| REMARKS<br><br>Site approved by Base Commander under MCO P11000.12c.<br><br>*This site was disapproved on 22 Dec 86, due to contaminated material being buried on site. Per telcon with Mr. Bob Alexander, Base Environmental Engineer on 5 Jan 87, it was determined that this site could still be utilized by placing the proposed site in an area of the site that is not contaminated. LANTDIV will conduct selected soil boring tests to ensure that the contaminated area is not disturbed during construction. |  |  |
