

FACILITIES DEPARTMENT

Short Term

GOAL

ENV-3

15 July 86
DATE

DIVISION/BRANCH/SECTION Soil water + Env Brand
NREAD

GOAL SPONSOR _____

GOAL: Evaluate procedures for ~~and~~
~~effectiveness~~ of potable ice quality
monitoring ~~programs~~.

BACKGROUND: NAVY personnel
PMU ~~are~~ currently collecting over 100 ice
samples per week from approx 200 ice machines in Facilities including
Food service. NREAD is performing BACT Analysis
which would cost a minimum of \$10.00^{each} if done
commercially. PMU is indicating going to 200 samples
per week (i.e. sample each machine/dispenser weekly). NREAD manpower
resources are currently strained. Naval Hospital has
personnel qualified to do analysis. Also, potential for
focusing on problem sites with education/enforcement could
reduce frequency. ^{Need for} Weekly sampling of each machine is questionable.

MILESTONES:

DATE

ACTION

1 sept 86

Supervising Chemist determine PMU FY87
requirements for laboratory support.

15 sept 86

NREAD consult with various public
Health Agencies on ice monitoring Procedures

1 oct 86

Supervising Chemist Brief AC/S Facilities
of NREAD recommendations

15 Oct 86

Consultation with
~~PMU~~ Preventive Medicine Office

1 Nov 86

Implement Program Changes (if any)
