Dear Sir:

In accordance with the new Total Coliform regulations a sample siting plan is enclosed for each of the six water treatment systems aboard the Camp Lejeune complex. Each sample siting plan consists of the State cover sheet, a list of the sample locations, directory with descriptions, and portions of the Base maps pertaining to that system. The map sheets have the sample locations highlighted in yellow and the location code number in red. The maps are dated 31 July 1984 therefore not all new facilities are present. New facilities that are sample locations have been added.

The point of contact on this matter is Elizabeth Betz, Supervisory Chemist, Environmental Quality Monitoring Branch, Environmental Management Department, telephone (919) 451-2471

DANNY D. SHARPE
Director, Hazardous Waste &
Pollution Control Division
Environmental Management Department
By direction of the
Commanding General
