Or closer to Joe Lieberman, who himself was a former Democratic vice presidential candidate who basically takes a much more hard-line stance?

JOHN EDWARDS, FORMER VICE PRESIDENTIAL NOMINEE: Let me speak for myself. What I believe, and I just listened to the ambassador, what I believe is that it's absolutely critical that we reduce the size of the American presence there.

That's a judgment that has to be made. My judgment is the number of troops that we have in Iraq now, the footprint, so to speak, that we have there, is doing more harm than good, for some of the reasons that Jack just talked about.

You know, we've got to make it clear we're going to let the Iraqis govern themselves, we're going to let them provide their own security and that we're not there for oil.

In order to accomplish that, we need a substantial reduction in our troop presence. I have, for months, said we ought to take it down at least by 40,000 troops.

So I think that's the first and most important step to sending the right signal to both Iraq and to the Arab world.

And if I can add one last thing, you know, the one thing that's clear about this is, and I think the ambassador believes this, too, is ultimately we can't do this for the Iraqis.

They have to do it for themselves. They have to decide whether they're going to have a representative government, whether they're going to do the work to make sure that Iraq can be secured.

This is going to ultimately have to be their job, not our job.

BLITZER: There are some, though, who maintain, though, Senator Edwards, that the only thing standing in the way of a civil war is that U.S. military presence. If the U.S. were to significantly reduce that presence, then who knows what might happen.

Are you concerned about the ramifications of that kind of troop withdrawal that you're talking about?

EDWARDS: I think it's the right thing to do under the circumstances. I think we actually have a low-level civil war going on right now. The question is whether it's going to transition into a full-blown civil war.

Well, the key to that is not us. The key to that is the Iraqis, whether they're going to have a representative government, whether they're going to step to the plate and help provide security for their own country.

I'm not saying we pull everybody out immediately, but we have to have a serious and substantial reduction so that this transition is occurring. They've got to do this for themselves, ultimately.

BLITZER: Secretary Kemp, let's talk about the Dubai ports deal collapse. How much damage, in your opinion -- and you've been a student of this area for some time -- how much damage, if any, has there been to the U.S. strategic interests in that part of the world given the close relationship between the UAE and the U.S.?

KEMP: Well, first of all, let me congratulate you, Wolf, for going to Dubai and interviewing Sheikha Lubna. She did an outstanding job of speaking for the United Arab Emirates government.

And they are an ally. And this is a betrayal of a friend. We need friends in the Middle East. It's tough for Arab nations to be friendly to the United States.

And after 9/11, they were forced to make a choice. They made a choice. And I was pleased to hear Sheikh Maktoum suggest that they want continued good relations with the United States.

Just think, there are naval ships in Dubai ports right now, managed, controlled and securitized by Dubai Ports World.

Our Air Force is using air bases in UAE, serviced, managed and securitized by Dubai Ports World.

So they've been an ally. They will continue to be an ally. But this, in my opinion, is a betrayal of a friend and is a sad day for the United States, acting so small, to not even let the president have a full 45 days to give the American people the facts.

BLITZER: And I just want to be precise on this point because you're very outspoken on this issue, Secretary Kemp. You're speaking, not as someone who has been hired by the UAE or one of Dubai Ports World.

KEMP: No.

BLITZER: You have no financial stakes in this.

KEMP: Absolutely not. I've done business in the Middle East, both in Israel and in the UAE, or in Egypt, at least, in the past. But I have no current contract. If I were allowed to do business again, I'd be honored to do so. These are friends. This is a globalization. Tom Friedman is right. The world is becoming flatter. And this is an area of the world right below Pakistan, right below Iran, right near Saudi Arabia and Iraq which has decided to be an ally of the puts United States.

So I think -- I use the word betrayal. I think it is a betrayal of a good friend and good ally. And I'm glad to see they're going to continue to be good friends and allies of the United States in the future.

BLITZER: Senator Edwards, are you on the same page as Jack Kemp?

EDWARDS: No. No, Jack and I have become very good friends and I have enormous affection for him and professional respect for him because we've done all this work on Russia which I assume we're going to talk about in just a minute.

On this subject, we don't agree. I think it's very important to recognize that our relationship with the UAE is a very positive relationship.

What they've done in the war on terror has been enormously helpful to us. I don't think we should discriminate against anybody.

I just think there's a threshold question for America and that question is who is going to provide for the security and for the operation of our ports. And my own view is that both the security and the operation of ports here in this country should be provided by American companies.

BLITZER: Senator Edwards, let's talk about Russia because you and Jack Kemp have been involved in this committee from the Council on Foreign Relations, taking a look at the U.S.-Russian relationship.

Are you confident, Senator Edwards, that Vladimir Putin, the president of Russia, is democratic -- small "D" -- and is in charge of a country that's moving in the right direction as opposed to the wrong direction?

EDWARDS: No, I'm not at all confident that Vladimir Putin is a democrat -- small "D."

My view is that -- and we talk about this in the report -- two things have happened under Putin, one positive and one negative.

The positive is the economy has changed dramatically in a good direction. They're much more stable financially. They've had GDP growth, by the end of this year, of about 65 percent during the time Putin's been in power, contrasted with about a 40 percent contraction during the time that Yeltsin was in power.

So, on the economic side, they've done some very good things, propped up, of course, in part by oil and natural gas prices. But that's not all of it. They've done more than that. But, on the democratic side, which way is Russia moving? They clearly are moving in the wrong direction, across the waterfront, everything from the suppression of opposition political parties to taking over the mass media to going after the oligarchs, getting rid of the direct election of governors.

So, basically, they've got divergent tracks right now. Economically, they're doing some good under Putin. On the democratic side, no one in Russia -- we were there a little while ago -- no one even argues that they're a democracy. And, for America, if I can step back for just a second, for America this is important because it has to do with whether we have a real partnership with Russia or whether we have just selected items on which we can work with them on, for example, Iran, which is enormously important.

But the issue for America over the long term, Wolf, is whether we're going to live in a world where the great powers work together on the issues that face the world, everything from terrorism to proliferation to AIDS or whether we're only going to be able to work on selected things.

And it's a huge issue. That's why our relationship with Russia matters.

BLITZER: Secretary Kemp, as you know, the G8 is supposed to have their summit in St. Petersburg, Russia this coming summer in July.

In your report, you speak about an informal probation of Russia's involvement in the G-8, the world's largest industrialized democracies. Should this G-8 summit go forward in Russia this summer?

KEMP: I believe it should. And I agree with John that the G-8 summit -- this is the 31st anniversary of these summits that began at Rambouillet, France with Giscard d'Estaing and Gerald Ford in 1975.

It was G-6, then G-7 and now G-8. So John is right. We need Russia's cooperation on everything from Iran to energy security. And I believe that that partnership, or selective partnership, is extremely important.

And the G-8 is a good time to make a broader agenda at the G-8 in St. Petersburg, where it's not just energy security, education and HIV/AIDS. It's also, stop bullying your neighbors, lift the pressure up from Latvia, Georgia and Ukraine and make sure that they cooperate on Iran.

So, as far as I'm concerned, we really need more of an economic agenda -- get them into the WTO, begin the negotiations for a free trade agreement because, then, my study of history has convinced me, Wolf, since the end of World War II, it's been economic liberalization leading to political liberalization.

So whether or not he's a Jeffersonian Democrat or not right now is, I think, beside the point. We need their cooperation and we've got to bring them into this flattening world a la Tom Friedman.
BLITZER: Two former U.S. vice presidential nominees joining us: Jack Kemp and John Edwards. To both of you, thanks very much for joining us.

KEMP: Thank you, Wolf.

EDWARDS; Thanks, Wolf.

BLITZER: And coming up: while polls show Republicans vulnerable leading up to November's congressional elections, do Democrats have a unified message to win over voters?

We'll speak with the party chairman, Howard Dean, the chairman of the DNC. He's standing by to join us live.

But up next, a quick check of what's in the news right now, including the latest testimony in the trial of Saddam Hussein. Stay with "Late Edition."

(NEWSBREAK)

BLITZER: Welcome back to "Late Edition." I'm Wolf Blitzer in Washington.

From the ports deal collapse to Iraq to the Hurricane Katrina response, lots of bad news for Republicans -- appearing to give the Democrats their best chance in years for regaining a majority in the U.S. Congress.

But the party is finding that's easier said than done.

Joining us here in Washington is the Democratic National Committee chairman, Howard Dean.

Governor Dean, welcome to "Late Edition."

HOWARD DEAN, DNC CHAIRMAN: Thanks for having me on, Wolf.

BLITZER: You just heard the ambassador, Zalmay Khalilzad, say that this has been a good day in trying to form a new government of national unity in Iraq. A recent Washington Post/ABC News poll asked if Democrats in Congress have a clear plan for Iraq.

Seventy percent said they do not have a clear plan. Only 24 percent said they have a plan.

The Democrats seem to be all over the place.

DEAN: Well, certainly wouldn't say we're all over the place. The resolution that was passed by the Senate was originally a Democratic resolution, which said: This will be a year of transition, that we will -- in fact, there was a letter to the president from Senator Levin, who I think will be on this show a little bit later, Senator Collins, and Senator Reed, Jack Reed, saying that it's time for the Iraqis to get their house in order and we have to make clear that we're not going to be there forever and we need to make this the transition year.

So I do think that we do have a plan. We are much more united than we appear in the newspapers.

And I think -- as often happens -- small differences of opinion get blown up as newspaper articles.

BLITZER: Is this going to be the big issue -- Iraq -- this upcoming mid-term election year?

DEAN: I think big issues will be security, the desire for a change, and honesty and openness in government. I think we win on all three of those.

I think the people of this country have lost confidence in the president's ability to defend us, principally because he hasn't been very truthful with the American people.

BLITZER: And specifically on which he hasn't been truthful, are you saying he lied to the American people?

DEAN: I'm saying that he misled us not just on Iraq and not just on Katrina, but he misled us on issues -- for example, how much the drug benefit for Medicare was going to cost and then what a mess that was going to be; misled us on the fact that he said he was going to fire anyone who leaked information, and Karl Rove still has a security clearance today.

You know, this is not an administration that's been terribly truthful to the American people -- and I think the American people realize that now.

So what we offer is real reform. You can see the Republicans in the Senate have now backed off any kind of lobbying reform. Well, we still think that you shouldn't take private jet flights, you shouldn't take free lunches -- and we ought to change the conference committee routine so you can't stick things, like the Republicans stuck in before Christmas, $20 billion giveaways to HMOs and oil companies.

Those are fundamental ethics reforms that ought to be made. I don't care if the Abramoff scandals have faded into the background because of all this other business; we need to make those changes.

We need real openness and honesty in government again.

BLITZER: So what I hear you saying is that you really feel the Democrats could take over control -- at least of the House, but maybe the Senate this year -- is that what you're saying?

DEAN: Yes. If we are relentless about the same message in 435 districts. I make no bones about this. I look at Newt Gingrich as the model for how to do this.

BLITZER: What he did in '94. DEAN: Yes. I certainly don't agree with much of his political views, but I certainly think his strategy was excellent.

Give a consistent message about what Democrats want: honesty and openness in government, American jobs that will stay in America using energy independence as a new industry to create those jobs, a strong national defense based on telling the truth to the American people and our soldiers. Those are the kinds of things where we can really make difference -- health care...

BLITZER: It sounds, Governor...

DEAN: ... a health care system that works for everybody. Those things we've all agreed on -- governors, senators, congressmen, mayors have all agreed on those things.

BLITZER: It sounds like you want to have a contract for America the way that Newt Gingrich had his contract for America?

DEAN: Well, if we do, we certainly won't call it that. But there are some fundamental things...

BLITZER: Well, what are you guys thinking of calling it?

DEAN: Who knows? I mean, we haven't got to an agreement on that. I'm actually meeting with the leadership again this week to have further discussions.

But the agenda is very clear. Again: honesty and openness, security, jobs, health care, education, and retirement security.

BLITZER: Here's one of the biggest problems you have -- is money. And money in politics, as you well know -- as in a lot of other areas -- talks.

According to these Federal Election Commission statistics, the Republicans raised $103 million over the past year. Democrats have raised $50 million. That's a two to one advantage that they have.

DEAN: It's also not exactly accurate. If you throw in what the DCCC and the DSCC, the Senatorial Committee have raised...

BLITZER: Those are the Democratic House and Senate committees.

DEAN: ...and match us all together, it's not anything close to two to one. The DNC has had a record year. We raised 20 percent more money when we couldn't take soft money than has ever been raised in an off year before. We have now 200 organizers in every state in the country, which we've had now for several months, three years before the next presidential election. These folks for the first time are going to be able to help out in congressional elections.

BLITZER: But the Republicans still have a lot more money.

DEAN: Yeah, but, you know, if money won this election we'd have a Democrat in the White House right now. It's infrastructure that you have to have. We need to fight in every state and stop trying to think we're going to be a national party if we have an election in 18 states. We need to be in every state.

BLITZER: Speaking of infrastructure, and there's a lot that goes into winning elections, there was a little bit of a stir this week. Harold Ickes, a top adviser to Hillary Clinton and to Bill Clinton, he was a former White House deputy chief of staff under Bill Clinton, let me read to you what The Washington Post wrote on Wednesday: "Ickes and others involved in the effort acknowledge that their activities are in part a vote of no confidence that the DNC under Chairman Howard Dean is ready to compete with Republicans on the technological front." What he's trying to do, and our Mary Snow reported it this week as well, is he's trying to create some new computer statistics, some new technology to help someone like Hillary or someone else move down the road in 2008 to get the kind of advantage they need to recapture the White House.

DEAN: We looked at what they're doing. It's a fine thing for outside -- for in terms of outside organizations. But the Democratic National Committee has to be the one that develops the voter file to be used by Democratic candidates. That's the law. We now have, based on what my predecessor did in terms of gathering information, we now have a technological platform that will do that.

BLITZER: But he says the database isn't good enough, and that's why he wants to create another one. We're talking about Harold Ickes.

DEAN: The database is very, very good. I brought my own technological people from my campaign to do it. And one thing, you may or may not have liked what I did in the campaign, but nobody argues with the technical skills of my folks.

And we brought them in. They're creating what needs to be done, and we'll have that ready, not just for senators and Congressmen. It has to be ready for mayors, for city councilors, for state representatives. You can't win the presidency unless you can start doing what we're now doing in places like Mississippi and Alabama and Missouri and Utah. We're now starting to win races on the ground.

BLITZER: So is Harold Ickes wrong?

DEAN: I would disagree with Harold. He's a friend of mine, but I wouldn't agree with him on this one.

BLITZER: So they're just basically wasting money. They could use the DNC for their purposes.

DEAN: I wouldn't say he was wasting money. He may want to do this for his own purpose, but it won't basically help candidates. They have to rely on hard money. It can't help federal candidates.

BLITZER: Is Hillary Clinton too liberal to win the presidency?

DEAN: You know, I don't discuss 2008 at all because I have to be the referee in this one. Hillary Clinton is running for the United States Senate. She's done a terrific job in New York. And I think she'll sit down and decide what her options are afterwards, but right now she's very focused on New York City and we don't know for sure...

BLITZER: New York state.

DEAN: Excuse me. Well, New York state and New York City. And we have no idea if she's going to run or not. And I know everyone in Washington thinks, oh, Hillary's going to run, Hillary's going to run. I know Hillary Clinton very well. She's a very smart person. She'll figure out what's best for her and what's best for New York and make sure that New Yorkers are well taken care of no matter what she does in her future.

BLITZER: I'll just put it up on the screen. Our latest CNN/USA Today/Gallup poll among registered Democrats has her as the choice for 2008 39 percent, John Kerry at 15, Al Gore at 13, John Edwards at 12, Mark Warner and Joe Biden at 5. At least at this early stage, that could simply be name recognition.

DEAN: We all know that whatever happens today may have absolutely no relevance whatsoever in what's going to happen in November of 2008. We have to focus on 2006, Wolf. We really do. I believe that we can take back the House and the Senate.

You know, America really wants a change, and the bottom line in this next election, do you want more of the same or do you want a change? And the Democrats can represent the things that people really want changed: honesty and openness in government, real security changes, a health care system that works for everybody. Those are fundamental things that people want to see done differently.

BLITZER: I've spoken to a lot of Democrats, and you speak to a lot more than I do. They are really sensing that they could win in this November, given all the problems the Republicans have had, the president, the White House, Katrina, Iraq, Scooter Libby, the vice president's former chief of staff, the vice president shooting his friend in the face in that hunting accident, the warrantless wiretaps, the Dubai ports deal.

So much negative stuff for the Republicans. If the Democrats don't take advantage of this, as one person said to me, there's going to be all hell to pay.

DEAN: Well, first of all, I'd prefer not to look at it as taking advantage of Republican weaknesses. After all, what's really at stake here is the future of the country. This country's become much weaker under President Bush, not just security and the outsourcing of our ports operations and all that, but the deficits. We're about to vote next week on a new debt ceiling. I think the Democrats are going to vote no. And thank God. Somebody has to be fiscally responsible in this country.

And the Republicans have lost the mantle of fiscal responsibility. Democrats are the only party in the last 40 years who have run a surplus under Bill Clinton. We've got to return us to the basics, return this country to the basics, where we're focused. You know, the president talks about homeland security. Well, homeland security means hometown security. And the Republicans have forgotten about ordinary people in the streets of America.

BLITZER: Let me get your reaction to this proposal. As you know, for years the Iowa caucus was first going forward with the presidential nominee, followed by the first primary in New Hampshire. There's now a recommendation out there that after the Iowa caucus there be two other caucuses in other states that may be more diverse than Iowa or New Hampshire before there's the first primary in New Hampshire. Is this a good idea?

DEAN: Well, it's certainly a good idea to have more geographic diversity and more ethnic diversity in the Democratic nominating process. After all, we are the most diverse party, certainly in this country, and probably the most diverse party on the face of the earth in terms of the different kinds of people who keep us in power. And who we need to put us back in power.

So I'm very supportive of this notion that diversity, both geographic and ethnic, in the prewindow.

We are committed to leaving Iowa first as the first caucus in the country and New Hampshire as the first primary in the country.

BLITZER: But do you support adding two caucuses between those two events?

DEAN: Well, I'm not going to -- you know, there's some wriggle room. The only commitment I'm going to make to you right now is there will be earlier events, and there will be some events, or at least one event in between Iowa and New Hampshire, and there will be before the window somewhere between four and six events, including Iowa and New Hampshire. That's what the commission recommended. I haven't had a chance to sit down with the rules committee. But we will have diversity in the prewindow.

BLITZER: Howard Dean is the chairman of the Democratic Party. Thanks for joining us.

DEAN: Thanks, Wolf.

BLITZER: And coming up next, in case you missed it, "Late Edition's" highlights from the other Sunday morning talk shows here in the United States. But first this.

(BEGIN VIDEOTAPE)

BLITZER (voice-over): Gordon Parks. What's his story? The legendary photographer, poet and filmmaker died Tuesday at his home in New York. Parks, the son of a Kansas dirt farmer, is credited for opening doors for African Americans in the arts. Parks began his career as the first black photographer in the government Office of War Information, and later became the first black photographer at both Vogue and Life magazines, where he worked for 20 years.

In 1969 he became Hollywood's first black filmmaker to direct a major studio movie, "The Learning Tree," and went on to direct "Shaft," featuring the first black action hero onscreen. Parks was 93.

(END VIDEOTAPE)

BLITZER: And now in case you missed it, let's check some of the highlights from the other Sunday morning talk shows here in the United States.

On ABC's "This Week," Senate Majority Leader Bill Frist blasted plans by Democratic Senator Russ Feingold to introduce a resolution to censure President Bush for warrantless wiretapping.

(BEGIN VIDEO CLIP)

U.S. SENATOR BILL FRIST (R-TN): The signal that it sends, that there is in any way a lack of support for our commander in chief -- who is leading us with a bold vision in a way that we know is making our homeland safer -- is wrong.

(END VIDEO CLIP)

BLITZER: On NBC's "Meet the Press," Democratic Senator Joe Biden said time is running out for the U.S. military presence in Iraq to be effective.

(BEGIN VIDEO CLIP)

U.S. SENATOR JOSEPH BIDEN (D-DE): If they don't have a constitution in place by this summer that is viewed as a uniting document where everybody signs onto it, it's game over.

Now, how you pull them out, where you pull them to, whether you have them over the rise, and whether you have a containment policy that secures the region in a different way -- that's a whole different question.

But status quo, the way it is now, is over.

(END VIDEO CLIP)

BLITZER: On CBS's "Face the Nation," Democratic Senator Barack Obama went one step further.

(BEGIN VIDEO CLIP)

U.S. SENATOR BARACK OBAMA (D-IL): This year should be the year in which we start withdrawing our troops. I think the footprint that we have on the ground is actually exacerbating some of the tensions.

My view -- and I always thought that this enterprise was poorly thought out -- but I also felt that, once we were there, we should try to make the best of a bad situation.

(END VIDEO CLIP) BLITZER: On Fox News Sunday, the Republican chairman of the House Armed Services Committee, Duncan Hunter, defended the widespread opposition in Congress to the foreign government ownership of U.S. ports.

(BEGIN VIDEO CLIP)

U.S. REPRESENTATIVE DUNCAN HUNTER (R-CA): You couldn't open a hamburger stand in Dubai, because Americans can't own anything.

All we're asking to foreclose to foreign ownership is a tiny percentage of that vast array of economic opportunities. Let's let people buy apartments in Chicago or farmland in Iowa, but they can't own and operate port operations.

(END VIDEO CLIP)

BLITZER: Highlights from the other Sunday morning talk shows here on "Late Edition," the last word in Sunday talk.

Don't forget our Web question of the week. You can vote right now. There it is: Did Congress overreact to the United Arab Emirates ports deal?

We'll have the results in our next hour. Stay with us. We'll be right back.

BLITZER: Just ahead, the Senate Intelligence Committee member, Saxby Chambliss -- he's in Dubai right now. We're going to talk about where things stand after the ports deal collapsed.

And the two top members of the Senate Armed Services Committee, John Warner and Carl Levin -- they're standing by live to talk about the potential impact in the war on terror, Iraq, Dubai, much more.

All "Late Edition" -- coming up at the top of the hour.

BLITZER: This is "Late Edition," the last work in Sunday talk.

(BEGIN VIDEO CLIP)

BUSH: I'm committed to strengthening our relationship with the UAE and explaining why it's important to Congress and the American people.

(END VIDEO CLIP)

BLITZER: The plug is pulled on the Dubai ports deal. Is U.S. standing in the Arab world weakened? We'll ask the top two senators on the Armed Services Committee, Republican Chairman John Warner and Democrat Carl Levin.

Also, a conversation with Senate Intelligence Committee member Saxby Chambliss, who's on the ground in Dubai.

(BEGIN VIDEO CLIP)

(UNKNOWN): You just (INAUDIBLE) box and send it to a representative.

(END VIDEO CLIP)

BLITZER: Plus, highlights of my exclusive behind the scenes tour of the company in the eye of the storm: DP World.

And part Las Vegas, booming desert city; part Disneyworld, fantasy entertainment; part Riyadh, packed with mosques. A look inside diverse Dubai.

ANNOUNCER: Live from CNN in Washington, this is "Late Edition" with Wolf Blitzer.

BLITZER: Welcome back. We'll speak with Senators John Warner and Carl Levin in just a moment. First, though, let's get a quick check of what's in the news right now.

(NEWSBREAK)

BLITZER: Thanks, Fred.

Let's get the latest developments that we're following in Iraq right now, a deadly attack in Baghdad's Sadr City, occurring today just as the discovery of a security breach over at Baghdad's International airport and the resumption of the trial of Saddam Hussein. Our Aneesh Raman is in Baghdad. He's joining us now, live, with the latest details. Aneesh?

ANEESH RAMAN, CNN CORRESPONDENT: Wolf, good afternoon. As Fredricka mentioned, at least 36 people killed, over 100 wounded, after three car bombs detonated at two marketplaces in Sadr city.

That is the most highly populated Shia area of the capital. It is also home to the country's second largest Shia militia, the Mehdi militia, who are loyal followers of Shia cleric Muqtada al-Sadr.

This attack has devastating potential for the sectarian strife here, given where it took place and the casualties that we are seeing here tonight.

Meantime, another security scare, this time at the Baghdad International Airport, a major security breach, taking place on Thursday. Royal Jordanian Airlines, the main airline that flies out of Baghdad to Amman, telling CNN today that, on Thursday, explosives were found, suspected explosives, in a cigarette box near a flight as it was about to leave for Amman.

Officials out of Amman are saying that they are still testing that material. But sources with Royal Jordanian in Baghdad confirmed to CNN that they were in fact explosives. Now, the U.S. embassy prompted this inquiry because a warning message went out today prohibited travel for U.S. governmental employees on commercial flights out of Baghdad until further notice, following this security breach.

All of this, as the trial of Saddam Hussein continued today, Saddam Hussein not in court. For the first time, the five-judge panel brought in the defendants one by one.

We heard from three today, former low-level Baath party members in the village of Dujail. They were essentially given time to testify, to question the evidence that has been presented, the witness testimony as well.

Court adjourned, set to resume tomorrow, Wolf. We expect to hear Saddam himself testify at some point early this week. Wolf?

BLITZER: What about the latest efforts -- we spoke with the U.S. ambassador to Iraq, Zalmay Khalilzad -- the latest efforts to try to get some sort of new government, a national unity government.

I heard him say, and each of our viewers who were listening on the first hour of "Late Edition" that they are still open to the possibility that Ibrahim Al-Jaafari, the interim prime minister might not, when all is said and done, be the next prime minister.

RAMAN: Well, in that exclusive interview with you, Zalmay Khalilzad, putting some diplomatic words on a tense situation.

Neither side seems willing to budge at the moment. The Kurdish, Sunni and secular blocks have said they don't want Ibrahim Al-Jaafari as prime minister.

The Shia, it seems now, are perhaps fudging a bit, saying they're open to other possibilities. But Jaafari himself, in earlier press statements, has shown no indication that he wants to step down.

In fact, he's said he thinks this pressure is personal and not meant for the unity government that everyone is seeking. Wolf?

BLITZER: Aneesh, thanks very much. Aneesh Raman, on the scene for us in Baghdad.

And joining us now to talk about the latest developments in Iraq, the possibility of civil war breaking out, as well as the collapse of the Dubai Ports deal and much more, two guests, the Republican chairman of the Senate Armed Services Committee, John Warner of Virginia and the panel's top Democrat, Carl Levin of Michigan.

Senators, thanks very much for joining us.

Are you hopeful, right now, based on what you heard from the ambassador here on "Late Edition" in the past hour, Senator Warner, that they can, the Iraqis, despite all this sectarian violence, put together a government of unity, including Shia, Sunni and Kurd?

SEN. JOHN WARNER (R), VIRGINIA: Bottom line, if that's not achieved, then you really have the risk of civil war breaking out.

So, I was encouraged by Ambassador Khalilzad's remarks. We have a high regard for him in the Congress. He's done an extraordinary job.

But remember, that's a sovereign nation. We liberated that country. It's a sovereign nation. And we can only do so much before it's perceived that we're trying to dictate how that government goes about its activities.

But Khalilzad is a master at that. And, in a balanced way, he is letting them know that it's just not unlimited, indefinite support by the United States.

We're there. We're backing them. We liberated them. And if they can pull together this government, there's a high probability they can achieve the fundamental goals of a democracy that the people of Iraq desire.

BLITZER: You wrote a letter, Senator Levin, this week, a letter to the president, together with some Republican and Democratic Senate colleagues.

Among other things, you wrote this.

You wrote: "The U.S. needs to make it clear to Iraqi leaders that a prompt political settlement is not only essential to them, it is a condition for our continued presence."

You're getting pretty close to Democratic Congressman John Murtha of Pennsylvania, who want a phased withdrawal over, shall we say, the next six months, a redeployment outside of Iraq.

SEN. CARL LEVIN (D), MICHIGAN: The letter that I wrote with Senator Collins and Senator Jack Reed was very clear, urging the president that, unless he makes it clear to the Iraqis that we're not there for an unlimited period of time, we're not there as long as they need us -- that's been the message of the administration so far -- we've got to change the course in Iraq with any possible means at our disposal.

And the one leverage point we've got is to let them know that, unless they reach a prompt, political settlement, which is the only way that the insurgency can be defeated and civil war can be avoided -- unless they have a prompt, political settlement that we, then, are going to have to withdraw our troops because there is no purpose then in our staying.

BLITZER: But the counter-argument is that this encourages the insurgents, the terrorists to just simply hold their fire, wait for the U.S. to pull out and then take over Iraq.

LEVIN: I think if you set a specific timetable, you could argue that. But that's not what we're doing. We're telling them, I hope, something we've not told them before, which is they've got to reach a prompt political settlement. There is no other way of defeating the insurgency. There's no other way of avoiding civil war.

BLITZER: Is Senator Levin on the right track, Senator Warner?

WARNER: Let me say that all of us want this government to come into place. But, as I opened up, it should be left to the man on the scene, not the Congress, to use that rhetoric which he feels can move forward the reconciliation of differences and, at the same time, not give any encouragement, that we just saw in your film clip, of Sadr City up in flames again.

Sadr is the most dangerous, perhaps, of all of them within the Shiite. And his militia, private militia, is a very significant force that could make a factor if they were unleashed into a civil war.

LEVIN: Wolf, the insurgents, the terrorists don't need any encouragement. They are on the road to try to promote a civil war.

The only way a civil war can be avoided -- and maybe it's unavoidable, but the only hope is if the leadership in Iraq quit feuding while Baghdad is burning.

And they've got to come to a political settlement or else, it seems to me, this thing is doomed. And the only leverage we've got to pressure them to a political settlement is to put our presence on the line.

The leaders want our continuing presence. They have an open- ended commitment to that. It is a mistake when the president says, you're there as long as you need us. That is a mistake. It's the wrong message.

WARNER: But I want to follow up. This week, some the most valuable testimony that came before the Congress came from General Abizaid.

And I know you and I, Carl, hold him in the highest degree of professionalism. He said that the problem today is the secular strife, at the rate at which it's growing.

That's more difficult than the insurgents coming in from other countries.

BLITZER: Here is precisely what he said, this week, General Abizaid.

Listen to this:

(BEGIN VIDEO CLIP)

GENERAL JOHN ABIZAID, COMMANDER, U.S. CENTRAL COMMAND: It's my belief that the security situation in the country, while changing in its nature from insurgency toward sectarian violence, is controllable by Iraqi security forces and multinational force.

(END VIDEO CLIP)

BLITZER: That seems to be a significant -- almost three years into this war, it's not only an insurgency that's undermining the U.S.-led effort, but now it's turning into what he calls sectarian violence.

Senator, that's not necessarily complete civil war, but it's moving towards that.

LEVIN: Well, it has the vestiges of civil war. It has the ingredients of civil war, and it's moving in that direction.

And when I met with General Abizaid this week, he told me that when he met with the president of Iraq, Mr. Talabani, that when Talabani came out and told the media that he was assured that we are there as long as the Iraqis want us there, that that was not what General Abizaid told Talabani.

And I pray it was not. He told them that too often.

BLITZER: Here's what a lot of Americans fear, Senator Warner, and you're sensitive to the concerns of your constituents in Virginia and Americans all over the country.

WARNER: Very much so.

BLITZER: There's 132,000 U.S. troops in Iraq right now. There are thousands of Americans who are civilians and people from all over the world who have been brought in.

If there is a civil war, how are they protected?

WARNER: You know, another very important part...

BLITZER: Did you get answers from...

WARNER: We did.

Another very important thing was Secretary Rumsfeld. I met with him early on Thursday morning -- with the chairman of Joint Chiefs and Abizaid in his office -- basically to bring to bear the military factor on the ports issue, which we'll cover.

But at that time, we discussed their testimony before the Appropriations Committee.

Rumsfeld pointed out, if civil war breaks out, then it will be the primary responsibility of the Iraqi forces, which we have trained and equipped, to put that down. The American forces...

BLITZER: But let me interrupt you, Senator...

(CROSSTALK)

WARNER: The American forces will be in support.

BLITZER: Now would you trust Iraqi forces to protect all those tens of thousands of Americans?

WARNER: I didn't go quite that far. I said it's their responsibility to put down the civil war and support the government.

The American forces are there, and my assumption -- although I have no specific knowledge -- is that part of their mission would be some support to the Iraqis fighting, but at the same time, try and give whatever measure of protection possible to the American people.

BLITZER: Senator, do you have confidence in those Iraqi forces to protect those Americans?

LEVIN: No, and we cannot protect them from themselves, Wolf. They're going to have to decide whether they want a nation, whether they want a civil war.

We can't write a constitution for them. We can't pick their government for them. But what we can do is let them know it's not an open-ended commitment.

If they don't want a nation, if they want a civil war, that's going to be their decision. Our decision is how long to stay and under what conditions.

BLITZER: Because there's still fear -- and we're going to take a break, Senator Warner, and get into the Dubai Ports deal -- there's still fear Iraq, when all is said and done, could crumble into a Shiite state, a Kurdish state and a Sunni state. And this integrity that the U.S. has been talking about, together with the Iraqi leaders, that may be wishful thinking.

LEVIN: Well, we're not there yet. The only hope of avoiding it is if the Iraqis make a political decision to come together, to unify. And we've got to put pressure on them to do that.

And the way to do that, again, if we let them know that our continuing presence upon their taking action.

BLITZER: All right, Senator...

WARNER: That action is also not just coming together and forming a government, but looking at refinements in the constitution...

LEVIN: I agree.

WARNER: ... and putting capable people in the ministries -- far more capable than those who worked in this present government in Iraq; to have integrity to run the ministries.

BLITZER: We'll take a break. But do you have confidence in Ibrahim al-Jaafari?

WARNER: I'm not in that position to make that statement.

BLITZER: Do you have confidence in him?

LEVIN: I think they are going to have to decide that question. We should not dominate.

WARNER: That's correct.

LEVIN: We should not dictate.

BLITZER: We'll leave it there. But we're going to take a quick break. We've got a lot more to talk about with the senators. I'll ask both Senators Warner and Levin about the ports deal collapse -- also, President Bush's warrantless wiretapping program: Is it legal?

Then, mending fences in the aftermath of that port deal collapse. We'll hear from the Senate Intelligence Committee member Saxby Chambliss. He's on the ground in Dubai right now.

Later, my exclusive look inside Dubai, at the height of the ports controversy. I was just there that week. I'll tell you what I saw.

"Late Edition" will continue right after this.

BLITZER: There's still time for you to weigh in on our Web question of the week: Did Congress overreact to the United Arab Emirates ports deal?

You can cast your vote. Go to cnn.com/lateedition.

Straight ahead: Should the U.S. Congress censure President Bush for authorizing warrantless wiretaps? I'll as Senators John Warner and Carl Levin' they're standing now live.

You're watching "Late Edition," the last word in Sunday talk.

(BEGIN VIDEO CLIP)

BUSH: In order to win the war on terror, we have got to strengthen our relationships and friendships with moderate, Arab countries in the Middle East.

UAE is a committed ally in the war on terror. They are a key partner for our military in a critical region.

(END VIDEO CLIP)

BLITZER: Welcome back to "Late Edition." We're talking with the two top members of the U.S. Senate Armed Services Committee, the Republican chairman, Senator Warner of Virginia and Democrat Carl Levin of Michigan.

Senator Warner, was it a mistake to kill this deal?

WARNER: Let me say that history will have to decide that. I went into this situation with a good deal of vigor, held the first briefing -- Carl was in attendance of our committee, so he could get the facts out.

So many people in the American public just did not have the benefit of the full factual picture of exactly what it was they were getting -- not buying the ports.

How many times did I see that incorrect statement?

We carefully tried -- I did and others -- to get the facts out. I can't what went on in the House of Representatives. But I think the Senate was quietly and reflectively looking at this situation.

UAE and the other moderate Gulf nations are absolutely critical for our national security.

BLITZER: So, you're not happy the way this...

WARNER: It's not a matter of being unhappy or happy. I'm concerned about the future war on terrorism and our ability to work with those valuable I'll allies for basing aircraft and so forth.

What we should have done is stayed on course with the 45 days and not tried to -- as they did on the floor of the Senate -- bring on this amendment, which will complicate immeasurably the pulling apart of these two companies.

The deal is over. We have the leader of the UAE, the prime minister, and indeed our government now working to pull it and get it off the books. And it looks like in every respect a total divestiture.

BLITZER: Total? In other words, there won't be any connection between the United Arab Emirates...

WARNER: That's my judgment.

BLITZER: ... and these six port operations.

WARNER: That's the goal. Now, we've got to wait and see how that's achieved. But I do not think Congress should take any more action on this ports issue. Put its attention on legislation to strengthen port security and to rewrite the CFIUS law.

BLITZER: As you know, Senator Levin, there are several pieces of legislation out there on the House side and the Senate side. They just want to make sure that there are no foreigners, whether from the United Arab Emirates or any other country, operating ports or critical infrastructure in the United States at a time when 75 to 80 percent of the port operations in this country are already being run by foreign operations.

LEVIN: I thought that it was a big mistake for the administration to proceed with this deal without going through that 45-day investigation, which our law requires. We got -- we're supposed to have checks and balances in this country. They haven't operated very well with this administration, to put it mildly. But here's an example. Where you've got a law which very clearly says that if security concerns are raised about a transfer such as this, just raised, that then there must be a formal investigation, a 45-day period, and a report to the president and to Congress. The administration tried to bypass that clear requirement because there clearly were security concerns raised here. Raised by the Coast Guard.

They may have resolved their concerns, but there were concerns. And by the 9-11 Commission, which was never consulted. The 9-11 Commission report laid out a series of...

BLITZER: I think that's fair, Senator Warner. The administration mishandled this operation.

WARNER: Well, I'm not sure you want to leap to that conclusion. In the first place, the CFIUS process...

BLITZER: Let me explain to our viewers, that's the Committee on Foreign Investments in the United States, an interagency panel, mid- level officials, basically concluded there were no...

WARNER: Handling hundreds of these cases.

BLITZER: ... national security concerns.

WARNER: Handling hundreds of these cases. Protecting the proprietary interests of companies who come here to try an work out deals. I went back over the weekend, I say to my good friend, and checked accurately what our administration did in this process.

They followed the same patterns that the first Bush administration did, the Clinton administration did and this administration. Been total consistency in the process. But I do believe we should have stayed with that 45 days and Congress should not come in now and try and vitiate this contract on its own.

BLITZER: It's over with now. I want both of you...

LEVIN: I hope it is, but the only way to stop this deal from going forward was for Congress to introduce this legislation. Remember, what the administration said is, they're going ahead. They're closing the deal, despite the Congressional interest.

BLITZER: Listen to what Senator Russ Feingold, Democrat of Wisconsin, said earlier today on ABC. Listen to this.

(BEGIN VIDEO CLIP)

FEINGOLD: What the president did, by consciously and intentionally violating the constitution and the laws of this country with this illegal wiretapping has to be answered. There can be debate about whether the law should be changed. There can be debate about how best to fight terrorism. We all believe that there should be wiretapping at appropriate cases. But the idea that the president can just make up a law in violation of his oath of office has to be answered.

(END VIDEO CLIP)

BLITZER: And he says he's going to introduce legislation tomorrow, a resolution to censure the president. Are you going to support him?

LEVIN: I think what the president did was wrong. I don't think that he could possibly use the authorization that we passed to authorize him to use force in Afghanistan is a basis for the wiretaps. I think that the law which we have on the books required him to go to the court to get these intercepts. But even though I think he was wrong, I would rather wait until the investigation is completed, which has now been started, by the intelligence committee, before I go beyond that.

WARNER: You know, you left out one thing on that little piece. He admitted he's running for president. And this was political grandstanding. And regrettably, because as the world watches, at the same time Congress is trying to sort through the important legislation, and I was among those, Carl, you know, that said we should legislate on this issue, bring clarity to it, so that the president is not perceived as breaking the law. I don't think he has.

But that was political grandstanding. And it tends to weaken our president. Whether you like him or not, he's the president for the next three years. Our economic trade abroad dependents on this, how the world views us, our security arrangements, diplomacy, all of it is dependent on an active, strong president. And to shoot out like that, is the worst type of political grandstanding.

LEVIN: I think criticism of the president is legitimate. It was bipartisan criticism of the president relative to the intercepts here. And so, I think we ought to welcome some checks and balances on the president. We ought to welcome some criticism, particularly where it is bipartisan. And on the use...

WARNER: Carl, I agree with you.

LEVIN: Well, wait a minute. On the use of these intercepts here, that involve American citizens, it seems to me that the criticism is highly appropriate, which was given on a bipartisan basis.

WARNER: I spoke out that we should proceed as a body to revise these laws so there is no a perception that this president or any future president would be breaking the law. But those presidents must act instantaneously in the security interests of this country. And it's hard today.

LEVIN: This was thought out. This wasn't instantaneous.

WARNER: I know, but this old statute is 30 years old. And since that time, there's been dramatic change in technology.

LEVIN: Well, then come to the Congress and ask for a change. WARNER: Fine, Carl, but at this time, don't do something like one of our colleagues did, jump up and call for this thing.

BLITZER: We'll leave it right there. Senator Warner, as usual, thanks very much. Senator Levin, thanks to you as well.

We have to take another quick break. When we return, the next step for the United States and the United Arab Emirates. How frayed is the relationship now that the Dubai ports deal has collapsed. I'll speak with U.S. Senator Saxby Chambliss. He's in Dubai right now. We'll get the latest from there.

Up next, though, a quick check of what's in the news right now, including deadly storms in the Midwestern united states. Stay with us.

(BEGIN VIDEOTAPE)

BLITZER (voice-over): Ann Richards, what's her story? The outspoken Texas politician announced this week she's battling cancer of the esophagus. Richards first grabbed the national spotlight with her keynote address at the 1988 Democratic National Convention.

She went on to serve as governor of Texas for four years before being defeated by then-Texas Rangers owner George W. Bush in 1995. Richards frequently speaks out about her struggle with osteoporosis, and now uses her experienced to consult women on the importance of leading a healthier lifestyle.

(END VIDEOTAPE)

(NEWSBREAK)

BLITZER: Welcome back. It's still unclear exactly what impact the ports deal collapse will have on the United States' long-time relationship with the United Arab Emirates and other Arab allies.

Just a short while ago, I spoke with the Republican Senator Saxby Chambliss of Georgia, a member of the Senate Intelligence Committee. He's in Dubai right now, part of a congressional delegation.

(BEGIN VIDEOTAPE)

BLITZER: Senator Chambliss, thanks for joining us. Welcome back to "Late Edition."

Did your fellow Republicans in the Senate and House do the right thing by killing this Dubai ports deal?

SEN. SAXBY CHAMBLISS (R), GEORGIA: Well, I'm not sure whether they did or not, Wolf. Obviously, the deal has been pulled at this point in time and that issue really is over with. We're going to continue down the road, I think, of reforming CFIUS, which I have supported from day one.

I came to Dubai to try to find out, really, what the facts are surrounding this deal. And, as I said, it's over with now. The leadership here has made a decision to transfer ownership of the management contract to a U.S. entity. And that will be done in due course.

But it's been an interesting day here in Dubai to learn about the country as well as to learn about the people that are involved in this issue.

BLITZER: Would you have been comfortable, knowing what you know now, having seen D.P. World in action at the ports in Dubai, letting this company operate, for example, the port in Savannah, Georgia?

CHAMBLISS: Well, the fact of the matter, Wolf, is that this particular company operates 51 ports around the world. I know what percentage of containers we examine in Savannah, and that's one of the key issues in the war on terrorism and making sure that we don't let either bad people or weapons that shouldn't come into the United States come into our country.

They actually examine a greater percentage of containers at the 51 installations run by the Dubai group.

So you know, it's one of those issues that, obviously, is very emotional, but I will say this. The individuals that run the Dubai ports are very professional. They are great partners of America in helping us fight to win the war on terrorism.

So I'm comfortable with the individuals that I've met and I'm comfortable with the fact that they operate a very professional organization.

BLITZER: It sounds as if, Senator, you would have, with hindsight, knowing what you know now, you would have allowed this deal to go forward.

CHAMBLISS: Well, I don't know because that's not why I came here. Initially, that's what we came here looking for, was to try to figure out whether or not we ought to support it or whether we ought to be in opposition to it.

But the fact that the deal was -- the decision was made to transfer the ownership of the management contract before we got here gave us a different light with which to look at the folks that are here and the operation that is here. And that's exactly what we've done.

So I am very comfortable, as I say, with the way in which they conduct themselves in the operation of the port facility here, which actually was run by a U.S. company from 1979 to 1989. That's something I didn't know.

Dubai is one of the best kept secrets in the world. And we came over here to find out the facts. And I've been very impressed with the facts that I have found since we've been here.

BLITZER: There's been some concern expressed over the past couple days since the deal collapsed that there could be some negative consequences for the U.S.

What's been the reaction in your talks with officials from the United Arab Emirates and from D.P. World? How angry are they toward the United States?

CHAMBLISS: Well, we've had some really good meetings. We've met with the custom folks. We've met with folks who run D.P. World as well as a good, long meeting with Prime Minister Muhammad bin-Rashid.

And we have received assurances from everybody that we have talked to that the strong relationship between the United States and UAE is going to continue. They have been great allies in the war on terrorism. They're going to continue to be great allies.

We are approaching the negotiations of a bilateral trade agreement. They're going to continue to look to the United States with great respect, and they're going to continue to move toward a positive trade agreement with the United States.

So I think, from the leadership standpoint, there's simply no question but what there has been no damage done.

What's been doing in the Arab world -- obviously, I'm sure our enemies will try to use it against us.

But what really makes me feel good about is that when we talk with the leadership here, they have been very positive. They understand that we're in political times in the United States.

A lot of the folks who are members of the cabinet, so to speak, as we would think, of the prime minister were educated in the United States.

So they understand the real world that we live in and they have accepted it. They have made the right decision, in my mind, and now they're ready to move forward. And I think we should be ready to move forward.

BLITZER: Senator Chambliss, have a safe trip over there. Thanks for joining us on "Late Edition."

CHAMBLISS: Thanks, Wolf. Always a pleasure to be with you.

(END VIDEOTAPE)

BLITZER: And a reminder for our North American viewers, right after "Late Edition," CNN reporters are "On the Story," including our White House correspondent Dana Bash on what happened behind the scenes as the ports showdown unfolded. You won't want to miss it.

Up next, though, something you'll see only here on CNN, my up close and personal look at Dubai, the story of this very diverse and vibrant Middle Eastern ally of the United States. But first this.

(BEGIN VIDEO CLIP)

(UNKNOWN): The UAE has had a long, extensive history of cooperating with the U.S. on issues dealing with military intelligence cooperation, terrorism and so on since well before 9/11.

(END VIDEO CLIP)

BLITZER: Usabelo Taiba (ph), the national security adviser to a crown prince in the United Arab Emirates.

Welcome back to "Late Edition."

There were earlier problems but, since 9/11, the United States and the United Arab Emirates have established an incredibly close, strategic partnership on the war on terror.

I travelled to Dubai to get the full story. I had exclusive access to D.P. World, top company and government officials, the ports, and security operations.

It's something you'll see only on CNN.

Who is actually responsible for inspecting the millions of containers coming through these ports ever year? That job falls to Dubai customs. Here's how they do it.

It's state-of-the-art technology, designed to see through heavy metal containers. It can detect illegal drugs and contraband weapons and ammunition. It can detect chemicals and biological agents.

And, perhaps most important, it can detect nuclear equipment, as well.

So if there were, God forbid, a radiological bomb inside a container, they would be able to determine it -- they would see that?

AHMED BUTTI, DIRECTOR GENERAL, DUBAI CUSTOMS: Yes. Yes.

BLITZER: This handheld piece of equipment can detect radiation levels.

BUTTI: We have also the machine that will tell you that... Ahmed Butti is in charge of Dubai customs. During an exclusive, behind-the-scenes tour, he proudly showed off the technology -- the hardware and the software that are already used in Dubai.

We are in the process right now in working together with the Department of Energy, of establishing in all our gates, to put the radiation machine to detect that.

And we have a team from our inspectors -- already on the (inaudible) right now to be trained how to operate these machines. BLITZER: Here in Dubai, when it comes to security and checking what's inside of containers, they say they are not worried about politically incorrect ethnic profiling.

BUTTI: From certain countries, 100 percent sometimes. Some countries, no. Thirty percent. Some countries, 20 percent. It depends where it's coming from. It depends the companies.

BLITZER: How suspicious you are.

BUTTI: Absolutely.

BLITZER: He won't say which countries have everything inspected, through presumably this Iranian ship loaded with Iranian cargo -- which we drove by -- would be a prime target for a thorough inspection.

D.P. World CEO Mohammed Sharaf also gave us an exclusive look around the huge facility -- and he stressed his company's worldwide reputation for safety and security.

MOHAMMED SHARAF, CEO, D.P. WORLD: We have customers whose vessels call at our terminals, which costs hundreds of millions -- not only the vessel, the goods on them cost hundreds of million of dollars.

If they don't have any confidence in our operation, they could not bring their ship to our terminals. Each ship has up to 10,000 containers on them.

Can you imagine each container costs -- the value of each container is around $100,000. What's the value of the total ship? Would they bring their ship to our terminal if they didn't feel secure or safe?

BLITZER: In my three-day behind-the-scenes visit, I also had a chance to inspect the port operations from a tugboat ride in the harbor -- and it was very clear that the port operator, in this case D.P. World, can have a significant impact on security for good or for ill.

Up in the port control tower, I saw D.P. World employees who have advanced knowledge of ship itineraries, controlling which ships go to which berth, determining how fast ships are loaded and unloaded and directing giant cranes. One of D.P. World's biggest customers is the United States Navy. It makes over 500 port visits a year to Dubai.

I spoke with the Navy Captain Thomas Goodwin.

Explain the little operation you have got over here. How secure do you feel as we get a sense of the U.S. Navy presence that occasionally comes in here?

CAPTAIN THOMAS GOODWIN, U.S. NAVY: Well, Wolf, as you know, security is kind of a -- and a feeling of safety is kind of a relative thing.

If you look around here, pretty populated with U.S. Navy ships, Military Sealift Command ships -- I feel very safe here. I know the crews and the people who are stationed down here in the UAE feel very safe here as well.

BLITZER: How often do U.S. Navy vessels come to Dubai?

GOODWIN: On a daily basis, there is at least one U.S. ship in a port in the UAE -- and, oftentimes, more than that, as you can see in the port here behind me.

BLITZER: And they'll spend a day or two or three or whatever?

GOODWIN: Typically, a warship will come in here for four visits: re-provisioning of food and fuel, and they'll get back underway. Jebel Ali is where we're here now in the United Arab Emirates and the emirates of Dubai -- it seems to be at the top of the port visit request list for warships.

BLITZER: Can they accommodate carriers, too?

GOODWIN: They can accommodate a carrier here. As a matter of fact, it's probably the only other than -- well, it is the only port in the AOR that can accommodate a carrier.

BLITZER: Now, who provides the services? When a U.S. Navy vessel comes in here, Dubai Ports World -- I take it -- helps you guys as the port operator?

GOODWIN: In fact, it is. United Arab Emirates, it's Dubai Ports World -- they own the territory. This is their home territory. We work hand in glove with Dubai Ports World for services and to provide fuel, logistics, and everything that a warship or another logistics ship would need here. Absolutely.

BLITZER: How do they do? How's the receptivity? What kind of grade would you give them when you come here to Dubai?

GOODWIN: If I put them on a grading scale like you're back in college or something like that, I'd have to give them at least an A- plus.

BLITZER: Despite glowing assessments of the U.S.-UAE military relationship from top U.S. military commanders, the deal may have been doomed from the start in this post-9/11 era.

A Wall Street Journal article on Friday referred to my visit to the United Arab Emirates. It said this -- let me read it to you:

"A CNN report from Dubai showed articulate and Western-educated Dubai leaders offering assurance that they would strictly maintain security at any port facilities they operated in the United States.

"But aids to House Republican leaders reported that the sight of men in Arab dress saying they would handle port security only made the calls of complaint come faster."

Two of the 9/11 hijackers came from the United Arab Emirates, and the emirates was one of only three countries to have official relations with the Taliban regime in Afghanistan before 9/11.

In an exclusive interview, I asked the chairman of D.P. World, Sultan Ahmed Bin Sulayem, about that.

(BEGIN VIDEO CLIP)

SULTAN AHMED BIN SULAYEM, CHAIRMAN, D.P. WORLD: You've got 3 million people here. You can't really blame 3 million for the act of two.

I think there's a lot of changes in how to control transfers of money, how to declare it. We have signed the anti-money laundering. We apply the rules. I think the cooperation in that field is very strong between our country and the USA.

(END VIDEO CLIP)

BLITZER: The decision to pull out of the deal and transfer D.P. World's U.S. port operations to a U.S. entity was sudden.

All of the executives and government officials I spoke with -- who were there -- they expressed supreme confidence, at least before this deal collapsed, that the deal would absolutely go through.

They said they had no doubt. No doubt, they were stunned by the speedy collapse.

Still ahead, some extraordinary views of Dubai. We're going to show you why this city is called "the city of gold."

Is such a popular city a major tourist spot? The answer, yes. We're going to show you why. Snowing in Dubai. Plus, the results of our Web question of the week, "Did Congress overreact to the United Arab Emirates ports deal?"

We'll take a quick break. We'll be right back.

BLITZER: It's fair to say that most Americans have learned a great deal about Dubai in recent weeks.

During my visit, I learned it's a very popular vacation destination in the Persian Gulf and a fascinating place. Here's a taste of extraordinary Dubai.

(BEGIN VIDEOTAPE)

BLITZER: (voice over) This is the Burj al-Arab Hotel in Dubai, arguably one of the manmade wonders of the world. It's the world's tallest hotel, complete with a helipad near the top. It's also one of the world's most expensive. LUC DELAFOSSE, HOTEL GENERAL MANAGER: We have a magnificent sell (ph), anyway, and the building itself soars at 321 meters. So you are in Suite 2008. That is actually one of our panoramic suites.

And the particularity of this suite category is this fantastic window, where you can actually really see Dubai, you know, at your feet. So it's made of the ground floor, where you have a bar area; you have a lounge area. We call it, actually, the majelice (ph), here for example, in this region. You have a dining room. You have two bedrooms. You have a bedroom on the ground floor. And you also have the master bedroom on the mezzanine level on the upper floor.

BLITZER: This suite is, per night, how much?

DELAFOSSE: I would say, in terms of dollars, you know, it would be something like $4,000 and $5,000.

BLITZER: A night?

DELAFOSSE: A night. We have a magnificent spa located on the 18th floor. Our, actually, commitment or mission is to be, clearly, the world's most luxurious hotel.

BLITZER: Not far from the hotel is this mall. What's extraordinary is what's inside. It's called "Ski Dubai."

It's hard to believe that we're right in the middle of the desert. Yes, we're in the desert. But these people are skiing. They're going on chair lifts. And there are ski slopes indoors.

It's the most bizarre scene, people from all over the world snowboarding and skiing downhill, and indoors.

The snow is manmade, as is the below-freezing temperature. But everything else is very real. Check it out.

Back outside, in the subtropical climate, a helicopter tour of Dubai reveals a booming desert city. One can't help but gasp at the pace of construction on both real desert land and manmade land.

This is Palm Island, where multimillion-dollar villas spread out across the Gulf. It's shaped like a date palm tree.

What's billed as the world's tallest building is now under construction. The Burj Dubai will be the centerpiece of a new development downtown.

Traffic jams here are a daily and expected occurrence in this growing city of 1.2 million people. There are lush golf courses. Tiger Woods was here recently for the Dubai Desert Classic.

Camel racing is popular but controversial because the jockeys are young children. Dubai is promising UNICEF it's banning underage jockeys. And get this -- robot jockeys are in development.

Dubai hosts more than 5 million visitors a year and wants to increase that number ten times, for the city that is rightly known as Vegas on the Gulf.

(END VIDEOTAPE)

BLITZER: Here are the results of our Web question of the week. Check it out. Remember, though, it's not a scientific poll.

And that's all the time we have for this "Late Edition." I'm Wolf Blitzer in Washington. Thanks very much for joining us.

Google, U.S. to face off in federal court

By Howard Mintz
Mercury News

It's showdown time for Google and the Bush administration.

In a widely anticipated hearing in San Jose federal court, lawyers for the Mountain View-based search engine and the government will square off Tuesday over whether Google should be forced to turn over a vast array of data, including 1 million Web addresses. The case is viewed by many experts as a test of how vulnerable the voracious search habits of the nation's Web users might be to the prying eyes of government.

Attorney General Alberto Gonzales triggered the clash in January, when Justice Department lawyers went to court to force Google to comply with a subpoena that asks the company to release a treasure trove of Web addresses and at least one week's worth of random search queries. The government is seeking the information to buttress its defense of the Child Online Protection Act, a federal law designed to keep children from sexually explicit content on the Internet.

Google, backed by privacy advocates, is resisting the subpoena on a variety of grounds, including the argument that it threatens the privacy rights of Web users and exposes the company's trade secrets to public release. The company also insists the information is irrelevant to the government's fight to revive the federal child protection law, which was put on hold by the U.S. Supreme Court two years ago.

U.S. District Judge James Ware's courtroom is expected to be jammed for this heavyweight legal bout between the world's largest search engine and the federal government. Despite the fact that the case has raised concerns about government intrusion into Web habits, legal experts say Ware may steer clear of that issue and decide the case on much narrower grounds, such as whether the government can justify its subpoena.

Nevertheless, the case is considered a crucial barometer of how much control a search engine has over its vault of Web traffic and whether the Internet habits of its users are insulated by a 20-year-old electronic privacy law. Orin Kerr, a law professor at George Washington University, said that if the government gets the information, it's conceivable Congress may eventually step in with legislation that would prevent the broad release of data collected on Internet searches.

``The subpoena was a wake-up call to everybody that search engines have these logs and can produce them,'' added Kevin Bankston, a lawyer with the Electronic Frontier Foundation, which opposes the release of the data. ``By storing all this data in perpetuity, they are creating a honey pot, not only for the government but for civil litigants'' who seek it for a host of reasons, from divorce fights to feuds between rival companies.

Justice Department lawyers declined comment on the case, but in court papers argue that Google and its supporters have overstated the risks of releasing the information. Government lawyers stress that the data they seek would not identify individual users.

The government has asked Google -- and other search engines such as Yahoo, Microsoft and America Online -- to provide data that can be used to study the prevalence of pornography on the Web and the effectiveness of filtering software to keep it from children.

The Supreme Court, in striking down the law, suggested that the government may be able to resurrect it if it can prove there is no alternative solution to effectively keeping adult content away from minors. As a result, the Bush administration is trying to pull together a study, using the Web data, to assess how often random searches turn up adult content and how that can be controlled.

Government lawyers went to great lengths in a recent brief to stress that the request poses no threat to the privacy of Google users, noting that the other major search engines have complied with similar subpoenas. The government relies heavily on Philip Stark, a statistician at the University of California-Berkeley who is helping assemble the data.

Stark declined comment. But in a recent declaration, he rejected Google's assertion that the data can be used to track the habits of individuals.

``Google queries are disclosed routinely to third parties when a user clicks any link in Google search results,'' Stark wrote. ``The government seeks less information about queries than Google publishes in Google Zeitgeist,'' a list of Google's most popular searches.

Google has argued that the government's request is in fact a direct threat to its relationship with users, who depend on assurances their Web browsing is a private matter. In court papers, the company balks at the government's argument that the data is needed for a study, saying it will tell the government

``absolutely nothing" about the effectiveness of the online protection law.

Whatever Ware decides, privacy experts say the government demand has raised awareness, in part because of increasing concerns about the extent of government surveillance programs.

``This case comes at a time when people are starting to recognize that the information they put into their computers creates a record," said Lauren Gelman, associate director of Stanford University's Center for Internet and Society. ``In the bigger picture, as people input more information into computers, they are losing control over that. We're leaving a digital footprint with all sorts of information about ourselves."

Government worries about mob ties at ports

By DAVID B. CARUSO
The Associated Press

NEW YORK — Justice Department lawyers warned eight months ago that a nefarious element had infiltrated important East Coast ports, but they weren't talking about terrorists or Arab shipping companies.

They were talking about the Mafia.

In a civil suit filed in July, prosecutors accused the International Longshoremen's Association (ILA), the 65,000-member union that supplies labor to ports from Florida to Maine, of being a "vehicle for organized crime" on the waterfront.

Packed with tales of corruption, embezzlement and extortion, the complaint accused union executives of being associates of the Genovese and Gambino crime families.

The U.S. Attorney's Office asked a judge to seize control of the union, remove its officers and "put an end to the conspiracy among union officials, organized-crime figures and others that has plagued some of the nation's most important ports for decades."

The allegations, assailed by the union as unjust and untrue, are inching toward trial amid heightened concern over port security triggered by a Dubai-based company's purchase of several U.S. shipping-terminal operations. The company moved to defuse the controversy by pledging to turn over its U.S. operations to a U.S. firm.

But some port-security experts say the nation already has a problem on its docks: gangsters who have made the piers friendly territory for drug smugglers and cargo thieves.

"Do we really think that terrorists aren't going to exploit this situation?" asked New York Sen. Michael Balboni, chairman of the state Senate's Homeland Security Committee.

ILA spokesman James McNamara said any suggestion the union poses a security risk is "ludicrous."

"Nobody in America cares more about port security than the longshoremen," he said.

The ILA was among the early critics of the Dubai Ports World deal, calling on the Bush administration

Feb. 21 to scrutinize the company "to avoid even the impression of unnecessary risks."

Organized crime's role on the waterfront has long been the stuff of movies such as 1954's "On the Waterfront" and TV's "The Sopranos."

It has also been the subject of more than a few federal indictments. From 1977 through 1981, prosecutors won conviction of 52 union officials on various mob- and racketeering-related charges.

March 12, 2006

Derailment lawsuit question might take Supreme Court ruling

FARGO, N.D._A lawyer representing people injured in a 2002 derailment and chemical spill on the west edge of Minot says it might take a U.S. Supreme Court ruling to determine the legal recourse for victims.

Federal\l "l" judges in North Dakota and Minnesota have ruled that private claims against the nation's railroads can't move forward because of the Federal\l "l" Railroad Safety Act, which makes railroads immune from such lawsuits.

The ruling last week by U.S. District Chief Judge Daniel Hovland in Bismarck threw out a class\l "l" action\l "l" lawsuit against Canadian Pacific Railway, raising questions about hundreds of lawsuits filed in Minnesota state court by the most severely injured.

"If Judge Hovland is correct, all cases have to be dismissed, no matter what court they are in," said Mike Miller, a Fargo lawyer handling hundreds of claims filed in Minnesota state court. "While it is so unbelievably bad for the people in Minot, it has ramifications throughout the country."

The Jan. 18, 2002, derailment sent a cloud of toxic anhydrous ammonia over Minot. One man was killed trying to escape the fumes and hundreds of people sought medical treatment.

Attorneys representing Minot victims affected by Hovland's decision may appeal it or move their claims to Minnesota state court, where the outcome is uncertain. Since last fall, Canadian Pacific has settled six lawsuits filed in Minnesota. A jury also ordered the company to pay $1.86 million to four other people. The railroad has appealed the cases it lost on claims of immunity.

Tim Thornton, an attorney for the railroad, said national interests outweigh private claims, a decision Congress made when voting to establish uniform standards for all railroads. While private claims aren't allowed, Thornton said, railroads aren't immune from fines and penalties levied by the Federal Railroad Administration.

Kristy Albrecht, who handled one of the cases settled last fall, said Hovland's decision surprised her.

"I don't think it was Congress' intent to take away innocent victims' remedy for railroad negligence," she said.

Hovland noted in his ruling that "the judicial system is left with a law that is inherently unfair to innocent bystanders and property owners who may be injured by the negligent actions of railroad companies."

Sen. Byron Dorgan, D-N.D., earlier this month asked the Congressional Research Service to investigate the Federal Railroad Safety Act, questioning why railroads should be given "some sort of special defense

in a court of law."

If Hovland's decision is appealed, it would go to the 8th U.S. Circuit Court of Appeals. Miller said the matter could end up in the U.S. Supreme Court regardless of the circuit court's decision.

Makfax (Macedonia)

El-Masri to testify in European Parliament

Skopje, 13.03.200609:31

Khalid El-Masri will testify on Monday in the Temporary Committee of the European Parliament on the secret detentions of the CIA in European countries.

Khalid El-Masri is a German citizen who claims that he was mistakenly kidnapped in Macedonia on 31.12.2003, later transferred to Afghanistan where he was tortured.

When the secret services realized that he was not Khalid El-Masri, an al-Qaeda mentor, he was released in Albania.

March 12, 2006

FBI error a `watershed' in fingerprinting

PORTLAND, OREGON -- An FBI mistake linking a Portland lawyer, a Muslim convert, to the 2004 Madrid train bombings was a "watershed event" that led to improved fingerprint identification, but more needs to be done, according to a federal report.

The 330-page Justice Department report released Friday expanded on its January report that faulted the FBI for sloppy work but concluded the government did not misuse the anti-terror USA Patriot Act against Brandon Mayfield.

FBI experts mistakenly matched fingerprints on a bag of detonators in Madrid to Mayfield's after the March 11, 2004, bombings that killed 191 people.

Mayfield, who was jailed for two weeks in 2004, was released after the FBI acknowledged the fingerprint was not his. He is suing the federal government.

Plan to unify immigrant appeals; Sen. Specter's provision to centralize jurisdiction draws fire

Bob Egelko, Chronicle Staff Writer

Tucked into a wide-ranging immigration bill now before a U.S. Senate committee is a proposal to send all future appeals in deportation and asylum cases to a court in Washington, D.C., where a single judge would have the authority to dismiss them.

The office of Sen. Arlen Specter, R-Pa., the bill's author, says the proposal would make immigration law uniform throughout the nation and relieve the other 12 federal appeals courts -- particularly those in San Francisco and New York -- of a glut of immigration cases.

But immigration lawyers and the American Civil Liberties Union say the plan is ill-conceived, dangerous and a thinly veiled attack on the Ninth U.S Circuit Court of Appeals in San Francisco, which now hears about half of the nation's immigration appeals. The critics were joined Friday by the Ninth Circuit's chief judge, Mary Schroeder.

"I don't think this is very constructive," she said in an interview. "I think it will limit representation" by requiring noncitizens to find lawyers who will travel to Washington to argue their cases.

In addition, Schroeder said, the judges on the Federal Circuit Court of Appeals in Washington, where the cases would be heard, "have no background" in immigration.

The change in court jurisdiction is one section of legislation sponsored by Specter, the Senate Judiciary Committee chairman, that also addresses such issues as temporary legalization for undocumented workers, increased border security and foreign visas. It is now undergoing committee review, without public testimony, and could come up for a vote by the end of this week.

Illegal immigrants seeking political asylum or fighting deportation orders now take their cases first to immigration courts, staffed by Justice Department employees. They can appeal unfavorable decisions to the U.S. Court of Appeals in their region, whose judges are appointed by the president and serve for life.

Increased immigration enforcement and limits ordered on immigration court review in 2002 by then-Attorney General John Ashcroft have led to a surge in such cases at the courts of appeals. Schroeder said they now make up 40 percent of the Ninth Circuit caseload, a situation that led to recent meetings with the Justice Department in which she and other judges urged upgrading the immigration court system.

Specter's bill would leave current appeals where they are, but send all such cases in the future to the Federal Circuit, which now handles mostly patent and trademark cases. Its roster of 12 judges, eight of them appointed by Republican presidents, would be increased by three.

The idea, according to Specter's office, is to eliminate regional discrepancies in immigration rulings -- and any incentive for illegal immigrants to look for a sympathetic court -- and create a single, nationwide set of legal standards.

Another provision would assign each incoming case to a single judge, who would decide whether the appeal contained an issue that was serious enough to warrant a hearing before a three-judge panel. If not, the judge would dismiss the case, and the immigrant would have no right of further appeal, said Marshall Fitz, director of advocacy for the 10,000-member American Immigration Lawyers Association.

"To try to ram this through as part of a broader immigration reform package ... without any hearings, any expert witnesses weighing in from the judiciary, any legal scholars ... is in my estimation irresponsible," Fitz said.

Among other things, he said, the change would add 10,000 cases to a court that now hears 1,500 cases a year. Specter's office denied that the judges would be overworked.

Tim Sparapani, an attorney with the American Civil Liberties Union, said immigrants already have trouble finding lawyers who will take their cases for free and would have more difficulty if their cases were moved to Washington.

"This would reduce the likelihood that attorneys will take cases on behalf of immigrants or would see them through until the end," Sparapani said.

Both he and Fitz contend the proposal is focusing in large part on the Ninth Circuit, whose liberal rulings and large size have prompted numerous attempts by Republicans over the last two decades to break it into two or three smaller circuits.

Specter's office would not allow any staffer members to be quoted by name, but aides said the senator's motivation was to make the law more uniform and effective, not to take cases away from the Ninth Circuit or any other court.

Liberal Law Professors and the Solomon Amendment Rout

Howard J. Bashman

Conservative commentators erupted in glee after the U.S. Supreme Court last week unanimously ruled in *Rumsfeld v. Forum for Academic and Institutional Rights, Inc.* that Congress had not violated the First Amendment rights of law schools by requiring, on pain of a university's loss of substantial federal financial assistance, that military recruiters receive the same on–campus access to students as the most favored non–military recruiters.

The decision brings to an end a rather ingenious challenge to the "Don't Ask, Don't Tell" policy prohibiting openly homosexual individuals from serving in the U.S. Military. After several direct legal challenges to the policy failed, law school professors believed that they could pressure Congress and the military to abandon the policy by making it more difficult to recruit law students into the military.

To do so, law schools adopted policies that prohibited any employer unwilling or unable to sign a pledge promising that the employer did not discriminate in hiring on the basis of sexual orientation from being able to take advantage of the law schools' on–campus recruiting services, which included not only interview rooms located conveniently close to where the students were, but also assistance in announcing the employer's planned visit and scheduling interviews for the employer.

Congress, however, was both unwilling to end the "Don't Ask, Don't Tell" policy and to see military recruiters forced off–campus due to the military's inability to sign pledges against discrimination based on sexual orientation. As a result, Congress overwhelmingly passed a law that would cause an entire university to lose what often represented a very substantial amount of federal funding unless military recruiters were allowed onto campus and treated as favorably as those employers who were able to sign anti–discrimination pledges. That law was known as the Solomon Amendment, named after its original sponsor, Rep. Gerald Solomon, R–N.Y., who died in 2001.

Faced with a choice between declaring defeat in their protest of the military's hiring policies or fighting the Solomon Amendment in court, the law professors (perhaps unsurprisingly) chose the latter course. But instead of directly challenging the "Don't Ask, Don't Tell" policy, these law professors decided to mount a

First Amendment challenge to the Solomon Amendment's access requirement.

According to the law professors, the Solomon Amendment unconstitutionally required law schools to engage in speech to assist military recruiting that the law schools did not want to engage in, to associate against their will with an employer unwilling to sign the anti–discrimination pledge required of all other employers, and to engage in expressive conduct (treating the military the same as other employers) that the law schools would not voluntarily agree to engage in but for the threat of losing federal funds.

To be sure, the law professors' legal arguments were of questionable validity. I count myself among those who never thought that the lawsuit challenging the Solomon Amendment on First Amendment grounds should succeed, and the U.S. District Court for the District of New Jersey agreed, denying FAIR's request for a preliminary injunction against the law.

FAIR then appealed to the 3rd U.S. Circuit Court of Appeals. In the interest of full disclosure, I filed an amicus brief in the 3rd Circuit on behalf of several law student veterans groups that supported the federal government's position in the case. At the 3rd Circuit oral argument, it was clear that one judge on the three–judge panel clearly saw merit in FAIR's constitutional challenge to the Solomon Amendment, a second judge appeared to view FAIR's challenge as without merit, while the third judge said absolutely nothing. Several months later, the panel ruled 2–1 that the plaintiffs were entitled to a preliminary injunction blocking enforcement of the Solomon Amendment.

Too many other 3rd Circuit judges had recused themselves from the case to enable rehearing en banc to occur, so the federal government's only recourse from the 3rd Circuit's adverse ruling was to seek review in the U.S. Supreme Court. FAIR opposed the federal government's petition for writ of certiorari, arguing that no circuit split existed on the Solomon Amendment's constitutionality and that the 3rd Circuit's decision directing the entry of a preliminary injunction envisioned further evidentiary proceedings on remand. Supreme Court review, if it were to happen at all, should await the conclusion of the entire case, FAIR argued.

But FAIR's argument was to no avail, as the Supreme Court agreed to review the 3rd Circuit's ruling on the merits. At that point, there was no turning back for FAIR. And following a Supreme Court oral argument during which FAIR's position appeared to have little to no support from the bench, it appeared likely that FAIR would lose convincingly and perhaps by a unanimous margin.

Notwithstanding the 8–0 trouncing that FAIR's arguments received at the hands of the Supreme Court, it strikes me as a bit unfair to argue that the outcome calls into question the professional qualifications of those liberal law professors who devised and backed the Solomon Amendment litigation.

To begin with, before the Supreme Court ruled, FAIR's arguments had achieved victory in both the 3rd Circuit and in a federal district court in Connecticut. FAIR deserves credit for choosing the 3rd Circuit as the forum in which to litigate the initial challenge to the Solomon Amendment, based on that federal appellate court's reputation as moderate to liberal on First Amendment issues.

Second, notwithstanding its ultimate loss in the Supreme Court, FAIR has caused a great deal of additional attention to be focused on the existence of the "Don't Ask, Don't Tell" policy, which may cause many people who had never considered the policy to question its necessity. In fact, even in defeat FAIR may help undermine the policy, as law students who do not believe the policy is justified will now have easier access to military recruiters, allowing those students more readily to join the military and seek from within to overturn support for the policy.

FAIR's most significant achievement in the litigation resulted from a concession by the solicitor general at oral argument, in response to questioning from Justices Ruth Bader Ginsburg, Anthony Kennedy, and Antonin Scalia, recognizing that vocal and enthusiastic protests of on-campus military recruiters can occur without violating the Solomon Amendment. The Supreme Court's opinion mentions that concession, giving FAIR a small victory in the midst of an otherwise total defeat.

For FAIR and its supporters, the Solomon Amendment case was being litigated as a matter of principle,

and often litigating for a principle, instead of being able to compromise, results in an unmitigated loss. And sometimes losing 8–0 is preferable to losing by just a single vote. Yet to say that the law professors supporting FAIR are unqualified to instruct the next generation of lawyers or determine litigation strategy overlooks what FAIR actually accomplished earlier in the litigation and in the court of public opinion. FAIR may have lost the case, but the battle over the principle at stake continues.

END

Comparing Models of Pandemic Influenza: Conclusions About Mitigation Strategies

Richard J. Hatchett, MD
Biodefense Directorate
Homeland Security Council
5 February 2006

Pandemic Influenza Threat

CHART 1.—Annual death rate per 1,000, by weeks, entire Navy, calendar year 1918, for all causes and diseases only.

Admiral Benson, CNO, Annual Report to Congress, 1919

Basic Tools

- ~~Vaccines~~
- Antiviral Medications
- Infection control / social distancing

Influenza Progression within an Individual Agent

A Compromise between Ferguson 2005, Nature; Longini et al., 2005, Science; and Longini et al., 2004, Am J Epidemiology

Infectivity and Tamiflu

Data on file (Ref. #155-005 & #155-008), Hoffmann-La Roche Inc.

Antiviral Prophylaxis

- Overall protective efficacy of oseltamivir (once daily x 7 days) against clinical influenza is 89% for individuals and 84% for households
- Viral shedding is inhibited in contacts taking oseltamivir with 84% efficacy
- Efficacy in preventing clinical influenza (72 - 89%) is greater than preventing initial viral infection (63%)

Welliver, R, et al. Effectiveness of oseltamivir in preventing influenza in household contacts. JAMA 2001;285:748-754.

Hayden, FG, et al. Inhaled zanamivir for the prevention of influenza in families. N Engl J Med 2000;343:1282-1289.

Infection Control / Social Distancing

- Transmission Interventions (Infection Control)
  - Facemasks
  - Cough etiquette
  - Hand hygiene
- Contact Interventions (Social Distancing)
  - School closure
  - Telecommuting
  - Liberal leave

DOJ_NMG_0016980

Critical insight

Averaging over a highly heterogeneous contact network can hide critical features that could be exploited to design effective mitigation strategies

Summary

- Our best countermeasure – vaccine – will probably be unavailable during the first wave of a pandemic
- Antiviral treatment may improve outcomes but will have only modest effects on transmission
- Antiviral prophylaxis will have more substantial effects on reducing transmission
- Infection control and social distancing should reduce transmission, but strategy requires clarification

How does this relate to influenza?

Social Network

Agent classes

    Contact frequency

Age-specific attack rates vary

Age group	Asian Flu (1957)	Hong Kong Flu (1968)	Longini Ro=1.6	Glass Ro=1.6
Overall	33%	34%	34%	25%
Young Children	35%	34%	35%	40%
Older Children	62%	35%	48%	37%
Adults	24%	33%	~30%	~20%

Transmission Dynamics: Variability by Age and Time

Glass, RJ, et al. Local mitigation strategies for pandemic influenza. NISAC, SAND Number: 2005-7955J

Animation of first 20 days, 10 Adult Seeds

Adult Seeds (large blue), Adults (black), Children (red), Teens (blue), Seniors (green)

Final Network of Infected

Final Network of Infected

Glass: Infectious Contacts

	To Children	To Teenagers	To Adults	To Seniors	Total From
From Children	21.4	3.0	17.4	1.6	43.4
From Teenagers	2.4	10.4	8.5	0.7	21.9
From Adults	4.6	3.1	22.4	1.8	31.8
From Seniors	0.2	0.1	0.8	1.7	2.8
Total To	28.6	16.6	49.0	5.7	

Demographics
- Children/Teenagers 29%
- Adults 59%
- Seniors 12%

Glass: Infectious Contacts

- Children and teens have 52 contacts a day v. adults (34) and seniors (24)
- Children are both more infectious and more susceptible in Glass's model
- Most of contacts for children are like-to-like with nearly half taking place in school classes

Mitigated Outbreak

neighbors	**light blue**
random	**grey**

Epidemic Exponentiation

Ro = 2.0, Progression = 1:2:4:8:16

Slowly Progressing Epidemic

Ro = 1.34, Progression = 1:2:4:5:7

Percolating Epidemic

Ro = 1.0, Progression = 1:2:4:4:4

Epidemic Quenching

Ro = 0.67, Progression = 1:2:4:3:2

Value of combining strategies – Ferguson model

- Base case (Ro=2.0)
- 90% case treatment + school closure
- 90% case treatment + school closure + 90% household prophylaxis
- 90% case treatment + school closure + 90% household prophylaxis + 70% household quarantine

Value of combining strategies – Longini model

- Base case (Ro=1.9)
- Generic social distancing
- School closure
- School closure + generic social distancing
- 60% Case treatment + 60% household prophylaxis
- 60% Case treatment + 60% household prophylaxis + 60% social prophylaxis (60% TAP)
- 60% TAP + School closure + generic social distancing

Targeted Antiviral Prophylaxis

- Only for Ro ≤ 1.6 can reasonable control using TAP alone be achieved with small stockpile
- TAP strategy requires identification of effective sizes of the close-contact mixing groups **DIFFICULT TO DO**
- As the clinical attack rate increases, case-targeted control policies become more effective. Socially-targeted prophylaxis will also be slightly more effective, much more so if the percentage of cases occurring in easily identified social compartments increases
- If a greater proportion of transmission occurs in schools and workplaces, overall and peak attack rates drop substantially (due to mixing being much more focused on school-age children) and effect of socially targeted control policies is markedly enhanced

Ferguson, NM, et al. Strategies for mitigating an influenza pandemic.
Germann, TC, et al. Strategies for controlling pandemic influenza in the United States.

Combining strategies – Glass model: Targeted Social Distancing

- Base case (Ro ~ 1.6)
- School closure alone
- School closure + targeted social distancing (10% compliance)
- School closure + targeted social distancing (30% compliance)
- School closure + targeted social distancing (50% compliance)
- School closure + targeted social distancing (90% compliance)

Glass, RJ. Personal communication

ID 0.01 ~ Ro 1.6
ID 0.0125 ~ Ro 2.0
ID 0.015 ~ Ro 2.4

Evidence to support school closure

- Children appear to be more susceptible to influenza and more infectious than adults in well-designed prospective studies of risk factors of influenza transmission in households.
- Nationwide school closure in Israel during an influenza epidemic resulted in significant decreases in the diagnoses of respiratory infections (42%), visits to physicians (28%) and emergency departments (28%), and medication purchases (35%).
- Japanese experience demonstrated 1 death prevented for every 420 children vaccinated (coverage 50-65% when denominator is children ages 3-18, but program achieved coverage of 80% for target population of children age 7-15; presumed mortality ~0.1%).
- Vaccination of 85% of schoolchildren in Tecumseh, Michigan resulted in two-thirds reduction in adult cases in community.

Shunting transmission to easily defined social compartments

Base case = 24% attack rate, peak ~d45, ends ~d114
60% compliance = 11% attack rate, peak~d75, ends ~d202
99% compliance = 0.5% attack rate, peak ~d12, ends ~d51

Reduction in case numbers by transmission compartment

Base case = 24% attack rate, peak ~d45, ends ~d114
60% compliance = 11% attack rate, peak~d75, ends ~d202
99% compliance = 0.5% attack rate, peak ~d12, ends ~d51

Factors that influence transmission dynamics

• Relative individual infectiousness ↑	↑ importance of like-to-like transmission compartments
• Social network size ↑	↑ transmission per agent (Ro)
• Ratio of within- to between-group mixing in schools and workplaces ↑	↑ efficacy of socially targeted prophylaxis
• Infected individuals continue to circulate	↑ proportion of transmission occurring outside households
• Household size ↑	↑ proportion of transmission occurring inside households and cumulative attack rate

Social Distancing Maneuvers

Targeting zones of high infectious contact

- Closing schools (eliminates like-to-like transmission / amplification)
- Keeping children and teens home (reduces household transmission)
- Social distancing in the workplace
- Liberal leave policies (reduces workplace transmission)

Shunting transmission into easily defined compartments

- Home isolation of patients / quarantine of family members
- Closing schools (increases proportion of transmission occurring in households and workplaces)
- Canceling public gatherings (may decrease occult community transmission)
- Reducing utilization of transit systems (may decrease occult community transmission)

A Strategy for Communities

Elements

Rapid Diagnosis

- RT-PCR confirmation of first cases in community
- Rapid influenza diagnostics for case ascertainment
- Clinical diagnosis if rapid diagnostics not available

Treatment / Isolation

- Antiviral medications (oseltamivir or zanamivir) as treatment for all persons with *confirmed* diagnosis of pandemic influenza
- All persons who are symptomatic with suspected or possible influenza are asked to remain in their homes for duration of illness
- Hospitalized patients isolated or cohorted with other influenza patients

Prophylaxis / Quarantine

- Household contacts of confirmed cases receive oseltamivir prophylaxis
- Household contacts of confirmed cases requested to comply with voluntary quarantine x 1 incubation period

Elements

Targeting zones of high infectious contact

- Schools close for duration of outbreak after first case confirmed in community
- Parents requested to keep children/teens home during outbreak
- Social distancing measures implemented in the workplace (e.g., self-contained small workgroups), but workplaces remain open
- Liberal leave policies to reduce circulation of ill or exposed adults

Shunting transmission into easily defined compartments

- Public gatherings cancelled
- Public advised to avoid crowds, minimize use of transit systems
- Public advised to postpone non-essential travel

Elements

Infection Control

- Hospitals implement infection control programs in waiting areas and emergency rooms and on clinical wards
- Public provided information about the use of facemasks
- Public advised of importance of maintaining physical separation from others, good hand hygiene, cough etiquette, etc.

If countermeasure supplies are adequate

- Prophylaxis of defined compartment (workplace) social contacts of patients with confirmed pandemic influenza

Caveat

Communities must be ready to implement measures immediately and public must sustain reasonable compliance for strategy to work.

Effect of Agent and Disease "Realism"

Factors that influence the shape of a pandemic but not transmission dynamics

• Ro ↑	↑ cumulative attack rate; requires more intensive containment measures
• Tg ↑	↑ time to peak, if no Δ Ro
• Incubation time ↑	↑ time to peak
• Peak infectiousness later	↑ time to peak
• Duration infectiousness ↑ but no Δ Ro	↑ time to peak; control policies more efficacious if case detection > 24 h from onset of symptoms

Vaccination

- Vaccinating 2N people with vaccine with 0.5X efficacy provides more protection than vaccinating N people with vaccine with X efficacy.
- For Ro ≤ 1.6, spread could be controlled if pandemic vaccine could be distributed nationally at rate of 10 million doses per week for 25 weeks initiated within 2 weeks of pandemic alert (day 40-50).
- Glass finds that vaccination of 60% of schoolchildren (1740 people) results in 98% reductions in case numbers and mortality (456 deaths, or 1 death for every 3.8 people vaccinated, for virus with mortality of 15% for symptomatic patients).

Targeted Antiviral Prophylaxis

- Only for Ro ≤ 1.6 can reasonable control using TAP alone be achieved with small stockpile
- TAP strategy requires identification of effective sizes of the close-contact mixing groups DIFFICULT TO DO
- As the clinical attack rate increases, the number of household infections increases and case-targeted control policies become more effective. Socially-targeted prophylaxis will also be slightly more effective, much moreso if the percentage of cases occurring in easily identified social compartments increases
- If a greater proportion of transmission occurs in schools and workplaces, overall and peak attack rates drop substantially (due to mixing being much more focused on school-age children) and effect of socially targeted control policies is markedly enhanced

Ferguson, NM, et al. Strategies for mitigating an influenza pandemic.

Reduction from base case due to social distancing of children / teens

Solid squares = attack and death rates
Open squares = peak afffected
Long dashes = time to peak
Short dashes = total time of epidemic

Open circles = ID 0.0125
Open triangles = ID 0.015

Reduction from base case due to vaccination of children / teens

Reduction from base case due to vaccination of children / teens

Social Distancing Measures

- Disease transmission parameters and the structure of social networks determine the Ro at which phase transition occurs, making a disease difficult to control with individual measures. Cf. effects of school closure between Longini/Ferguson

- The value of social distancing may emerge only in combination with other measures. Cf. comparison of combination measures between Longini/Ferguson

Circulation

- If infected individuals continue to circulate, greater proportion of transmission will occur outside of households
- In Ferguson/Glass models peak infectiousness occurs while individual is in pre-symptomatic period, while in Longini peak infectiousness is associated with symptoms.

Risk of Contracting Influenza and Bringing the Infection Home

Children—Schools/Community Adults—Work/Community

Risk of Infected Individuals Transmitting Influenza to Others Each Day
Children—Schools/Community Adults—Work/Community

Sensitivity

• Ro ↑	↑ cumulative attack rate with ↑ household size
• Tg ↑	↑ time to peak, if no Δ Ro
• Ratio of within- to between-group mixing in schools and workplaces	Affect only measures specifically targeting schools and workplaces
• Household size ↑	↑ cumulative attack rate
