PREFORMED Guy Guard can be used where anchor guys are exposed to pedestrian or vehicular traffic. Guy Guard offers these advantages:

1. O.D. of applied dead-ends is not a factor in product selection;
2. Wide combination of strands (range $\frac{3}{16}$ "- $\frac{1}{2}$ ") can be accommodated by one size Guy Guard;
3. Installed quickly without bolts or metal parts. Covers the guy all around.

COLOR: Choice of two colors: Yellow for commercial areas; and grey for industrial areas.

MATERIAL: High impact polyvinyl chloride plastic retains good physical characteristics, within a range of extreme temperatures that are self-extinguishing when exposed to fire. **PVC**

PREFORMED Reflective Plastic Guy Guard offers all the exclusive features of Guy Guard, plus the addition of a treated area which projects a bright reflection of any light that touches its surface.

Standard

Catalog Number	Length	Color Code	Units	Wt./Lbs.
			Per Carton

PREFORMED LINE PRODUCTS POLY GUY GUARDS

Page 04025

The tubular body of this ^{Polyethylene} Guy Guard is made of polyethylene which provides improved weathering and low temperature characteristics.

The pigtail continues to be PVC because the spring-like characteristics of this material is desirable for the helix. The pigtail is riveted to a poly tab extending from the tube. The increased flexibility of the polyethylene tab is a benefit during installation, particularly on cold days.

The bottom of this guy marker has a strap, which makes it difficult for vandals to pull or twist off, once the snap is pushed into the strap.

PREFORMED Reflective Plastic Guy Guard offers all the exclusive features of Guy Guard, plus the addition of a treated area which project a bright reflection of any light that touches its surface.
