Ms. Carole Aloisio
Office of Assistant Administrator
Agency for Toxic Substances
and Disease Registry
Mail Stop E-56
1600 Clifton Road
Atlanta, Georgia 30333

Dear Ms. Aloisio:

This is in response to your September 2, 1994, letter to the Naval Environmental Health Center concerning documents needed to assist the Agency for Toxic Substances and Disease Registry (ATSDR) with its Public Health Assessment research. Prior to receipt of this letter, we were of the opinion that we had cooperated in every way possible to accommodate your requests for information. In the future, if you feel Marine Corps Base (MCB), Camp Lejeune is not adequately supporting your efforts, please contact us directly so that we may insure that necessary information is provided.

The Administrative Record Index for MCB, Camp Lejeune is attached as enclosure (1). Please denote in this document which items you desire, and return it to allow us to forward the necessary material to you. ATSDR has been added to the Technical Review Committee, thereby allowing you to receive future draft final and final documents related to hazardous waste site remediation. Also provided, in enclosure (2), are the responses to ATSDR's personnel questionnaire. We trust enclosures (1) and (2) will provide you the opportunity to fill any information gaps needed to ensure a quality Public Health Assessment.

Although the Installation Restoration Division has been providing ATSDR with information concerning lead contaminated drinking water, it is important to note that the source is a result of solder in the distribution system, as opposed to hazardous waste sites.

If you have any concerns or questions, please contact Mr. Neal Paul, Director, Installation Restoration Division, Environmental Management Department, at telephone (910) 451-5068.

Sincerely,

ROBERT L. WARREN
Assistant Chief of Staff
Environmental Management
By direction of
the Commanding General
