SHAPE

DEPARTMENT OF THE NAVY

Memorandum

DATE: 6 November 1980

FROM: Ms. Betz, Q. C. Lab.

TO: Mr. Sharpe, Ecologist

SUBJ: Oak Grove

1. The 31 October sample showed the possibility of the water getting worse again. However, the next sample, on 4 November, showed no non-coliform anywhere. There was one coliform in the fence line sample. One is not considered a positive, it takes five colonies for the sample to be a positive sample. The one colony could have been due to the fact that the spigot is outside and or that the spigot is located in a poor drainage area and it rained a lot up there over the weekend.
2. PMU is still allowing the water to be used. However they are keeping a close eye on the situation. Mr. McCloskey went up to Oak Grove this morning to check on it. It is still just being sampled once a week. The next sample comes in on 12 November and the next report will be ready on 13 November.

6 November 1988

Ms. Bels, G. C. Lab.

Mr. Sharpe, Ecologist

Oak Grove

1. The 31 October sample showed the possibility of the water getting worse again. However, the next sample, on 4 November, showed no non-coliform anywhere. There was one coliform in the fence-line sample. One is not considered a positive, it has five colonies for the sample to be a positive sample. The one colony could have been due to the fact that the pipette is outside and/or that the pipette is located in a drainage area and it rained since we there over the weekend.
2. BMU is still allowing the water to be used. However they are keeping a close eye on the situation. Mr. McElwee went up to Oak Grove this morning to check on it. It is still just being sampled once a week. The next sample comes in on 12 November and the next report will be ready on 13 November.
