Lt. Colonel T. R. Baisley  
Base Maintenance Officer  
U.S. Marine Corps  
Marine Corps Base  
Camp Lejeune, N.C. 28542

Dear Colonel Baisley:

The State has completed its review of your proposal to construct two concrete boat ramps and provide erosion control measures on the New River at Camp Lejeune, N.C. The proposal is described in your application for a Department of the Army permit (public notice SAWCO80-N-067-000065 dated December 20, 1979) and in your determination of July 15, 1980 that the proposal is consistent with the North Carolina Coastal Management Program.

The State concurs with your determination. Therefore, we support both issuance of the Department of the Army permit and construction of the project. Such construction should meet the conditions of the 401 Water Quality Certification that has been issued for the proposal.

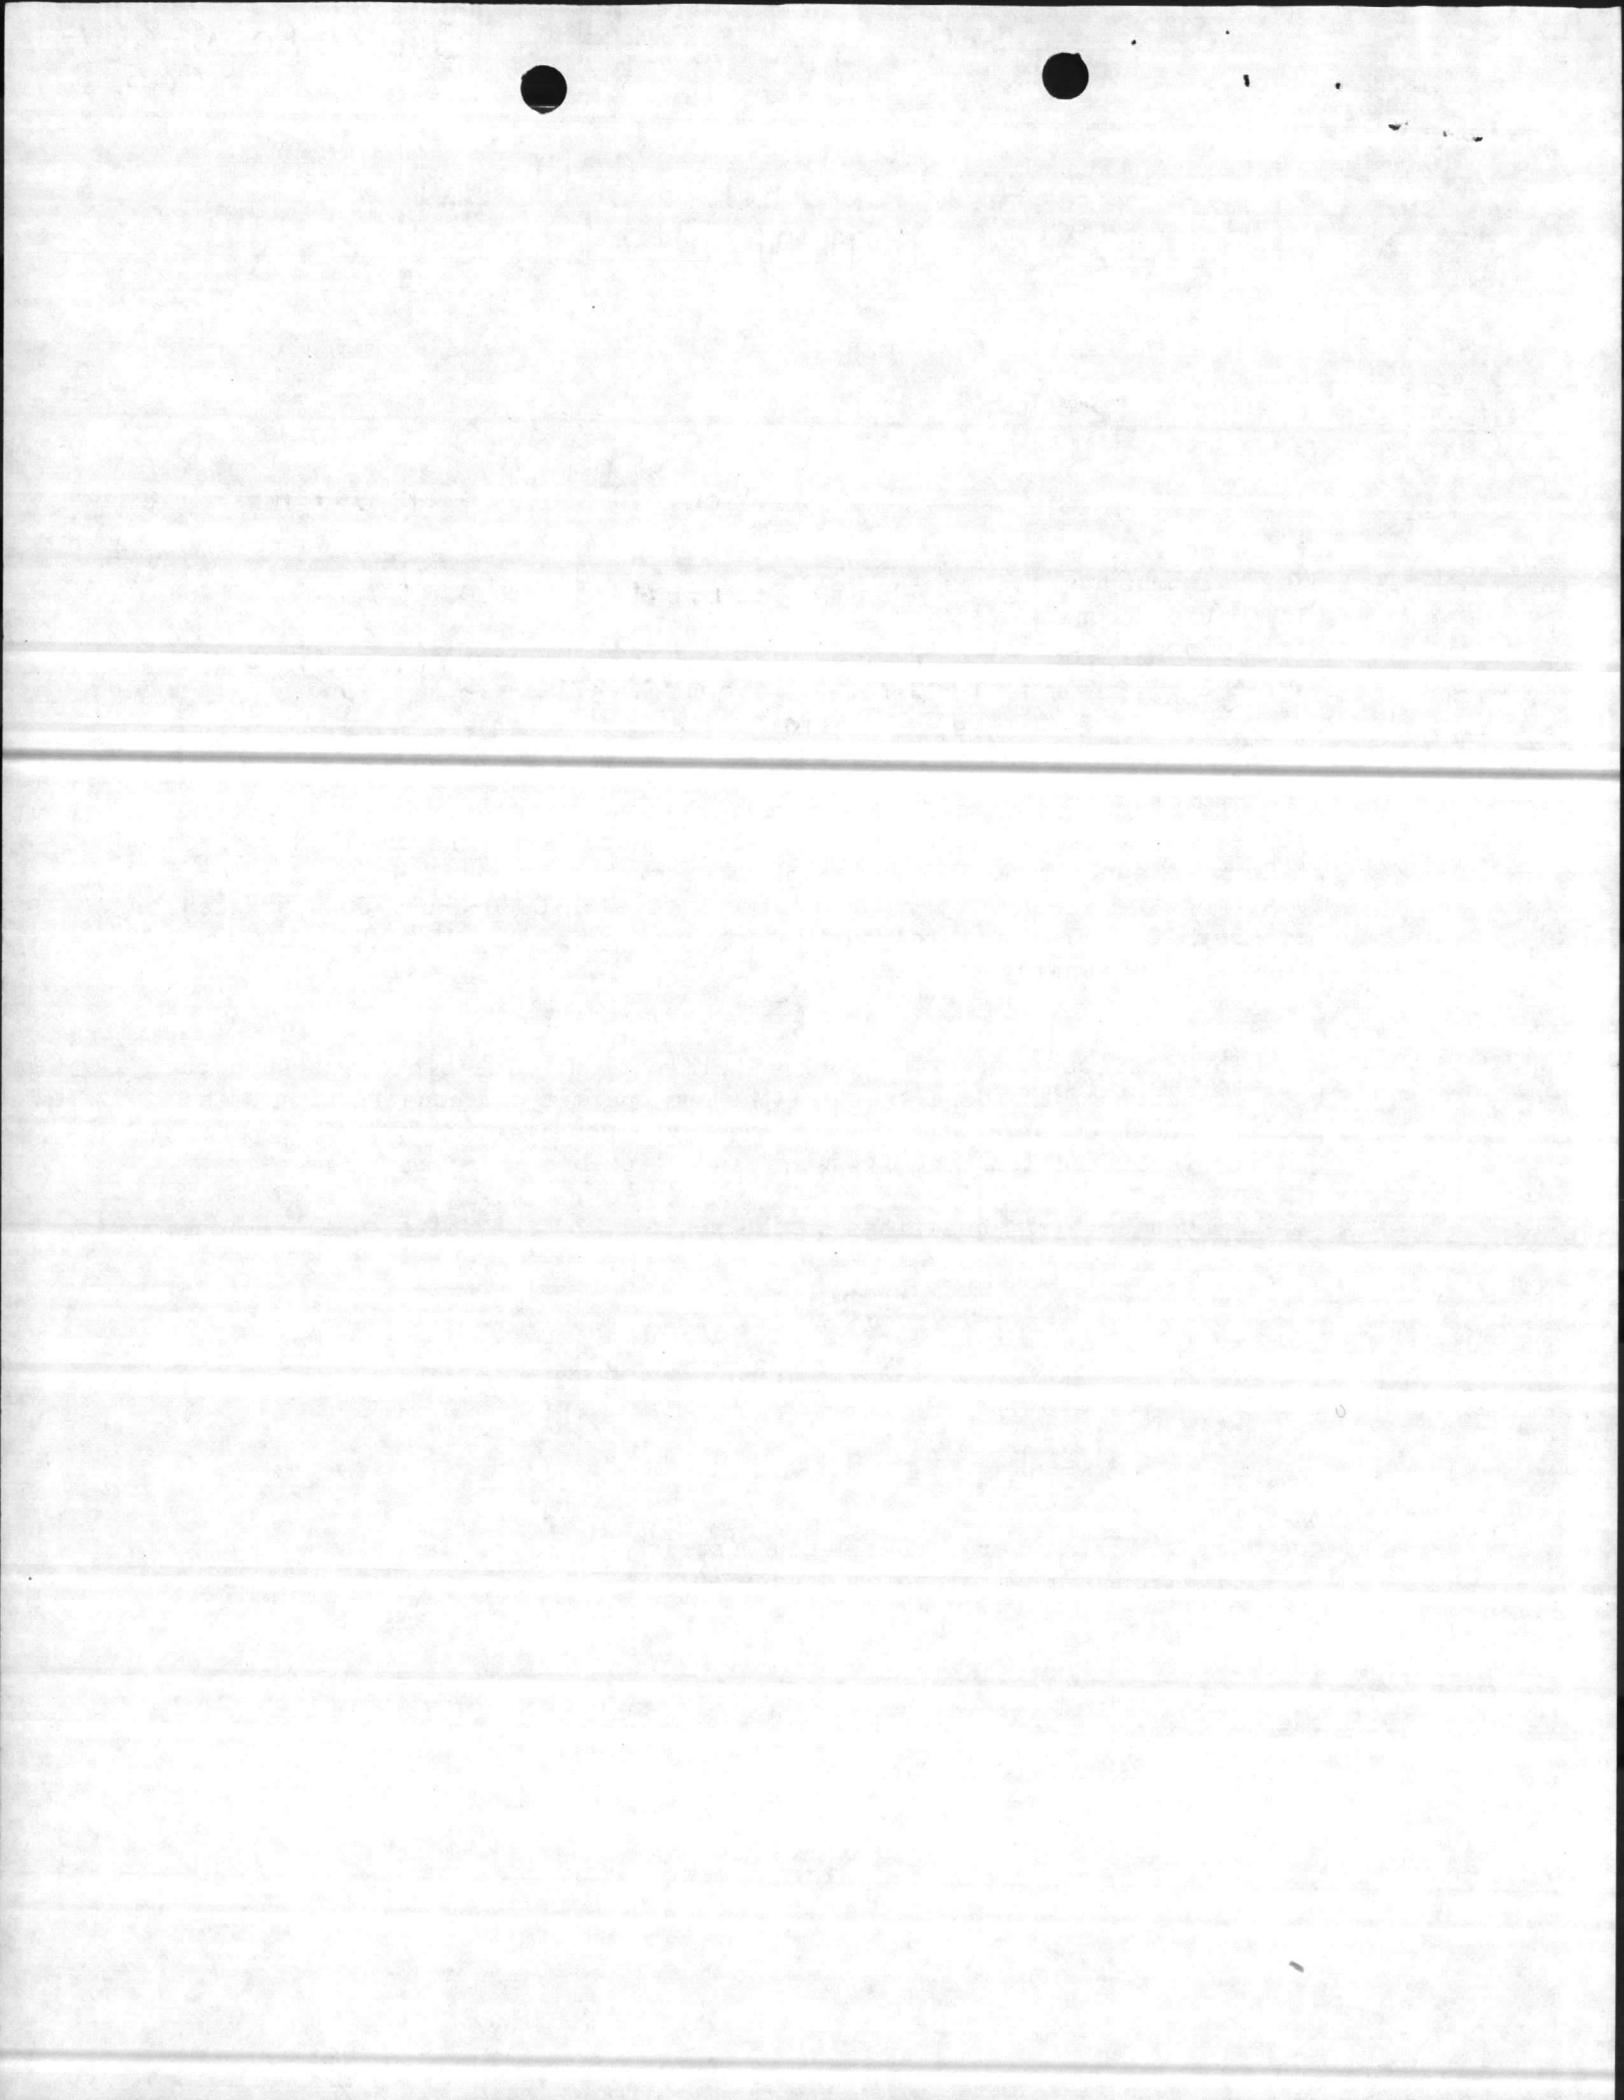

If you have any questions on the position of the State, please let me know.

Sincerely,

E. Walton Jones

Mr. Ken Stewart, Director  
Office of Coastal Management  
Department of Natural Resources and Community  
Development, Post Office Box 27687  
Raleigh, North Carolina 27611

Dear Sir:

The purpose of this letter is to furnish additional information required in order to receive a 404 Permit from the U. S. Army Corps of Engineers for the Marine Corps Base's proposed project to upgrade two existing landing ramps used by tactical amphibious track vehicles entering and exiting from New River.

It appears that concurrence from your office is the only remaining consideration to be addressed. Accordingly, a consistency statement is enclosed for your review. The Base Public Works Officer is unable to obtain final approval from Headquarters Marine Corps until the 404 Permit has been obtained. If possible, it is respectfully requested this matter be expedited as Marine Corps Base is approaching funding deadlines for fiscal year 1980.

Sincerely,

T. R. BAISLEY  
Lt Colonel, U. S. Marine Corps  
Base Maintenance Officer  
By direction of the Commanding General

JUL 1 5 1980

CONSISTENCY STATEMENT  
AMPHIBIOUS RAMP PROJECT, CAMP LEJEUNE, NORTH CAROLINA

A. Project Description: This project will provide concrete ramps and erosion control measures at existing dirt ramps used for access to New River by amphibious track vehicles. One ramp will be located at the end of Rhodes Point Road on the west side of New River. The second ramp will be located at the end of Wiel Point Road on the east side of New River just south of the mouth of French's Creek.

B. Purpose of Project: To correct existing erosion problems caused by surface runoff.

C. Land Use: No change in land use is proposed. No marsh or wetland vegetation will be disturbed.

D. Archaeological and Historic Values: The project was reviewed by Dr. Thomas Loftfield, Department of Sociology, University of North Carolina at Wilmington. The site near French's Creek has no significant values in the immediate vicinity of the project. Significant archaeological materials were located up and down stream from the Rhodes Point road site. The Rhodes Point construction will be held within the existing road right-of-way and will not impact on the archaeological and historical value of the site. In fact, the project will protect the site against accelerated erosion. See Attachment #1.

E. Alternatives: There is no available alternative other than no action. The use of both roads by track vehicles is an essential part of training and has been conducted since the base was established.

F. Areas of Environmental Concern: The project will protect estuarine shoreline. No acceleration of intensity of traffic is foreseen; therefore, the project should greatly enhance the environment of the immediate area of each ramp.

G. Onslow County Land Use Plan: While the Marine Corps Base was excluded from the county plan, the waters of New River were not. This project will enhance the protection of water quality by controlling erosion and sedimentation. Therefore, it is concluded that this project is consistent with Onslow County Land Use Plan.

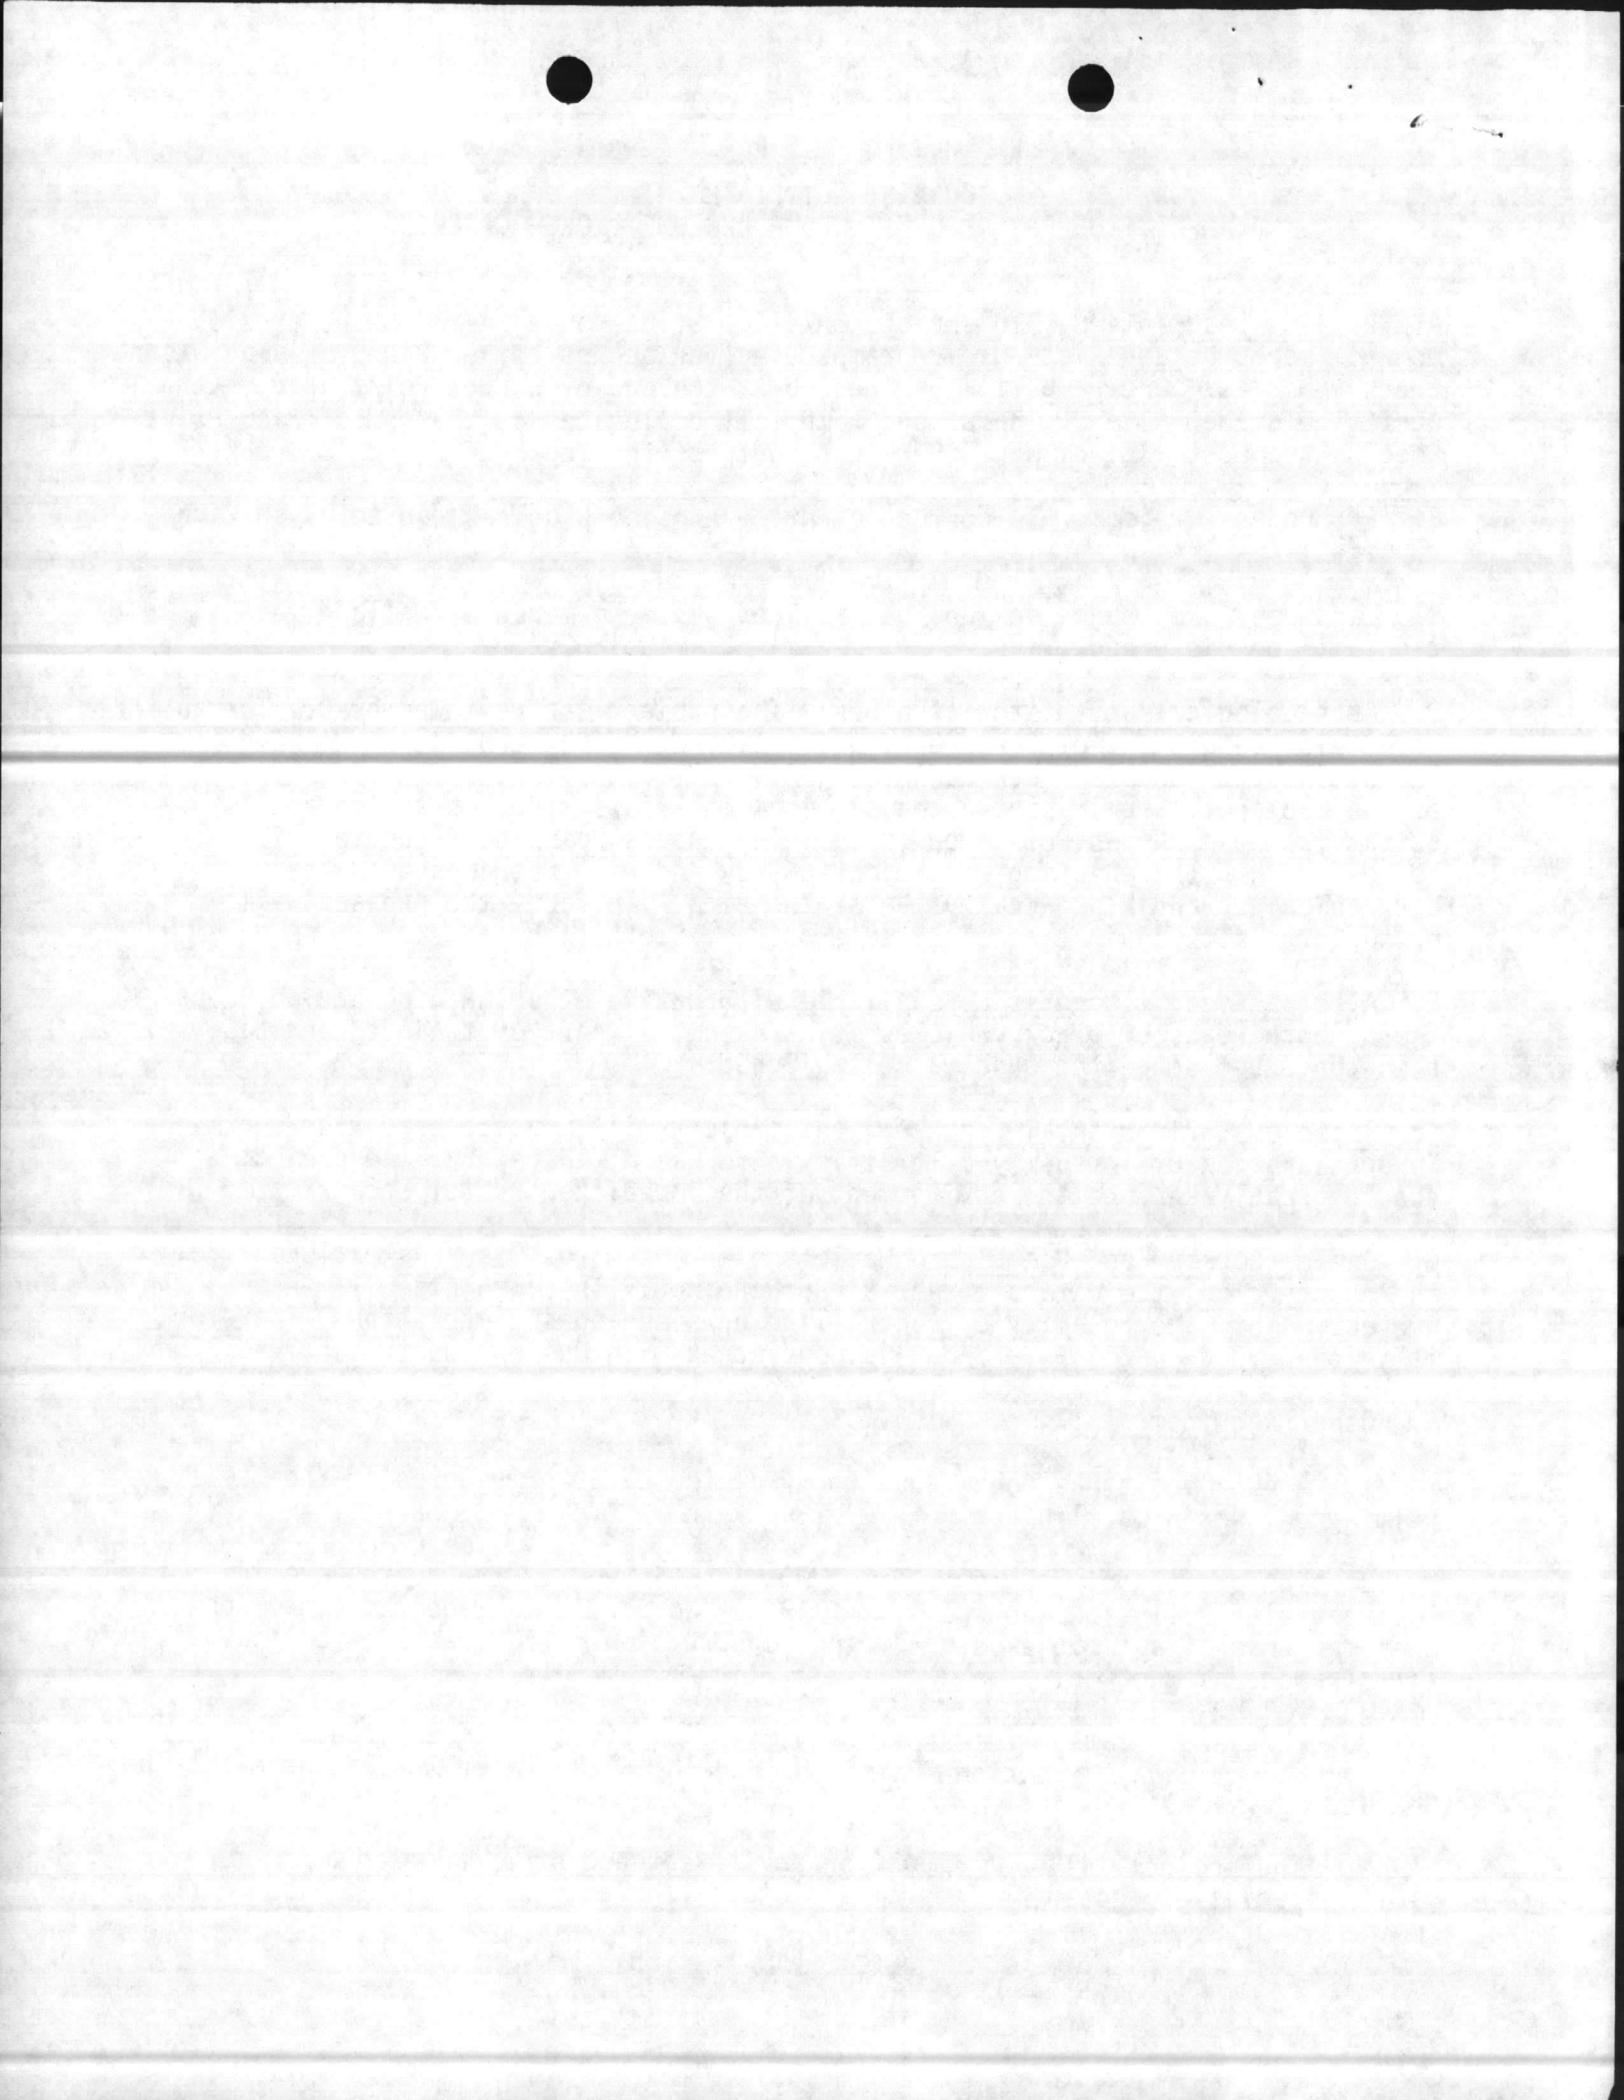

H. Other Requirements:

1. A 404 permit has been requested from the U. S. Army Corps of Engineers, Wilmington, North Carolina.

2. The project effects compliance with the intent of the North Carolina Sedimentation Pollution Control Act of 1973. No permit is required since less than one acre of soil is exposed during construction. The area will be stabilized after ramp construction.

3. The certification from the North Carolina Division of Environmental Management pursuant to Section 401 of the Federal Clean Water Act has been obtained. See attachment #2.

4. The project will not impact on any threatened or endangered plant or animal species protected by federal and state regulations.

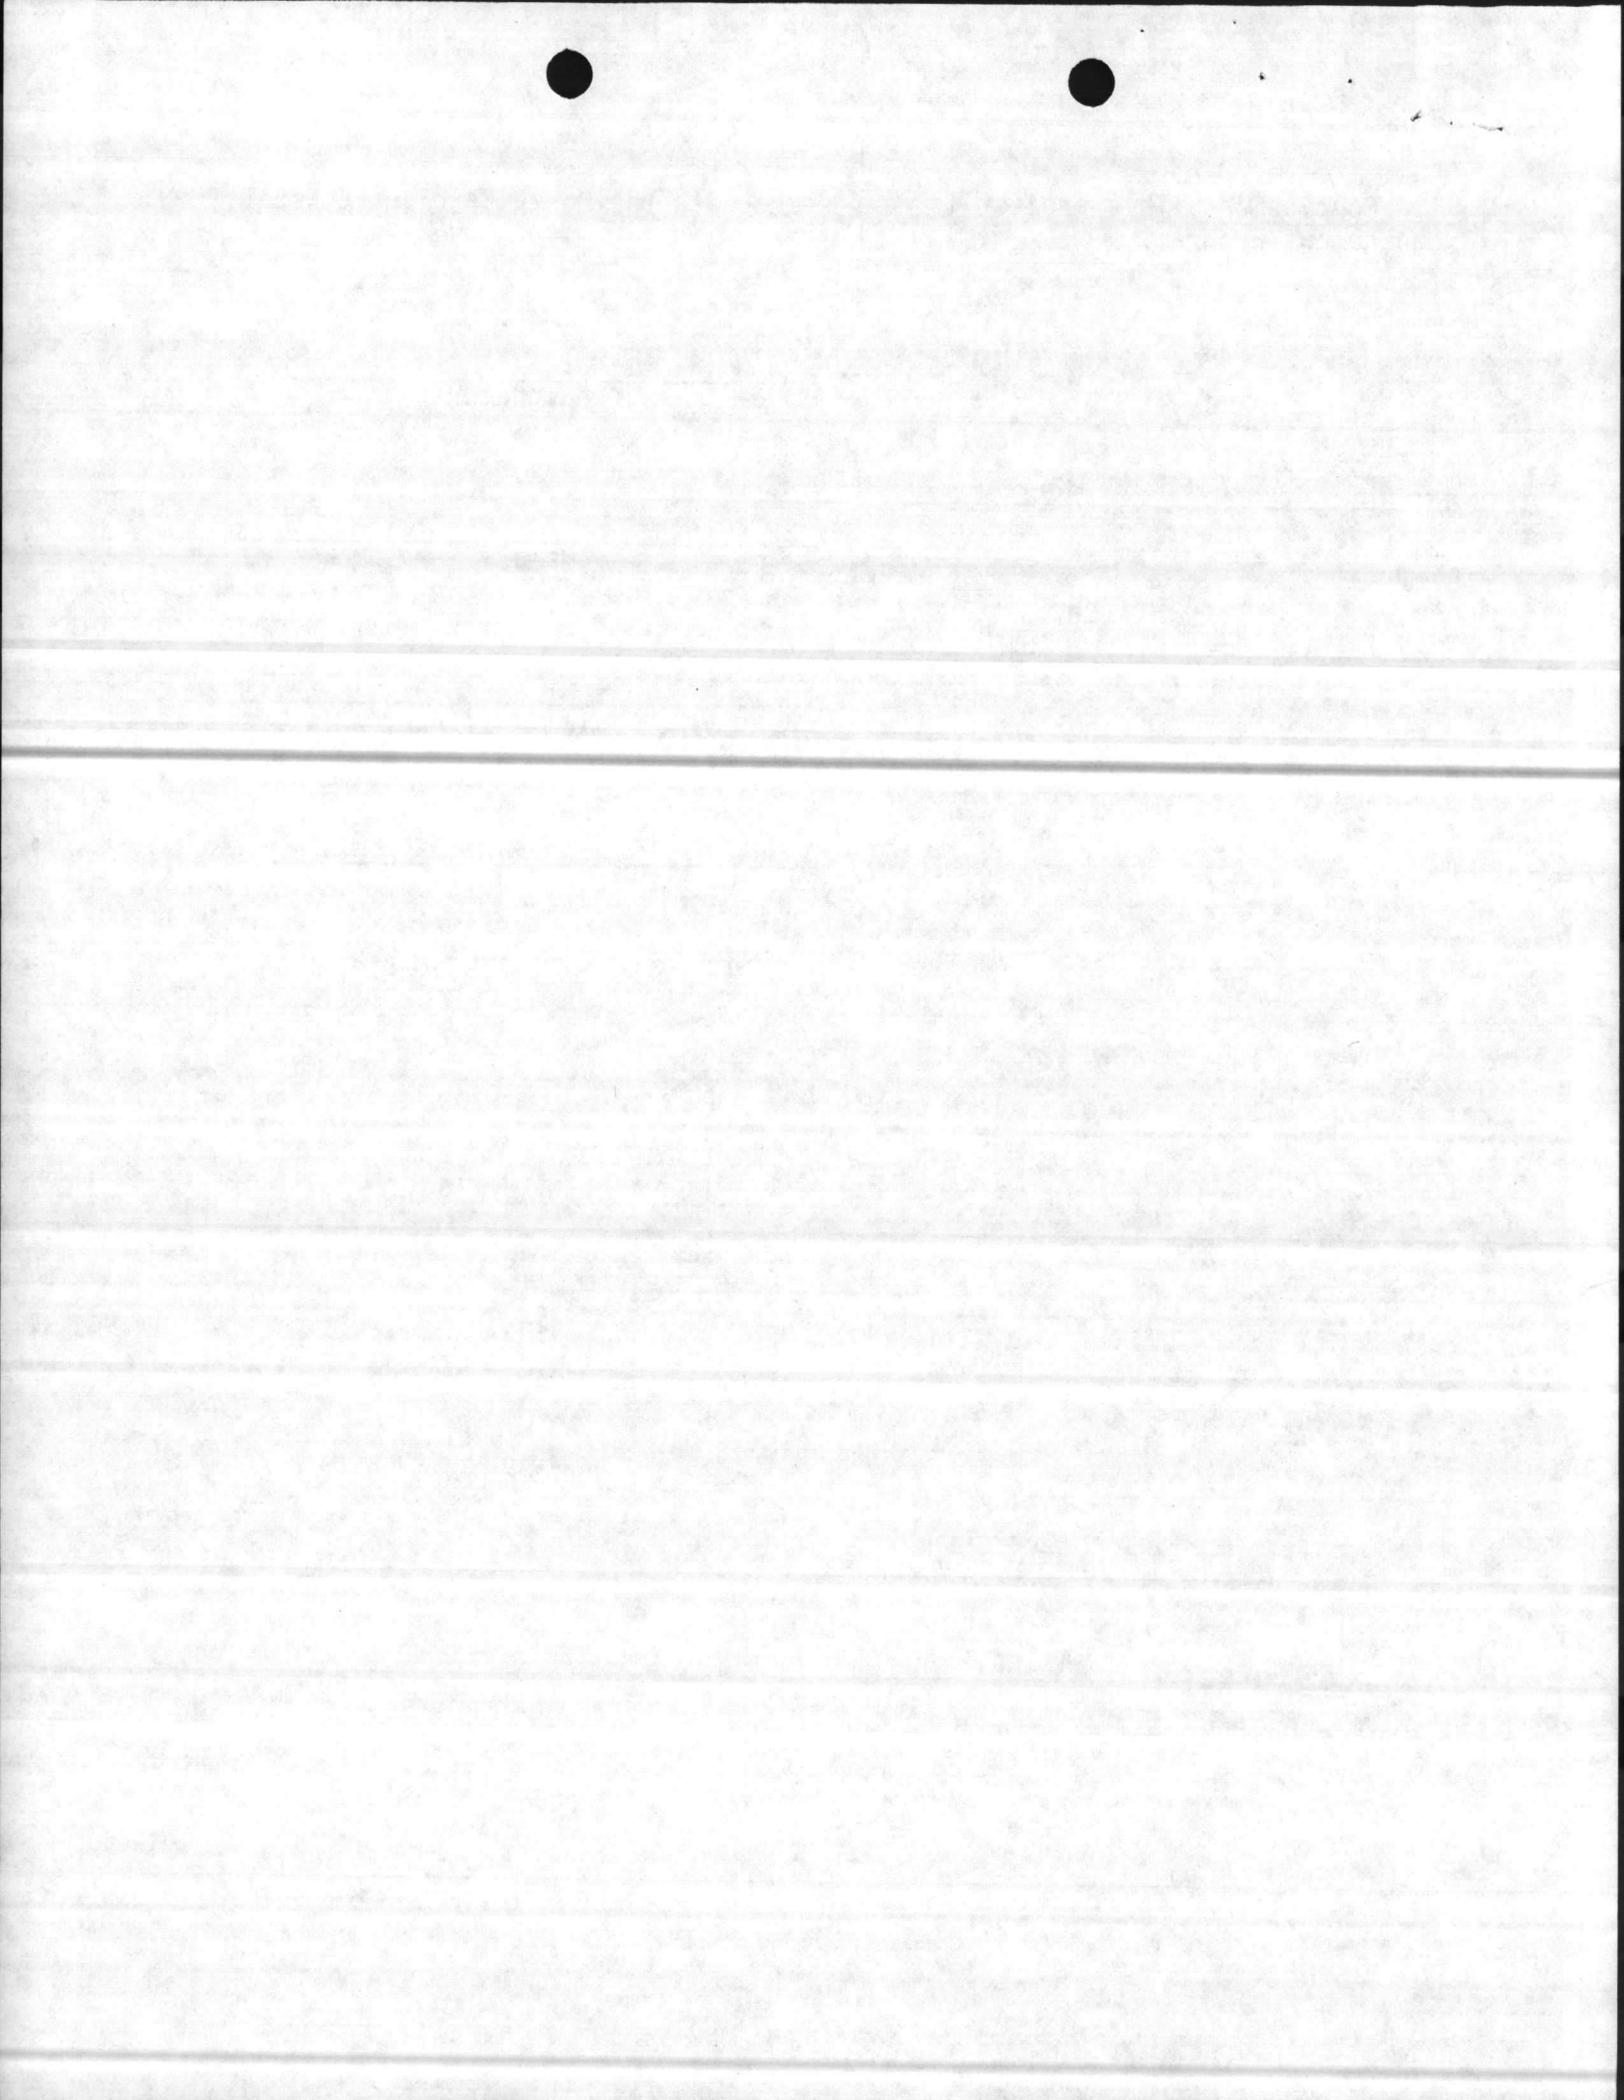

I. Conclusion: This project is consistent with the North Carolina Coastal Management Program.

NORTH CAROLINA  
ONSLow COUNTY

CERTIFICATION

THIS CERTIFICATION is issued in conformity with the requirements of Public Laws 92-500 and 95-217 of the United States and subject to the North Carolina Division of Environmental Management Regulations in 15 NCAC 2H, Section .0500 to the U.S. Marine Corps, Camp Lejeune, pursuant to the application filed on the 7th day of January, 1980, for the discharge of fill material into the waters of the New River.

The application provides adequate assurance that the discharge in conjunction with the construction of two-concrete amphibious ramps at Weil Point and Rhodes Point in Onslow County will not result in a violation of applicable water quality standards. Therefore, the State of North Carolina certifies that this activity will not violate Sections 301, 302, 303, 306, 307 of PL 92-500 and PL 95-217 if conducted in accordance with the application and conditions hereinafter set forth.

CONDITIONS OF CERTIFICATION:

1. That the activity be conducted in such a manner as to prevent significant increases in turbidity outside the area of construction or construction-related discharge (increases of 25 JTU's or less are not considered significant).

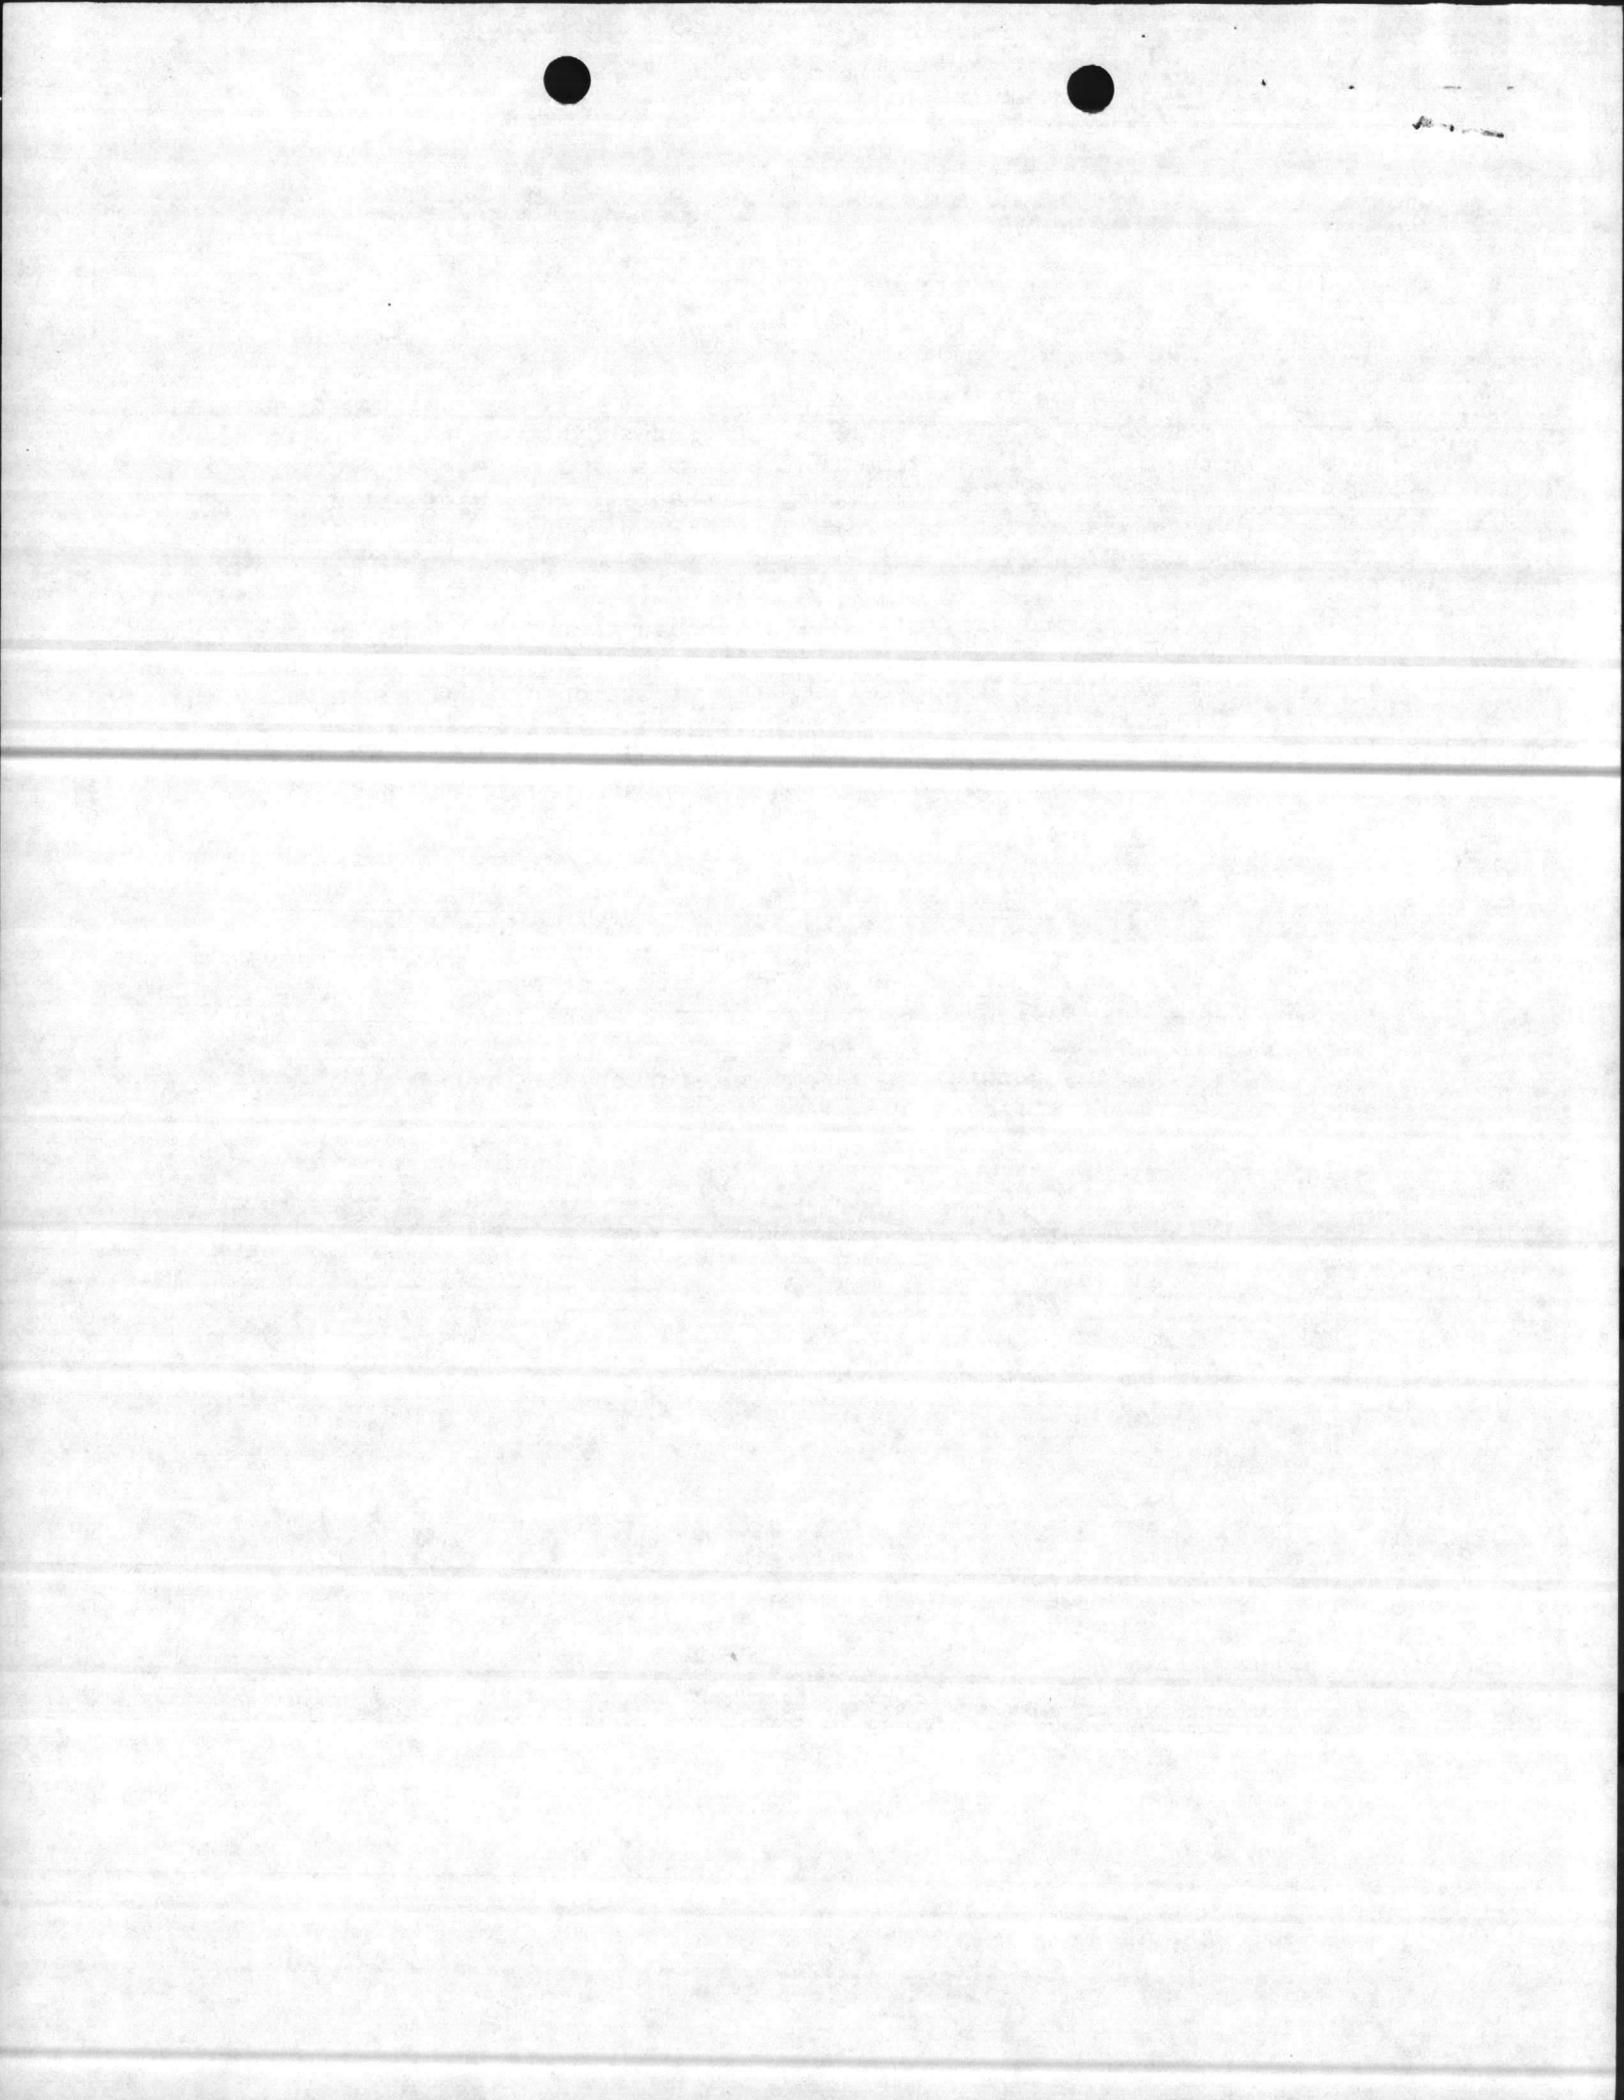

Violations of any conditions herein set forth shall result in revocation of this Certification.

This the 21st day of May, 1980.

V. Intended Use of Project Area (Describe)

- A. 1. Private N/A
- 2. Commercial N/A
- 3. Housing Development or Industrial N/A
- 4. Other AMPHIBIOUS VEHICLES ENTERING AND LEAVING NEW RIVER

- B. 1. Lot size(s) SEE ENCLOSURE (1)
- 2. Elevation of lot(s) above mean high water APPROXIMATELY 12'
- 3. Soil type and texture FINE SAND
- 4. Type of building facilities or structures LAUNCHING RAMP
- 5. Sewage disposal and/or waste water treatment A. Existing N/A Planned N/A  
 B. Describe N/A
- 6. Land Classification (circle one) DEVELOPED TRANSITIONAL COMMUNITY RURAL  
 CONSERVATION OTHER MILITARY TRAINING (See CAMA Local Land Use Plan Synopsis)

VI. Pertaining to Fill and Water Quality:

- A. Does the proposed project involve the placement of fill materials below mean high water? Yes  No
- B. 1. Will any runoff or discharge enter adjacent waters as a result of project activity or planned use of the area following project completion? Yes  No
- 2. Type of discharge RAIN WATER, WATER DRAINING OFF AMPHIBIOUS VEHICLES
- 3. Location of discharge ON RAMP

VII. Present rate of shoreline erosion (if known): UNKNOWN

VIII. List permit numbers and issue dates of previous Department of Army Corps of Engineers or State permits for work in project area, if applicable: N/A

IX. Length of time required to complete project: 4/6 MONTHS

X. In addition to the completed application form, the following items must be provided:

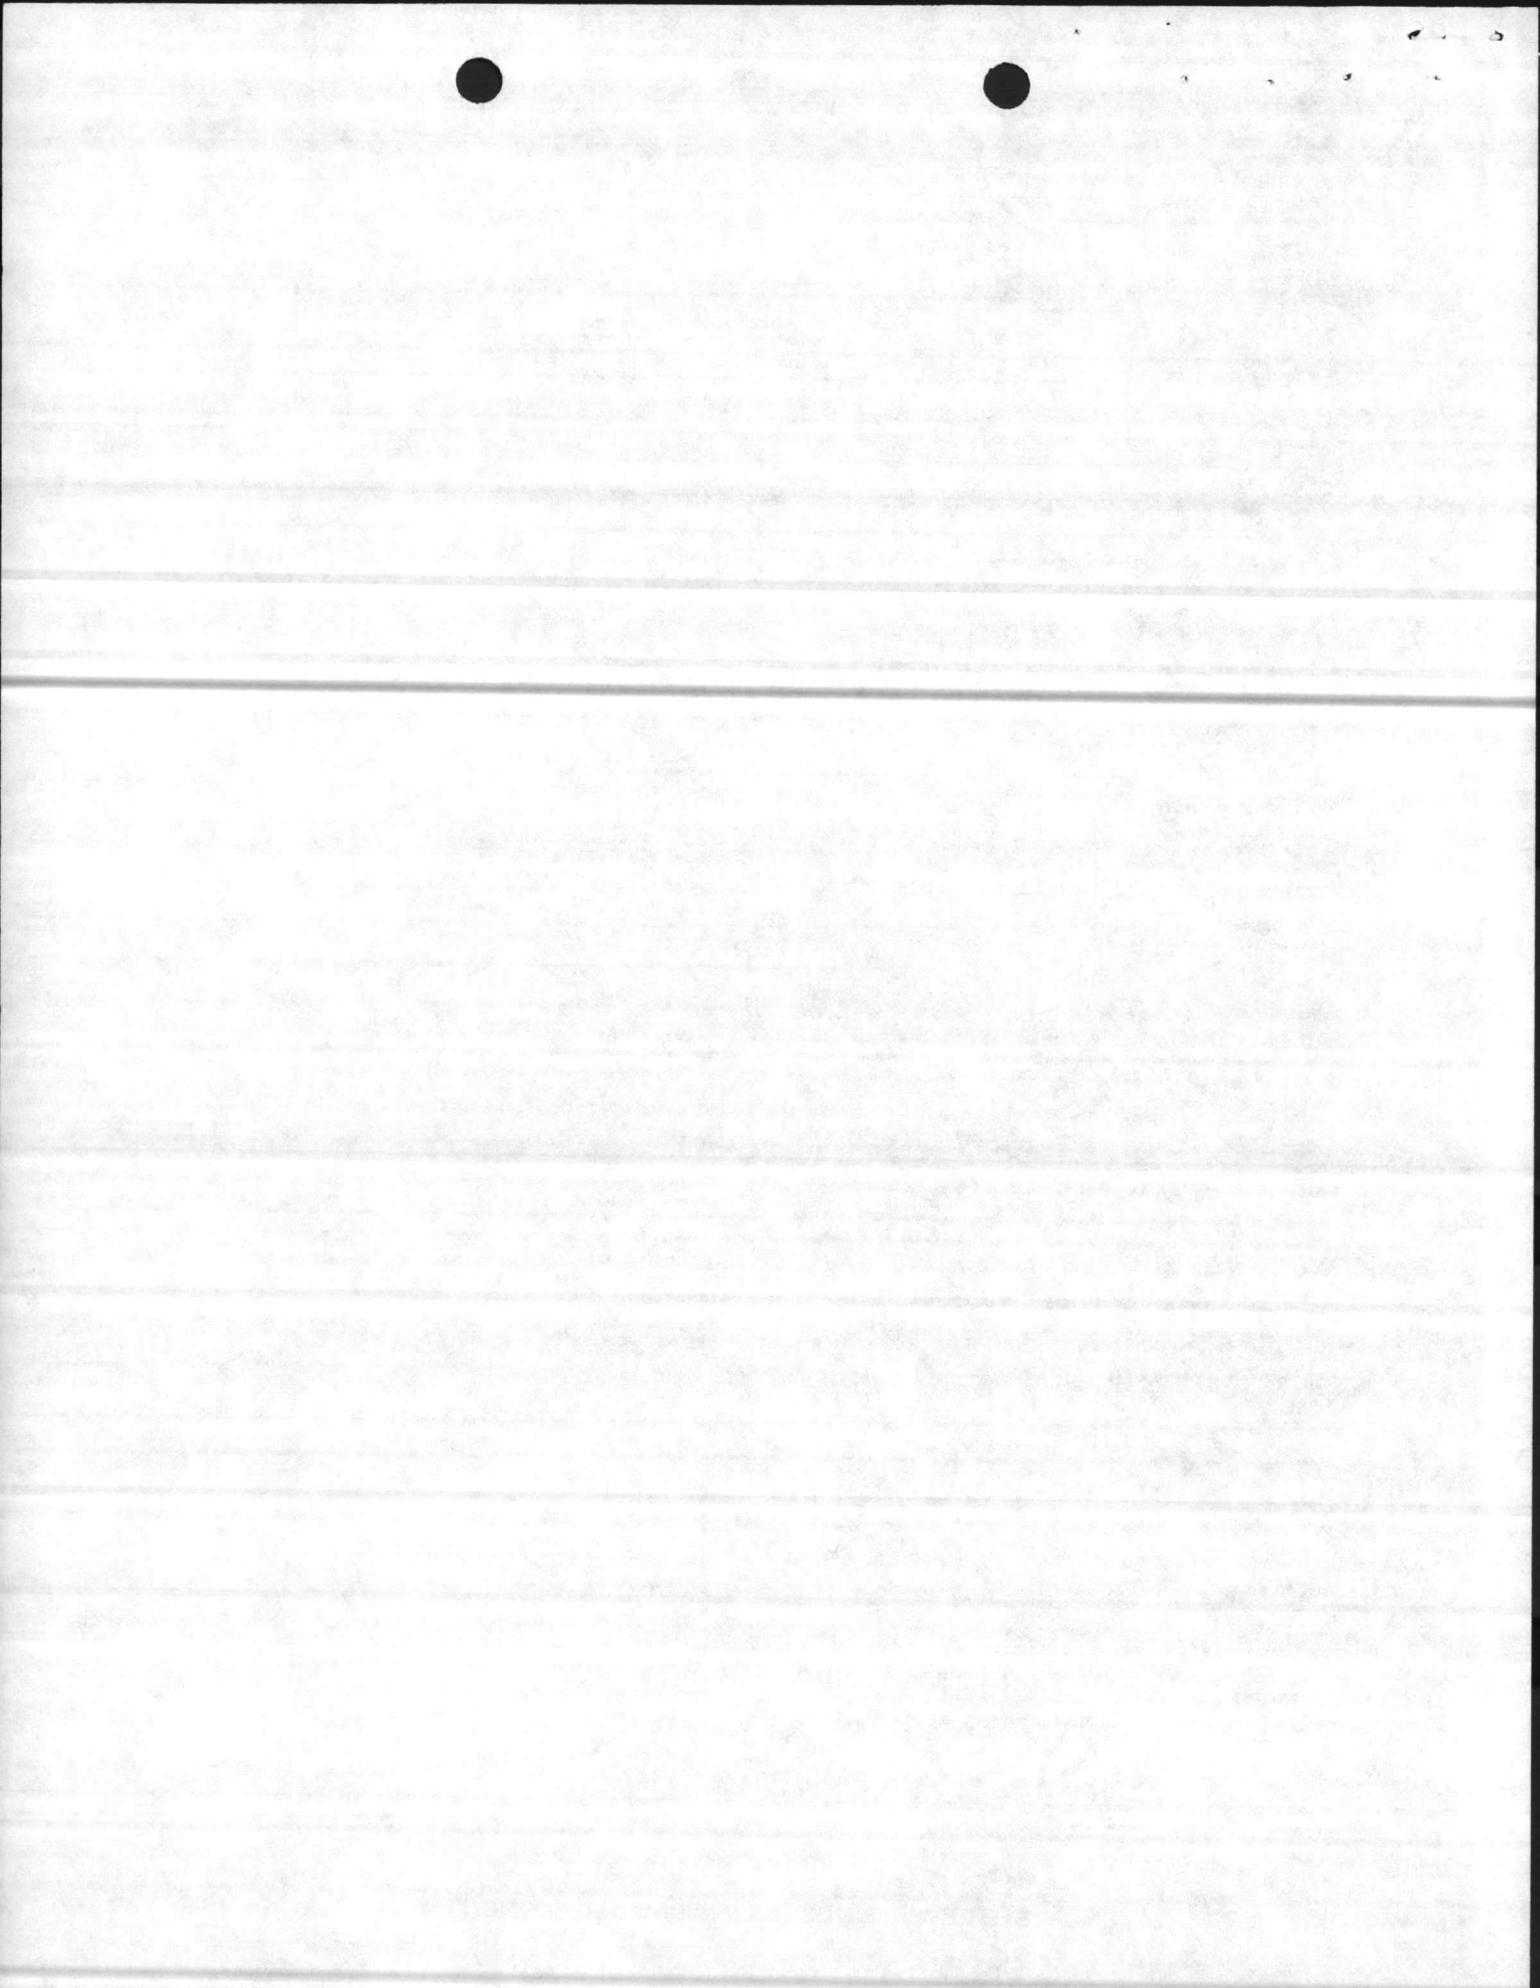

- A. Attach a copy of the deed (with State application only) or other instrument under which applicant claims title to the affected property. OR if applicant is not claiming to be the owner of said property, then forward a copy of the deed or other instrument under which the owner claims title plus written permission from the owner to carry out the project on his land. N/A
- B. Attach an accurate work plat drawn to scale on 8 1/2 X 11" white paper (see instruction booklet for details). Note: Original drawings preferred - only high quality copies accepted. SEE ENCLOSURE (1)
- C. A copy of the application and plat must be served upon adjacent riparian landowners by registered or certified mail or by publication (G.S. 113-229 (d)) Enter date served NOT REQUIRED FOR OVER 5 MILES
- D. List names and complete addresses of the riparian landowners with property adjoining applicant's. Such owners have 30 days in which to submit comments to agencies listed below.  
N/A

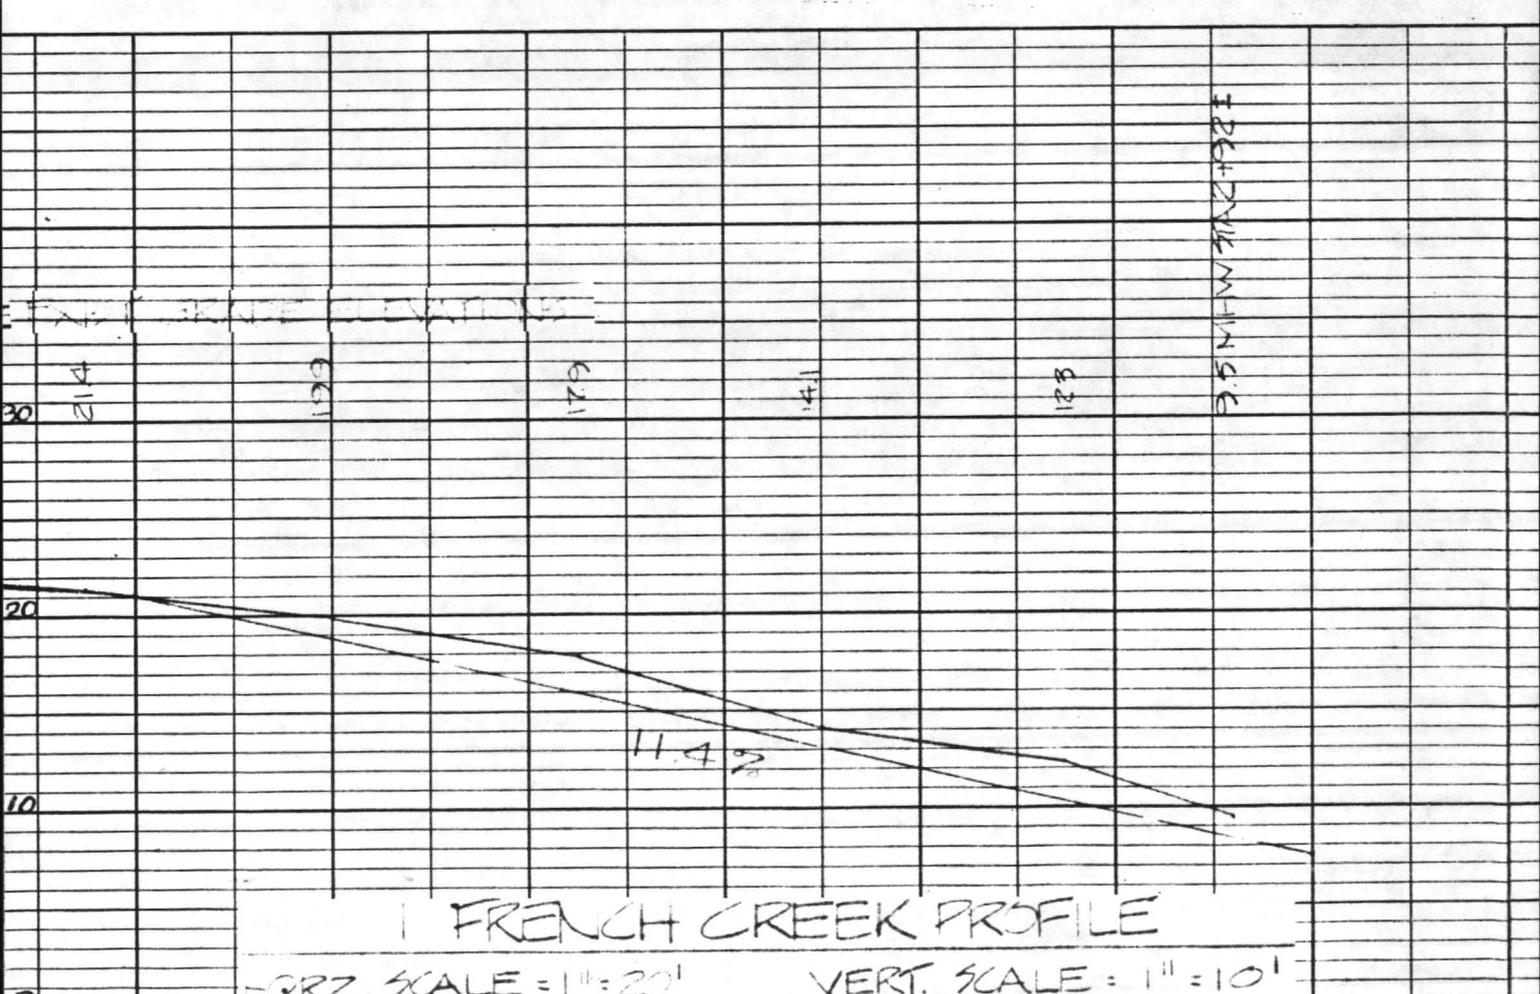

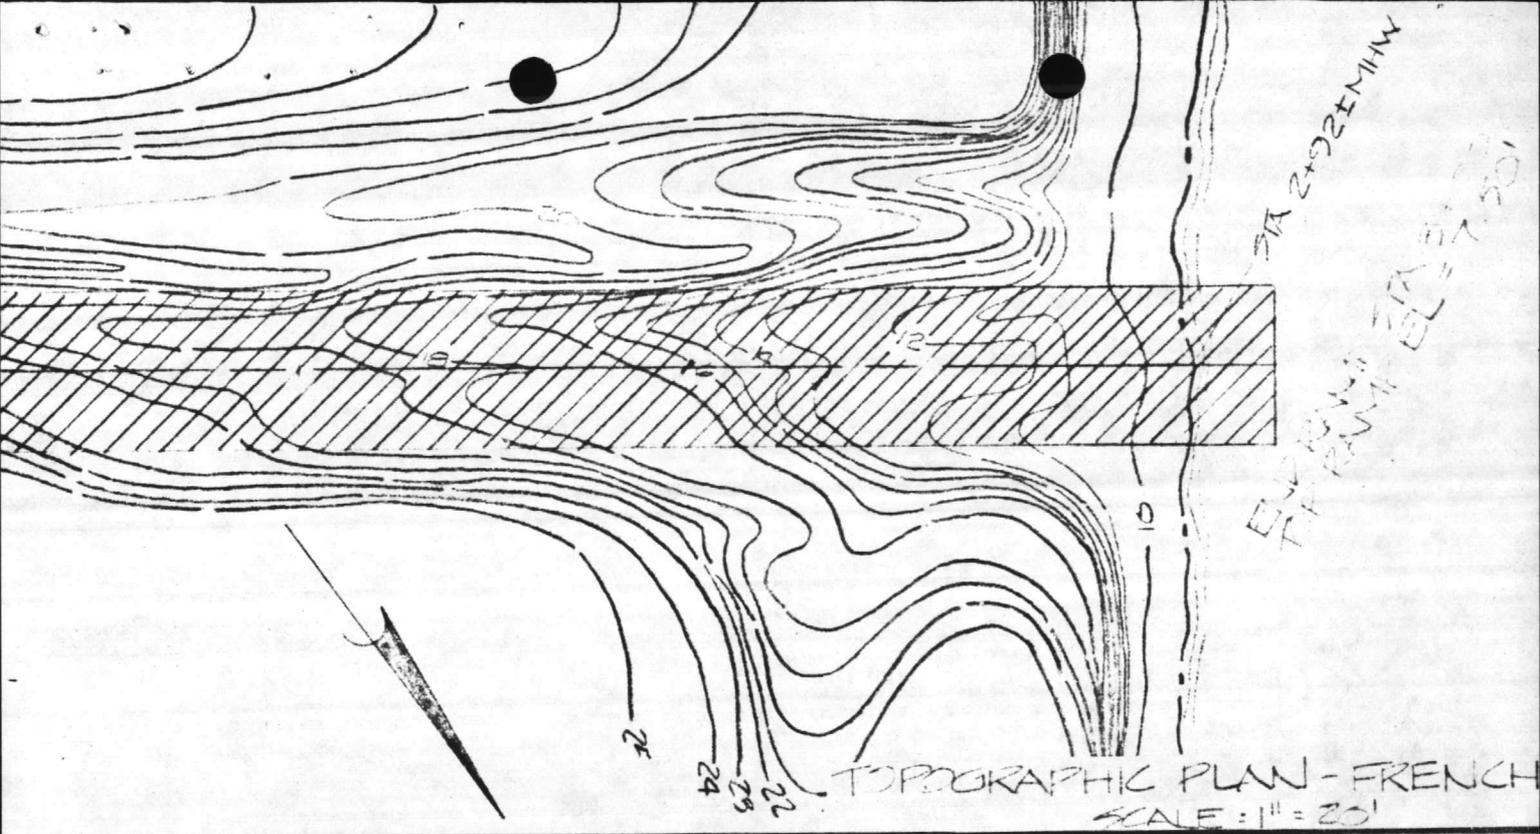

XI. Certification requirement: I certify that to the best of my knowledge, the proposed activity complies with the State of North Carolina's approved coastal management program and will be conducted in a manner consistent with such program.

XII. Any permit issued pursuant to this application will allow only the development described in this application and plat. Applicants should therefore describe in the application and plat all anticipated development activities, including construction, excavation, filling, and land clearing.
