Gentlemen:

Your inquiry of 23 May 1979 to the Naval Regional Medical Center relative to Safe Drinking Water Act analysis has been referred to this Department for response. The Base Quality Control Laboratory, Base Maintenance Department, has interim certification from the Environmental Protection Agency to perform certain in-house potable water analysis as required by the Safe Drinking Water Act. However, Marine Corps Base does not test water for other activities even though the base is on the Environmental Protection Agency approved list.

For details on the Safe Drinking Water Act, it is suggested that you contact Mr. Charles E. Rundgren, Head, Water Supply Branch, Sanitary Engineering Section, Department of Human Resources, Division of Health Services, Raleigh, North Carolina, telephone (919) 733-2321.

Sincerely,

T. R. BAISLEY
Lt Colonel, U. S. Marine Corps
Base Maintenance Officer
By direction of the Commanding General

Naval Regional Medical Center
Preventive Medicine Service
Camp Lejeune, North Carolina

Gentlemen:

We own a small public utility approved water system serving 21 homes and known as the "Skyland Drive Water System". We have been advised that your Center is approved by EPA for North Carolina requirements for testing of Inorganic chemicals, Organic chemicals, and Radionuclide. Please advise if you are able to supply a container for a water sample and also price for these tests, and whether or not we could receive results by June 24, 1979 if samples were shipped promptly.

If you are not able to provide a container, please advise what quantity of water you would require and if there are any specific requirements for the container.

Yours very truly,

WITTEN SUPPLY COMPANY, INC.
