IN REPLY REFER TO

28 February 1986

SUBJECT: MCAS New River Marina

Commanding General
Marine Corps Base
ATTN: Assistant Chief of Staff,
Facilities
Camp Lejeune, NC 28542

1. On 24 February 1986 Mr. Robert Alexander, Environmental Engineer and Mr. Richard G. Deuto, manager of the MCAS New River Marina met with Mr. Hugh Heine of my staff regarding plans to build up the beach area off the New River at the MCAS New River Marina in Camp Lejeune, Onslow County, North Carolina.
2. During this on-site meeting, we were informed that the fill material, which will be trucked to the site from an upland borrow area, is to be placed no closer than 20 feet from the mean high water (MHW) contour. Therefore, since no fill material is to be placed in any waters or wetlands of the river, Federal permits will not be required. However, care should be taken that no fill material is placed, pushed, or allowed to erode into any waters or wetlands of the New River.
3. If you have any further questions or comments, please contact Mr. Hugh Heine at telephone (919) 343-4725 or FTS 671-4725.
