Camp Lejeune, NC 28542

Dear Asbestos Contractor:

Subject: Notification Requirements
Asbestos Removal Projects

A review of our files indicates that your company has or may be involved with asbestos removal projects in North Carolina. Since some contractors have expressed uncertainty as to the exact notification requirements, this letter is being sent to help answer these questions.

Please find attached an example of the type form that can be used. It is not a required form but does contain the minimum amount of information necessary for us to evaluate your projects. Also included is a list of persons to be notified of each asbestos demolition and/or renovation project and a description of their related area of responsibility.

If you have any questions or need additional information, please feel free to contact Mr. Don Johnson at (919) 733-7015, ext. 135.

Your cooperation in protecting and maintaining clean air in North Carolina is greatly appreciated.

Sincerely,

Fin Johnson, Chief
Air Quality Section

Enclosure

cc: Don Johnson
