GARY, NEAL-

DO YOU HAVE ANY INFO ON THE WELL NO. 652 (LOCATED ON LYMAN ROAD)? IT IS ON A CONTRACT TO REMOVE, AND MACK FRAZELLE SAYS IT IS A GOOD WELL, CURRENTLY PRODUCING WATER.

Mick,

Thanks for the quick return on the info. Current NC regs require that well abandonment be documented by filing an abandonment report with the state. I assume that this was the case in the late 80's. So, the question is, was an abandonment report ever filed? If so, then we have no problem, we just refer to that abandonment report in DEHNR's permanent files. If not, I am afraid that we may have a problem since the Wilmington folks have been sticklers about this issue lately.

Raw water well A-5 was abandoned during the late 1980's when the new elevated tank was constructed in that area. Mack

Mack,
I have a conference call at 13:00 and need some sort of status on the supply well nearest to Courthouse Bay. I think it is A-5. I'd like to know if it active, inactive, closed, or abandoned. Depending on its status, we would have to treat a nearby contaminated site accordingly. Thank you for any insight you may be able to provide.
