PAB 4632655

The following table shows the results of the experiment conducted on the 15th of June 1954. The data was collected from the measurements of the rate of change of the magnetic field of the Earth. The results are given in the following table.

Time (min)	Rate of change of magnetic field (gauss/min)
0	0.00
10	0.01
20	0.02
30	0.03
40	0.04
50	0.05
60	0.06
70	0.07
80	0.08
90	0.09
100	0.10

The results show that the rate of change of the magnetic field of the Earth is increasing steadily over time. This is in agreement with the theory that the magnetic field of the Earth is generated by the rotation of the Earth.
