Re: Rebuild Electrical Substation, MCAS(H)
Project Number R-10-78

Dear Roger:

We are currently designing the referenced substation and find that we do not have any information on how the facility is metered and if any of the oil circuit breakers are interlocked. A one-line diagram of the facility probably would show the metering arrangement. A copy of this would be very helpful to us.

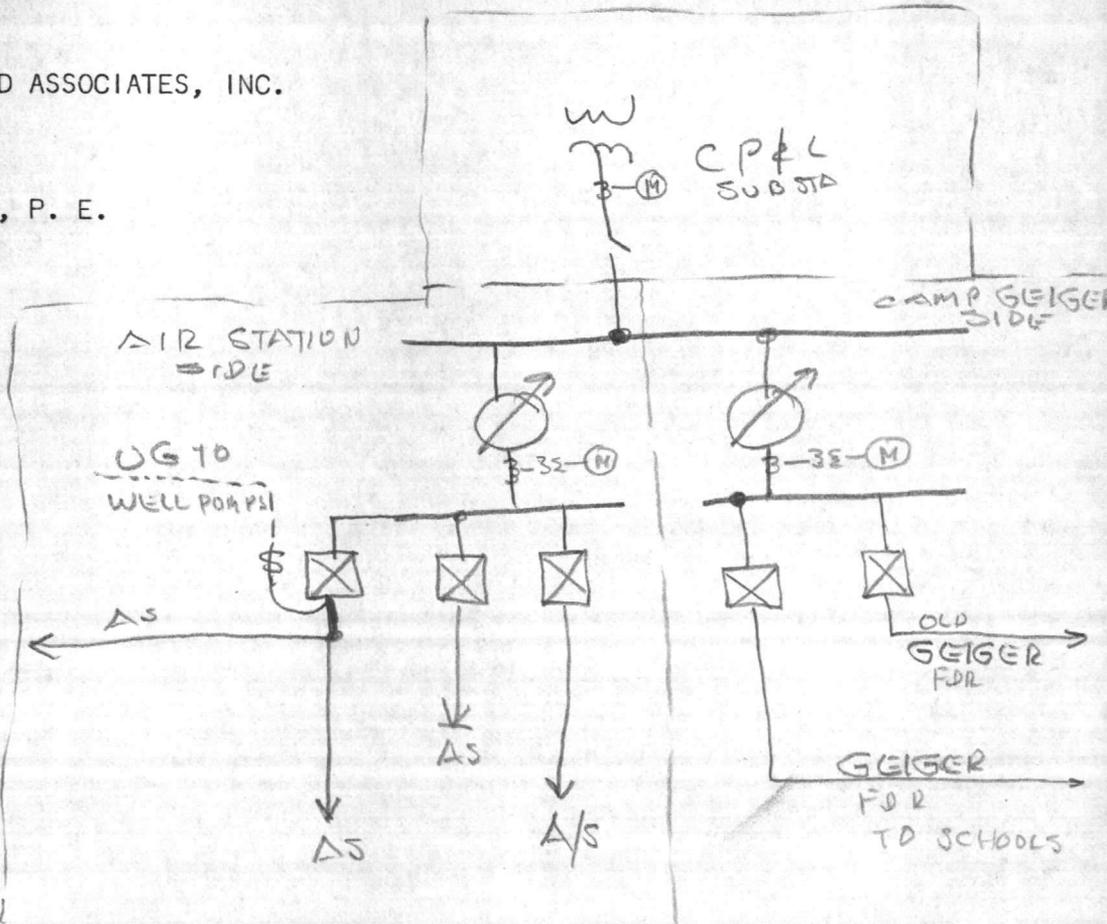

Please advise if you need clarification of this request.

Very truly yours,

HENRY VON OESEN AND ASSOCIATES, INC.
