Re: Electronics/Communications Maintenance Shop  
FY 89 MCON Project P-229, MCB, Camp Lejeune, NC

Dear Bob:

With reference to our conversation, this letter will authorize you to provide three (3) asbestos tests at the steam manhole No. 1044. This steam manhole is located near the north end of Building 1340, as shown on the enclosed sketch. Tests should include two (2) elbows and one (1) fitting.

In addition to asbestos testing, you are also to certify the manhole as "gas-free." In the unlikely event that you encounter any water or electrical items in the manhole, please contact Mr. Donald Sutherland, Base Utilities, MCB, Camp Lejeune, 919/451-5161.

Prior to starting work, please notify Ms. Karen Foskey, Public Works Planning, MCB, Camp Lejeune, 919/451-1833 to advise her of your intended schedule.

We look forward to your proceeding with this project as soon as possible and to receiving the results of your tests. If you have any questions, please let me know.

Sincerely,

Jeffrey A. Huberman, AIA
