Dear Sir:

This letter is to report an 18 March 1985 break in a sewer main in the Hadnot Point wastewater treatment system, Marine Corps Base, Camp Lejeune, North Carolina. Telephonic notification was made to your office on 19 March 1985. Mr. Bush of your staff made an on-site inspection on 20 March 1985. Approximately 2,000 gallons of sewage were spilled when a contractor collecting soil samples broke the line. Nons appeared to reach the New River. The site was treated with NTH and cleaned up. It was repaired by 3:30PM on 18 March 1985.

If additional information is desired, please contact Ms. Elizabeth Betz, Supervisory Chemist at (919) 451-5977.

Sincerely,

B. W. ELSTON  
Assistant Chief of Staff, Facilities  
By direction of the Commanding General

- W.R.P.* ~~CAMP GEIGER~~  
1. The ~~Courthouse Bay~~ Wastewater Treatment Plant violated the parameter for percent removal of BOD and SS for the month of February 1985, parameters being 85% removal. Actual BOD removal was 81.9% and SS removal was 83.6% for the month.
- W.R.P.* ~~COURTHOUSE BAY~~  
2. The ~~Camp Geiger~~ Wastewater Treatment Plant violated the parameter for percent removal of BOD for the month of February 1985, parameter being 85% removal. Actual BOD removal was 83.1% for the month.
3. The trickling filters for both plants were under contract to replace filter sweeps and center column. Due to the time required for replacement, the zoogleal film on filter media was destroyed which takes approximately two weeks to reclaim.
4. Filters at both plants are back in normal operation and permit requirements are being met.
