Cott,
I'm not sure where the media interest is originating and we are attempting
to get a copy of last night's news from PAO. ABC Cleaners is a Superfund
site in which groundwater contaminated with TCE migrated onto MCB CL
property. As a result, supply wells in the TT area have been permanently
closed since 1984. This site is managed by EPA Region 4, Atlanta, GA and
the Program Manager is Luis Flores @ 404-562-8807. He can answer questions
re site status and cleanup schedule.
/R,
Neal
