

Memorandum

DATE: 14 Aug 86

FROM: Supply Officer, Support Battalion, Marine Corps Base, Camp Lejeune

TO: Distribution List

SUBJ: UPDATING CONDITION CODES/RETIREMENT YEARS FOR PLANT ACCOUNT PROPERTY

1. In accordance with the attached, it is requested a physical inventory of all plant account items be conducted and the condition codes/retirement years be updated. A listing of condition codes is attached.

2. It is requested the annotated copy of the attached listing be returned to this office no later than 19 September 1986.

IN REPLY REFER TO:
7100
LOG
28 Jul 1986

From: Commanding General, Marine Corps Base, Camp Lejeune
Subj: UPDATING CONDITION CODES/RETIREMENT YEARS FOR CLASS III
AND IV PLANT PROPERTY; REQUEST FOR
Ref: (a) MCO 7321.2
(b) BO P4400.5 Chapter XVI, para. 16000
Encl: (1) Plant Account Listing
(2) Definition of Condition Codes

1. Reference (a) requires this Headquarters to submit semi-annual listings of plant property to the Commandant of the Marine Corps for use in meeting budgetary requirements imposed by higher headquarters. In order to meet this requirement, certain plant property data, i.e., Condition Codes and Retirement Years, must be updated by the using activities.

2. The Retirement Year (replacement year) is based on the useful life of the item, therefore, it is necessary that during physical inspection of equipment the Retirement Year should be updated as well as the condition code. For example, if a Class III or IV item listed on enclosure (1) has a Retirement Year of 1986 and a current physical inspection of the item reveals it to still be in A4 condition (assuming the item was in A4 condition), it becomes apparent that although the Retirement Year has been exceeded there is still useful life remaining. Therefore it would be expected that the Retirement Year of the item would be advanced to 1987 at least.

3. In accordance with reference (b), it is requested that a physical inspection be made of the Class III and IV plant property listed on enclosure (1) and the condition codes and/or Retirement Years be updated as required. It is further requested that an annotated copy of enclosure (1) be returned directly to the Base Plant Account Office, Building 1005, Guard Mail stop 19, not later than 29 September 1986.

4. Enclosure (2) is a listing of Condition Code definitions and is provided to assist the addressee in determining the appropriate Condition Code to be assigned upon completion of the physical inspection.

DEFINITION OF CONDITION CODES

CODE

A	Serviceable (Issuable Without Qualification)	New, used, repaired or reconditioned materiel which is serviceable and issuable to all customers without limitation or restriction. Includes materiel with more than 6 months shelf life remaining. Includes only new and unused materiel for Clothing and Textile items. Also MILSTRIP, DOD 4140.17-M.
B	Serviceable (Issuable With Qualification)	New, used, repaired or reconditioned materiel which is serviceable and issuable for its intended purpose but which is restricted from issue to specific units, activities, or geographical areas by reason of its limited usefulness or short service life expectancy. Includes materiel with 3 through 6 months shelf life remaining.
C	Serviceable (Priority Issue)	Items which are serviceable and issuable to selected customers, but which must be issued before Supply Condition Code A and B materiel to avoid loss as a useable asset. Includes materiel with less than 3 months shelf life remaining.
D	Serviceable (Test/Modification)	Serviceable materiel, which requires test, alteration, modification, conversion or disassembly. This does not include items which must be inspected or tested immediately prior to issue.
E	Unserviceable (Limited Restoration)	Materiel which involves only limited expense or effort to restore to serviceable condition and which is accomplished in the storage activity where the stock is located.
F	Unserviceable (Reparable)	Economically reparable materiel which requires repair, overhaul, or reconditioning; includes reparable items which are radioactively contaminated. Also MILSTRAP, DOD 4140.17-M.
G	Unserviceable (Incomplete)	Materiel requiring additional parts or or components to complete the end item prior to issue. Also MILSTRIP, DOD 4140.17-M.
H	Unserviceable (Condemned)	Materiel which has been determined to unserviceable and does not meet repair criteria; includes condemned items which are radioactively contaminated.
J	Suspended (In Stock)	Materiel in stock which has been suspended from issue pending condition classification or analysis, where the true condition is not known.

Enclosure (2)

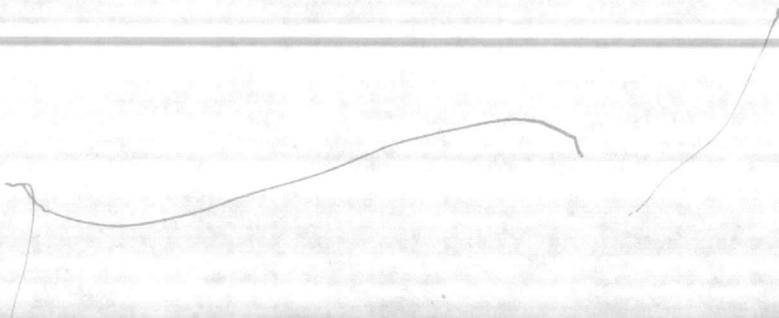

- K Suspended (Returns)** Materiel returned from customers or users and awaiting condition classification.
- L Suspended (Litigation)** Materiel held pending litigation or negotiation with contractors or common carriers.
- M Suspended (In Work)** Materiel identified on inventory control record but which has been turned over to a maintenance facility or contractor for processing.
- N Suspended (Ammunition Suitable for Emergency Combat use only)** Ammunition stocks suspended from issue except for emergency combat use.
- P Unserviceable** Materiel determined to be unserviceable, uneconomically repairable as a result of physical inspection, teardown, or engineering decision. Item contains serviceable components or assemblies to be reclaimed.
- Q Suspended (Quality Deficient Exhibits)** Quality deficient exhibits returned by customers/users as directed by the IMM due to technical deficiencies reported by Quality Deficiency Report. Exhibit requires technical or engineering analysis to determine cause of failure to perform in accordance with specifications. This code is used for intra-Air Force use only.
- R Suspended (Reclaimed Items Awaiting Condition Determination)** Materiel reclaimed by ICPs/IMMs from activities that do not have the capability to determine materiel condition (e.g., skills, manpower, or test equipment). Actual condition (serviceable or unserviceable repairable) will be determined at the repair facility and reported to the ICP/IMM prior to issue or repair. This code is for intra-Air Force use only.
- S Unserviceable (Scrap)** Materiel that has no value except for its materiel content. No stock will be recorded as on hand in Supply Condition Code S. This code is used only on transactions involving shipments to DPDOs. Materiel will not be transferred to Supply Condition Code S prior to turn-in to DPDOs if materiel is recorded in Supply Condition Code A through H at the time materiel is determined excess. Materiel identified by NSN will not be identified by this Supply Condition Code.

Enclosure (2)

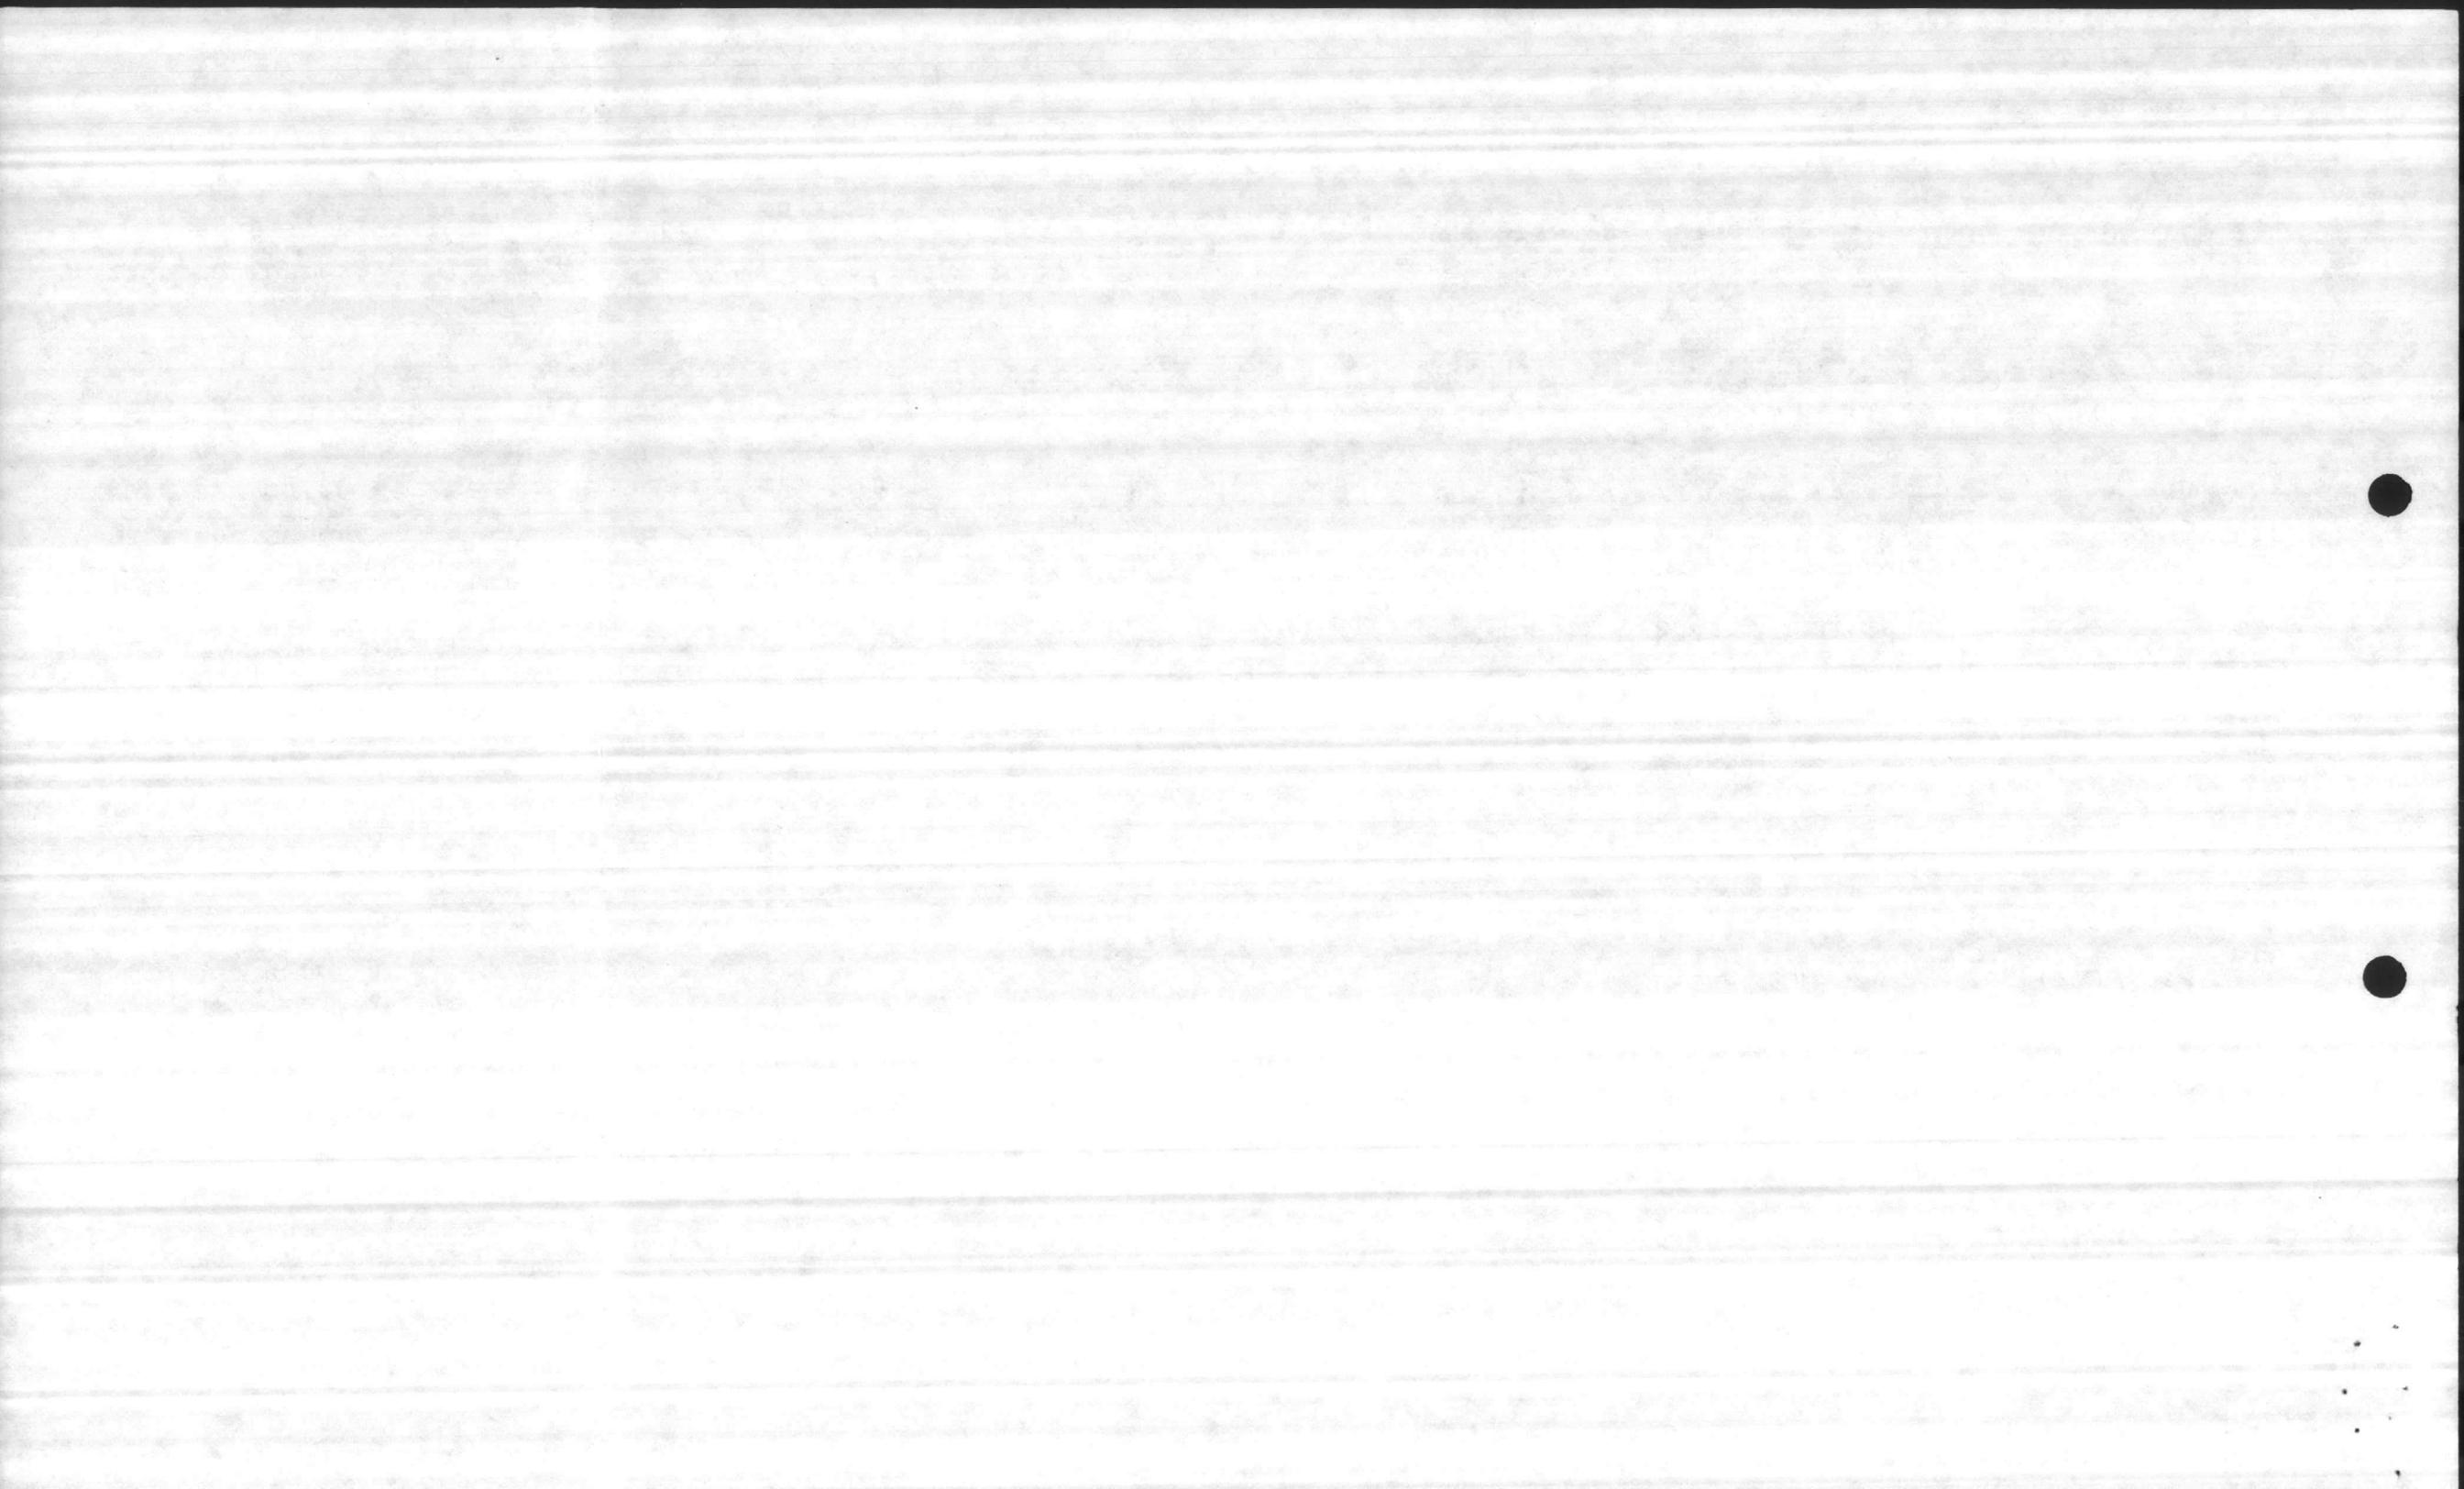

10

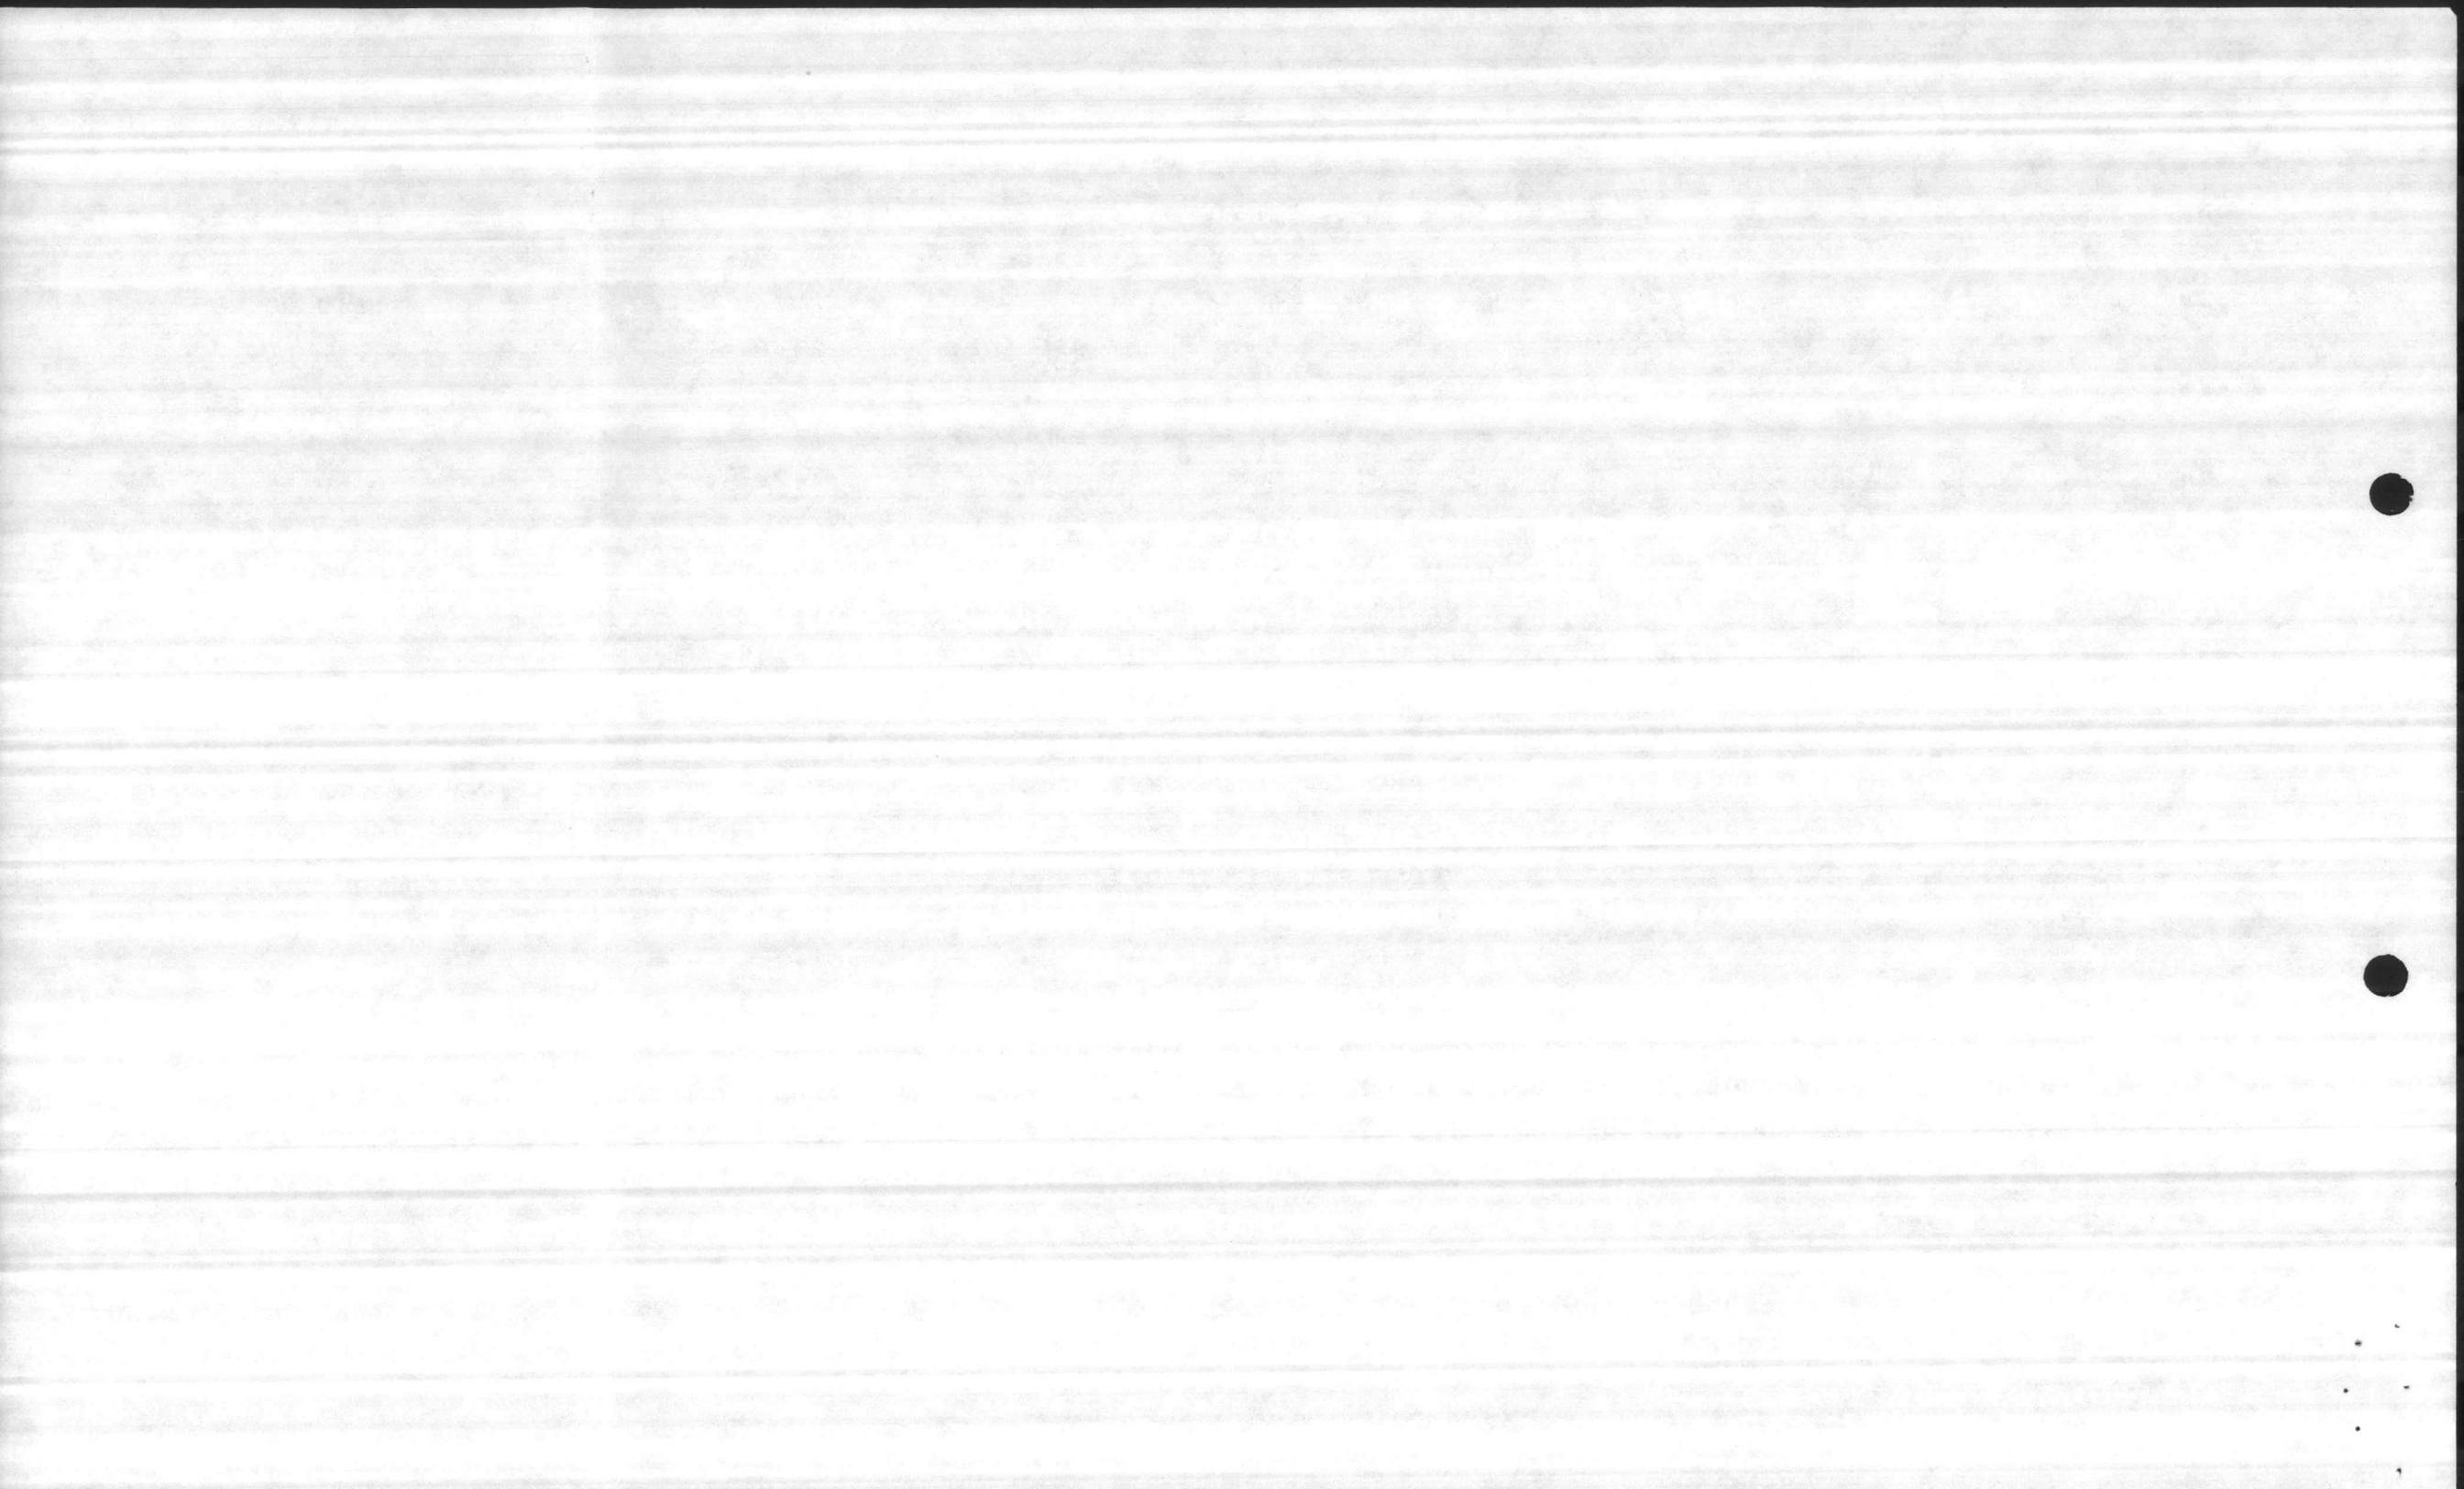

<u>CODE</u>	<u>TITLE</u>	<u>DEFINITION</u>
1	Unused - Good	Unused property that is usable without repairs and identical or interchangeable with new items from normal supply source.
2	Unused - Fair	Unused property that is usable without repairs, but is deteriorated or damaged to the extent that utility is somewhat impaired.
3	Unused - Poor	Unused property that is usable, without repairs, but is considerably deteriorated or damaged. Enough utility remains to classify the property better than salvage.
4	Used - Good	Used property that is usable without repairs and most of its useful life remains.
5	Used - Fair	Used property that is usable without repairs, but is somewhat worn or deteriorated and may soon require repairs.
6	Used - Poor	Used property that may be used without repairs, but is considerably worn or deteriorated to the degree that remaining utility is limited or major repairs will soon be required.
7	Repairs Required-Good	Required repairs are minor and should not exceed 10% of the standard price.
8	Repairs Required-Fair	Required repairs are considerable and are estimated to range from 16% to 40% of the standard price.
9	Repairs Required-Poor	Required repairs are major because the property is heavily damaged, worn, or deteriorated and are estimated to range from 41% to 65% of the standard price.
S	Scrap	Material has no value except for its basic material content.
X	Salvage	Property has some value in excess of its basic material content, but repair or rehabilitation to use for the originally intended purpose is clearly impractical. Repair for any use would exceed 65% of the standard price.
