RE: Water Closet, P-1 2.4.1  
UEPH Project  
Contract: N62470-82-C-224

Dear Roger,

Per your request, please find enclosed notarized letters of compliance covering the above mentioned water closet.

As I had mentioned in my letter of March 8, 1985, I am unaware of any plumbing fixture manufacturer who offers a floor mounted, rear outlet flush valve type closet which will cleanse on less water than this particular unit.

Your prompt attention in submitting this for approval will be greatly appreciated.

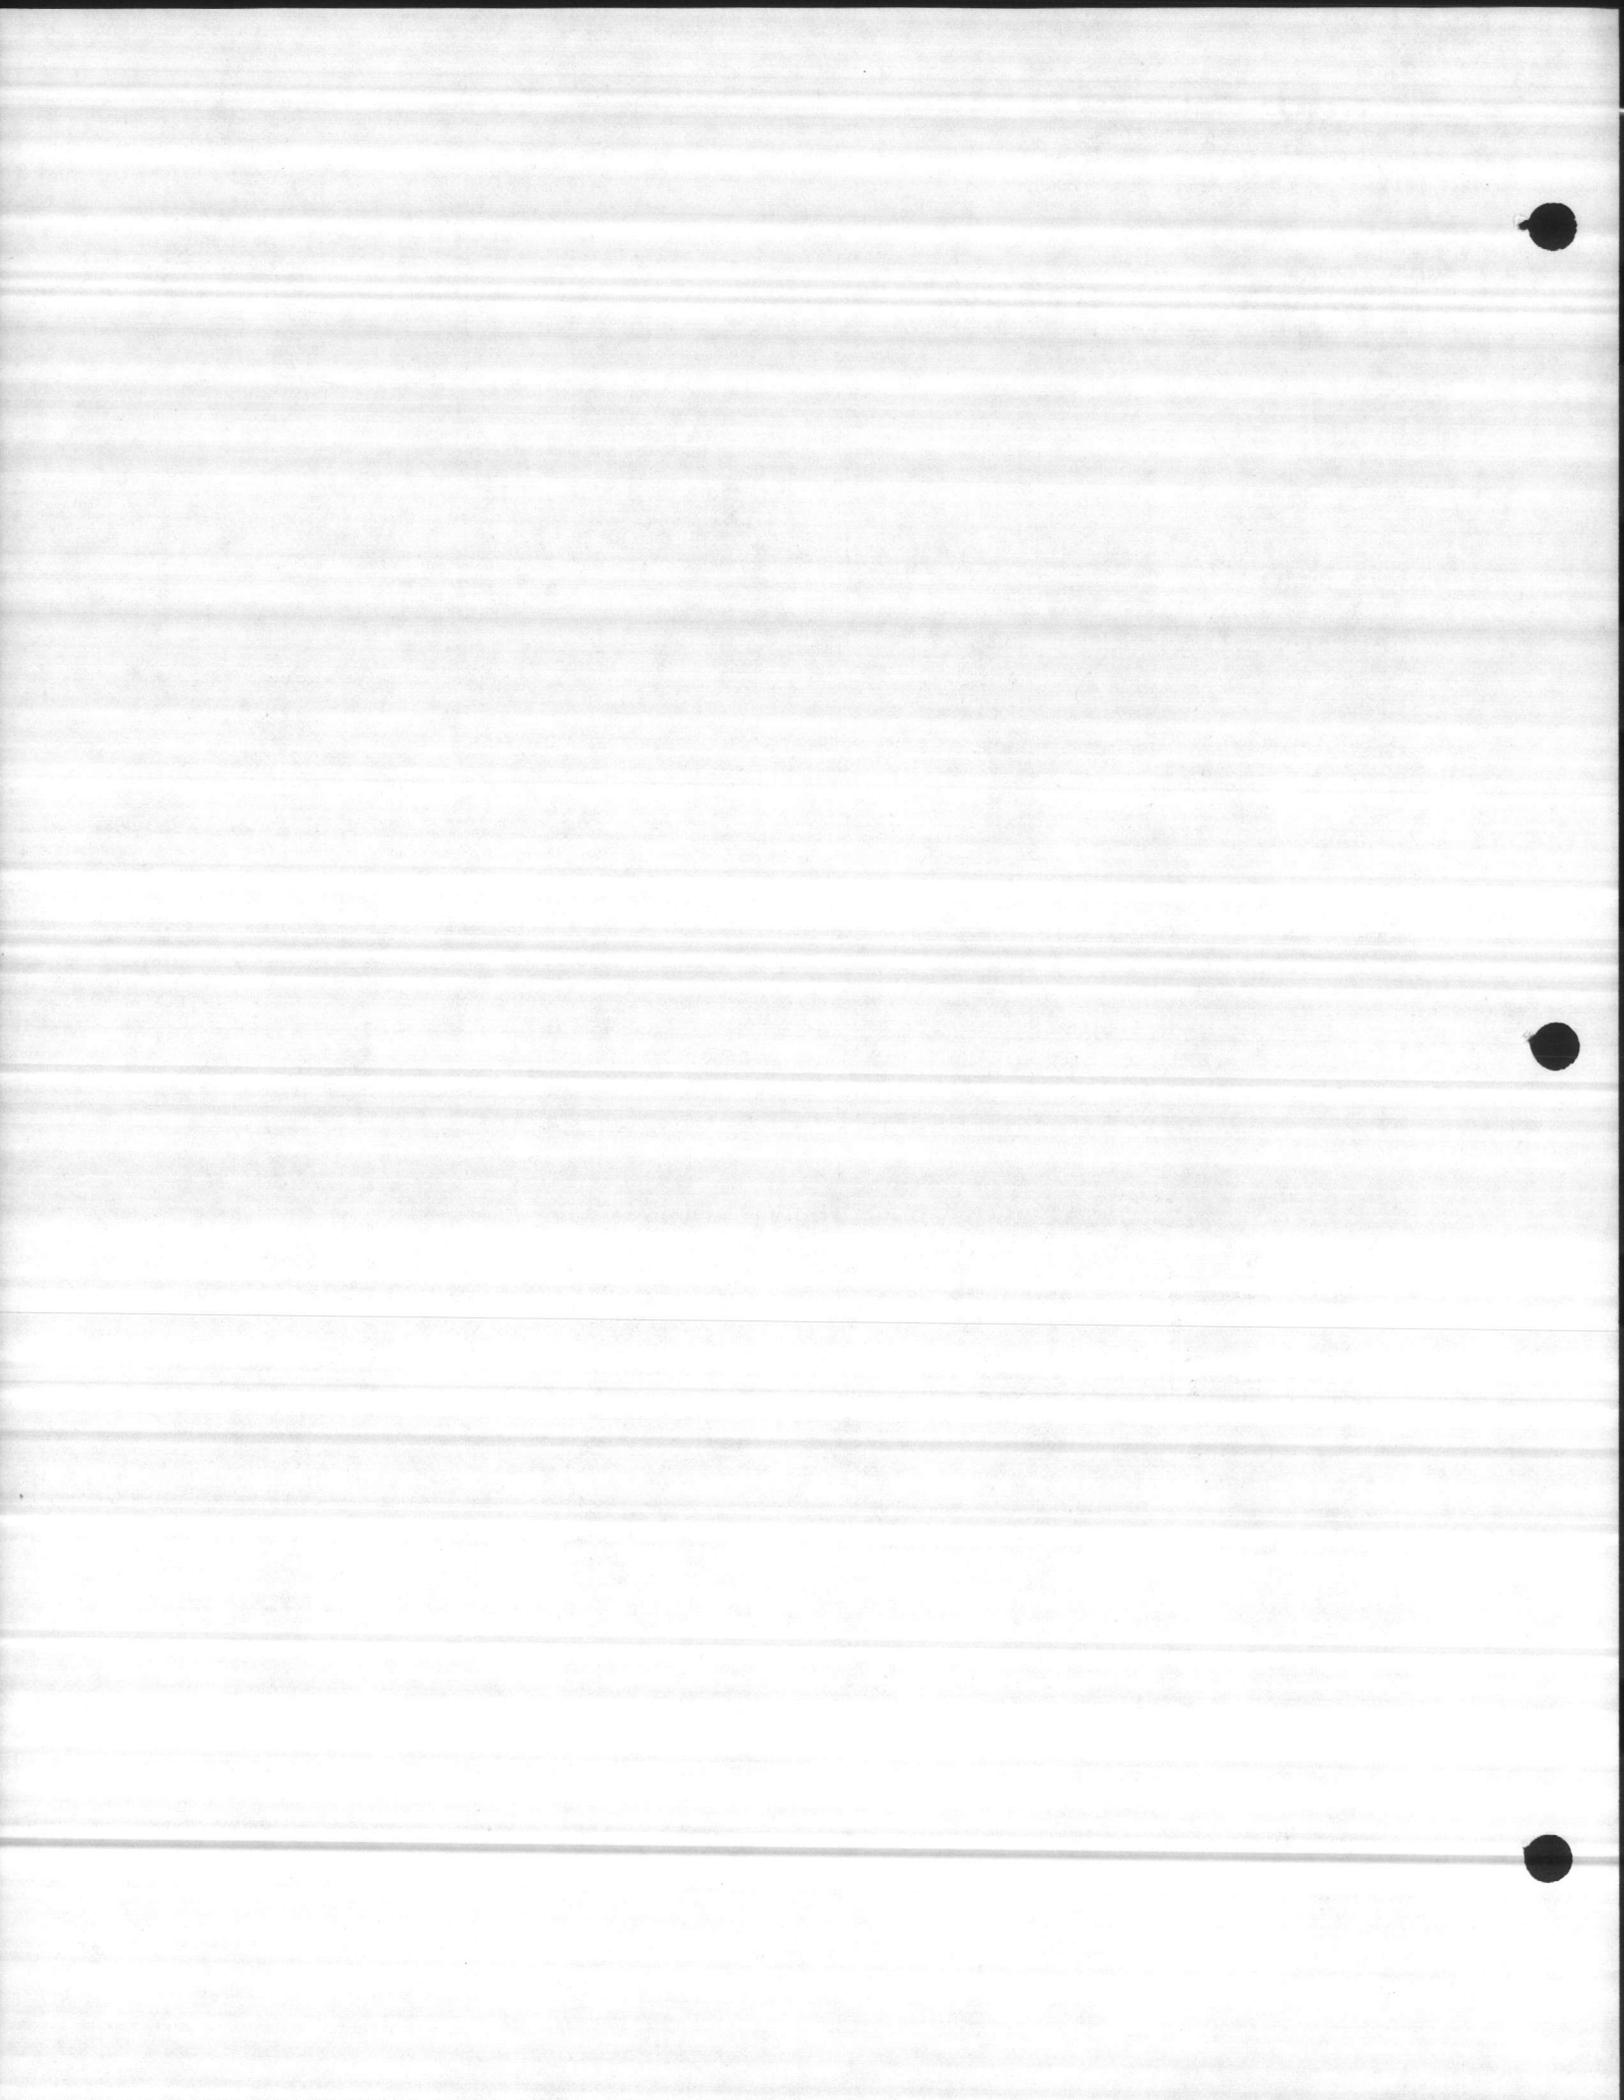

Sincerely,

A handwritten signature in cursive script that reads 'Chip Davis'.

RE: Water Closet, P-1, 2.4.1  
UEPH Project  
Contract: N62470-82-C-224

Dear Roger,

In reference to the above mentioned water-closet as submitted for this project, it has come to my attention that this closet, K-4486-ET, requires between 4½ and 5 gallons per flushing cycle to properly cleanse.

Neither myself or Kohler company are aware of any fixture manufacturer who offers a floor mounted, back outlet flush valve type closet bowl which operates on 4 gallons as requested.

I am enclosing another submittal sheet for your review and asking for a second approval. Certainly, transmittal #052 approved the items, yet I do not want us to be in a situation of having to request a deviation on this after the items are on the job.

Please feel free to contact me if I may be of any assistance.

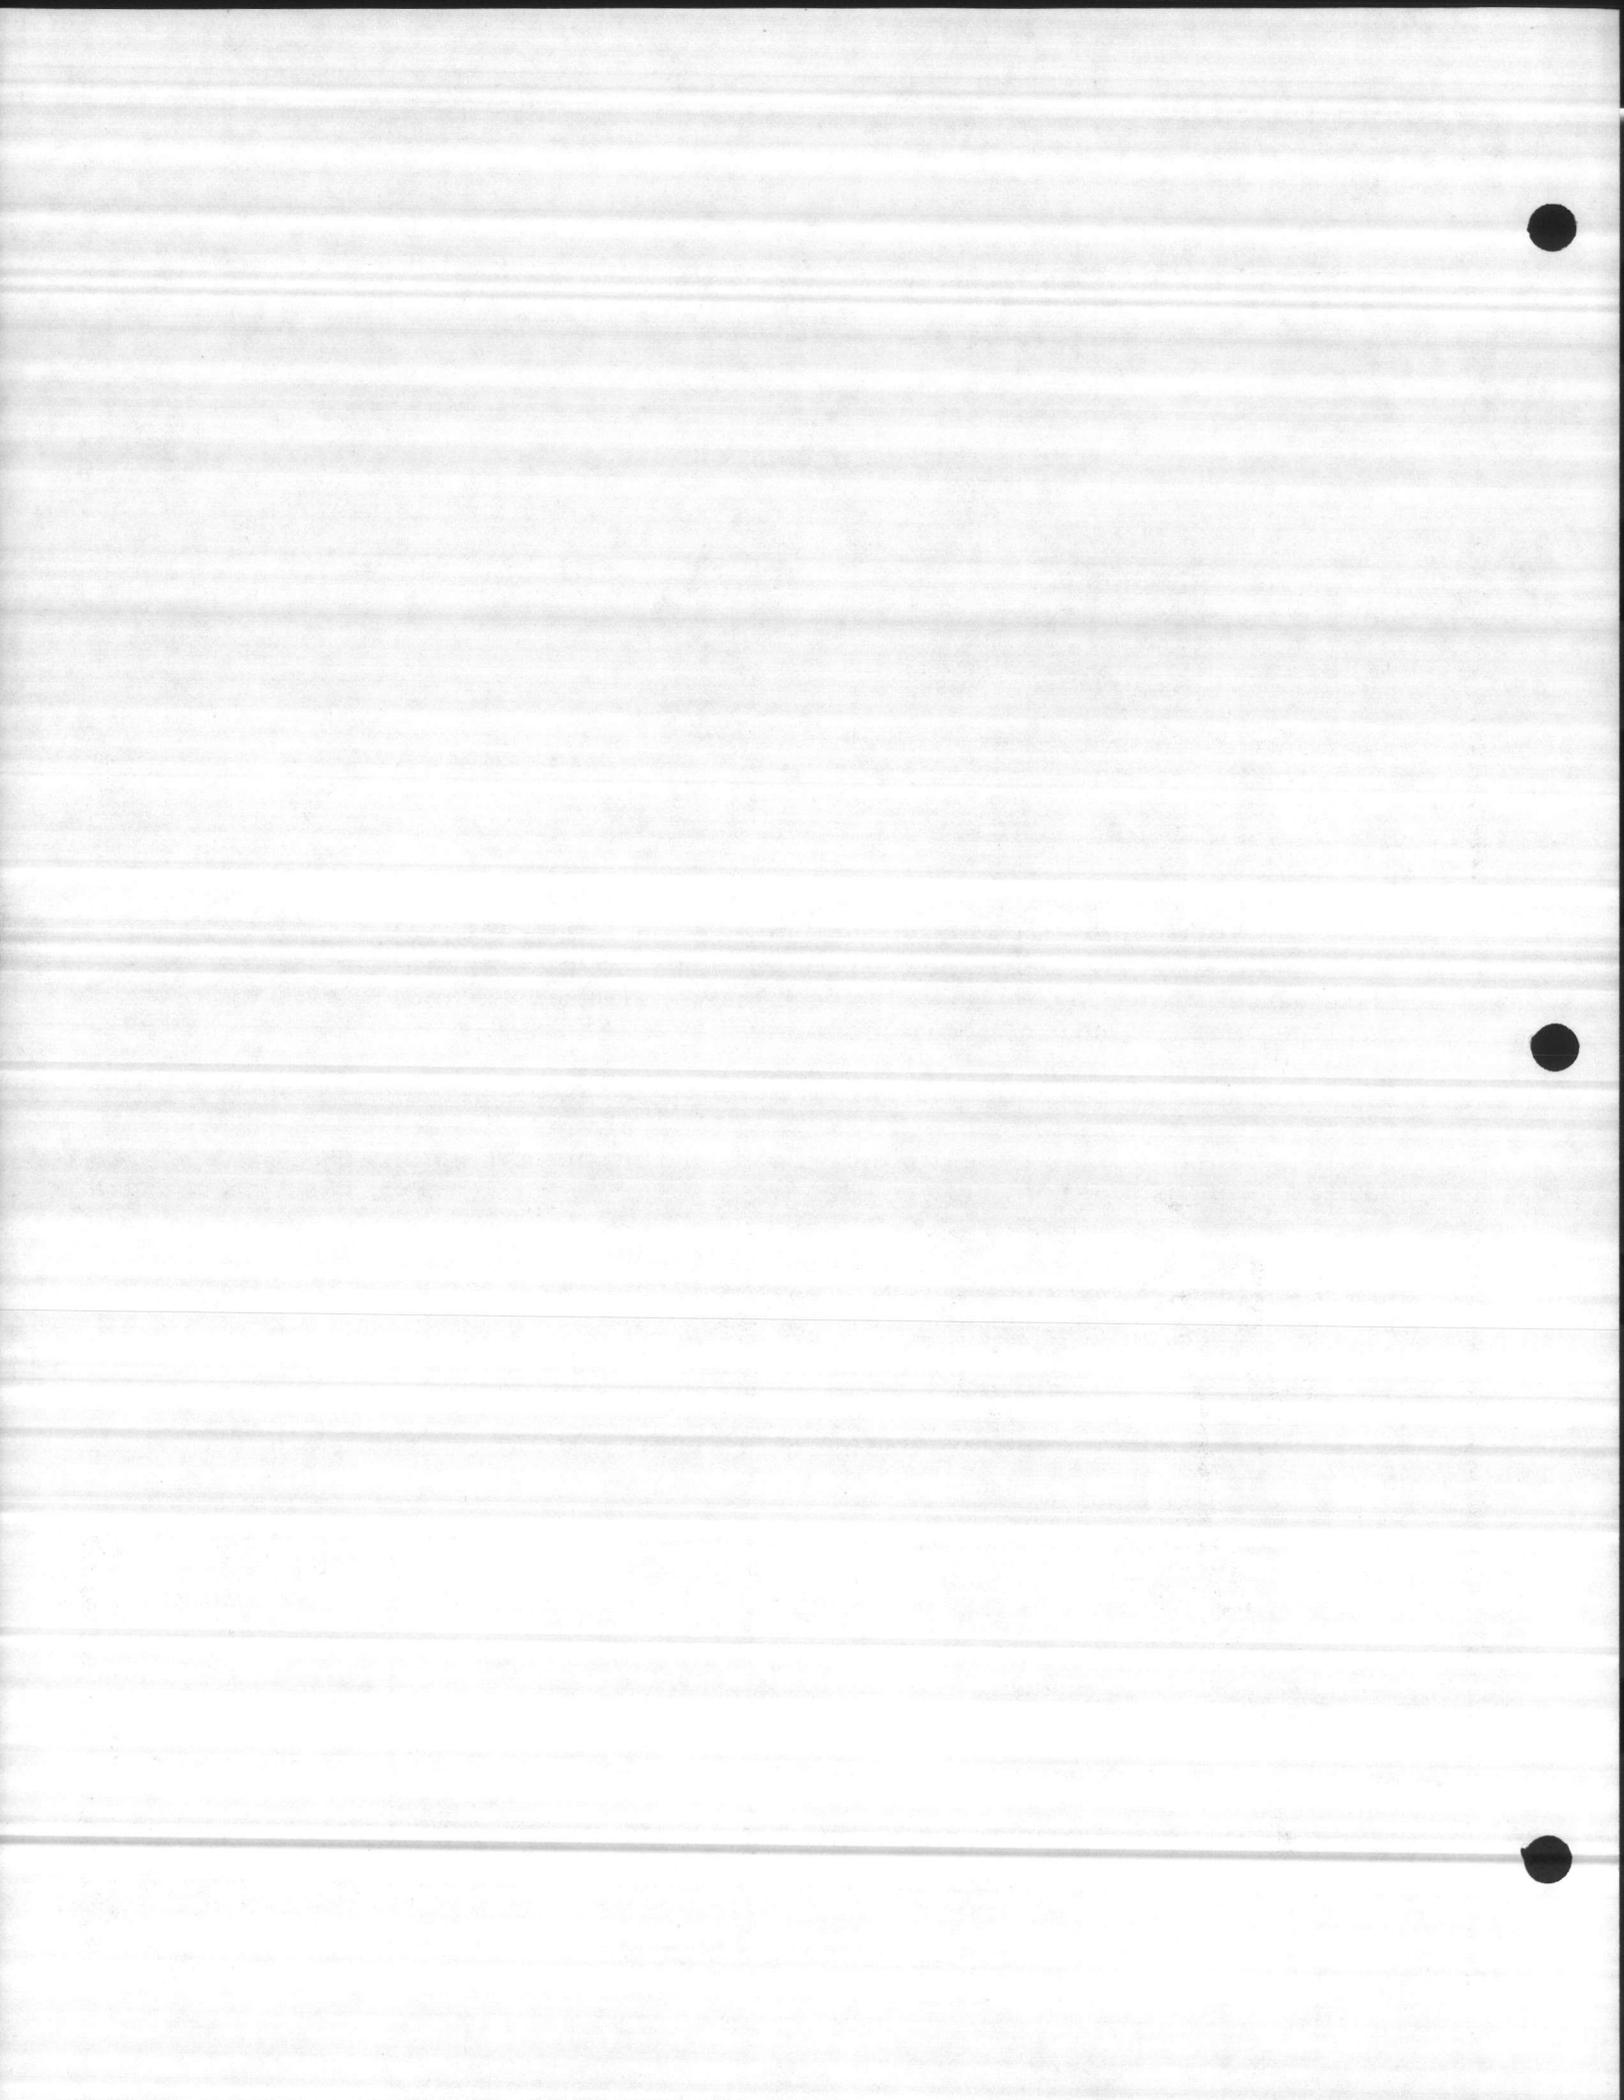

Sincerely,

A handwritten signature in cursive script that reads 'Chip Davis'.
