I MUST HAVE MISSED YOUR STATEMENT CONCERNING MARCH 2 COB. YOUR
EMAIL TO ME STATED FEB 24 COB. IRD WILL PREPARE RESPONSE AND NEVER
INTENDED ON GIVING YOU THE IMPRESSION THAT IT WAS YOUR
RESPONSIBILITY.
V/R,
NEAL

As stated earlier, the subject items should be ready for you by COB 2 March 1994
. I had not planned on preparing the response, I
figured you would do that. I had just planned on providing your
office with the requested documents.

BETSY,
I NEED TO CALL ATSDR AND GIVE THEM A TENTATIVE DATE THAT WE CAN
PROVIDE THE REQUESTED INFO. DO YOU KNOW WHEN SUBJECT INFO CAN BE
PROVIDED?
THANKS,
NEAL

----- [Original Message] -----

Please note I received the 4 Feb 1994 letter yesterday afternoon. I should be
able to compile the requested data that was maintained in the laboratory within
two weeks from yesterday. The first item requested is no problem. The other
two items involve alot of data reports, all at least seven years old, well past
the Navy's required years of retention.

Please note that this laboratory did not get involve with VOC analysis, except
for the one time analysis discussed in item (1), until after November 1984.
Therefore, the initial part of the monitoring data requested in item (3) was
done under the NACIP program and if the original or copies of the laboratory
data reports were maintained it would either be in your files or LANTDIV's. I
trust your shop will hunt them down.

By close of business on 24 February 1994, I should be able to provide at list of what reports are down here in the laboratory files.
