DEPARTMENT OF THE NAVY

# Memorandum

DATE: 11 February 1982

FROM: Ms. Betz, Quality Control Lab., Environmental Section, NREAB, BMaintDiv

TO: Mr. Sharpe, Supervisory Ecologist, Environmental Section, NREAB, BMaintDiv

SUBJ: Total Trihalomethane Testing

1. The last samples for TTHM monitoring were taken in September for the Hadnot Point and Marine Corps Air Station systems. Therefore, we have received all the results from LantDiv on these two systems.

2. Samples for TTHM monitoring were not taken in November for the Rifle Range System, because the Army did not send any sample containers, since their instruments were down and they were back logged. Samples were taken in December and January at the Rifle Range, but the results have not yet been received. January's samples were not taken until the 28th so LantDiv may not even have the results yet.

Elizabeth A. Betz  
Supervisory Chemist
