

MEMO TO FILE

RE: Selectable document that could not be copied but must be returned to owner

SID 1936 (Document ID 0001005-076-001) is an original bound 1941/1942 report titled "Completion Report Covering the Design of Camp Lejeune U. S. Marine Barracks New River, North Carolina Vol. II." It was selected from Building 1037, MCB Camp Lejeune pursuant to Booz Allen Hamilton's document search and collection process in November 2007. The owner of this document, Deborah Guthrie, (Maintenance Control Supervisor, Public Works Division, Camp Lejeune), requested that the document be copied and returned because of its frequent use as a reference and its historical value. The size and tight binding of the document, however, prohibited legible reproduction.

Booz Allen staff reviewed the Booz Allen Document Search and Collection repository and found three other copies of "Completion Report Covering the Design of Camp Lejeune U. S. Marine Barracks New River, North Carolina Vol. II": SID 2076 (Doc ID 0001005-059-003), SID 5753 (Doc ID 0000001-003-002), and SID 5513 (Doc ID 0000084-002-001).

Review of these documents revealed that these were similar to SID 1936, with a few small variances as detailed below. The closest duplicate to SID 1936 is SID 2076 with these exceptions:

- SID 1936 is Copy No. 18 with "Office of the Camp Engineer Camp Engineer" stamped on the front cover. SID 2076 is Copy No. 24 with no stamp on the front cover.
- Page numbers 721 and 726 in SID 1936 were hand corrected; there were no other written alterations/notes within the database. There are no hand corrected page numbers in SID 2076 but there are duplicated pages within the report. There are two copies of page numbers 362-367, page number 739, page number 803, and page number 824 contained within the bound report.
- Neither report has a full sequence of pages; both copies contain page numbers 317-367 and then jump to page numbers 600-869.

The other two versions of the report that were collected have different stamps and handwriting on the front covers with handwriting contained within the report.

- SID 5753 is Copy No. 19 with "Office of the Camp Engineer" and "Office of the Camp Utilities Officer" stamped on the cover, as well as "Central Heating Plant" handwritten on the front cover. In addition, there is handwriting on the diagram that appears after page number 343.
- SID 5513 is Copy No. 34 with "Building Numbers Listed Pages 787-847." In addition, there is handwriting on page number 629 and the photograph following page number 629.

Because of the difficulty of obtaining a readable copy of SID 1936; the need to return the original to its owner; the availability of nearly identical copies of the document; and extensive documentation of any variances amongst the copies, SID 1936 was returned to its owner in Building 1035 without retaining a full copy for the Booz Allen repository. Germane information regarding variances was documented through this memo to file. In addition, the front cover of SID 1936 was copied to capture the uniqueness of the stamp, and the copy of the cover is attached to SID 1936's DDF.

The original of SID 1936 (0001005-076-001) may be referenced at Bldg 1005, in Container 076. Container 076 is a three shelf bookcase located in Operations Branch ("Wing 4" on the building map located in the Building 1005 Building Packet), Room 102 (at the end of the wing on the right). The bookcase is immediately across the room from the entrance to the office and the report was returned to those shelves. Neal Paul is the Director of the Operations Branch. He and the occupant of Room 102 were notified of the importance of retaining the report in its current location.

13 December 2007

MEMO TO FILE

RE: Selectable document that could not be copied but must be returned to owner

SID 1938 (Document ID 0001002-078-001) is an original bound 1943M1943 report titled "Complete Report Covering the Design of Camp Lejeune U. S. Marine Barracks New River North Carolina Vol. 1". It was selected from Building 1027, MCB Camp Lejeune pursuant to Boz Allen Hamlin's document search and collection project in November 2007. The owner of this document, Deborah Gurnee (Maintenance Control Supervisor, Fuel/Water Division, Camp Lejeune), requested that the document be copied and returned because of its frequent use as a reference and its historical value. The size and lighting of the document, however, prohibited legible reproduction.

Boz Allen still reviewed the Boz Allen Document Search and Collection repository and found three other copies of Complete Report Covering the Design of Camp Lejeune U. S. Marine Barracks New River North Carolina Vol. 1: SID 2076 (Doc ID 0001002-025-003), SID 2753 (Doc ID 0000001-003-003), and SID 2815 (Doc ID 000084-00-001).

Review of these documents revealed that these were similar to SID 1938, with a few small variances as detailed below. The closest duplicate to SID 1938 is SID 2076 with these exceptions:

- SID 1938 is Copy No. 18 with Office of the Chief Engineer, Camp Engineer, stamped on the front cover. SID 2076 is Copy No. 24 with no stamp on the front cover.
- Page numbers 731 and 732 in SID 1938 were hand corrected; there were no other written annotations within the document. There are no hand corrected page numbers in SID 2076 and there are duplicated page numbers in the report. There are two copies of page numbers 302-307, page number 739, page number 803, and page number 824 contained within the bound report.
- Neither report has a full sequence of pages; both copies contain page numbers 317-337 and then jump to page numbers 600-889.

The other two versions of the report that were collected have different stamps and handwriting on the front covers with handwriting contained within the report.

- SID 2753 is Copy No. 19 with Office of the Camp Engineer, and Office of the Camp Utilities Officer, stamped on the cover, as well as Central Heating Plant, hand written on the front cover. In addition, there is handwriting on the diagram that appears after page number 343.
- SID 2815 is Copy No. 34 with Ballistic Tables List, Paper 787 247, in addition there is handwriting on page number 829 and the photograph following page number 830.

Because of the difficulty of obtaining a readable copy of SID 1938, the need to return the original to the owner, the availability of nearly identical copies of the document and previous reproduction of this document, amongst the copies SID 1938 was returned to its owner in Building 1025 without retaining a full copy for the Boz Allen repository. Genuine information regarding variances was documented through this memo to file. In addition, the front cover of SID 1938 was copied to capture the uniqueness of the stamp, and the copy of the cover is attached to SID 1938's PDF.

The original of SID 1938 (0001002-078-001) may be referenced at Bldg 1007, in Container 078 Container 078 is a three shelf book rack located in Operations Branch 1007, on the building map located in the building 1007 building rack, from the end of the aisle on the right. The bookcase is immediately across the room from the entrance to the office and the report was returned to those shelves. Staff Parks is the Director of the Operations Branch. He and the applicant of Room 102 were notified of the impoundment retaining the report in its current location.
